Establishment of the minimum marbling requirement for Choice at different points was the basis for several of the alternative grading systems considered. Setting the minimum marbling requirement for Choice at the midpoint (50 percent or "typical slight") of the slight degree appears to be the preferable alternative of those that would reduce the marbling requirements for Choice. The average palatability of Choice under this alternative was not significantly lower than that of the present Choice grade whereas including all of slight in Choice did result in a significantly lower palatability. This alternative would also avoid problems associated with the recommended requirements for fat thickness and fat color. Based on previously collected data, it was estimated that under present feeding practices about 20 percent of the beef with slight marbling would fail to qualify for Choice if a minimum fat thickness of 0.3 inch were required. On the same basis it was estimated that 25–35 percent of the beef with slight marbling would be below the midpoint slight requirement. These factors indicated that requiring typical slight marbling in A maturity for Choice would provide beef with slightly lower, although not significantly different, palatability than beef currently graded Choice (Table 2) and result in only a slightly lower percentage of cattle

qualifying for Choice than would the various recommendations for decreasing the marbling requirements for the Choice grade. This proposal should allow feeders an opportunity to produce leaner cattle more efficiently and provide greater marketing flexibility while avoiding the application problems associated with fat thickness and color requirements. Further, it should provide consumers with Choice beef which closely maintains the palatability levels associated with the present Choice grade.

Several groups proposed that all beef in A and B maturities that failed to meet the minimum requirements for Choice should be graded Good. They contended that this would give consumers a supply of a leaner, less costly alternative grade of beef which, because of its youthfulness, would still be fairly acceptable in palatability. Analysis of the palatability data, however, indicated that the palatability of beef that was practically devoid of marbling was of borderline acceptability in A maturity and generally unacceptable in all other maturity groups. Therefore, it was determined that in order to qualify for the Good grade, beef should have at least minimum traces of marbling. In the 1975 beef grade revision the Good grade was narrowed in the hope that it would be used to identify fed beef of acceptable palatability that lacked the marbling needed to qualify for Choice. By increasing the minimum requirements for Good, most of the lightweight beef that had previously been marketed as Good in some areas of the country was excluded from the grade. The intended use of the Good grade to identify heavier beef with slight marbling did not materialize. Lowering the minimum marbling requirement for Good to traces would return this grade to essentially where it was before the 1975 changes, and it could once again be used to identify lightweight beef. These proposed changes would result in a grade which, although it is significantly lower in palatability than the present Good grade (Table 2), still excludes the least desirable youthful beef and provides an adequate supply of an acceptable and leaner alternative to Choice with less variation in palatability within the grade than the alternatives which were proposed to the Department.

It is proposed that the Standard grade be eliminated and that all carcasses which fail to meet the minimum quality requirements for the Good grade be graded Utility. The palatability of those carcasses that would fail to meet the proposed Good requirements would be essentially equal to or lower than that of beef in C maturity that qualifies for Utility. Although it is recognized that these are youthful carcasses, it does not appear that there would be sufficient numbers to justify a separate grade to identify maturity but not palatability differences.

The principle of requiring the same minimum amount of marbling for each grade throughout A maturity was adopted in 1975. This principle is based on the concept that within this very young age category increases in marbling are not necessary to offset increases in maturity. The change was based on the best research available at that time and has since been supported by additional research, including the 1975 USDA study. Under the present standards, increased marbling is required to offset increases in maturity beyond A maturity. For each grade the marbling requirement increases one full degree across the width of B maturity. While the flat line marbling requirements in A maturity have been supported by recent research, the USDA data indicated that an increase of one marbling degree in B maturity was not sufficient to offset the decreased palatability associated with more advanced maturity, especially in conjunction with the reduced marbling requirements proposed in A maturity. For example, in Table 1 the palatability score for moderate marbling in A maturity is 5.93. To achieve a similar score in B maturity requires an increase in marbling to moderately abundant. Analysis indicated that the carcasses in the oldest third of B maturity were especially lower and more variable in palatability. Thus it was determined that across the width of B maturity an increase of two degrees of marbling should be required in order to maintain palatability essentially equivalent to that of A maturity in each grade. It is recognized that only a very small percentage of the cattle marketed fall into this maturity group. However, the additional increase in marbling requirements in B maturity will help to assure that the palatability levels associated with Prime, Choice, and Good are maintained.

In 1973, the official standards were revised to provide quality grades for beef from young bulls. Interest in such grades stemmed primarily from earlier research which showed that young bulls were superior to steers in efficiency and rate of feedlot gain and from a belief by many that requiring such beef to be identified as "Bull" was a deterrent to its acceptance. Research comparing the palatability of beef from steers with beef from young bulls has generally shown that, on the average, steer beef is slightly more palatable and is less variable in palatability than beef from young bulls. Therefore, the bullock class designation has been required as part of the official grade designation when this beef is officially graded. Since the requirements for the various grades of bullock beef have been the same as the requirements for the same grades of steer, heifer, and cow beef, it is proposed that the quality grade requirements for bullock carcasses be changed to be the same as those proposed for steer, heifer, and cow carcasses in A maturity (Figure D). Bullock beef, can be produced efficiently and provides a leaner product which consumers desire. This change should allow slightly more bullock beef to qualify for Prime and Choice and yet have little or no effect on the palatability of bullock beef in either grade.

In brief, the official U.S. standards for quality grades of carcass beef would be revised as follows: (1) The minimum amount of marbling required for steer, heifer, and cow beef in A maturity to quality for Prime, Choice, and Good would be reduced to minimum moderate, typical slight, and minimum traces, respectively; (2) An increase of two degrees of marbling would be required to offset increases in maturity across the width of B maturity; (3) Beef in A and B maturities failing to meet the minimum requirements for Good would be graded Utility; and (4) The quality grade requirements for bullock beef would be changed to be the same as those proposed for steer, heifer, and cow beef in A maturity. The relationship between marbling, maturity, and carcass quality grade for the present and proposed standards is shown, respectively, in Figure A and Figure D. Also, a comparison of the palatabilities of the present and proposed grades is shown in Table 2.

Yield Grade Standards

Among the grade changes implemented in 1975 was the requirement that all beef graded be indentified for both quality grade and yield grade. When the yield grades were adopted in 1965, the user of the grading service had the option of identifying beef for quality grade only, yield grade only, or both quality grade and yield grade. Meat packers, who opposed the change in 1975, have cited various problems with the current requirements and petitioned the Department to return to the previous requirements, allowing users the option of identifying quality grades, yield grades, or both.

The basic position of meat packers on yield grading was presented in a letter from the American Meat Institute (AMI) to the USDA on June 3, 1981. The AMI recommendations included: "1. Assignment of yield grades for beef carcasses should be returned to a voluntary option for users of the service. 2. Revise yield grade formula to allow removal of kidney, pelvic, and heart fat from the hot carcass. 3. Make allowances in the standards for other fats to be trimmed from the hot carcass prior to yield grading."

A major reason cited for wanting to return to optional yield grading is that the present regulation prevents meat packers from trimming excess external fat and kidney fat from beef carcasses. The packers contend that removal of such fat at the time of slaughter would result in significant savings of energy required for chilling fat and of labor for removing chilled fat. Fat removed at the time of slaughter would also likely have a higher salvage value than fat removed later. The current standards do allow removal of kidney, pelvic, and heart (KPH) fat prior to grading and actually encourage such a practice by reflecting the lower total fatness in the yield grade assigned. However, carcasses graded after KPH fat removal do have the grade indentification applied differently to allow them to be distinguished from carcasses graded with KPH fat intact, because KPH fat removal affects the relative yields between hindquarters and forequarters.

Removal of external fat prior to grading has not been allowed, despite the benefits, because of the potential effect of such trimming on the ability of graders to evaluate trimmed carcasses properly and the effect of trimming on the accuracy of yield grades in reflecting carcass yields. In the determination of yield grades, KPH fat is evaluated independently of external fat and relates directly to the amount of fat observed in specific places in the carcass. Thus, the amount of KPH fat present is easier to discern than the amount of external fat. External fat evaluation is based on a measured thickness of fat at a specific point and is largely dependent upon a constant relationship between that measurement and the amount of fat on other parts of the carcass. Trimming of fat would alter these relationships and could affect the accuracy of the yield grades as measures of carcass yields. Unless graders can be trained to recognize and account for fat variation due to trimming it will not be possible to grade trimmed carcasses accurately. Since no information has been available to ascertain whether graders can accurately evaluate trimmed carcasses, a study was recently initiated by USDA to provide such information. Analysis of the data is underway, and preliminary results indicate that further study may be necessary. However, final results of the study are not yet available.

The AMI also addressed the voluntary nature of grading, claiming that the current grade requirements amount to "mandatory yield grading" and are contrary to the intent of the Agricultural Marketing Act of 1946. Under the Agricultural Marketing Act of 1946, the Secretary of Agriculture is directed and authorized to develop and improve standards of quality, condition, quantity, grading, and packaging, and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices. The Act specifically provides that no one is required to use the services, but that the Secretary has the authority to determine what the grade shall consist of if the grading service is used. In the case of beef, both quality and yield designations are considered to be integral parts of the grade and must be identified when beef is graded.

Between 1965 and 1975 yield grades came to be widely recognized as reliable indicators of an important value determining consideration (the expected yield of trimmed retail cuts to be derived from a carcass). Also, by 1975 a large amount of beef, including most of that which qualified for Yield Grades 1, 2, and 3, was voluntarily being identified for yield grade. Thus, the main effect of the 1975 change was to require identification of yield grades on graded carcasses in Yield Grades 4 and 5.

Prior to the 1975 grade changes, meat packers were among the leaders in calling for revisions of the beef quality grade standards. Among the changes they advocated was the elimination of conformation as a quality grade factor. Research had established that comformation made little or no contribution to the prediction of palatability, but it was believed that conformation was related to carcass cutability and was, therefore, a useful value determining consideration when beef was not yield graded. It was recognized, however, that the yield grades could do a much better job of reflecting cutability than could conformation. Thus, it was felt in 1975 that the identification or yield grade plus quality grade was a much better reflection of true carcass value than identifcation of only a quality grade that included conformation or only a yield grade.

By 1975 many beef purchasers had come to recognize the value of yield grades and frequently specified that beef they received be Yield Grade 3 or better. Thus discounts developed for beef in Yield Grades 4 and 5 and small premiums were sometimes paid for Yield Grades 1 and 2. Cattle producers were also interested in having all beef identified for yield grade in hopes that the true value differences between grades would be reflected through the marketing channels. They felt that this should encourage the production of leaner beef, which they believed consumers wanted.

Prior to 1975, the discounts for Yield Grades 4 and 5 beef, were much less than estimated value differences; since 1975, they have increased to often equal or even exceed the expected value differences. However, the premiums paid for Yield Grades 1 and 2 have not increased accordingly. It is unlikely that these price spreads would be altered significantly if beef were again allowed to be identified for quality grade only. Most large volume beef purchasers recognize the value of yield grades and would probably continue to insist on beef graded Yield Grade 3 or better. From past experience, they would assume that any beef not identified for yield grade would be in Yield Grades 4 and 5, and they would refuse to accept it or would accept it only at a discount. It is this segment of the beef population (Yield Grades 4 and 5) that packers contend can be merchandized more effectively without yield grades. The Department is concerned that the optional use of yield grading would cause the grades to be less descriptive on the important factor of carcass yield, and might work to the disadvantage of some small-volume purchasers who were unaware of the regulations regarding grading.

There are several arguments for returning the option of having graded beef identified for yield grade to the users of the grading service. The potential benefits of external fat trimming, which is currently prohibited if the beef is to be graded, are especially strong in this regard. However, the Department believes that the benefits of universal identification of graded beef for yield grade still outweigh these considerations. The Department will continue to seek ways to grade carcasses accurately that have had external fat trimmed. Consideration will also be given to other suggested changes in the yield grades. These include: (1) Requiring KPH fat removal prior to grading or changing the evaluation of KPH fat, (2) Revising the basic yield

grade equation, (3) Reducing the number of yield grade factors or using new yield grade factors, and (4) Changing the number of yield grades used. At this time no changes are being proposed for the beef carcass yield grade standards.

The standards for grades of slaughter cattle, which are based on the beef carcass grade standards, would be revised to reflect the changes proposed for the beef carcass grade standards.

For the reasons outlined, it is proposed that certain sections of the regulations and standards appearing at 7 CFR Part 2853 (formerly Part 53) as they relate to meats, prepared meats, and meat products, and certain sections of the regulations and standards appearing at 7 CFR Part 53 as they relate to livestock, be revised as set forth below.

PART 2853—MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

1. The authority citation for Part 2853 reads as follows:

Authority: Agricultural Marketing Act of 1946, sec. 203, 205, as amended; 60 Stat. 1087, 1090, as amended (7 U.S.C. 1622 and 1624)

2. 7 CFR 2853.102–2853.107 are revised to read as follows:

Note.—In this document, new or revised text is enclosed by arrows (► ◄). This proposed revision of the subpart also corrects typographical errors.

Carcass Beef

§ 2853.102 Scope.

These standards for grades of beef are written primarily in terms of carcasses. However, they also are applicable to the grading of sides. To simplify phrasing of the standards, the words "carcass" and "carcasses" are used to also mean "side" or "sides."

§ 2853.103 Classes of beef carcasses.

(a) Class determination of beef carcasses is based on evidences of maturity and apparent sex condition at the time of slaughter. The classes of beef carcasses are steers, bullocks, bulls, heifers, and cows. Carcasses from males—steers, bullocks, and bulls—are distinguished from carcasses from females—heifers and cows—as follows:

(1) Steer, bullock, and bull carcasses have a "pizzle muscle" (attachment of the penis) and related "pizzle eye" adjacent to the posterior end of the aitchbone.

(2) Steer, bullock, and bull carcasses have, if present, rather rough, irregular fat in the region of the cod. In heifer and cow carcasses, the fat in this region, if present, is much smoother.

(3) In steer, bullock, and bull carcasses, the area of lean exposed immediately ventral to the aitchbone is much smaller than in heifer and cow carcasses.

(b) Steer, bullock, and bull carcasses are distinguished by the following:

(1) In steer carcasses, the "pizzle muscle" is relatively small, light red in color, and fine in texture and the related "pizzle eye" is relatively small.

(2) In bullock and bull carcasses, the "pizzle muscle" is relatively large, dark red in color, and coarse in texture and the related "pizzle eye" is relatively large.

(3) Bullock and bull carcasses usually have a noticeable crest.

(4) Bullock and bull carcasses also usually have a noticeably developed small round muscle adjacent to the hipbone commonly referred to as the "jump muscle." However, in carcasses with a considerable amount of external fat, the development of this muscle may be obscured.

(5) Although the development of the secondary sex characteristics is given primary consideration in distinguishing steer carcasses from bullock or bull carcasses, this differentiation is also facilitated by consideration of the color and texture of the lean. In bullock and bull carcasses, the lean is frequently at least dark red in color with a dull, "muddy" appearance—and in some cases it may have an iridescent sheen. Also, it frequently has an "open" texture.

(6) The distinction between bullock and bull carcasses is based solely on their evidences of skeletal maturity. Carcasses with the maximum maturity permitted in the bullock class have slightly red and slightly soft chine bones, and the cartilages on the ends of the thoracic vertebrae have some evidence of ossification; the sacral vertebrae are completely fused; the cartilages on the ends of the lumbar vertebrae are nearly competely ossified; and the rib bones are slightly wide and slightly flat. Bull carcasses have evidences of more advanced maturity.

(c) Heifer and cow carcasses are distinguished by the following:

(1) Heifer carcasses have a relatively small pelvic cavity and a slightly curved aitchbone. In cow carcasses, the pelvic cavity is relatively large and the aitchbone is nearly straight.

(2) In heifer carcasses, the udder usually will be present. In cow carcasses, the udder usually will have been removed. However, neither of these are requirements.

§ 2853.104 Application of standards for grades of carcass beef.

(a) The grade of a steer, heifer, cow, or bullock carcass consists of separate evaluations of two general considerations: (1) The indicated yield of closely trimmed (⅛ inch fat or less), boneless retail cuts expected to be derived from the major wholesale cuts (round, sirloin, short loin, rib, and square-cut chuck) of a carcass, herein referred to as the "yield grade," and (2) Characteristics of the meat which predict the palatability of the lean, herein referred to as the "quality grade." The grade of a bull carcass consists of the yield grade only. When officially graded, the grade of a steer, heifer, cow, or bullock carcass consists of both the quality grade and the yield grade. The yield grade designation may be removed from officially graded beef carcasses, sides, quarters, wholesale cuts, or combinations of wholesale cuts on which the external fat (natural or trimmed) does not exceed ⅜ inch in thickness. For purposes of these regulations, wholesale cuts, or combinations thereof, which can qualify for yield grade designation removal are: round, sirloin, short loin, rib, square-cut chuck, shank, brisket, plate, and flank. The yield grade designation may be removed from all other cuts without trimming of external fat. In instances where removal of the yield grade designation is permitted, the USDA grade may consist of the quality grade designation only.

(b) The carcass beef grade standards are written so that the quality grade and yield grade standards are contained in separate sections. The quality grade section is divided further into two separate sections applicable to carcasses from: (1) Steers, heifers, and cows, and (2) bullocks. ►Seven quality grade desinations—Prime, Choice, Good, Commercial, Utility, Cutter, and Canner—are applicable to steer and heifer carcasses.◄ Except for Prime, the same designations apply to cow carcasses. ►The quality grade designations for bullock carcasses are Prime, Choice, Good, and Utility.◄ There are five yield grades applicable to all classes of beef, denoted by numbers 1 through 5, with Yield Grade 1 representing the highest ►yield of trimmed retail cuts.◄

(c) When officially graded, bullock and bull beef will be further identified for its sex condition; steer, heifer, and cow beef will not be so identified. The designated grades of bullock beef are not necessarily comparable in quality or cutability with a similarly designated grade of beef from steers, heifers, or

cows. Neither is the cutability of a designated yield grade of bull beef necessarily comparable with a similarly designated yield grade of steer, heifer, cow, or bullock beef.

(d) The Department uses photographs and other objective aids in the correct interpretation and application of the standards.

(e) To determine the grade of a carcass, it must be split down the back into two sides and one or both sides must be partially separated into a hindquarter and forequarter by cutting it with a saw and knife insofar as practicable, as follows: A saw cut perpendicular to both the long axis and split surface of the vertebral column is made across the 12th thoracic vertebra at a point which leaves not more than one-half of this vertebra on the hindquarter. The knife cut across the ribeye muscle starts—or terminates—opposite the above-described saw cut. From that point it extends across the ribeye muscle perpendicular to the outside skin surface of the carcass at an angle toward the hindquarter which is slightly greater (more nearly horizontal) than the angle made by the 13th rib with the vertebral column of the hindquarter posterior to that point. As a result of this cut, the outer end of the cut surface of the ribeye muscle is closer to the 12th rib than is the end next to the chine bone. Beyond the ribeye, the knife cut shall continue between the 12th and 13th ribs to a point which will adequately expose the distribution of fat and lean in this area. The knife cut may be made prior to or following the saw cut but must be smooth and even, such as would result from a single stroke of a very sharp knife.

(f) Other methods of ribbing may prevent an accurate evaluation of the grade determining characteristics. Therefore, carcasses ribbed by other methods will be eligible for grading only if an accurate grade determination can be made by the official grader under the standards.

(g) Beveling of the fat over the ribeye, application of pressure, or any other influences which may alter the characteristics of the ribeye or the thickness of fat over the ribeye prevent an accurate grade determination. Therefore, carcasses subjected to such influences shall not be eligible for a grade determination, and the presentation of such carcasses for an official grade determination shall be considered a fraudulent or deceptive practice in connection with the services requested for such carcasses. Carcasses that have had external fat removed in trimming for Federal meat inspection compliance may be graded only if the official grader determines that an accurate grade determination can be made. Although entire carcasses with more than minor amounts of lean removed from the major wholesale cuts (round, sirloin, short loin, rib, or square-cut chuck) shall not be eligible for a grade determination, the remaining portions of these carcasses which are unaffected by the removal of lean shall remain eligible for a grade determination provided a cross section at the 12th-13th rib is available and an accurate grade determination may be made.

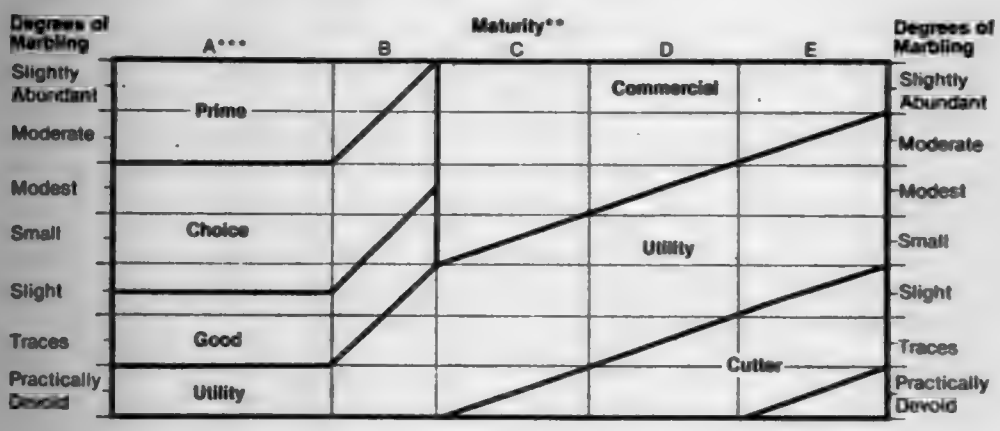
(h) When both sides of a carcass have been ribbed prior to presentation for grading and the characteristics of the two ribeyes (area, marbling, color, texture, and firmness) would justify different quality and/or yield grades, the final grade of the carcass shall reflect the "highest" of each of these grades as determined from either side.

(i) To meet the demand of export trade or changing trade practices, grading of carcasses ribbed other than between the 12th and 13th ribs may be approved by the Director. In such cases, grading shall be based on the requirements specified in these standards and shall be consistent with the normal development of grade characteristics in various parts of a carcass of the quality level involved. When an exception is granted for export trade, such carcasses shall be identified with the word "EXPORT" in such a manner that will clearly distinguish them from other officially graded beef.

(j) Carcasses qualifying for any particular grade may vary with respect to their relative development of the various grade factors. There will be carcasses that qualify for a particular grade, some of whose characteristics may be more nearly typical of another grade. For example, in comparison with the descriptions of maturity contained in the standards, a particular carcass might have a greater relative degree of ossification of the cartilages on the ends of its lumbar vetebrae than its other evidences of maturity. In such instances, the maturity of the carcass is not► determined solely by the ossification of the lumbar vertebrae but neither is this ignored. All of the maturity-indicating factors are considered. In making any composite evaluation of two or more factors, it must be remembered that they seldom are developed to the same degree. Because it is impractical to describe the nearly limitless number of recognizable combinations of characteristics, the standards for each quality grade and yield grade describe only beef which has a relatively similar degree of development of the various factors affecting its quality and yield. Also, the quality grade and yield grade standards each describe beef which is representative of the lower limits of each quality grade and yield grade.

(k) For steer, heifer, and cow beef, quality of the lean is evaluated by considering its marbling and firmness as observed in a cut surface in relation to carcass evidences of maturity. The maturity of the carcass is determined by evaluating the size, shape, and ossification of the bones and cartilages—especially the split chine bones—and the color and texture of the lean flesh. In the split chine bones, ossification changes occur at an earlier stage of maturity in the posterior portion of the vertebral column (sacral vertebrae) and at progressively later stages of maturity on the lumbar and thoracic vertebrae. The ossification changes that occur in the cartilages on the ends of the split thoracic vertebrae are especially useful in evaluating maturity and these vertebrae are referred to frequently in the standards. Unless otherwise specified in the standards, whenever reference is made to the ossification of cartilages on the thoracic vertebrae, this shall be construed to refer to cartilages attached to the thoracic vertebrae at the posterior end of the forequarter. The size and shape of the rib bones also are important considerations in evaluating differences in maturity. In the very youngest carcasses considered as "beef," the cartilages on the end of the chine bones show no ossification, cartilage is evident on all of the vertebrae of the spinal column, and the sacral vertebrae show distinct separation. In addition, the split vertebrae usually are soft and porous and very red in color. In such carcasses, the rib bones have only a slight tendency toward flatness. In progressively more mature carcasses, ossification changes become evident first in the bones and cartilages of the sacral vertebrae, then in the lumbar vertebrae, and still later in the thoracic vertebrae. In beef of very advanced maturity, all the split vertebrae will be devoid of red color, very hard and flinty, and the cartilages on the ends of all the vertebrae will be entirely ossified. Likewise, with advancing maturity, the rib bones will become progressively wider and flatter until in very mature beef the ribs will be very wide and flat.

(l) In steer, heifer, and cow beef, the color and texture of the lean flesh also undergo progressive changes with advancing maturity. In the very youngest carcasses considered as "beef," the lean flesh will be very fine in



texture and light grayish red in color. In progressively more mature carcasses, the texture of the lean will become progressively coarser and the color of the lean will become progressively darker red. In very mature beef, the lean flesh will be very coarse in texture and very dark red in color. Since color of lean also is affected by variations in quality, references to color of lean in the standards for a given degree of maturity vary slightly with different levels of quality. In determining the maturity of a carcass in which the skeletal evidences of maturity are different from those indicated by the color and texture of the lean, slightly more emphasis is placed on the characteristics of the bones and cartilages than on the characteristics of the lean. In no case can the overall maturity of the carcass be considered more than one full maturity group different from that indicated by its bones and cartilages.

(m) The preceding two paragraphs also are applicable to the determination of quality in bullock beef except for carcasses having darker colors of lean than specified in the standards for the quality level for which they would otherwise qualify. In such carcasses, maturity will be evaluated on the basis of skeletal characteristics only, and the final grade will be determined in accordance with the procedures specified in the standards for grading "dark-cutting beef."

(n) In determining compliance with the maximum maturity limits for the ►Prime, Choice, and Good grades◄ for steer, heifer, and cow carcasses, color and texture of the lean are considered only when the maturity-indicating factors other than color and texture of the lean indicate only a slightly more advanced degree of maturity than that specified as maximum for these grades, and provided further, that the lean is considerably finer in texture and lighter in color than normal for the grade and maturity involved. The same principle, in reverse, is likewise applicable to determining compliance with the minimum maturity limits of the ►Commercial, Cutter, and Canner grades.◄

(o) These standards are applicable to the grading of beef throughout the full range of maturity within which cattle are marketed. However, in steer, heifer, and cow carcasses, the range of maturity permitted within each of the grades varies considerably. ►The Prime, Choice, and Good grades are restricted to beef from young cattle; the Commercial, Cutter, and Canner grades are restricted to beef from cattle too mature for Prime, Choice, and Good; and the utility grade may include beef from animals of all ages.◄ By definiton, bullock carcasses are restricted to those whose evidences of skeletal maturity do not exceed those specified for the juncture of the two youngest maturity groups referenced in the standards for steer, heifer, and cow carcasses. Except for the youngest maturity group, within any specified grade, the requirements for marbling ►increase with◄ evidences of advancing maturity. In the youngest maturity group, the marbling requirements do not ►increase with◄ evidences of advancing maturity. For each grade, the firmness requirements are different for each maturity group, but, within each maturity group, the firmness requirements do not ►increase with◄ evidences of advancing maturity. Also, regardless of the extent to which marbling may exceed the minimum of a grade, a carcass must meet the minimum firmness requirements for its maturity to qualify for that grade. To facilitate the application of these principles, the standards recognize five different maturity groups and seven different degrees of marbling. The five maturity groups are identified in Figure 1 as A, B, C, D, and E, in order of increasing maturity. The limits of these five maturity groups are specified in the grade descriptions for steer, heifer, and cow carcasses. The A maturity portion of the figure is the only portion applicable to bullock carcasses. The degrees of marbling referenced in the specifications, in order of descending quantity are: slightly abundant, moderate, modest, small, slight, traces, and practically devoid. However, for carcass evaluation programs and other purposes, three higher degrees are recognized—moderately abundant, abundant, and very abundant. ►Information on how to obtain illustrations of various degrees of marbling is available from the Department of Agriculture.[1]

Relationship Between Marbling, Maturity, and Carcass Quality Grade*

*Assumes that firmness of lean is comparably developed with the degree of marbling and that the carcass is not a "dark cutter."
**Maturity increases from left to right (A through E).
***The A maturity portion of the Figure is the only portion applicable to bullock carcasses.

Figure 1

(p) The relationship between marbling, maturity, and quality grade is shown in Figure 1. This figure assumes that the firmness of lean is comparably developed with the degree of marbling and that the carcass is not a "dark cutter." From this figure it can be seen, for instance, that the minimum marbling requirement for Choice varies from a ►typical slight◄ amount for carcasses throughout the youngest maturity group to a ►typical modest◄ amount for carcasses having the maximum maturity permitted in Choice. Likewise, in the Commercial grade the minimum marbling requirement varies from a minimum small amount in beef with the

[1] Information concerning such devices may be obtained from the ►Agricultural Marketing Service; Lovestock, Meat, Grain, and Seed Division.◄

minimum maturity permitted to a maximum moderate amount in beef from very mature animals. The marbling and other lean flesh characteristics specified for the various grades are based on their appearance in the ribeye muscle of properly chilled carcasses that are ribbed between the 12th and 13th ribs. For carcass evaluation programs and other purposes, in the Prime and Commercial grades, each additional degree of marbling (up to three) greater than specified as minimum for each of these grades is equal to one-third of a grade of higher quality.

(q) References to color of lean in the standards for steer, heifer, and cow beef involve only colors associated with changes in maturity. They are not intended to apply to colors of lean associated with so-called "dark-cutting beef." Dark-cutting beef is believed to be the result of a reduced sugar content of the lean at the time of slaughter. As a result, this condition does not have the same significance in grading as do the darker shades of red associated with advancing maturity. The dark color of the lean associated with "dark-cutting beef" is present in varying degrees from that which is barely evident to so-called "black cutters" in which the lean is actually nearly black in color and usually has a "gummy" texture. Although there is little or no evidence which indicates that the "dark-cutting" condition has any adverse effect on palatability, it is considered in grading because of its effect on acceptability and value. Depending on the degree to which this characteristic is developed, the final grade of carcasses which otherwise would qualify for the Prime, Choice, or Good grades may be reduced as much as one full grade. ►In beef otherwise eligible for the Commercial grade,◄ the final grade may be reduced as much as one-half of a grade. In the Utility, Cutter, and Canner grades, this condition is not considered.

(r) The yield grade of a beef carcass is determined by considering four characteristics: (1) The amount of external fat, (2) the amount of kidney, pelvic, and heart fat, (3) the area of the ribeye muscle, and (4) the carcass weight.

(s) The amount of external fat on a carcass is evaluated in terms of the thickness of this fat over the ribeye muscle, measured perpendicular to the outside surface at a point three-fourths of the length of the ribeye from its chine bone end. This measurement may be adjusted, as necessary, to reflect unusual amounts of fat on other parts of the carcass. In determining the amount of this adjustment, if any, particular attention is given to the amount of fat in such areas as the brisket, plate, flank, cod or udder, inside round, rump, and hips in relation to the actual thickness of fat over the ribeye. Thus, in a carcass which is fatter over other areas than is indicated by the fat measurement over the ribeye, the measurement is adjusted upward. Conversely, in a carcass which has less fat over the other areas than is indicated by the fat measurement over the ribeye, the measurement is adjusted downward. In many carcasses no such adjustment is necessary; however, an adjustment in the thickness of fat measurement of one-tenth or two-tenths of an inch is not uncommon. In some carcasses a greater adjustment may be necessary. As the amount of external fat increases, the percent of retail cuts decreases—each one-tenth inch change in adjusted fat thickness over the ribeye changes the yield grade by 25 percent of a yield grade.

(t) The amount of kidney, pelvic, and heart fat considered in determining the yield grade includes the kidney knob (kidney and surrounding fat), the lumbar and pelvic fat in the loin and round, and the heart fat in the chuck and brisket area which are removed in making closely trimmed retail cuts. The amount of these fats is evaluted subjectively and expressed as a percent of the carcass weight. As the amount of kidney, pelvic, and heart fat increases, the percent of retail cuts decreases—a change of 1 percent of the carcass weight in these fats changes the yield grade by 20 percent of a yield grade.

(u) The area of the ribeye is determined where this muscle is exposed by ribbing. This area usually is estimated subjectively; however, it may be measured. Area of ribeye measurements may be made by means of a grid calibrated in tenths of a square inch or by other devices designated by the ►Agricultural Marketing Service◄ of the U.S. Department of Agriculture.[1] An increase in the area of ribeye increases the percent of retail cuts—a change of 1 square inch in area of ribeye changes the yield grade by approximately 30 percent of a yield grade.

(v) Hot carcass weight (or chilled carcass weight × 102 percent) is used in determining the yield grade. As carcass weight increases, the percent of retail cuts decreases—a change of 100 pounds in hot carcass weight changes the yield grade by approximately 40 percent of a yield grade.

(w) The standards include a mathematical equation for determining yield grade. This grade is expressed as a whole number; any fractional part of a designation is always dropped. For example, if the computation results in a designation of 3.9, the final grade is 3—it is not rounded to 4.

(x) The yield grade standards for each of the first four yield grades list characteristics of two carcasses of two different weights together with descriptions of the usual fat deposition pattern on various areas of the carcass. These descriptions are not specific requirements—they are included only as illustrations of carcasses which are near the borderlines between groups. For example, the characteristics listed for Yield Grade 1 represent carcasses which are near the borderline of Yield Grades 1 and 2. These descriptions facilitate the subjective determination of the yield grade without making detailed measurements and computations. The yield grade for most beef carcasses can be determined accurately on the basis of a visual appraisal.

§ 2853.105 Specifications for official United States standards for grades of carcass beef (yield).

(a) The yield grade of a beef carcass is determined on the basis of the following equation: Yield grade = 2.50 + (2.50 × adjusted fat thickness, inches) + (0.20 × percent kidney, pelvic, and heart fat) + (0.0038 × hot carcass weight, pounds) − (0.32 × area of ribeye, square inches).

(b) The following descriptions provide a guide to the characteristics of carcasses in each yield grade to aid in determining yield grades subjectively.

(1) *Yield Grade 1.* (i) A carcass in Yield Grade 1 usually has only a thin layer of external fat over the ribs, loins, rumps, and clods and slight deposits of fat in the flanks and cod or udder. There is usually a very thin layer of fat over the outside of the rounds and over the tops of the shoulders and necks. Muscles are usually visible through the fat in many areas of the carcass.

(ii) A 500-pound carcass of this yield grade which is near the borderline of Yield Grades 1 and 2 might have three-tenths inch of fat over the ribeye, 11.5 square inches of ribeye, and 2.5 percent of its weight in kidney, pelvic, and heart fat.

(iii) An 800-pound carcass of this yield grade which is near the borderline of Yield Grades 1 and 2 might have four-tenths inch of fat over the ribeye, 16.0 square inches of ribeye, and 2.5 percent of its weight in kidney, pelvic, and heart fat.

(2) *Yield Grade 2.* (i) A carcass in Yield Grade 2 usually is nearly completely covered with fat but the lean is plainly visible through the fat over the outside of the rounds, the tops of the

shoulders, and the necks. There usually is a slightly thin layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is slightly thick. There are usually small deposits of fat in the flanks and cod or udder.

(ii) A 500-pound carcass of this yield grade which is near the borderline of Yield Grades 2 and 3 might have five-tenths inch of fat over the ribeye, 10.5 square inches of ribeye, and 3.5 percent of its weight in kidney, pelvic, and heart fat.

(iii) An 800-pound carcass of this yield grade which is near the borderline of Yield Grades 2 and 3 might have six-tenths inch of fat over the ribeye, 15.0 square inches of ribeye, and 3.5 percent of its weight in kidney, pelvic, and heart fat.

(3) *Yield Grade 3.* (i) A carcass in Yield Grade 3 usually is completely covered with fat and the lean usually is visible through the fat only on the necks and the lower part of the outside of the rounds. There usually is a slightly thick layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is moderately thick. There usually are slightly large deposits of fat in the flanks and cod or udder.

(ii) A 500-pound carcass of this yield grade which is near the borderline of Yield Grades 3 and 4 might have seven-tenths inch of fat over the ribeye, 9.5 square inches of ribeye, and 4.0 percent of its weight in kidney, pelvic, and heart fat.

(iii) An 800-pound carcass of this yield grade which is near the borderline of Yield Grades 3 and 4 might have eight-tenths inch of fat over the ribeye, 14.0 square inches of ribeye, and 4.5 percent of its weight in kidney, pelvic, and heart fat.

(4) *Yield Grade 4.* (i) A carcass in Yield Grade 4 usually is completely covered with fat. The only muscles usually visible are those on the shanks and over the outside of the plates and flanks. There usually is a moderately thick layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is thick. There usually are large deposits of fat in the flanks and cod or udder.

(ii) A 500-pound carcass of this yield grade which is near the borderline of Yield Grades 4 and 5 might have one inch of fat over the ribeye, 9.0 square inches of ribeye, and 4.5 percent of its carcass weight in kidney, pelvic, and heart fat.

(iii) An 800-pound carcass of this yield grade which is near the borderline of Yield Grades 4 and 5 might have one and one-tenth inch of fat over the ribeye, 13.5 square inches of ribeye, and 5.0 percent of its weight in kidney, pelvic, and heart fat.

(5) *Yield Grade 5.* A carcass in Yield Grade 5 usually has more fat on all of the various parts, a smaller area of ribeye, and more kidney, pelvic, and heart fat than a carcass in Yield Grade 4.

§ 2853.106 Specifications for official United States standards for grades of carcass beef (quality-steer, heifer, cow).

(a) *Prime.* (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Prime grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for two maturity groups, which cover the entire range of maturity permitted in the Prime grade.

(2) Carcasses in the younger group range from the youngest that are eligible for the beef class to those at the juncture of the two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is light red in color and is fine in texture. In carcasses throughout the range of maturity included in this group, a minimum ►moderate◄ amount of marbling is required (see Figure 1) and the ribeye muscle is moderately firm.

(3) Carcasses in the older group range from those described above as representative of the juncture of the two groups to those at the maximum maturity permitted in the Prime grade, which have chine bones tinged with red and cartilages on the ends of the thoracic vertebrae that are partially ossified. In addition, the sacral vertebrae are completely fused, the cartilages on the ends of the lumbar vertebrae are completely ossified, and the cut surface of the lean tends to be fine in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from minimum ►moderate◄ to maximum slightly abundant (see Figure 1) and the ribeye muscle is firm.

(4) ►Cow beef◄ is not eligible for the Prime grade.

(b) *Choice.* (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Choice grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for two maturity groups, which cover the entire range of maturity permitted in the Choice grade.

(2) Carcasses in the younger group range from the youngest that are eligible for the beef class to those at the juncture of the two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is moderately light red in color and is fine in texture. In carcasses throughout the range of maturity included in this group, a ►typical slight◄ amount of marbling is required (see Figure 1) and the ribeye muscle may be slightly soft.

(3) Carcasses in the older group range from those described above as representative of the juncture of the two groups to those at the maximum maturity permitted in the Choice grade, which have chine bones tinged with red and cartilages on the ends of the thoracic vertebrae that are partially ossified. In addition, the sacral vertebrae are completely fused, the cartilages on the ends of the lumbar vertebrae are completely ossified, and the cut surface of the lean tends to be fine in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from a ►typical slight amount to a typical modest◄ amount (see Figure 1) and the ribeye muscle is slightly firm.

(c) *Good.* (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Good grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for two maturity groups, which cover the entire range of maturity permitted in the Good grade.

(2) Carcasses in the younger group range from the youngest that are eligible for the beef class to those at the juncture of the two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. If addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is slightly ►dark◄ red in color and is fine in texture. In carcasses throughout the range of maturity included in this group,

►a minimum traces amount of marbling is required (see Figure 1) and the ribeye may be soft.◄

(3) Carcasses in the older group range from those described above as representative of the juncture of the two groups to those at the maximum maturity permitted in the Good grade, which have chine bones tinged with red and cartilages on the ends of the thoracic vertebrae that are partially ossified. In addition, the sacral vertebrae are completely fused, the cartilages on the ends of the lumbar vertebrae are completely ossified, and the cut surface of the lean tends to be fine in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from a ►minimum traces◄ amount to a maximum slight amount (see Figure 1) and the ribeye muscle may be ►moderately soft.◄

►(d) *Commercial.* (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Commercial grade vary in their other indications of quality as evidenced in the ribeye muscle. Commercial grade beef carcasses are restricted to those with evidences of more advanced maturity than permitted in the Good grade. Thus, three maturity groups are recognized.◄ Minimum quality characteristics are described for the youngest and the most mature of these groups. The requirements for the intermediate group are determined by interpolation between the requirements indicated for the two groups described.

(2) Carcasses in the youngest group permitted in the Commercial grade range from those with indications of maturity barely more advanced than described as maximum for the ►Good◄ grade to those with moderately hard, rather white chine bones and with cartilages on the ends of the thoracic vertebrae that show considerable ossification but the outlines of the cartilages are still plainly visible. In addition, the rib bones are moderately wide and flat and the ribeye muscle is moderately dark red and slightly coarse in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from a minimum small amount to a maximum small amount (see Figure 1) and the ribeye muscle is slightly firm.

(3) The youngest carcasses in the most mature group included in the Commercial grade have hard, white chine bones and the outlines of the cartilages on the ends of the thoracic vertebrae are barely visible, the rib bones are wide and flat, and the ribeye muscle is dark red and coarse in texture. The range in maturity in this group extends to include carcasses from the oldest animals marketed. The minimum degree of marbling required increases with advancing maturity throughout this group from a minimum moderate amount to a maximum moderate amount (see Figure 1) and the ribeye muscle is firm.

►(e)◄ *Utility.* (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Utility grade vary in their other indications of quality as evidenced in the ribeye muscle. Carcasses within the full range of maturity classified as beef are included in the Utility grade. Thus, five maturity groups are recognized. ►Minimum quality requirements are described for two of these groups—the third or intermediate and the fifth or the most mature. The requirements for the fourth maturity group are determined by interpolation between the requirements described for the adjoining groups. In the first and second maturity groups, only those carcasses that are inferior to the minimum requirements for the Good grade are included in the Utility grade.◄

►(2)◄ Carcasses in the third or intermediate maturity group range from those with indications of maturity barely more advanced than described as maximum for the ►Good◄ grade to those with moderately hard, rather white chine bones and with cartilages on the ends of the thoracic vertebrae that show considerable ossification but the outlines of the cartilages are still plainly visible. In addition, the rib bones are moderately wide and flat and the ribeye muscle is dark red in color and slightly coarse in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from minimum practically devoid to maximum practically devoid (see Figure 1) and the ribeye muscle may be moderately soft.

►(3)◄ The youngest carcasses in the fifth or oldest maturity group have hard, white chine bones and the outlines of the cartilages on the ends of the thoracic vertebrae are barely visible, the rib bones are wide and flat, and the ribeye muscle is very dark red in color and coarse in texture. The range in maturity in this group extends to include carcasses from the oldest animals marketed. The minimum degree of marbling required increases with advancing maturity throughout this group from a minimum slight amount to a maximum slight amount (see Figure 1) and the ribeye muscle is slightly firm.

►(f) *Cutter.* (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Cutter grade vary in their other indications of quality as evidenced in the ribeye muscle. Cutter grade beef carcasses are restricted to those with evidences of more advanced maturity than permitted in the Good grade. Thus, three maturity groups are recognized. Minimum quality requirements are described for the youngest and the most mature of the groups. The requirements for the intermediate group are determined by interpolation between the requirements indicated for the two adjoining groups described.

(2) Carcasses in the first or youngest maturity group permitted in the Cutter grade range from those with indications of maturity barely more advanced than described as maximum for the Good grade◄ to those with moderately hard, rather white chine bones and with cartilages on the ends of the thoracic vertebrae that show considerable ossification but the outlines of the cartilages are still plainly visible. In addition, the rib bones are moderately wide and flat and the ribeye muscle is dark red in color and slightly coarse in texture. In carcasses throughout the range of maturity included in this group, the ribeye muscle is devoid of marbling and may be soft and watery.

►(3) The youngest carcasses in the most mature group included in the Cutter grade◄ have hard, white chine bones and the outlines of the cartilages on the ends of the thoracic vertebrae are barely visible, the rib bones are wide and flat, and the ribeye muscle is very dark red in color and coarse in texture. The range in maturity in this group extends to include carcasses from the oldest animals marketed. The minimum degree of marbling required increases with advancing maturity throughout this group from minimum practically devoid to maximum practically devoid (see Figure 1) and the ribeye muscle is soft and slightly watery.

►(g)◄ *Canner.* The Canner grade includes only those steer, heifer, and cow carcasses that are inferior to the minimum requirements specified for the Cutter grade.

§ 2853.107 Specifications for Official United States Standards for Grades of Carcass Beef (Quality-Bullock).

(a) *Prime.* For the Prime grade, the minimum degree of marbling required is a ►minimum moderate◄ amount for carcasses throughout the range of maturity permitted in the bullock class ►(see Figure 1).◄ The ribeye muscle is moderately firm and, in carcasses having maximum maturity for this class, the ribeye is light red in color.

(b) *Choice.* For the Choice grade, the minimum degree of marbling required is a ►typical slight◄ amount for carcasses throughout the range of

maturity permitted in the bullock class ►(see Figure 1).◄ The ribeye muscle may be slightly soft and, in carcasses having the maximum maturity for this class, the ribeye is moderately light red in color.

(c) *Good.* For the Good grade, the minimum degree of marbling required is a ►minimum traces◄ amount for carcasses throughout the range of maturity permitted in the bullock class ►(see Figure1).◄ The ribeye muscle may be moderately soft and, in carcasses having the maximum maturity for this class, the ribeye is slightly ►dark◄ red in color.

►(d) *Utility.* The Utility grade includes only those carcasses that are inferior to the minimum requirements specified for the Good grade.◄

PART 53—LIVESTOCK (GRADING, CERTIFICATION, AND STANDARDS)

1. The authority citation for Part 53 reads as follows:

Authority: Agricultural Marketing Act of 1946, sec. 203, 205, as amended; 60 Stat. 1087, 1090, as amended (7 U.S.C. 1622 and 1624).

2. 7 CFR §3.201–53.206 are revised to read as set forth below. In § 53.206, paragraphs (a)(4), (b)(4), (c)(4), (d)(4), and (e)(2) are removed.

Note.—In this document, new or revised text is enclosed by arrows (►◄). This proposed revision of the subpart also corrects typographical errors.

§ 53.201 Cattle.

The official standards for live cattle developed by the United States Department of Agriculture provide for segregation first according to use—slaughter and feeder—then as to class, which is determined by sex condition, and then as to grade, which is determined by the apparent relative excellence and desirability of the animal for its particular use. Differentiation between slaughter and feeder cattle is based solely on their intended use rather than on specific identifiable characteristics of the cattle. Slaughter cattle are those which are intended for slaughter immediately or in the very near future. Feeder cattle are those which are intended for slaughter after a period of feeding. However, under some economic conditions, specific kinds of cattle may be considered as feeders whereas under other economic conditions they might be considered as slaughter cattle.

§ 53.202 Classes of Slaughter and Feeder Cattle.

The classes of slaughter and feeder are steers, bullocks, bulls, heifers, and cows. Definitions of the respective classes are as follows:

(a) *Steer.* A steer is a male bovine castrated when young and which has not begun to develop the secondary physical characteristics of a bull.

(b) *Bullock.* A bullock is a young (under approximately 24 months of age) male bovine (castrated or uncastrated) that has developed or begun to develop the secondary physical characteristics of a bull.

(c) *Bull.* A bull is a mature (approximately 24 months of age or older) uncastrated, male bovine. However, for the purpose of these standards, any mature, castrated, male bovine which has developed or begun to develop the secondary physical characteristics of an uncastrated male also will be considered a bull.

(d) *Cow.* A cow is a female bovine that has developed through reproduction or with age, the relatively prominent hips, large middle, and other physical characteristics typical of mature females.

(e) *Heifer.* A heifer is an immature female bovine that has not developed the physical characteristics typical of cows.

§ 53.203 Application of Standards for Grades of Slaughter Cattle.

(a) *General.* Grades of slaughter cattle are intended to be directly related to the grades of the carcasses they produce. To accomplish this, these slaughter cattle grade standards are based on factors which are related to the grades of beef carcasses. The quality and yield grade standards are contained in separate sections of the standards. The quality grade standards are further divided into two sections applicable to: (1) steers, heifers, and cows, and (2) bullocks. ►Seven quality designations—Prime, Choice, Good, Commercial, Utility, Cutter, and Canner—are applicable to steers and heifers.◄ Except for Prime, the same designations apply to cows. ►The quality designations for bullocks are Prime, Choice, Good, and Utility.◄ There are five yield grades, which are applicable to all classes of slaughter cattle and are designated by numbers 1 through 5, with Yield Grade 1 representing the highest degree of cutability. The grades of slaughter cattle shall be a combination of both their quality and yield grades, except that slaughter bulls are yield graded only.

(b) *Quality Grades.* (1) Slaughter cattle quality grades are based on an evaluation of factors related to the palatability of the lean, herein referred to as "quality." Quality in slaughter cattle is evaluated primarily by the amount and distribution of finish, the firmness of muscling, and the physical characteristics of the animal associated with maturity. Progressive changes in maturity past approximately 30 months of age in the amount and distribution of finish and firmness of muscling have opposite effects on quality. Therefore, for cattle over approximately 30 months of age in each grade, the standards require a progressively greater development of the other quality-indicating factors. In cattle under approximately 30 months of age, a progressively greater development of the other quality-indicating characteristics is not required.

(2) Since carcass indices of quality are not directly evident in slaughter cattle, some other factors in which differences can be noted must be used to evaluate their quality. Therefore, the amount of external finish is included as a major grade factor herein, even though cattle with a specific degree of fatness may have widely varying degrees of quality. Identification of differences in quality among cattle with the same degree of fatness is based on distribution of finish and firmness of muscling. Descriptions of these factors are included in the specifications. For example, cattle which have more fullness of the brisket, flank, twist, and cod or udder and which have firmer muscling than that indicated by any particular degree of fatness are considered to have higher quality than indicated by the degree of fatness.

(3)►The approximate maximum age limitation for the Prime, Choice, and Good grades of steers, heifers, and cows is 42 months. The Commercial, Cutter, and Canner grades for steers, heifers, and cows include only cattle over approximately 42 months. There are no age limitations for the Utility grade of steers, heifers, and cows.◄ The maximum age limitation for all grades of bullocks is approximately 24 months.[1]

(c) *Yield Grades.* (1) The yield grades for slaughter cattle are based on the same factors as used in the official yield grade standards for beef carcasses (7 CFR 2853.105). Those factors and the change in each which is required to make a full yield grade change are as follows:

---

[1] Maximum maturity limits for bullock carcasses are the same as those described in the beef carcass grade standards for steers, heifers, and cows at about 30 months of age. However, bullocks develop carcass indicators of maturity at younger chronological ages than steers. Therefore, the approximately age at which bullocks develop carcass indicators of maximum maturity is shown herein as 24 months rather than 30 months.

Factor	Effect of increase on yield grade*	Approximate change in each factor required to make a full yield grade change**
Thickness of fat over ribeye.	Decreases	4/10 in.
Percent of kidney, pelvic, and heart fat.	Decreases	5%.
Carcass weight	Decreases	250 lb.
Area of ribeye	Increases	3 in.²

*The yield grades are denoted by numbers 1 through 5 with Yield Grade 1 representing the highest cutability or yield of closely trimmed retail cuts. Thus, an "increase" in ►yield grade (cutability)◄ means a smaller yield grade number while a "decrease" in ►yield grade (cutability)◄ means a larger yield grade number.

**This assumes no change in the other factors.

(2) When evaluating slaughter cattle for yield grade, each of these factors can be estimated and the yield grade determined by using the equation contained in the official yield grade standards for grades of carcass beef. However, a more practical method of appraising slaughter cattle for yield grade is to use only two factors normally considered in evaluating live cattle—muscling and fatness.

(3) In the latter approach to determining yield grade, evaluation of the thickness and fullness of muscling in relation to skeletal size largely accounts for the effects of two of the factors—area of ribeye and carcass weight. By the same token, an appraisal of the degree of external fatness largely accounts for the effects of thickness of fat over the ribeye and the percent of kidney, pelvic, and heart fat.

(4) These fatness and muscling evaluations can best be made simultaneously. This is accomplished by considering the development of the various parts based on an understanding of how each part is affected by variations in muscling and fatness. While muscling of most cattle develops uniformly, fat is normally deposited at a considerably faster rate on some parts than on others. Therefore, muscling can be appraised best by giving primary consideration to the parts least affected by fatness, such as the round and the forearm. Differences in thickness and fullness of these parts—with appropriate adjustments for the effects of variations in fatness—are the best indicators of the overall degree of muscling in live cattle.

(5) On the other hand, the overall fatness of an animal can be determined best by observing those parts on which fat is deposited at a faster-than-average rate. These include the back, loin, rump, flank, cod or udder, twist, and brisket. As cattle increase in fatness, these parts appear progressively fuller, thicker, and more distended in relation to the thickness and fullness of the other parts, particularly the round. In thinly muscled cattle with a low degree of finish, the width of the back usually will be greater than the width through the center of the round. The back on either side of the backbone also will be flat or slightly sunken. Conversely, in thickly muscled cattle with a similar degree of finish, the thickness through the rounds will be greater than through the back and the back will appear full and rounded. At an intermediate degree of fatness, cattle which are thickly muscled will be about the same width through the round and back and the back will appear only slightly rounded. Thinly muscled cattle with an intermediate degree of finish will be considerably wider through the back than through the round and will be nearly flat across the back. Very fat cattle will be wider through the back than through the round, but this difference will be greater in thinly muscled cattle than in those that are thickly muscled. Such cattle with thin muscling also will have a distinct break from the back into the sides, while those with thick muscling will be nearly flat on top but will have a less distinct break into the sides. As cattle increase in fatness, they also become deeper bodied because of large deposits of fat in the flanks and brisket and along the underline. Fullness of the twist and cod or udder and the bulge of the flanks, best observed when an animal walks, are other indications of fatness.

(6) In determining yield grade, variations in fatness are much more important than variations in muscling.

(d) *Other considerations.* (1) Other factors such as heredity and management also may affect the development of the grade-determining characteristics in slaughter cattle. Although these factors do not lend themselves to description in the standards, the use of factual information of this nature is justifiable in determining the grade of slaughter cattle.

(2) Slaughter cattle qualifying for any particular grade may vary with respect to the relative development of the individual grade factors. In fact, some will qualify for a particular grade although they have some characteristics more nearly typical of cattle of another grade. Because it is impractical to describe the nearly infinite number of recognizable combinations of characteristics, the quality and yield grade standards describe only cattle which have a relatively similar development of the various quality and yield grade determining factors and which are near the lower limits of these grades. The requirements are given for two maturity groups in the quality grade standards for steers, heifers, and cows—but for only one maturity group for bullocks. In the yield grade standards, cattle with two levels of muscling are described and specific examples in terms of carcass characteristics also are included.

§ 53.204 Specifications for Official U.S. Standards for Grades of Slaughter Steers Heifers, and Cows (Quality).

(a) *Prime.* (1) Slaughter steers and heifers 30 to 42 months of age possessing the minimum qualifications for Prime have a fat covering over the crops, back, ribs, loin, and rump that tends to be thick. The brisket, flanks, and cod or udder appear full and distended and the muscling is very firm. The fat covering tends to be smooth with only slight indications of patchiness. Steers and heifers under 30 months of age have a moderately thick but smooth covering of fat which extends over the back, ribs, loin, and rump. The brisket, flanks, and cod or udder show a marked fullness and the muscling is firm.

(2) Cattle qualifying for the minimum of the Prime grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described for the Prime grade. Such cattle have less width of back and loin and are less uniform in width than normal for the Prime grade. The thick, full muscling gives the back and loin a well-rounded appearance with very little evidence of flatness. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be slightly prominent. Although such cattle have a lower degree of fatness over the back and loin than described as typical, evidence of more fatness than described is noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described for the Prime grade. The distribution of fat is not typical, for it is thicker over the crops, back, loin, and rump than described while the brisket, flanks, twist, and cod or udder indicate less fatness. Such cattle are wide and nearly flat over the back and loin and there is a sharp break from these parts into the sides. The width over the back is much greater than through the rounds and shoulders.

(3) Cows are not eligible for the Prime grade.

(b) *Choice.* (1) Slaughter steers, heifers, and cows 30 to 42 months of age possessing the minimum qualifications for Choice have a fat covering over the crops, back, loin, rump and ribs that tends to be ►slightly thick.◄ The brisket, flanks, and cod or udder show a marked fullness and the muscling is firm. Cattle under 30 months of age carry a ►slightly thin◄ fat covering over the top. The brisket, flanks, and cod or udder appear moderately full and the muscling is moderately firm.

(2) Cattle qualifying for the minimum of the Choice grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described for the Choice grade. Such cattle are less uniform in width than normal for the Choice grade. The thick, full muscling over the top results in a rounded appearance with little evidence of flatness. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be slightly prominent. Although such cattle have a lower degree of fatness over the back and loin than described as typical, evidence of more fatness than described is especially noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described for the Choice grade. The distribution of fat is not typical, for it is thicker over the crops, back, loin, and rump than described but with evidence of less fatness in the brisket, flanks, twist, and cod or udder. The back and loin break sharply into the sides and the width over the back is much greater than through the rounds and shoulders.

(c) *Good.* (1) Slaughter steers, heifers, and cows 30 to 42 months of age possessing the minimum qualifications for Good have a fat covering that tends to be ►thin◄ with some fullness evident in the brisket, flanks, twist, and cod or udder and the muscling is firm. Cattle under 30 months of age have a ►very thin◄ fat covering which is largely restricted to the back and loin. The brisket, flanks, twist, and cod or udder are slightly full and the muscling is slightly firm.

(2) Cattle qualifying for the minimum of the Good grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described for the Good grade. Such cattle are less uniform in width than normal for the grade. The thick, full muscling through the back gives the back and loin a well-rounded appearance. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be prominent. Evidence of more fatness than described is especially noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described for the Good grade. The distribution of fat is not typical, for it is thicker over the crops, back, loin, and rump than described while the brisket, flanks, twist, and cod or udder indicate less fatness. Such cattle are nearly flat over the back and loin and the width over the back is greater than through the rounds and shoulders.

►(d)◄ *Commercial.* (1) The Commercial grade is limited to steers, heifers, and cows over approximately 42 months of age. Slaughter cattle possessing the minimum qualifications for Commercial and which slightly exceed the minimum maturity for the Commercial grade have a slightly thick fat covering over the back, ribs, loin, and rump and the muscling is moderately firm. Very mature cattle usually have at least a moderately thick fat covering over the back, ribs, loin, and rump and considerable patchiness frequently is evident about the tail-head. The brisket, flanks, and cod or udder appear to be moderately full and the muscling is firm.

(2) Cattle qualifying for the minimum of the Commercial grade will differ considerably in cutability because of widely varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described for the Commercial grade. The thick, full muscling over the top results in a rounded appearance with little evidence of flatness. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be slightly prominent. Although such cattle have less thickness of fat over the back and loin than described as typical, evidence of more fatness than described is especially noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described for the Commercial grade. The distribution of fat is not typical, being thicker over the crops, back, loin, and rump than described while the brisket, flanks, twist, and cod and udder indicate less fatness. The back and loin break sharply into the sides and the width over the back is much greater than through the rounds and shoulders.

►(e) *Utility.* (1) Cattle under approximately 42 months of age which fail to meet the minimum requirements for the Good grade are graded Utility. The minimum degree of finish required for older slaugher steers, heifers, and cows to qualify for the Utility grade varies from a slightly thin covering of fat for cattle approximately 42 months of age to a slightly thick fat covering, generally restricted to the back, loin, and rump, for the very mature cattle in this grade.◄ In such mature cattle, the crops are slightly thin and the brisket, flanks, and cod or udder indicate very slight fullness.

(2) Cattle qualifying for the minimum of the Utility grade vary somewhat in cutability, especially among older animals. ►Those under 42 months of age have no fatness requirement to qualify for the minimum of the grade and ◄ most of the variation in cutability of such cattle is due to differences in muscling. Cattle over 42 months of age will vary in their degree of fatness as well as muscling. Thus, cattle with thicker muscling than normal and less external fat than specified for this grade will have higher cutability than cattle with thinner musling and more fatness.

►(f) *Cutter.* The Cutter grade is limited to steers, heifers, and cows over approximately 42 months of age. In slaughter cattle in the Cutter grade, the degree of finish ranges from practically none in cattle approximately 42 months of age to very mature cattle which have only a very thin covering of fat.◄

►(g)◄ *Canner.* Canner grade are those which are inferior to the minimum specified for the Cutter grade.

§ 53.205 Specifications for Official U.S. Standards for Grades of Slaughter Bullocks (Quality).

(a) *Prime.* (1) Slaughter bullocks possessing the minimum qualifications for the Prime grade have a moderately thick but smooth covering of fat which extends over the back, ribs, loin, and rump. The brisket and flanks show a marked fullness and the muscling is firm.

(2) Bullocks qualifying for the minimum of the Prime grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Bullocks with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described as minimum for the Prime grade. Such bullocks have less width of back and loin and are less uniform in width than described as typical for the Prime grade but the muscling is firmer than described. Conversely, bullocks with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described as minimum for the Prime grade.

(b) *Choice.* (1) Slaughter bullocks possessing the minimum qualifications for the Choice grade carry a ►slightly thin◄ fat covering over the top. The brisket and flanks appear moderately full and the muscling is moderately firm.

(2) Bullocks qualifying for the minimum of the Choice grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Bullocks with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described as minimum for the Choice grade but the muscling is firmer than described. Conversely, bullocks with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described as minimum for the Choice grade.

(c) *Good.* (1) Slaughter bullocks possessing the minimum qualifications for the Good grade have a ►very thin◄ fat covering which is largely restricted to the back and loin. The brisket and flanks are slightly full and the muscling is slightly firm.

(2) Bullocks qualifying for the minimum of the Good grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Bullocks with higher cutability than normal for the grade are thickly muscled and have a lower degree of fatness than described as minimum for the Good grade. Such bullocks are less uniform in width than described as typical of the grade but the muscling is firmer than described. Conversely, bullocks with lower cutability than normal for this grade have thinner muscling and a higher degree of fatness than described as minimum for the Good grade.

►(d)◄ *Utility.* The Utility grade includes only those bullocks that do not meet the minimum requirements specified for the Good grade.

§ 53.206 Specifications for Official United States Standards for Grades of Slaughter Cattle (Yield).

(a) *Yield Grade 1.* (1) Yield Grade 1 slaughter cattle produce carcasses with very high yields of boneless retail cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 1 (near the borderline between Yield Grade 1 and Yield Grade 2) will differ considerably in appearance because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They are moderately wide and the width through the shoulders and rounds is greater than through the back. The top is well-rounded with no evidence of flatness, and the back and loin are thick and full. The rounds are deep, thick, and full and the width through the middle part of the rounds is greater than through the back. The shoulders are slightly prominent and the forearms are thick and full. These cattle have only a thin covering of fat over the back and rump. The flanks are slightly shallow and the brisket and cod or udder have little evidence of fullness. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.3 of an inch of fat over the ribeye and about 13.0 square inches of ribeye area.

(3) Because of the relatively low proportion of lean to bone, practically no thinly muscled cattle produce carcasses with an exceptionally high yield of boneless retail cuts. Therefore, it is unlikely that thinly muscled cattle will qualify for Yield Grade 1.

(b) *Yield Grade 2.* (1) Yield Grade 2 Slaughter cattle produce carcasses with high yields of boneless retail cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 2 (near the borderline between Yield Grade 2 and Yield Grade 3) will differ considerably in appearance because of differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They are wide through the back and loin and have slightly greater width through the shoulders and rounds than through the back. The top is well-rounded with little evidence of flatness and the back and loin are thick and full. The rounds are thick, full, and deep and the thickness through the middle part of the rounds is greater than that over the top. The shoulders are slightly prominent and the forearms are thick and full. There is a slightly thick covering of fat over the back and rump and the flanks are slightly deep. The brisket and cod or udder are slightly full. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.6 of an inch of fat over the ribeye and about 12.5 square inches of ribeye area.

(3) Thinly muscled cattle typical of the minimum of this grade have a relatively low proportion of lean to bone. They tend to be flat and slightly narrow over the back and have slightly long, flat rounds. They are slightly wider over the back than through the rounds. The shoulders are slightly prominent and the forearms are only slightly thick. These cattle have a thin covering of fat over the back and rump. The flanks are slightly shallow and thin and the brisket and cod or udder have little evidence of fullness. Slaughter cattle of this description producing 600-pound carcasses usually have 0.3 of an inch of fat over the ribeye and about 10.0 square inches of ribeye area.

(c) *Yield Grade 3.* (1) Yield Grade 3 slaughter cattle produce carcasses with intermediate yields of boneless retail cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 3 (near the borderline between Yield Grades 3 and 4) will differ considerably in appearance because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They are very wide through the back and loin and are uniform in width from front to rear. The back or top is nearly flat with only a slight tendency toward roundness and there is a slight break into the sides. The back and loin are very full and thick. The rounds are deep, thick, and full. The shoulders are smooth and the forearms are thick and full. There is a moderately thick covering of fat over the back and rump. The flanks are deep and full and the brisket and cod or udder are full. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.9 of an inch of fat over the ribeye and about 12.0 square inches of ribeye area.

(3) Thinly muscled cattle typical of the minimum of this grade have a relatively low proportion of lean to bone. They are flat and slightly wide over the back and loin and are wider over the back than through the rounds. The shoulders are slightly smooth and the forearms are only slightly thick. These cattle tend to have a slightly thick covering of fat over the back and rump. The flanks are slightly deep and full and the brisket

and cod or udder are slightly full. Slaughter cattle of this description producing 600-pounding carcasses usually have about 0.6 of an inch of fat over the ribeye and about 9.5 square inches of ribeye area.

(d) *Yield Grade 4.* (1) Yield Grade 4 slaughter cattle produce carcasses with moderately low yields of boneless retail cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 4 (near the borderline between Yield Grades 4 and 5) will differ considerably in appearance because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They appear wider over the top than through the shoulders or rounds. The back and loin are very thick and full, nearly flat, and break sharply into the sides. The rounds are deep, thick, and full. The shoulders are smooth and the forearms are thick and full. These cattle have a thick covering of fat over the back and rump. The flanks are very deep and full and the brisket and cod or udder are very full. Slaughter cattle of this description producing 600-pound carcasses usually have about 1.1 inches of fat over the ribeye and about 11.5 square inches of ribeye area.

(3) Thinly muscled cattle typical of the minimum of this grade have a relatively low ratio of lean to bone. They are flat over the back and loin and much wider through the back than through the shoulders or rounds. The rounds tend to be long and flat. The shoulders are smooth and the forearms are slightly thick. These cattle have a moderately thick covering of fat over the back and rump and the back breaks sharply into the sides. The flanks are deep and full and the brisket and cod or udder are full. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.9 of an inch of fat over the ribeye and about 9.0 square inches of ribeye area.

►(e) *Yield Grade 5.*◄ Yield Grade 5 slaughter cattle produce carcasses with low yields of boneless retail cuts. Cattle of this grade consist of those not meeting the minimum requirements for Yield Grade 4 because of either more fat or less muscle or a combination of these characteristics.

Done at Washington, D.C., on December 23, 1981.

John Ford,

Deputy Assistant Secretary Marketing and Inspection Services.

U.S. DEPARTMENT OF AGRICULTURE, AGRICULTURAL MARKETING SERVICE

Appendix—Summary of the Preliminary Regulatory Impact Analysis of Proposed Changes in the United States Standards for Grades of Carcass Beef and Slaughter Cattle

High interst rates, inflation and a decrease in the amount of discretionary dollars in the consumer budget have created an economic situation where feeding cattle has been relatively unprofitable for the last 2 years. This has occurred during the phase of the cattle cycle that has traditionally been the most profitable. The cattle feeding industry has two basic problems to solve that are related. They are: (1) finding ways to produce cattle at reduced costs, and (2) finding and maintaining an overall production (supply) level that leads to a quantity-price relationship on the demand side that makes the production level profitable to produce.

During the last few years there has also been increasing evidence that consumers are more conscious of health concerns related to food consumption. Studies have reached conclusions that consumers are more concerned about the levels of saturated fats, cholesterol, and overall calories in their diets. These results are generally expressed in the broad statement that consumers are now demanding leaner beef.

In April 1981, the Department received a formal petition from the National Cattlemen's Association (NCA) that asked for consideration and appropriate action on a resolution "to improve and modernize the USDA Beef Grading Standards." The NCA petition maintains that the current grading system inhibits the production of leaner beef and leads to the overfattening of some cattle and to economic inefficiencies. The NCA petition suggests that revising the current standards can lower production costs by reducing the average feeding time by 15 to 30 days and at the same time provide a product that is as acceptable as the product in the current grades and more in line with consumer desires for leaner beef.

Since the submission of the NCA petition, numerous other groups and individuals have either formally or informally provided USDA with recommendations regarding the current beef grade standards or publicly presented their positions. These recommendations range from support of the current system, to calling for a return to the standards that were in effect prior to a revision implemented in 1976, to those recommending changes similar to the NCA recommendation.

In response, the Department has reviewed the beef quality standards, has considered several alternatives for modifying the existing standards and has developed a specific set of proposed modifications. This process has been consistent with the Department's philosophy that the beef standards cannot be static; they must be dynamic to be of greatest value to the various users. In keeping with this philosophy, the Department has made changes in the standards as necessary to meet the changing needs of users of the system. There have been eight revisions to the official beef grade standards since they were introduced in 1926. The voluntary, industry-funded grading program was initiated 1 year later in 1927.

Changes in the standards have normally been considered for one or more of the following reasons: (1) to clarify the intent of the standards or to otherwise improve the ease of application or uniformity of their interpretation; (2) to incorporate the results of research findings with respect to the importance of various grade factors; or (3) to keep the standards abrest of established changes in consumer preferences and livestock production practices.

The Department has continued to receive recommendations for change during the review of the existing standards. In August 1981, the Department received a petition from the Community Nutrition Institute (CNI) recommending that the current quality standards be maintained but that changes be made in the current nomenclature.

Alternatives Considered

In developing the current proposal, the Department initially considered a wide variety of options for quality grades that were narrowed down to the following four alternatives:

- The Present Standards
- The Proposed Standards
- The NCA Alternative
- A New Grade Alternative

These four alternatives, that are representative of the wide variety of suggestions the Department has received, are described in the Background section of the preceding proposed rule for grades of carcass beef and slaughter cattle.

In accordance with section 3(d) of Executive Order 12291 on Federal Regulation, the Department has prepared a Preliminary Regulatory Impact Analysis (PRIA) that includes (1) a description of the potential costs and benefits of the Department's proposal, including the beneficial and adverse effects that cannot be quantified in monetary terms, (2) identification of the public sectors likely to receive the benefits and likely to bear the costs and (3) a description of alternative approaches considered together with their costs and benefits. In accordance with the Regulatory Flexibility Act (Pub. L. 96–354), the PRIA identifies particular costs and benefits applicable to small businesses. Due to the nature and use of grade standards, it is not feasible to consider different requirements for different sizes of firms. This summary includes the major findings and conclusions of the PRIA.

The Present Standards

The Department recognizes that some users believe that the existing standards are adequately sorting beef according to palatability and that they do not necessarily discourage the production of leaner beef. Several beef industry sectors have, however, acknowledged the apparent inefficiencies in a system that produces excess fat that must

be chilled and transported only to be trimmed off before the final product appears in the meat counter of a retail store. While there is not a direct cause and effect relationship, there is some evidence that the existing standards do have an influence on the production system that now produces a relatively high percentage of overfat cattle.

A panel discussion at the National Beef Grading Conference held in Ames, Iowa, in January 1981, concluded that most cattle are sold based on an estimated percentage of Choice in conjunction with weight and number of days on feed. Most cattle are fed until the feeder or buyer estimates that 75 percent or more of the lot or pen will grade Choice. This normally occurs at market weights of 1,050 to 1,200 pounds depending on the size, age and breed of cattle. At the same time as the cattle are developing the marbling to grade Choice, they are also developing increased exterior and seam fat. The conclusion that has been reached by the NCA and other segments of the beef industry is, that with the existing grade standards, it is generally impossible to achieve the goal of 75 percent or more Choice without producing a relatively high percentage of Yield Grade 4 and Yield Grade 5 cattle that are discounted for being overfat.

Even though most fed cattle may be marketed only after they reach the goal of 75 percent or more Choice, the cattle feeder's profits are still based on considerations of marginal costs and marginal revenues. As cattle approach the traditional market weights of 1,050 to 1,200 pounds, marginal costs are increasing because of decreases in feed efficiency (pounds of grain required per pound of gain). Marginal revenues are simultaneously affected by rising and falling market prices, by premiums paid for Choice cattle over Good cattle and by discounts for Yield Grade 4 and 5 cattle. These premiums and discounts change over time. For example, over the last 4 years, premiums for Choice slaughter cattle over Good cattle have averaged from $3 to $5 per hundred pounds. However, in early February 1981, prices for Good and Choice cattle differed by only $2 dollars per hundred pounds based on the price quotations from certain central markets. These price quotations are based on the slaughter cattle standards. Since 1975, the wholesale discounts for Yield Grade 4 and 5 carcasses have varied considerably. Prior to 1975, The discounts were generally less than estimated value differences. The discounts, which presumably help establish slaughter cattle prices, have now increased to often reflect or even exceed the expected value differences. Under certain market conditions, cattle are fed to a point where the total discounts exceed the total premiums. Feeding to a goal of 75 percent or more Choice is one of several factors that can contribute to that type of situation.

Based on a sample of 1,287 carcasses examined in late 1980 and early 1981, the Department estimates that almost 23 percent of fed cattle now slaughtered produce a carcass that is either Yield Grade 4 or Yield Grade 5. In 1980, there were approximately 24 million fed steers and heifers slaughtered. This slaughter level produced an estimated 5.5 million Yield Grade 4 or Yield Grade 5 carcasses. An examination of wholesale dressed meat prices in 1980 shows that typical discounts for these carcasses ranged from $12 to $15 per hundred pounds. Assuming that these heavier carcasses averaged 750 pounds, then the total discount for these 5.5 million carcasses would probably have been between $500 and $600 million. These cattle cost as much, if not more, to produce than cattle with more desirable yield grades. It is believed that most of this loss in revenue is borne by the cattle feeder because buyers estimate the number of Yield Grade 4 and 5 cattle when they offer price quotations.

The number of Yield Grade 4 and Yield Grade 5 carcasses could potentially be reduced in a number of ways, including:

(1) Changes in breeding practices that would lead to a reduction in cattle that tend to put on excessive exterior and seam fat. This potential solution is analogous to the pork industry's move to a leaner market hog. Even if feasible, however, this is a long term solution not addressed here.

(2) Another potential solution would involve the identification, sorting and marketing of overfinished cattle earlier. Identification would be based on visual examination or on the use of instruments such as backfat probes. It has been suggested that sorting on a large scale is neither practical nor cost effective. A similar suggested approach is to sort cattle at placement based on frame size or other characteristics and then experiment with different feed rations.

(3) Reducing the overall time on feed. This is the solution that is the projected impact of two alternatives, the current proposal and the NCA petition.

(4) Feeding to a lower percentage (50 to 60 percent) of Choice, under the existing standards.

The NCA petition suggests that cattle feeders cannote produce leaner beef under the current standards. That is probably true as long as the target goal for feeders is 75 percent or more Choice. The number of overfat cattle could, however, be reduced if this goal was reduced to 50 to 60 percent Choice. It is not clear whether this goal is set by the production side of the industry (feeders and packers) or by the customer side (retailers, purveyors and consumers). In recent years, some retailers have shown that their customers will purchase an ungraded, generally leaner product over Choice if it is less expensive. Some have found supplies of this product limited. There is certainly some evidence that more Good quality beef would sell if it were produced and merchandised. However, there has not been sufficient evidence available on the production side to change overall feeding patterns. There may be a lot of tradition in the production goal of 75 percent or more Choice. The goal existed prior to 1976 when only 50 percent of feed beef was Choice quality. It exists today when an estimated 64 percent of fed beef is of Choice quality.

The Department does not expect to see major changes in feeding patterns under the current standards. Some proponents of the existing standards believe that many of the objectives of the proposed changes could be achieved by an extensive educational and promotional campaign extolling the virtues of Good grade beef or by changing the Good name in order to avoid the perceived consumer and industry aversion to its connotation. The petition from CNI has proposed changing the Good grade name to "Choice Light" and the Standard grade name to "Lean".

An obvious advantage of the existing standards is that any change requires an adustment and learning phase at all levels of the marketing system. There would be some costs associated with the implementation of any change.

The Proposed Standards

The current proposal would provide feeders with the opportunity to feed to a constant percentage of Choice with less time on feed. With shorter feeding times, overall profitability should increase because (1) overall feed efficiency would go up for lighter market weights, and (2) the total discounts for Yield Grade 4 and 5 carcasses should go down as fewer are produced. It is not clear what would happen to the price differentials between Good and Choice cattle.

However, the impacts of the current proposal are highly dependent on the resultant change in feeding patterns. The Department recognizes that there are differences in opinion as to (1) the number and types of feedlot operations that would change feeding patterns in response to a change in the grade standards, and (2) the magnitude of that response in terms of the reduction in average time on feed. The NCA suggests in their petition that relatively minor changes, such as those they recommend, would shorten the average feeding time by 15 to 30 days. Others believe that this is optimistic based on the reaction, to date, to the 1976 changes in the grade standards. The Department proposes to establish minimum marbling requirements for Choice beef that are higher than the requirements recommended by the NCA. If we accept the premise that there is a cause and effect relationship such that lower minimum marbling requirements for Choice beef result in a reduction in average time on feed, then we would expect the proposed standards to have a slightly smaller impact on feeding time than the NCA alternative, assuming a consistent goal of feeding to 75 percent or more Choice. The Department acknowledges that feeding times could be affected by changes in marbling requirements. However, the Department also recognizes that there are many other variables that will influence overall feeding patterns. Therefore, in the PRIA, the Department did not attempt to establish a functional relationship between marbling requirements and feeding patterns.

Because of the uncertainty of response, the PRIA analyzes the affects of a wide variety of potential reactions. In addition, we have developed a projected response by the cattle feeding sector to the proposed standards based on (1) the review of the 1976 revisions, (2) the magnitude of the changes in carcass weight and feed consumption, and (3) the collective judgment of multidisciplinary personnel across several USDA agencies.

This projection is that the average time on feed for approximately half of fed cattle would be reduced by approximately 15 days, or that the overall average time on feed would be reduced by approximately 7 days. The estimated impacts of this projected case and two others are summarized below. The other cases are included because there is so much uncertainty as to what the actual response would be.

● If all fed cattle were fed 7 days less (the Department's projected response) there would be a 1.7 percent decrease in total live weight, a 2.1 percent decrease in carcass weight and a 1.4 to 1.8 percent decrease in the supply of closely trimmed retail cuts. Total feed costs would be reduced by almost 5 percent or over $200 million. This represents a decrease in overall production costs of 1.1 percent. It has also been estimated that the average yield grade would be decreased by 0.1 to 0.15. With this amount of shift in average yield grade, an estimated 3 to 4 percent of fed cattle would move from Yield Grade 4 down to Yield Grade 3, potentially decreasing overall discounts by 13 to 17 percent. Under this response, we have estimated that the percentage of Choice cattle would rise from 64 percent to 74 percent and that the percentage of Good cattle would decrease from 26 percent to 12 percent. This could affect the premiums paid for Choice cattle.

● If all cattle were fed 15 days less, there would be a 4.1 percent decrease in total live weight, a 5.4 percent decrease in total carcass weight and a 3.8 to 4.1 percent decrease in the supply of closely trimmed retail cuts. Total feed costs would be reduced by approximately $450 million. This represents a decrease in overall production costs of 2.3 percent. It has also been estimated that the average yield grade would be decreased by 0.2 to 0.3. With this amount of shift in average yield grade, an estimated 6 to 8 percent of fed cattle would move from Yield Grade 4 down to Yield Grade 3, potentially decreasing overall discounts by 25 to 35 percent. Under this response, the percentage of Choice cattle will still increase and the percentage of Good cattle would decrease but changes would be less.

● There is also the possibility that there would be no noticeable change in feeding patterns. In this case, there would be no reduction in feeding costs and no reduction in the percentage of Yield Grade 4 and Yield Grade 5 cattle. It is estimated that the percentage of Choice cattle would rise to 77 percent and the percentage of Good cattle would fall to only 7 percent. There is no guarantee that total premiums for Choice cattle would increase. In early 1981, there was a relative surplus of Choice cattle relative to Good cattle. As a result, there was very little difference in the wholesale carcass prices for Good and Choice beef. Live cattle prices differed by about $2 per hundred pounds at Midwest markets.

There are some cattle feeders that would probably benefit from the proposed changes without a reduction in feeding time. Some feeders are now feeding an increasing, but unknown, number of cattle referred to as "Exotic Crossbreds." These cattle are, on the average, larger-framed, heavier-muscled, higher-cutting and faster-gaining than traditional cattle. However, they now have one problem. They geneally don't marble enough to qualify for Choice until they reach weights of 1,300 to 1,400 pounds and at these weights, they are too large to be desired by the restaurant or retail trade. Therefore, many of these cattle are sold at relatively young ages at traditonal market weights and do not qualify for Choice. Under the current proposal, more of these carcasses could qualify for Choice and these feeders should receive more for their live cattle. The proposal could encourage a shift to the production of more of these types of cattle.

The PRIA identifies several reasons that might inhibit a change to the shorter feeding times that would result in lighter cattle and fewer overfat cattle. Examples include:

● The packing industry may discount lighter cattle because their carcasses represent less total revenue.

• Retailers may not want lighter carcasses because the individual retail cuts may be too small. Traditional retail purchase specifications provide for a 600 to 700 pound carcass. In late August 1981, cattle under 1,050 pounds were being heavily discounted because of an oversupply of shorter-fed cattle, that are likely to produce a carcass under 600 pounds.

• Retailers may fear an adverse customer reaction and change their purchase specifications.

• Buyers and feeders may simply be slow to move away from traditional slaughter weights.

Past experience has shown that the percentage of Yield Grade 4 and 5 carcasses is highest during periods of overproduction and corresponding low market prices, when feeders hold on to cattle waiting for market improvements. Therefore, for the cattle feeding industry to fully realize the potential benefits from the current proposal, the industry must address the second overall problem identified above and maintain a production level that is consistent with a profitable price-quantity relationship on the demand side. If short term benefits from the proposal trigger overproduction then all potential long term benefits may be lost.

Retailers, restaurant and hotel owners and operators, purveyors and consumers will all be concerned about the affects that the proposed changes would have on the eating quality of beef within the proposed grades.

Subsequent to the changes promulgated in March 1975, the Department initiated a major study of beef quality in cooperation with Texas A&M University, Colorado State University, and Iowa State University. This study, which involved over 1,000 beef carcasses, was the most comprehensive study of grades, grade factors, and beef palatability ever conducted. The Department has used an analysis of that study in developing its current proposal. The Department has concluded that the proposed standards for the Prime and Choice grades would not significantly [1] lower the overall palatability part, the analysis assumes that there would not be a shift in demand due to the proposed changes in the standards. The one available consumer survey that has looked at the 1976 change, a change of similar magnitude, did not find any significant changes in purchasing patterns due to the revisions in the grade standards.

The Department does recognize, however, that no amount of research is going to convince all parties that the proposed changes would not result in a deterioration in quality without a corresponding reduction in price. The Department also recognizes that while price and leanness are important beef attributes to consumers, recent surveys still show that quality is the most important consideration for consumers in purchasing beef.

The impacts of reduced time on feed were analyzed using the Department's Food and Agricultural Policy Similator, an interactive economic model of the farm sector that utilizes supply-demand relationships for individual commodities and relationships of how different commodities and products substitute for each other at different price levels. The analysis has projected that if cattle feeders respond by reducing average time on feed, there would be increases in the average production cost per pound of fed beef, reductions in retail supplies of fed beef leading to some retail price increases, and decreases in grain use leading to reductions in grain prices. There would also be some secondary effects on the demand for pork and poultry and on the supplies of trimmed fat for rendering.

The following impacts (1 year following the change) are estimated for the projected response that overall average time on feed would be reduced by 7 days.

• Fed beef production would be down by 1.2 percent leading to a 1.3 percent increase in the retail price index for beef. Production costs per retail pound would be up by at most one cent per pound.

• The retail price index for pork would increase by 0.7 percent. Retail prices for both chicken and turkey would be up by 0.9 percent.

• Corn feed use would be decreased by 0.3 percent and the average farm price for corn would decrease by almost 1.0 percent.

• The Consumer Price Index (CPI) for food would be up by 0.3 percent; there would be no expected change in the overall CPI.

• Gross farm income would increase by 0.3 percent and net farm income would increase by 0.6 percent.

The production costs per pound go up because live weight decreases proportionally faster than direct costs, as feeding time is decreased. Under the projected response, it was estimated that feeders would reduce total feed costs by $217 million. It was also estimated that a 7 day reduction in average time on feed could reduce interest costs by approximately $25 million and other direct costs such as fuel, utilities, and repairs by approximately $60 million. Therefore, with the projected response, total direct costs could be reduced by approximately $300 million. However, at the same time, total live weight would decrease by approximately 470

[1] In dicussing palatability, the term "significantly lower" is used in the statistical sense to indicate that there is no change in the palatability scores at a 95 percent level of confidence.

million pounds, a loss in revenues of over $300 million at an average market price of $.65 per pound.

The analysis does not support a conclusion that reduced time on feed could lead to short term reduction in overall production costs that could be passed on to consumers in terms of lower beef prices. However, it is recognized that in the long term, feeders could feed out more cattle per year with reduced feeding times and spread their fixed costs over a wider base, thereby lowering the overall production costs per pound.

If feeding cattle continues to be unprofitable, feeders may drastically cut back on feeding operations leading to far more significant impacts on retail prices. It is possible that the price increases due to the revisions may help stabilize the fed beef portion of the cattle cycle and help prevent price increases that would otherwise result.

Slaughterers and processors would, most likely, see a decrease in total volume of sales. However, these firms normally see fluctuations due to changes in the profitability of cattle feeding and changes due to the overall cattle cycle. Total commercial cattle slaughter fell by over 21 percent between 1976 and 1979. The proposed revisions in the grade standards would be expected to reduce total carcass weight by only 2.1 percent based on the projected response. Of course, reductions in average size have different cost implications than reductions in the number of head. However, the analysis shows only minor increases (less than one cent per pound) in the slaughter and processing costs per retail pound of beef.

With the projected response, there would be considerable changes in the supplies of fed beef by quality level, graded or not graded. There would be a 13 percent increase in Choice beef, a 72 percent increase in Prime beef and a projected 54 percent decrease in Good beef.

These changes will cause some retailers and other wholesale buyers to change or modify their purchasing programs, their merchandising programs, or both. In recent years, retailers have shown an increased tendency to change or modify merchandising progams for other reasons. Stores apparently can move from a USDA graded program to a house brand program, or vice versa, without major effects. If retailers or wholesalers find they must purchase graded beef, where they previously purchased ungraded or "no roll" beef, the added cost due to the grading service is only a tenth of a cent per pound. The analysis has not attempted to project price differentials between the proposed grade levels. Some retail firms will support the proposal because they recognize a need to produce less wasteful carcasses that require less trimming. Consumer preferences have led to more boneless cuts and more closely trimmed cuts being available in retail stores.

The Department believes that the proposed change can benefit purveyors, restaurants and hotels by identifying a larger category of Prime beef for their customers who they believe are very discriminating and who demand top quality beef.

Again, the analysis has not attempted to predict the relative prices for the proposed Prime, Choice and Good grades. The Department has no analytical model that can project these levels.

In summary, the analysis has shown that, if feasible, it would be better to selectively feed only the overfat cattle for shorter periods of time. There are, however, potential benefits for producers if overall feeding times could be shortened, and if certain types of cattle could qualify for Choice with less marbling. The analysis has not identified any major reason for not changing the standards in order to allow the opportunity for shorter feeding times.

The NCA Alternative

The NCA alternative is conceptually the same as the Department's proposal in the sense that both alternatives would set lower marbling requirements for Prime and Choice beef. The difference is that the NCA alternative would set lower overall requirements for the Choice grade. Under current feeding patterns, the Department's proposal would result in fewer of the current Good carcasses qualifying for the Choice grade. The Department estimates that requirements recommended by the NCA would allow an additional 3 to 4 percent of the current fed-beef production to quality for the Choice grade. Because of the lower marbling requirements for Choice, we would expect that the NCA alternative would result in a slightly larger reduction in average time on feed. However, because of the uncertainty of response, and because of the relatively minor differences between the two alternatives, we have not attempted to project a different response for the NCA alternative.

The NCA alternative provides for a minimum marbling requirement for Choice that is also accompanied by conditional requirements related to fat color and external fat thickness. The Department believes that these conditional requirements would complicate the grading decision process and could lead to increases in both implementation costs and the ongoing costs of providing grading service.

The Department has determined from its analysis of the palatability research that the requirements recommended by the NCA would significantly lower the overall acceptability of Choice beef. Therefore, while the NCA alternative might allow for greater reductions in feeding time, the Department's assessement, somewhat quantitiative, somewhat subjective, is that the potential costs from reduced palatability are too high when compared to the potential benefits from reduced time on feed.

A New Grade Alternative

A new grade alternative appeals to those who desire a second major retail grade as an alternative to Choice. It is estimated that the proposed standards would result in an estimated 74 percent of fed beef qualifying for the Choice grade. If consumers are really looking for leaner beef in terms of less marbling and not just in terms of external fat, than a system where over 85 percent of the product would be Prime or Choice does not identify an adequate amount of an alternative leaner beef.

The new grade alternative would either result in a second major retail grade or it could result in a large volume of ungraded beef, or at least a large increase in the use of house brands. Retailers could decide to use the new grade in both purchasing and merchandising, in purchasing alone, or in neither. If retailers chose to not use a new grade in merchandising, then the potential customer benefits of having an alternative to Choice would be lost. If retailers and other customers do not use a grade in purchasing, the packing industry is not going to request that the product be graded. In a series of informal interviews, retailers have identified several reasons why it is preferable to offer only one line of beef per store. For example, with one grade retailers can offer a wider variety of cuts and packaging. Several retailers have also found that one grade leads to better inventory control, less spoilage and less customer confusion.

The Department has concluded that the new grade concept would cause a major change in the beef marketing system, with high potential costs and unknown benefits. At the current time the Department has no indication that this alternative would result in reduced feeding times. Assuming no change in feeding patterns, the new grade alternative would result in considerable changes in the supplies of fed beef by quality level, graded or not graded. With existing feeding patterns, the Department estimates that the majority of fed beef would qualify for the new grade alternative.

Other Issues

The PRIA also examined several issues in addition to the alternative changes in quality standards. A major issue is whether or not to require that quality grading be accompanied by yield grading.

The Department has strongly supported yield grading as a means of achieving better carcass valuation and improved pricing efficiency. In the 1976 revisions, the Department required that all carcasses graded for quality would also be yield graded. Today large price spreads exist between Yield Grade 3 or better, and Yield Grade 4 or 5 carcasses. However, the premiums paid for Yield Grades 1 and 2 have not increased accordingly. The system has not been totally successful in achieving improved pricing efficiency.

It is unlikely, however, that existing price spreads would be altered significantly if beef were again allowed to be identified for quality grade only. Most large volume beef purchasers recognize the value of yield grades and would probably continue to insist on beef graded Yield Grade 3 or better. From past experience, they would assume that any beef not idenified for yield grade would be in Yield Grades 4 and 5 and would refuse to accept it or would accept it only at a discount. The Department is concerned that a return to the optional use of yield grading might work to the disadvantage of some small volume purchasers who do not have the purchasing power to request yield grading and don't have personnel skilled in carcass evaluation.

There are several arguments for returning the option of having graded beef identified for yield grade to the users of the grading service. There are potential benefits of allowing external fat trimming, which is currently prohibited if the beef is to be yield graded. However, the Department believes the benefits of universal identification of graded beef for yield grade still outweigh these considerations.

The Department's proposal also includes changes in the grades for slaughter cattle. The two major uses of the slaughter cattle standards are for quoting market prices for live cattle, and for grading live cattle delivered to satisfy futures trading contracts. To the extent possible the current grades for slaughter animals conform directly to the grades for carcasses produced from the live animals. The changes now being proposed in the slaughter cattle standards are intended to maintain consistency between the two types of grades. The PRIA does not treat these changes as a separate action with separate impacts.

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1421

[Amdt. 3]

Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed

AGENCY: Commodity Credit Corporation, United States Department of Agriculture.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would amend the regulations found at 7 CFR §§ 1421.5551 *et seq.* relating to Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed. The proposed amendment would: (1) require warehousemen wishing to continue their approval under the Uniform Grain Storage Agreement (UGSA) and the Uniform Rice Storage Agreement (URSA) to pay contract fees to Commodity Credit Corporation (CCC) in advance of the annual renewal date to partially defray warehouse examinations and administrative costs incurred by CCC in administering the UGSA and URSA; and (2) require warehousemen requesting initial warehouse approval under the UGSA and URSA to pay contract fees to partially defray CCC's costs in examining and approving such facility.

DATES: Comments must be received on or before February 28, 1982, in order to be assured of consideration.

ADDRESS: Interested persons are invited to send written comments to Paul W. King, Director, Transportation and Storage Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Paul W. King or Tyrus Matsuoka, United States Department of Agriculture, Agricultural Stabilization and Conservation Service, Transportation and Storage Division, P.O. Box 2415, Washington, D.C. 20013; (202) 447-7433.

The Draft Regulatory Impact Analysis describing the options considered is available from the above named individuals.

SUPPLEMENTARY INFORMATION: The proposed rule has been reviewed under USDA procedures established in accordance with Secretary's Memorandum 1512-1 and Executive Order 12291, and has been classified "not major." It has been determined that the provisions of this proposed rule will not result in: (1) an annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, production, innovation, or an ability of United States-based enterprises to compete with foreign enterprises in domestic or export markets.

This action will not have a major impact on area and community development. Therefore, a review as established by OMB Circular A-95 was not used to assure that units of local government are informed of this action.

It has been determined that the Regulatory Flexibility Act is not applicable to this proposed rule since the CCC is not required by 5 U.S.C. or any other provision of law to publish a notice of rulemaking with respect to the subject matter of the proposed rule.

The Commodity Credit Corporation Charter Act (15 U.S.C. 714) provides authority for CCC to conduct a number of operations to stabilize, support, and protect farm income and prices. Section 4(h) of the CCC Charter Act provides that the Corporation shall not acquire real property in order to provide storage facilities for agricultural commodities, unless CCC determines that private facilities for the storage of such commodities are inadquate.

Further, Section 5 of the CCC Charter Act provides that in carrying out the Corporation's purchasing and selling operations, and in the warehousing, transporting, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangements of trade and commerce.

Accordingly, CCC has set forth standards of approval which must be met by warehousemen before CCC will enter into storage agreements with such warehousemen for the storage of agricultural commodities which are owned by CCC or which are serving as collateral for CCC price support loans.

The Omnibus Budget Reconciliation Act of 1981, Public Law 97-35, requires the Secretary of Agriculture or his designee to assess user fees with respect to all warehouses licensed under the United States Warehouse Act. The user fees would be paid by federally licensed warehousemen to the Agricultural Marketing Service (AMS) to defray the costs of (1) warehouse examinations; (2) licenses issued to classify, inspect, grade, sample, or weigh agricultural commodities stored; and (3) warehouse licenses issued, amended, modified, extended, or reinstated. Since CCC contracts with federally licensed warehouses in the conduct of its business and thereby benefits from the services under the United States Warehouse Act, it has been proposed that CCC should pay a portion of the costs of these services.

The major service of AMS used by CCC is the report of periodic examinations of warehouses under the United States Warehouse Act. CCC, for its own protection, also requires the periodic examination of warehouses not licensed under the United States Warehouse Act. Under a proposed agreement with AMS, the warehouseman and CCC will together pay the cost representing user fees as mandated by the Omnibus Budget Reconcilation Act for those warehouses which are licensed under the United States Warehouse Act but which also have Uniform Grain or Rice Storage Agreements.

CCC now pays a portion of the costs incurred in the examinations of warehouses which are performed by States under Federal/State Cooperative Agreements. In addition, CCC now pays AMS all of the examination costs for those warehouses which have UGSA/URSAs but which are not federally licensed or licensed in States having Federal/State Cooperative Agreements. As a result of the assessment by AMS of user fees, the difference in costs among the three groups of warehouses under contract with CCC, which are specified above, could result in some warehouses withdrawing from the United States Warehouse Act program without any subsequent loss of their ability to

remain on the list of CCC approved warehouses. Since CCC now pays 100 percent of the costs of examining warehouses operating under the UGSA or URSA, such warehousemen could withdraw from the United States Warehouse Act program and still receive the advantages of AMS examinations with CCC paying all of the costs of such examinations.

Since other warehouse customers derive an indirect benefit from CCC's examination of UGSA and URSA warehouses, it is proposed that CCC, effective July 1, 1982, pay only a portion of the total costs of that examination under the UGSA and URSA. The remaining costs of examining UGSA and URSA warehouses would be obtained from the collection of contract fees from the warehousemen. Contract fees for UGSA and URSA warehouses would be based on the same formula as the formula used to assess fees for federally licensed warehouses. This proposal would establish parity between federally licensed warehouses and warehouses approved under the UGSA and URSA and distribute administrative costs more equitably.

Proposed Rule

Accordingly, it is proposed to amend Subpart—Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed of Part 1421, Title 7 of the Code of Federal Regulations as follows:

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

1. The authority citation for such subpart, Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed, reads as follows:

Authority: Secs. 4 and 5, 62 Stat., 1070, as amended (15 U.S.C. 714).

2. Section 1421.5558 is added to read as follows:

§ 1421.5558 Contract fees.

For each warehouse with a Uniform Grain Storage Agreement or Uniform Rice Storage Agreement which is not licensed under the U.S. Warehouse Act or which is not licensed by a State having a Federal/State Cooperative Agreement for examination of warehouses for Commodity Credit Corporation:

(a) There shall be charged to and collected from the warehouseman for each warehouse approved under the Uniform Grain Storage Agreement and the Uniform Rice Storage Agreement an annual contract fee in accordance with the schedule in paragraph (c) of this section;

(b) There shall be charged to and collected from the warehouseman for each warehouse requesting approval under the Uniform Grain Storage Agreement and Uniform Rice Storage Agreement an initial contract fee in accordance with the schedule in paragraph (c) of this section;

(c) Contract fees collected from warehouses under this section shall be in accordance with the following schedule:

Grain capacity (bushels)	Annual contract fees (dollars)
1 to 150,000	$250
150,001 to 250,000	350
250,001 to 500,000	450
500,001 to 750,000	550
750,001 to 1,000,000	650
1,000,001 to 1,200,000	750
1,200,001 to 1,500,000	850
1,500,001 to 2,000,000	950
2,000,001 to 2,500,000	1,050
2,500,001 to 5,000,000	1,150
5,000,001+	1,250

Signed at Washington, D.C., on December 23, 1981.

Clarence L. Tardy,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 545

[No. 81-799]

Savings Account Activity Charges and Small Accounts

Dated: December 17, 1981.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: These proposed amendments would eliminate existing rules which prohibit Federal savings and loan associations from imposing charges in connection with opening or maintaining savings accounts. The proposed amendments would also eliminate the $50 ceiling for the maximum size of non-interest bearing small accounts offered by Federal Associations. The proposed changes are intended to give associations greater flexibility in structuring classes of accounts, and to provide parity with commercial bank practices.

COMMENTS MUST BE RECEIVED BY: January 29, 1982.

ADDRESS: Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street NW., Washington, D.C. 20552.

FOR FURTHER INFORMATION CONTACT: David J. Bristol (202-377-6461).

SUPPLEMENTARY INFORMATION: Pursuant to its continuing goal of relieving Federal savings and loan associations of unnecessary regulatory constraints, the Board is proposing to eliminate certain provisions of 12 CFR 545.1 which prohibit Federal associations from charging any fees for becoming, remaining, or ceasing to be a holder of an account, and adopt a new provision expressly authorizing imposition of such fees. The Board is also proposing to amend 12 CFR 545.3(g) to eliminate the $50 ceiling for the maximum size of small accounts on which interest need not be paid.

The Board believes that allowing Federal associations to impose charges in connection with savings accounts will provide management with increased flexibility and a tool for developing different classes of accounts pursuant to 12 CFR 545.1-1(a)(1). By developing classes of accounts, associations will be able to encourage the size and type of accounts that will be profitable and provide substantial funds for lending. For similar reasons, the Board is proposing to amend § 545.3(g) to allow the management of each Federal association to set the minimum size for interest-bearing accounts. Federal banking agencies impose no similar prohibitions upon institutions subject to their jurisdiction, and therefore these proposed amendments would give Federal associations parity with commercial banks in encouraging or discouraging various types of savings accounts. Finally, as disclosure is currently required with respect to RSU and NOW account transactions, any Federal association imposing charges in connection with a savings account would be required to satisfy the disclosure requirements for such charges set forth in 12 CFR 563.3.

Regulatory Flexibility Act Certification

Pursuant to section 3 of the Regulatory Flexibility Act, Pub. L. No. 96-354, 94 Stat. 1164 (September 19, 1980), the Board certifies that the proposed amendments, if promulgated, would not have a significant economic impact on a substantial number of small entities. The proposed regulations would reduce a number of existing restrictions on the issuance of savings accounts and give institutions greater flexibility in designing such accounts. The Board believes that increased flexibility will benefit institutions but does not believe that the amendments will have a significant economic impact on small institutions.

PART 545—OPERATIONS

Accordingly, the Federal Home Loan Bank Board proposes to amend Part 545, Subchapter C, Chapter V of Title 12, *Code of Federal Regulations*, as set forth below.

1. Section 545.1 is amended by removing paragraph (c), and by revising paragraph (b) to read as follows:

§ 545.1 Savings accounts.

* * * * *

(b) *Fees.* As permitted by the rules for any class of accounts, an association may charge fees in connection with the administration of such accounts.

2. Revise paragraph (g) of § 545.3, to read as follows:

§ 545.3 Time and manner of distribution.

* * * * *

(g) *Small accounts.* An association may, by resolution of its board of directors, determine not to distribute earnings on any savings account of less than a specified minimum amount. An association may also so specify a lower minimum amount for accounts established under a plan offered by the association to children to encourage thrift.

* * * * *

(Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464), Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1947 Supp.)

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

12 CFR Parts 545, 555, and 563

[No. 81-798]

Amendments on Negotiable and Other Certificates of Deposit, Eurodollar Deposits, and Savings Account Loans

Dated: December 17, 1981.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed amendments.

SUMMARY: The Board is proposing to reduce current restrictions on savings accounts by: (1) permitting savings accounts with fixed terms ("certificate accounts") to be evidenced by negotiable instruments regardless of denomination; (2) permitting the issuance of certificate accounts for terms of more than 10 years; (3) permitting the issuance of Eurodollar certificates subject only to the term and minimum denomination requirements for certificate accounts generally; and (4) permitting "loophole" certificate accounts without limitation. The proposed amendments would give savings and loan associations with accounts insured by the Federal Savings and Loan Insurance Corporation ("FSLIC") greater flexibility in designing certificate accounts to meet the needs of the institution, its customers and the financial marketplace.

COMMENTS MUST BE RECEIVED BY: January 29, 1982.

ADDRESS: Send comments to Information Services, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW, Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Peter M. Barnett (202-377-6445), Office of General Counsel, at the above address.

SUPPLEMENTARY INFORMATION:

Negotiable Certificates of Deposit

Board regulations governing certificate accounts (12 CFR 545.1-1, 545.1-3, 563.3-1) generally prohibit the issuance of any certificate account evidenced by a negotiable instrument. Exceptions to the prohibition are provided for "marketable" certificates of deposit and Eurodollar certificates issued by Federal savings and loan associations (12 CFR 545.1-5, 545.24-4) and for certificate accounts specifically approved by the Board and "marketable" certificates of deposit issued by other insured institutions (12 CFR 563.3-2, 563.3-3). "Marketable" certificates of deposit and negotiable Eurodollar certificates must be issued in minimum denominations of $100,000 or more.

The Board believe that negotiability may offer important benefits for both insured institutions and their customers by providing an alternative to withdrawal prior to the maturity of a certificate account and the imposition of a penalty for early withdrawal. For institutions, negotiability as an alternative to early withdrawal can provide certainty as to the term of a deposit, thus permitting more effective asset/liability management. For savers, negotiability can provide increased liquidity for certificate accounts and the opportunity to realize capital gains if interest rates decline subsequent to the purchase of a certificate. In addition, title II of the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. 96-221, 94 Stat. 136 (March 31, 1980)) has charged the Depository Institutions Deregulation Committee with removing limitations on rates paid on savings accounts. Since commercial banks are not restricted in issuing negotiable certificates, the Board desires to give insured institutions full flexibility to compete with other depository institutions as deregulation of savings accounts unfolds.

Therefore, the Board is proposing to amend §§ 545.1-1, 545.1-3 and 563.3-1 to permit institutions to issue certificate accounts evidenced by negotiable instruments regardless of denomination. These amendments obviate the need for special regulations governing "marketable" certificates of deposit (§§ 545.1-4 and 563.3-3), and the proposal would rescind those regulations. The proposal would permit negotiable certificates of deposit to be issued pursuant to regulations governing certificate accounts generally, subject only to the requirement that the opinion of counsel to be filed with the FSLIC along with the certificate form must state expressly that the certificate would constitute a negotiable instrument pursuant to applicable law.

Institutions should note that negotiable certificates would be subject to the limitations on the maximum rate of return of 12 CFR Parts 526 and 1204. In addition, negotiable certificates with an original maturity of less than four years would be subject to the reserve requirements of 12 CFR Part 204 (Regulation D) issued by the Board of Governors of the Federal Reserve System. Lastly, it should be noted that the proposal would eliminate the express authorization contained in §§ 545.1-4 and 563.3-3 permitting institutions to use commercial banks with accounts insured by the Federal Deposit Insurance Corporation to sign and deliver certificate accounts and to collect and transmit funds. Because the regulations applicable to savings account brokerage generally (12 CFR 563.25, 1204.110) apply to all types of certificate accounts, restatement of those provisions of §§ 545.1-4 and 563.3-3 is unnecessary.

Maximum Term of Savings Accounts

Existing regulations (12 CFR 545.1-1, 545.1-3, 563.3-1, 563.3-2) provide that the term of a certificate account shall not exceed 10 years. Since the Board desires to give institutions maximum flexibility in designing certificate accounts, the Board is proposing to eliminate the 10-year limit on their maximum term.

Eurodollar Deposits

The existing regulation (12 CFR 545.24-4) governing the issuance of Eurodollar certificates by Federal associations requires a minimum denomination of $100,000 for certificates

and $10,000 for participations and a minimum maturity of five years. The regulation permits collateralization of Eurodollar certificates only if the aggregate amount of all association assets securing deposits and outside borrowings does not exceed 20 percent of total association assets. Since the Board desires to grant institutions full flexibility in designing certificate accounts, including Eurodollar certificates, the proposed amendments would eliminate the minimum denomination and maturity requirements and make these certificates subject only to the denomination and maturity requirements generally applicable to certificate accounts. Thus, the minimum term for certificates of $100,000 or more would be 14 days and for certificates of less than $100,000 would be 90 days. There would be no maximum maturity and no minimum denomination requirements for either certificates or participations.

The Board also is proposing to conform the FSLIC right to purchase collateral securing Eurodollar certificates to recently proposed changes in the FSLIC right of purchase for secured outside borrowings. *See* Board Resolution No. 81-640 (October 20, 1981); 46 FR 53673 (October 30, 1981). Thus, the FSLIC right of purchase would apply to any secured Eurodollar certificate regardless of the term of the certificate or type of collateral pledged. The collateral pool would be subject to sale or other disposition on behalf of a certificate holder only after the FSLIC received written notice of default and did not exercise its right to purchase the collateral at the proposed sale price. The FSLIC would have 7 days to exercise its right of purchase for any collateral consisting of liquid assets pursuant to 12 CFR 523.10, Government National Mortgage Association guaranteed single-family mortgage-backed securities, or U.S. Department of the Treasury securities; and 30 days to exercise its right to purchase for any other collateral.

Lastly, the Board is proposing to simplify the requirements of the Eurodollar deposit regulation designed to ensure that the certificates are not issued to citizens or residents of the United States, its territories or possessions. All of the certification requirements would be restated in a more succinct form, and the written confirmation to be delivered by underwriters to purchasers would be eliminated.

Savings Account Loans

The Board ruling found at 12 CFR 555.7 (1981) provides that a savings account with a sufficient balance must be in existence before a Federal association may make a loan on the security of that savings account, and that no part of the proceeds of the loan may be used as collateral for the loan. This ruling was based upon the previously limited authority of associations pursuant to the Home Owners' Loan Act of 1933, as amended ("HOLA"), to lend their funds only on the security of shares or on the security of first liens. Subsequently, the Board has authorized associations to raise capital in the form of savings deposits and the HOLA has been amended to expand the lending authority of Federal associations to include expressly loans on all savings accounts. Because of these subsequent developments, the Board has determined that the ruling on savings account loans no longer implements a statutory directive but instead limits the ability of Federal associations to compete with other depository institutions in offering "loophole" certificates. "Loophole" certificates are accounts for which the institution lends the depositor part of the funds necessary to meet minimum deposit requirements. Accordingly, the Board is proposing to rescind § 555.7. This action would permit Federal associations to issue savings accounts funded by the proceeds of a loan secured by the account without limit. Institutions should note, however, that the requirement of 12 CFR 526.2 that the rate of interest on a loan secured by a savings account be equal to at least one percent per year more than the rate of return on the account applies to loophole certificates, and that the penalty on early withdrawal of a loophole certificate is applied to the entire amount of the certificate.

Other Amendments

The Board also desires to make other simplifying and clarifying amendments to its regulations governing savings accounts, as described below:

1. The proposal would restate the filing requirements for Board approval of savings account forms in §§ 545.2 and 563.1. The restatement clarifies that filing is made with the Board's Principal Supervisory Agent (the President of the Federal Home Loan Bank of which the institution is a member) and simplifies current procedure by providing that after 30 days an institution may use the form unless the Principal Supervisory Agent has given written notice of objection to the form.

2. Current regulations permit institutions to pay interest in the form of a discount only in the case of certificates exempt from interest-rate ceilings. Upon consideration, the Board has determined that this restriction is unnecessary as long as the rate of return on a discounted certificate account does not exceed the rates permitted pursuant to 12 CFR Parts 526 and 1204. Therefore, the proposal would eliminate the current restriction on payment of interest in the form of a discount.

3. The proposal would eliminate the current prohibition of redemption provisions in the certificate accounts of insured institutions and provide for disclosure of such provisions.

4. The proposal restates § 563.31 ("Other insurance or guaranty") of the Insurance Regulations to clarify the rules contained therein. The proposed restatement would not affect the substance of § 563.31 as it has been interpreted by opinions of the Office of General Counsel.

5. The proposal would eliminate the requirement currently found in § 545.2 that a Federal association secure and retain signature cards for the owners of savings accounts. The Board believes that associations will use prudent methods of identifying accountholders and that the signature care requirement is unnecessary.

6. Lastly, the proposal would correct an ambiguity that occurred when the Federal Regulations were simplified in July of 1979. At that time the "marketable" certificate regulation was moved from § 545.1-5 to § 545.1-4. However, in the *Code of Federal Regulations* the regulation continues to be published at § 545.1-5 as well as § 545.1-4. The proposal would move the Eurodollar deposit regulation to § 545.1-4 and rescind § 545.1-5.

Regulatory Flexibility Act Certification

Pursuant to section 3 of the Regulatory Flexibility Act, Pub. L. No. 96-354, 94 Stat. 1164 (September 19, 1980), the Board certifies that the proposed amendments, if promulgated, would not have a significant economic impact on a substantial number of small entities. The proposed regulations would reduce a number of existing restrictions on the issuance of certificate accounts and give institutions greater flexibility in designing such accounts. The Board believes that increased flexibility will benefit institutions but does not believe that the amendments will have a significant economic impact on institutions.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend

Parts 545 and 555 of Subchapter C and Part 563 of Subchapter D, Chapter V of Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

1. Revise paragraph (f) of § 545.1–1 to read as follows:

§ 545.1–1 Rates of return on savings accounts.

* * * * *

(f) *Certificate accounts.* A Federal association's board of directors may authorize a certificate account to receive a rate of return higher than the regular rate but not exceeding the applicable maximum rate of return prescribed for certificate accounts in Part 526 of this chapter. Such account shall be maintained at not less than the applicable minimum amount required by that part for a continuous period, determined by the association, of at least: (1) 90 days or (2) 14 days for a public unit account as defined in § 526.1(m) or an account of $100,000 (50,000 if the association's home office is in Puerto Rico) or more. The certificate shall be in a form determined by the association's board of directors, set forth in the board's minutes, together with the date after which, and the class of savings for which, the form will be used. The certificate shall comply with the requirements of § 545.2 and provide for penalties for early withdrawal prescribed in § 545.4. Any part of a savings account meeting the amount requirement prescribed by the association under this paragraph may, at the holder's request, be exchanged for one or more certificates, and the association may, at the time of such exchange or on the next regular distribution date, distribute any undistributed earnings and any applicable bonus on the savings account, or part thereof, so exchanged.

* * * * *

2. Amend § 545.1–3 by removing paragraph (d) and revising paragraphs (b) and (c) to read as follows:

§ 545.1–3 Fixed-term savings deposits.

* * * * *

(b) *Payment of interest.* Subject to the provisions of Part 526 of this Chapter, a deposit association may pay interest at the rate determined by the association at the time that the deposit is accepted in accordance with § 545.3 of this Part. The annual rate of return paid on a savings deposit either may be fixed at the time the deposit is accepted or may vary according to a schedule, index or formula specified at the time the deposit is accepted. The term of such savings deposits shall be at least (i) 90 days or (ii) 14 days for a public unit account as defined in § 526.1(m) or an account of $100,000 ($50,000 if the association's home office is in Puerto Rico) or more.

(c) *Form of account.* Fixed-term savings deposits may be issued in the form of a passbook or certificate as determined by the association's board of directors: *provided*, that the form of account makes the disclosures required pursuant to § 545.2 of this Part.

3. Revise § 545.1–4 to read as follows:

§ 545.1–4 Eurodollar deposits.

(a) *Definitions.* As used in this section:

(1) "Eurodollar certificate" means a certificate of deposit, denominated in United States dollars, evidencing a Eurodollar deposit;

(2) "Eurodollar deposit" means a deposit by a person who is not a United States person;

(3) "United States person" means any national or resident of the United States of America, its territories and possessions, including any corporation, trust, estate, or other entity organized under the laws thereof or of any political subdivision thereof; and

(4) "Participation" means an interest or participation in a Eurodollar certificate.

(b) *General.* A Federal association may issue Eurodollar certificates in conformity with this section and § 545.1–1 or § 545.1–3 of this Part. Eurodollar certificates shall be insured pursuant to Part 564 of this Chapter: *provided*, that participations in Eurodollar certificates shall not be separately insured.

(c) *Collateralization of certificates.* Notwithstanding the provisions of §§ 545.24 and 545.1–2 of this Part, an association which is a deposit association as defined in § 545.1–2 of this Part may give security for Eurodollar deposits. For any secured Eurodollar certificate, the terms of the certificate shall provide that the Federal Savings and Loan Insurance Corporation shall receive prompt written notification of any default on the obligation and, before a sale or other disposition of any portion of the collateral, that the Corporation shall have thirty days after written receipt of notice of the proposed sale or other disposition to exercise a right to repurchase the collateral at the price to be paid at the sale or to acquire the collateral at the value to be assigned to it in such other disposition: *provided* that, if the collateral consists of liquid assets as defined in § 523.10 of this Chapter, Government National Mortgage Association guaranteed single-family mortgage-backed securities or U.S. Department of the Treasury securities, the Corporation shall have seven days to exercise the rights granted in this paragraph (c).

(d) *Requirements as to distribution.* (1) In exercising authority under this section, an association shall require an undertaking in writing from each purchaser of a Eurodollar certificate or participation therein to the effect that:

(i) If the purchaser is not a dealer, he will not offer, sell or deliver such Eurodollar certificate(s) or participations therein directly or indirectly in the United States of America or its territories or possessions or to nationals or residents thereof, including any corporation, trust, estate or other entity organized under the laws thereof or of any political subdivision thereof; or

(ii) If the purchaser is a dealer, he has not offered, sold or delivered, and agrees that he will not offer, sell or deliver, any such Eurodollar certificate(s) or participations therein directly or indirectly in the United States of America or its territories or possessions or to nationals or residents thereof and he is not purchasing any such Eurodollar certificate(s) or participations therein for the account of any such nationals or residents. Further, if the purchaser is a dealer, he shall agree that he will require the undertaking required by paragraph (d)(1)(i) of this section on any sales of the Eurodollar certificate(s) or participations therein and that he will inform the issuing association promptly if any beneficial ownership by a United States person comes to his attention.

(2) Upon completion of the distribution of any Eurodollar certificates or participations therein, the lead or managing underwriter shall deliver to the issuing association a certification as to the sale stating that to the knowledge of the underwriter no beneficial owner or owners of the Eurodollar certificate(s) or participations therein is a United States person; and, further, that the underwriter has not knowingly sold or offered for sale and will not sell or offer for sale, the Eurodollar certificate(s) or participations therein to any United States person.

(3) To the extent that beneficial ownership of a Eurodollar certificate or participation therein is acquired by a United States person, the return payable thereon will be the maximum permissible rate of return payable on a regular account from the time ownership is acquired by the United States person.

The issuing association shall take the necessary and appropriate action to ensure that the interest paid on a Eurodollar certificate, or that portion of a Eurodollar certificate attributable to a participation, beneficially owned by a United States person, is at the maximum permissible rate of return payable on a regular account of the issuing association.

(4) Upon issuance of any certificate under this section, the issuing association shall provide to the Board such information as the Board's Office of General Counsel and Office of Policy and Economic Research deem necessary for the Board to effectively monitor the use of the authority provided by this section.

(e) *Requirements as to certificates.* Each Eurodollar certificate and participation, including a temporary Eurodollar certificate or participation, shall bear on its face, in boldface type, a legend substantially in the following form:

This Eurodollar certificate has been issued pursuant to a regulation of the Federal Home Loan Bank Board, an agency of the United States government, which requires that the Eurodollar certificate be sold and interest at the amount stated hereon paid, only to purchasers who are not United States nationals or residents, and may not be directly or indirectly offered or sold in the United States of America, its territories or possessions, or to persons who are nationals or residents therof.

(f) *Requirements as to coupons.* Each coupon attached to a Eurodollar certificate or participation shall bear a legend substantially in the following form:

To the extent that beneficial ownership of the Eurodollar certificate or the participation therein to which this coupon appertains is acquired by a United States national or resident of the United States of America or its territories and possessions, including any corporation or other entity organized under the laws thereof or any political subdivision thereof, the return payable thereon will be the maximum permissible rate of return payable on a regular account of the association.

(g) *Pooling of certificates.* Notwithstanding the provisions of § 531.11 of this Chapter, a Federal association may engage in pooling or participate in pooling funds, or soliciting or promoting pooled accounts in connection with the issuance of a Eurodollar certificate in conformity with this section.

§ 545.1–5 [Removed]

4. Section 545.1–5 is removed.

5. Revise § 545.2 to read as follows:

§ 545.2 Evidence of account.

(a) *Evidence of account.* At the time of opening a savings account, a Federal association shall issue to the accountholder evidence of the accountholder's interest of the account and written evidence of the terms of the account contract. No form of account shall be issued without compliance with the requirements of paragraph (b) of this section.

(b) *Filing.* Prior to issuing any form of saving account, an association shall file with the Board (1) the form of account and (2) an opinion of its legal counsel that the form complies with the requirements of applicable law and regulations and the association's charter and bylaws. If the account is issued in negotiable instrument form, the opinion must state expressly that the form so qualifies under applicable law. Filing shall be made by delivering a copy of the form and legal opinion to the Board's Principal Supervisory Agent (as defined in § 545.14(a)(3) of this Part). The association may issue accounts in the form filed on the earlier of (i) the receipt by the association of written notice from the Principal Supervisory Agent that it has no objection to the form or (ii) 30 days after filing the form and opinion as evidenced by return receipt for certified or registered mail without receipt of written notice from the Principal Supervisory Agent that he has objection to the form. The association shall retain a copy of the legal opinion required by this paragraph for as long as accounts in that form are outstanding. The requirements of this paragraph shall not apply if an association issues a form of savings account that has been approved by the Board for use by Federal associations.

(c) *Disclosure.* Each certificate evidencing a fixed-term savings deposit authorized under § 545.1–3 of this Part or a certificate account authorized under § 545.1–1(f) of this Part, whether incorporated in an account book or printed as a separate certificate, shall display in easily-read type:

(1) The rate or anticipated rate of earnings to be paid, the basis, frequency, extent and limits of any variation in the rate over the term of the account, and the dates or frequency at which earnings are distributable;

(2) The amount of the account and the date on which it is issued;

(3) The minimum term (or for a savings deposit, the term) and minimum-balance requirement;

(4) Any provisions limiting the right of the holder to withdraw all or any portion of the account prior to its maturity;

(5) The penalty or penalties for withdrawal prior to expiration of the term;

(6) Any provision relating to redemption, repurchase or acceleration;

(7) Any provision relating to renewal when the term expires;

(8) Any provision relating to earnings after expiration of the term or any renewal period; and

(9) A provision converting the rate of return on the deposit, whenever the minimum balance may cease to be met, to the maximum return on a regular savings deposit.

(d) *Ownership of record.*—(1) *General rule.* Savings accounts of a Federal association shall be transferable only on the association's books on proper application by the transferee and acceptance of the transferee as a member on terms approved by the board of directors. An association may treat the holder of record of a savings account as the owner, regardless of any notice to the contrary, until the savings account is transferred on the association's books.

(2) *Exception.* Subparagraph (d)(1) of this section notwithstanding, an association may issue negotiable certificates in bearer form without recording ownership on the books of the association: *provided,* that the association's charter provisions regarding membership and voting shall not apply to such certificates.

(e) *Duplicate evidence of account.* Except for accounts issued in negotiable instrument form, an association shall issue a new evidence of account in the name of the holder of record, if the holder of record, or the legal representative of the holder, files an affidavit with the association that the accountholder's evidence of account was lost or destroyed, and that no part of the account has been pledged or assigned. The association's board of directors may require bond sufficient to indemnify the association against any loss that might result from issuance of the new evidence of account.

§ 545.24–4 [Removed]

6. Section 545.24—4 is removed.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

7. Revise § 563.1 to read as follows:

§ 563.1 Form of account.

(a) *Submission for approval.* At the time of the application for insurance, every applicant (except a Federal savings and loan association) shall submit to the Corporation for approval copies of all savings account, checking

account, share, membership, stock and demand or time deposit certificates, passbooks, and other forms of investment contracts proposed to be issued by the applicant as an insured institution. An applicant also shall submit for approval its charter, constitution, and bylaws, and all amendments thereto, affecting its securities and investment contracts. No insured institution (except a Federal savings and loan association) shall issue any form of checking or savings accounts, share, stock, membership or deposit certificates, passbooks, or other investment contract unless it has complied with the requirements of paragraph (b) of this section; but this approval requirement shall not apply with regard to forms for NOW accounts. Any insured institution which amends its charter, constitution, or bylaws affecting its securities or investment contracts shall promptly transmit such amendments to the Corporation for approval. Except with the written approval of the Corporation, no insured institution may issue or have outstanding any class of insured account having preference, whether as to time or amount in the event of liquidation, over any other class of insured account: *provided* that, where there may be a change from one type of account to another, a reasonable time, to be determined by the Corporation, may be allowed to effect such change. Each insured institution shall cause a true copy of its charter and bylaws and all amendments thereto to be available to members at all times in each office of the institution, and shall upon request deliver to any member a copy of such charter, constitution, bylaws, and amendments.

(b) *Filing.* Prior to issuing any form of savings account, an insured institution shall file with the Corporation (1) the form of account and (2) an opinion of its legal counsel that the form complies with the requirements of applicable law and regulations and the institution's charter and bylaws. If the account is issued in negotiable instrument form, the opinion must state expressly that the form so qualifies under applicable law. Filing shall be made by delivering a copy of the form and legal opinion to the Corporation's Principal Supervisory Agent (as defined in § 545.14(a)(3) of this Chapter). The institution may issue accounts in the form filed on the earlier of (i) the receipt by the institution of written notice from the Principal Supervisory Agent that he has no objection to the form or (ii) 30 days after filing the form and opinion as evidenced by return receipt for certified or registered mail without receipt of written notice from the Principal Supervisory Agent that he has objection to the form. The institution shall retain a copy of the opinion for as long as accounts in that form are outstanding. The requirements of this paragraph shall not apply if an institution issues a form of savings deposit that has been approved by the Corporation for use by insured institutions.

8. Amend § 563.3–1 by Revising paragraphs (c) and (d) to read as follows:

§ 563.3–1 Fixed-term accounts (certificate accounts).

* * * * *

(c) *Limitations.* In issuing certificate accounts, no institution shall:

(1) Provide for the payment of interest or the distribution of earnings on any certificate account in excess of the applicable maximum rate of return prescribed in Part 526 of this Chapter;

(2) Accept any fixed-term account of less than $100,000 for a term of less than 90 days (14 days for a public unit account as defined in §526.1(m) of this Chapter);

(3) Accept any fixed-term account of $100,000 or more for a term of less than 14 days;

(4) Provide for withdrawal from any certificate account prior to the expiration of its term, except as provided in paragraph (f) of this section; or

(5) Issue any form of certificate account, unless the institution has complied with the requirements of § 563.1 of this Part.

(d) *Disclosure.* Each certificate account shall include in its provisions and display in easily-read type:

(1) The rate or anticipated rate of earnings to be paid, the basis, frequency, extent and limits of any variation in the rate over the term of the account, and the dates or frequency at which earnings are distributable;

(2) The amount of the account and the date on which it is issued;

(3) The minimum term (or for a savings deposit, the term) and minimum-balance requirement;

(4) Any provisions limiting the right of the holder to withdraw all or any portion of the account prior to its maturity;

(5) The penalty or penalties for withdrawal prior to expiration of the term;

(6) Any provision relating to redemption, repurchase or acceleration;

(7) Any provisions relating to a renewal when the term expires;

(8) Any provisions relating to earning after expiration of the term or any renewal period; and

(9) A provision covering the rate of return on the certificate account, whenever the minimum balance requirement may cease to be met, to the maximum return on a regular account as defined in § 526.1(d) of this Chapter.

9. Amend § 563.3–2 by revising subparagraphs (b)(3)(i) and (b)(4), to read as follows:

§ 563.3–2 Certificates evidencing other accounts.

* * * * *

(b) *Limitations.* * * *

(3)(i) Issue any certificate account of less than $100,000 with a term of less than 90 days (14 days for a public unit account as defined in § 526.1(m) of this Chapter), or (ii) issue any certificate account of $100,000 or more with a term of less than 14 days;

* * * * *

(4) Issue any form of certificate under this section, unless the institution has complied with the requirements of § 563.1 of this Part; or

* * * * *

§ 563.3–3 [Removed]

10. Section 563.3–3 is removed.

11. Revise § 563.31 to read as follows:

§ 563.31 Other insurance or guaranty.

(a) *General rule.* An insured institution shall not acquire any insurance or guaranty of all or any part of the accounts of such insured institution in addition to the insurance provided by title IV of the National Housing Act. As used in this section, the term "accounts" shall have the same meaning as the term "withdrawable or repurchaseable shares, investment certificates, or deposits" where used in subsection (a) of section 405 of the National Housing Act, except that the term "accounts" shall not include borrowings.

(b) *Exceptions.* Paragraph (a) of this section notwithstanding:

(1) A Federal savings and loan association may acquire bond or security pursuant to § 545.24–2 of this Chapter; and

(2) To the extent that it has legal power to do so, an insured institution that is not a Federal association may acquire bond or security in conformity with § 545.24–2 as if such institution were a Federal deposit association as defined in § 545.1–2 of this Chapter.

(Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402, 403, 48 Stat. 1256, 1257, as amended (12 U.S.C. 1725, 1726); Reorg. Plan

No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Geological Survey

30 CFR Part 211

43 CFR Part 3400

Public Information Briefings on Proposed Rulemaking on Federal Coal Management Program

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public information briefings.

SUMMARY: Proposed rulemakings by the Bureau of Land Management and by the Geological Survey were published in the **Federal Register** on December 16, 1981 (46 FR 61390, 61424). The proposed rulemakings, which make revisions in the Federal coal leasing program appear at 43 CFR Part 3400 and 30 CFR Part 211, are coordinated and cross-referenced. The public information briefings announced in this notice are designed to provide the public with information on the proposed rulemakings and to provide the public with a forum where they may discuss the proposed rulemaking with the staffs of the Bureau of Land Management and the Geological Survey. It is hoped that these discussions will aid the public in the formulation of their comments on the proposed rulemakings. The comment period on the proposed rulemakings closes on February 16, 1982.

DATES: Briefings to be held January 11, 13, and 15, 1982 at 2:00 p.m. and 7:00 p.m.

ADDRESSES: The public information briefings on the proposed rulemakings are schedule to be held in the following locations:

Salt Lake City, Utah, Salt Palace, Room 220—Monday, January 11, 1982, 2:00 p.m. and 7:00 p.m.

Casper, Wyoming, Ramada Inn—Wednesday, January 13, 1982, 2:00 p.m. and 7:00 p.m.

Farmington, New Mexico, Farmington Civic Center, Room C, 200 West Arrington—Friday, January 15, 1982, 2:00 p.m. and 7:00 p.m.

FOR FURTHER INFORMATION CONTACT:

BILLING CODE 4310–84–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Docket No. AH036VA; A–3–FRL–1995–2]

State of Virginia; Proposed Revision of the Virginia State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Commonwealth of Virginia has submitted a revision to the Virginia State Implementation Plan (SIP). This revision is intended to meet the newly promulgated SIP requirements at 40 CFR 51.18(j) (45 FR 52676, August 7, 1980) for new source review for nonattainment purposes. This is a substantive revision of the Virginia Regulations for the Control and Abatement of Air Pollution.

DATE: Comments must be submitted on or before January 29, 1982.

ADDRESSES: Copies of the proposed SIP revision and the accompanying support documents are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Air Media & Energy Branch, Curtis Building, Sixth & Walnut Streets, Philadelphia, Pennsylvania 19106, Attn: Ms. Carol D. Peters

Virginia State Air Pollution Control Board, Room 801, Ninth Street Office Building, Richmond, Virginia 23219, Attn: Mr. John M. Daniel, Jr.

Public Information Reference Unit, EPA Library, Room 2922, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

All comments on the proposed revision submitted on or before January 29, 1982 will be considered and should be submitted to Mr. James E. Sydnor at the EPA Region III address stated above.

FOR FURTHER INFORMATION CONTACT:

Ms. Carol D. Peters at the Region III address stated above or call 215/597–9139.

SUPPLEMENTARY INFORMATION: On August 18, 1981 the Commonwealth of Virginia submitted a revision to the Virginia (SIP). This revision consists of the relocation of the new source review provisions for major stationary sources locating in nonattainment areas from Part II, General Provisions, to Part VIII, Permits—Major Stationary Sources and Major Modification, Prevention of Significant Deterioration Areas or Nonattainment Areas, of the Regulations for the Control and Abatement of Air Pollution. The provisions that are being relocated are also undergoing substantive modifications. Amendments are also included to Part I, Definitions, Part IV, Rule EX–4 Emission Standards for Particulate Emissions from Manufacturing Operations and Rule NS–4 Standards of Performance for Stationary Sources, and Part V, Special Provisions, as necessary to facilitate the above relocation. The revision is intended to meet the newly promulgated SIP requirements at 40 CFR 51.18(j), for new source review for nonattainment purposes.

The Commonwealth provided proof that after adequate public notice, public hearings were held with regard to these amendments. These hearings were held in accordance with the public hearing and notice requirements of 40 CFR 51.4 and all relevant State procedural requirements.

I. Part V Regulations

The Commonwealth of Virginia has requested that Part V be considered as part of the SIP because of recent additions to Part V. In the past, EPA had considered it for informational purposes only. Part V was first submitted August 14, 1975. Amendments to Part V were submitted October 20, 1976, September 20, 1978, September 6, 1979, September 21, 1979 and August 18, 1981.

Part V consists of Special Provisions, Standards of Performance for Visible Emissions and Fugitive Dust/Emissions (Rule NS–1), Standards of Performance for Odorous Emissions (Rule NS–2), Environmental Protection Agency Standards of Performance for New Stationary Sources (Rule NS–3), and Standards of Performance for Stationary Sources (Rule NS–4). EPA does not govern odorous emissions, and therefore will not act upon Rule NS–2. EPA delegated the authority for the Standards of Performance for New Stationary Sources (NSPS) to the Commonwealth of Virginia on December 30, 1975. The delegation was announced in the **Federal Register** on February 26, 1976 (41 FR 8346). Therefore, it is not necessary for EPA to act upon Rule NS–

3. In many cases, the Commonwealth has submitted amendments to the same regulations in Part V at different times over the past several years. In these instances, only the most recent version is being considered for review as a revision to the Virginia SIP. Because of the number of revisions being addressed today, the submittal date of each is shown in parenthesis.

Regulation/Section	Brief description
Special Provisions:	
5.01(8/14/75)	*Applicability.*—Part V shall be applicable to new and modified sources.
	Compliance
5.02 (a) (9/20/78)	Determines time limit for a new or modified source to be in compliance and which performance tests should be used.
(b) (10/20/76)	Requires new or modified sources to conduct performance tests.
(c) (10/20/76)	Requires installation, calibration, maintenance, and operation of monitoring and recording equipment.
(d) (10/20/76)	Provides for notification and reporting as required by this part.
(e) (9/20/78)	Requires owners to maintain and operate any affected facility and associated air pollution control equipment in a manner consistent with good air pollution control practices.
(f) (9/8/79)	*Stack Heights.*—Compliance with standards of performance as affected by stack height.
5.03 (10/20/76)	*Performance Testing.*—Details when, how to conduct, and how to report test methods and procedures.
5.04 (a) (9/20/78), (b)–(d) (10/20/76), (e) (9/20/78), (f) (10/20/76).	*Monitoring.*—Details regulations for continuous monitoring and recording emissions and alternatives.
5.05 (10/20/76)	*Notification, Records, and Reporting.*—Details the notification system, which records to maintain and reporting requirements.

RULE NS–1.—STANDARDS OF PERFORMANCE FOR VISIBILE EMISSIONS AND FUGITIVE DUST/EMISSIONS

Regulation/Section	Brief description
5.10 (9/20/78)	*Applicability and Designation of Affected Facility.*—Applicability of the provisions of this rule.
5.11	Reserved.
5.12 (9/21/79)	*Standard for Visible Emissions.*—Standard is given with an exception for one six-minute period in any one hour of not more than 30 percent opacity.
5.13 (8/14/75)	*Standard for Fugitive Dust/Emissions.*—Details precautions which may be used to prevent particulate matter from becoming airborne.
5.14 (9/20/78)	*Monitoring.*—Provisions for providing notifications and reports and maintaining records and monitoring results.
5.15 (9/20/78)	*Test Methods and Procedures.*—Reference Method 9 or any alternative method shall be used to determine compliance with the standard prescribed in § 5.12.
5.16 (9/20/78)	*Waivers.*—Provisions for granting waivers from the opacity emission limitation in Section 5.12.
5.17 (8/14/75)	Traffic Hazard

RULE NS–4.—STANDARDS FOR PERFORMANCE FOR STATIONARY SOURCES

Regulation/Section	Brief description
5.40 (9/8/79)	*Applicability and Designation of Affected Facility.*—For this rule.
5.41	Reserved.
5.42 (8/18/81)	*Standard for Stationary Sources.*—Affected facilities must comply with any applicable standard of performance, best available control technology (BACT) or any condition that may be placed upon the permit approval.
5.43 (8/18/81)	*Standard for Major Stationary Sources.*—(Nonattainment Areas)—Requirements for compliance with lowest achievable emission rate (LAER) for major stationary sources locating in nonattainment areas.
5.44 (8/18/81)	*Standard for Major Stationary Sources.*—(Prevention of Significant Deterioration Areas)—Requirements for compliance with BACT for major sources locating in PSD areas.
5.45 (9/8/79)	*Compliance With Other Standards.*

It should be noted that, under the terms of the delegation of authority of the NSPS program to the Commonwealth, the NSPS delegation takes precedence over any conflicting portion of the State regulations. Specifically, the Commonwealth is not authorized to establish equivalent or alternative test methods to which the Federal NSPS provisions apply.

EPA Evaluation: Part V, as submitted on the dates indicated above, has been reviewed and found to be acceptable except for section 5.02(f).

Section 5.02(f) repeats an ambiguous regulation (4.02(g)(4)) that EPA has previously noted as needing revising 45 FR 64218: September 29, 1980). This regulation should be revised as noted or eliminated because stack heights and supplementary control systems should not be considering in determining compliance with emission standards.

Section 5.02(a)(2) and 5.15 are acceptable but would be less ambiguous if the Commonwealth would add the phrase "if an alternative methods is specified in the permit" after the words "alternative method" in the first sentence of each. This addition would specify what methods the source would be using to determine compliance with the appropriate standard.

II. Relocation of New Source Review Provisions for Nonattainment Areas

The relocation of the new source review provisions for major stationary sources locating in nonattainment areas from Part II, General Provisions, to Part VIII, Permits—Major Stationary Sources and Major Modifications, also affects provisions in Part I, Definitions, Part IV, Rule EX–4 Emission Standards for Particulate Emissions from Manufacturing Operations and Rule NS–4 Standards of Performance for Stationary Sources, and Part V, Special Provisions. Part V has been discussed in Section I above. The following is a summary of changes made.

Part I—Definitions

Section 1.02
A. Additions
1. Administrator
2. Begin Actual Construction
3. Best Available Control Technology
4. Class I Area
5. Class II Area
6. Class III Area
7. Emission Unit
8. Federally Enforceable
9. Major Modification
10. Necessary Preconstruction Approvals on Permits
11. Prevention of Significant Deterioration Area
12. Secondary Emissions
13. State Enforceable
14. Uncontrolled Emission Rate

B. Modifications
1. Affected Facility
2. Allowable Emissions
3. Commence
4. Construction
5. Criteria Pollutant

6. Fugitive Emissions
7. Major Stationary Source
8. Modification
9. Potential to Emit
10. Public Comment Period
11. Reconstruction
12. Stationary Source

C. Relocated to Section 8.02
1. Lowest Achievable Emission Rate
2. Nonattainment Pollutant
3. Qualifying Pollutant
4. Reasonable Further Progress

Regulation/Section	Brief description
Part II	*General Provisions.*
2.31	Permits will now be issued under § 2.33 and Part VIII.
2.33(a), (b), (c), (d), (e), (g), (k), (m)	Provisions of §§ 8.01 or 8.02 shall prevail where there is a conflict with § 2.33. provisions relating to major stationary sources locating in nonattainment areas, are relocated to § 8.02. Significant emission rates are established.
Part IV:	
Rule EX–4	*Emission Standards for Particulate Emissions from Manufacturing Operations.*
4.41 (b)(4)	Relocated hot mix asphalt plant provisions are moved to § 2.33(g)(5).
Part VIII	*Permits—Major Stationary Sources and Major Modifications, Prevention of Significant Deterioration Areas or Nonattainment Areas.*
Preface	Instructions for the applicability of the three permitting sections, §§ 2.33, 8.01 and 8.02.
8.02	*Permits—Major Stationary Sources and Major Modifications Locating in Nonattainment Areas—new section.*
(a)	Definitions—Relocated or added:
	Stationary Source.
	Building, Structure, Facility.
	Installation.
	Potential to Emit.
	Major Stationary Source.
	Major Modification.
	Net Emissions Increase.
	Emission Unit.
	Reconstruction.
	Fixed Capital Cost.
	Secondary Emissions.
	Fugitive Emissions.
	Significant.
	Allowable Emissions.
	Actual Emissions.
	Lowest Achievable Emission Rate.
	Federally Enforceable.
	Begin Actual Construction.
	Commence.
	Necessary Preconstruction Approvals or Permits.
	Construction.
	Nonattainment Pollutant.
	Qualifying Pollutant.
	Reasonable Further Progress.
	Administrator.
(b)	*General.*
(c)	*Applications.*
(d)	*Information Required.*
(e)	*Standard/Conditions for Granting Permits.*
(f)	*Action on Permit Application.*
(g)	*Emission Testing for Stationary Sources.*
(h)	*Revocation of Permit.*
(i)	*Existence of Permit No Defense.*
(j)	*Application Review and Analysis.*
(k)	*Circumvention.*
(l)	*Interstate Pollution Abatement.*
(m)	*Offsets.*
(n)	*Exceptions.*
Appendix L	*Prevention of Significant Deterioration Areas—new appendix.*

It should be noted that the Commonwealth now has definitions under three sections: 1.02, 8.01 and 8.02. Section 1.02 definitions are those that apply generally, over all of the State Regulations. The definitions in § 8.01 apply only to that section. Section 8.01 contains the regulations, *Permits—Major Stationary Sources and Major Modifications Locating in Prevention of Significant Deterioration Areas (PSD).* The Commonwealth has received the delegation of authority from EPA to implement and enforce the PSD program (46 FR 29707 and 29753; June 3, 1981). The definitions contained in Section 8.02 are applicable to sections 8.02 and 5.43. The definitions of sections 8.01 and 8.02 shall take precedence over those in section 1.02 in the appropriate sections.

EPA Evaluation: The changes to Parts I, II, IV, and VIII, as summarized above, have been reviewed by EPA and are acceptable.

The definitions that are added or modified in Section 1.02 are acceptable for the general areas of the regulations. The relocation of several of the definitions from this section to section 8.02 are acceptable as they are more specifically for that section of the regulations.

The changes to Part II, General Provisions, and Part IV, Rule EX–4, Emission Standards for Particulate Emissions from Manufacturing Operations, are a result of the relocation of the permitting for major stationary sources and major modifications locating in nonattainment areas. As there are now similar provisions in section 8.02, these changes are acceptable.

Part VIII, section 8.02 is a new section and has been found to meet the newly promulgated requirements of 40 CFR 51.18(j).

Appendix L specifies which areas are subject to the PSD regulations for each criteria pollutant. Appendix L is acceptable.

Based on the above discussion, the Environmental Protection Agency is proposing to approve this SIP revision, pending submission of the correction to section 5.02(f) as indicated in the discussion of that section.

The public is invited to submit to the address stated above comments on whether the amendment to the Commonwealth of Virginia's regulations should be approved as a revision of the Virginia SIP.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not major because this action, if promulgated, only approves State actions and imposes no new requirements.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Pursuant to the provisions of 5 U.S.C. 605(b) the Administrator has certified that SIP approvals under sections 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 8709; January 27, 1981). This action, if promulgated, constitutes a SIP approval under sections 110 and 172 within the terms of the January 27 certification. This action only approves State actions. It imposes no new requirements.

(42 U.S.C. 7401–642)

Dated: November 12, 1981.

Peter N. Bibko,

Regional Administrator.

[FR Doc. 81–37188 Filed 12–29–81; 8:45 am]

BILLING CODE 6560–38–M

40 CFR Part 180

[PP OE2398/P209; PH-FRL-2014-4]

Atrazine; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of the herbicide atrazine. This proposed amendment to establish a maximum permissible level for residues of atrazine in or on guava was submitted by the Interregional Research Project No. 4 (IR-4).

DATE: Comments must be received on or before January 29, 1982.

ADDRESS: Written comments to: Donald Stubbs, Emergency Response Section, Registration Division (TS-767C), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703-557-7123).

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, PO Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition number OE2398 to EPA on behalf of the IR-4 Technical Committee and the Agricultural Experiment Station of Hawaii.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for combined residues of the herbicide atrazine (2-chloro-4-ethylamino-6-isopropylamino-*s*-triazine) and its metabolites in or on guava at 0.25 part per million (ppm). The petition was later revised to propose a tolerance of 0.05 ppm atrazine *per se* in or on guava.

The data submitted in the petition and all other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance for atrazine were a 2-year rat chronic feeding/oncogenic study with a no-observable-effect level (NOEL) of 100 ppm; a 2-year dog chronic feeding study with a NOEL of 150 ppm; a 3-generation rat reproduction study with a NOEL of 100 ppm (highest level fed). Data lacking for this pesticide include teratology studies in two mammalian species (preferably the rat and rabbit) and an oncogenicity study in mice (using technical material).

The acceptable daily intake (ADI), based on the 2-year dog feeding study (NOEL of 3.750 mg/kg/day) and using a 100-fold safety factor, is calculated to be 0.0375 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 2.25 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5 kg daily diet is calculated to be 0.0769 mg/day. The current action will utilize 0.01 percent of the ADI. Published tolerances utilize 3.42 percent of the ADI.

The nature of the residues is adequately understood and an adequate analytical method (gas-liquid chromatography with a microcoulometric detector) is available for enforcement purposes. There are presently no actions pending against the continued registration of these chemicals.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.220 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, which contains any of the ingredients listed herein, may request, on or before January 29, 1982, that this proposed rulemaking be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this proposed regulation. Comments must bear a notation indicating the document control number "[PP 0E2398/P209]". All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

As required by Executive Order 12291, the EPA has determined that this proposed rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this proposed regulation from the OMB review requirements of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels, or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Effective on: December 30, 1981.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, it is proposed that 40 CFR 180.220 be amended by adding and alphabetically inserting the raw agricultural commodity "Guava" in paragraph (a) to read as follows:

§ 180.220 Atrazine; tolerances for residues.

(a) * * *

Commodity	Part per million
* * * * *	
Guava	0.05
* * * * *	

[FR Doc. 81-36790 Filed 12-29-81; 8:45 am]

BILLING CODE 6560-32

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 61

[Docket No. FEMA-FIA]

National Flood Insurance Program Coverage, Sales and Loss Prevention Provisions

AGENCY: Federal Insurance Administration (FIA), Federal Emergency Management Agency (FEMA).

ACTION: Proposed rule.

SUMMARY: This rule will revise the National Flood Insurance Program (NFIP) regulations dealing with flood insurance coverage and the Standard Flood Insurance Policy (SFIP) terms and provisions. The purpose of the amendment is to revise the Program regulations to reflect improvements in the Flood Insurance Manual used by private sector property insurance agents and brokers in producing flood insurance business, coverage changes in the contract of flood insurance, and advances in flood hazard mitigation engendered by the President's Executive Order 11988 and FEMA's implementing regulations, at 44 CFR Part 9. In the case of the SFIP, Dwelling Form, the

amendment will also result in a more readable flood insurance contract, consistent with private sector personal insurance lines practices.

DATE: All comments received on or before February 11, 1982, will be considered before final action is taken on the proposed rule.

ADDRESS: Persons wishing to comment should submit comments in duplicate to the Rules Docket Clerk, Office of the General Counsel, Federal Emergency Management Agency, Washington, D.C. 20472.

FOR FURTHER INFORMATION CONTACT: Donald L. Collins, Federal Emergency Management Agency, Federal Insurance Administration, 500 "C" Street, S.W., Room 429, Washington, D.C. 20472, Telephone Number (202) 287-0740.

SUPPLEMENTARY INFORMATION: In these proposed amendments excessive legalese in the dwelling owner's policy form will be replaced, in considerable degree, with colloquial language more readily understandable to the lay person. Also, risk management will be enhanced by the addition of coverage restrictions keyed to the reduction of high risk flood losses. It is believed that this approach will contribute toward a more fiscally self-sufficient National Flood Insurance Program and assist materially in the realization of the Agency's hazard mitigation goals.

Accordingly, the substantive amendments to the Standard Flood Insurance Policy and related rules will provide, as follows:

1. In the Insuring Agreement and Definitions section of the SFIP, at Part 61, Appendix A, that the policy responds only to direct *physical* loss by flood to the insured property.

2. In providing contents coverage for personal property, the $500 limitation of coverage for works of art, gems, precious metals, jewelry and the like will be reduced to $250. Such items are easily transported away from flood waters.

3. Buildings located seaward of mean tide, or in, on or partially over water will not be covered.

4. Personal property pollutants will not be covered unless stored at safe elevations.

5. Mobile homes in special flood hazard areas will not be covered unless anchored to resist flotation or lateral movement.

6. In coastal high hazard areas, obstructions below the building's lowest floor, including solid walls, "breakaway" walls, personal property and equipment will not be covered.

7. The deductible will be raised to $500.00 for both buildings and contents losses and a $3,000.00 deductible will be made available as to property in V-Zones, at a commensurate reduction in premium.

8. Definitive provisions regarding cancellation and voidance of the contract of insurance will be added to the policy.

9. Machinery or equipment servicing the insured building below the lowest floor used for rating purposes or not contained within the foundation walls of the insured building will not be covered.

10. A mobile home (and its contents) located within a FEMA designated coastal high hazard area (Zones V1–V30 on a FEMA Flood Insurance Rate Map) which is not located in a mobile home park or subdivision in existence prior to April 1, 1982 will not be covered.

11. Replacement cost coverage will be made available only as to a single family dwelling, which is the principal residence of the insured and which is not a mobile home.

12. Definitive policy renewal procedures will be made a part of the contract of insurance.

13. FEMA is also considering alternative approaches to the provisions on cancellation or avoidance in situations when less than the full premium is paid at the time of the application or renewal. The alternatives include adjustment of the amount of insurance provided or adjustment of the premium as a condition of continued coverage. Comments on these or other possible alternatives are invited and will be considered in the formulation of the final rule.

In the body of Part 61, appropriate changes to the rules have been made to conform them to the proposed revisions of the Standard Flood Insurance Policy.

FEMA has determined based upon an Environmental Assessment that this proposed rule does not have significant impact upon the quality of the human environment. A finding of no significant impact is included in the formal docket file and is available for public inspection and copying at the Rules Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, 500 "C" Street, S.W., Washington, D.C. 20472.

These proposed regulations do not have a significant economic impact on a substantial number of small entities. Such regulations will not be required to undergo regulatory flexibility analysis.

In this connection, the specific policy changes and related rules proposed herein generally are not "significant", within the meaning of the Regulatory Flexibility Act, since most such rules are likely to affect only a relatively few commercial policyholders engaged in activities in respect to which full flood insurance coverage is curtailed by these proposed rules (e.g., manufacturing processes producing pollutants; commercial enterprises carried out beneath ground level). Accordingly, I hereby certify that these proposed regulations do not impact on areas of commerce to any significant degree.

This proposed amendment is not a "major rule" as defined in Executive Order 12291 dated February 17, 1981.

PART 61—INSURANCE COVERAGE AND RATES

Accordingly, Subchapter B of Chapter 1 of Title 44 is proposed to be amended at Part 61 as follows:

1. Section 61.5 (d) and (f) are revised to read as follows:

§ 61.5 Special terms and conditions.

* * * * *

(d) Each loss sustained by the insured is subject to a deductible provision under which the insured bears a portion of the loss before payment is made under the policy. The amount of the deductible for each loss occurrence is (1) for structural (i.e., insured building) losses, $500.00; and (2) for contents (i.e., insured personal property) losses, $500.00. At the policyholder's option, when purchasing a flood insurance policy covering property located in a coastal high hazard area the amount of the deductible for each loss occurrence may be $3,000.00. The loss deductible shall apply separately to each building loss and contents (personal property) loss including, as to each, debris removal and expenses incurred in connection with the removal of insured property away from the peril of flood.

* * * * *

(f) The following property and contents for residential structures are not insurable under the Program:

(1) Accounts, bills, currency, deeds, evidences of debt, money, coins, medals, postage stamps, securities, bullion, manuscripts or other valuable papers or records;

(2) Buildings located seaward of mean tide, or in, on or partially over water; fences, retaining walls, seawalls, outdoor swimming pools, bulkheads, wharves, piers, bridges, docks; other open structures located on or partially over water, including boat houses or other similar structures or buildings into which boats are floated or personal property in the open;

(3) Land values, lawn, trees, shrubs or plants, growing crops, or livestock; underground structures and equipment servicing the building including wells, septic tanks or septic systems; those

portions of walks, driveways and other paved or poured surfaces outside the foundation walls of the structure; and machinery or equipment not contained within the foundations walls of the described building or below the lowest floor used for rating the building in order to calculate the premium paid for the policy of flood insurance;

(4) Animals, birds, fish; aircraft and motor vehicles (other than motorized equipment pertaining to the services of the premises and not licensed for highway use) including their parts and equipment, trailers on wheels, watercraft including their furnishings and equipment; and business property;

(5) Units which are primarily containers, rather than buildings (such as gas and liquid tanks, chemical or reactor container tanks or enclosures, brick kilns, and similar units) and their contents (Silos and grain storage buildings including their contents, may be insured even though they may be of countainer-type construction);

(6) Contents which may become a pollutant to a community during flooding unless such contents are at or above the base flood elevation, or above ground level where there are no established elevations);

(7) Buildings and their contents, including machinery and equipment, which are part of the building, where 50 percent or more of the actual cash value of such buildings is below ground, unless the lowest level is at or above the base flood elevation (in the Regular Program) or the adjacent ground level (in the Emergency Program) by reason of earth having been used as an insulation material in conjunction with energy efficient building techniques;

(8) A mobile home located within a FEMA designated Special Flood Hazard Area that is not anchored to resist flotation or lateral movement by providing ties to ground anchors. This anchorage must be of a kind to resist flotation, collapse, or lateral movement by providing over-the-top and frame to ground anchors.

Specific requirements shall be that (i) over-the-top ties be provided at each of the four corners of the mobile home, with two additional ties per side at intermediate locations and mobile homes less than 50 feet long requiring one additional tie per side; (ii) frame ties be provided at each corner of the mobile home, with additional ties per side at intermediate locations and mobile homes less than 50 feet long requiring one additional tie per side; (iii) frame ties be provided at each corner of the home with five additional ties per side at intermediate points and all components of the anchoring system be capable of carrying a force of 4,800 pounds; and (iv) any additions to the mobile home be similarly anchored;

(9) A mobile home and its contents located within a FEMA designated coastal high hazard area which is not located in a mobile home park or subdivision in existence prior to April 1, 1982.

(10) On and after April 1, 1982, in any Zone V (numbered or unnumbered) identified on a FEMA Flood Insurance Rate Map, obstructions below the building's lowest floor, including solid walls, open wood constructed lattice "breakaway walls", insect screening or other "breakaway walls", and any personal property or other contents located below the building's lowest floor where the initial placement of any part of the aforementioned items occurs on or after April 1, 1982.

* * * * *

2. Section 61.5 (g) and (h) are revised to read as follows:

§ 61.5 Special terms and conditions.

* * * * *

(g) The following property and contents for non-residential structures are not insurable under the Program:

(1) All of the kinds of uninsurable property and contents referenced at paragraph (f) (1) through (10) of this section;

(2) Automobiles including parts and equipment, any self-propelled vehicle or machine, except motorized equipment not licensed for use on public thoroughfares and operated principally on the premises of the insured; watercraft or aircraft.

* * * * *

(h) The following rules provide for voidance or cancellation of coverage issued under a Standard Flood Insurance Policy by the insurer:

(1) Where an error(s) involving a misrating resulting in an underpayment of premium is apparent on the face of the flood insurance application, renewal endorsement or other form, or is caused by any willful misrepresentation or concealment of any material fact, including facts relevant to the rating of a flood insurance risk, by the insured, the agent or any other legal representative of the insured, the entire policy shall be void and all premium funds returned to the insured; in the case of willful misrepresentation or concealment, only, the entire policy shall be void as of the date the wrongful act was committed, and coverage prior to the date of the wrongful act shall not be affected.

(2) Where an error(s) involving a misrating resulting in an underpayment of premium is not apparent on the face of the flood insurance application, renewal, endorsement or other form and has not been willfully made by the insured, agent or other legal representative of the insured, upon discovery of the error by the insurer, the insured shall be given written notice of premium due by the insurer and, provided the insured remits the additional premium due to the insurer within thirty (30) days from the date the notice of additional premium due is mailed, the policy shall be reformed, from its inception date, to provide flood insurance coverage to the insured in the amounts of coverage initially requested by the insured;

(3) Where an error(s) involving a misrating resulting in an underpayment of premium is not apparent on the face of the flood insurance application, renewal, endorsement or other form, the entire policy may be cancelled, at the insurer's option, for nonpayment of premium in the event the insured refuses, after mailing of notice of additional premium due by the insurer, to pay the additional premium. Silence on the part of the insured after thirty (30) days have elapsed from the date of the mailing notice of premium due to the insured's mailing address, as shown on the flood insurance application, shall be deemed to be refusal to pay additional premium within the meaning of this subsection. Upon the insured's refusal to pay the additional premium due, the insurer may cancel the policy, in which case:

(i) The paid premium shall be deemed to be fully earned and the term of the policy shall be reduced by an adjustment reflecting the number of calendar year days (based on a 360 day calendar year) of requested coverage and limits the paid premium will purchase and, with the term thereby reduced, the policy shall continue in force to the end of the adjusted term, at which time the policy shall be deemed cancelled by the insurer and the insured; and

(ii) Paid premiums for policies issued in prior terms shall be deemed fully earned, with a commensurate reduction in the term of any such policy, and, in the event a claim has been paid under any such prior policy which arose after the end of the policy's term, as reduced to reflect the payment of insufficient premium, the insured shall be indebted to the insurer in the amount of the claim, unless, upon written demand for the additional premium due in respect to such prior policy, the insured pays the additional premium within thirty (30)

days from the date of mailing of the written demand.

* * * * *

3. Appendix A(1) referenced at § 61.13, Standard Flood Insurance Policy is revised to read as follows:

Appendix A(1)—Federal Emergency Management Agency, Federal Insurance Administration, Standard Flood Insurance Policy

(Issued Pursuant to the National Flood Insurance Act of 1968, or Any Acts Amendatory Thereof)

Dwelling Form—Insuring Agreement

Agreement of Insurance between the Federal Emergency Management Agency (FEMA), as Insurer (hereinafter known as "we", "our", and "us"), and the Insured (hereinafter known as "you" and "your"). Based upon your having paid the correct amount of premium, our reliance on the accuracy of the information and statements you have furnished in the application for this policy about the property to be insured and subject to all the terms of this policy, the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001 et seq.), and regulations issued by us (Title 44, Code of Federal Regulations), we insure you and your legal representatives against all "Direct Physical Loss by Flood" to the insured property as defined in the "Definitions Section" of this Agreement to the extent of the actual cash value of the property at the time of loss but not exceeding (1) the cost of replacing the insured building at the time of loss with material of like kind and quality and (2) the actual cash value of any insured personal property at the time of loss.

Now, therefore, in consideration of the foregoing and the mutual promises exchanged herein, we and you agree, further, as follows:

Article I—Persons Insured

We insure only:

A. The named insured and legal representatives;

B. Any mortgagee and loss payee named in the application and declaration page in the order of precedence and to the extent of their interest but for no more, in the aggregate, than the interest of the named insured.

Article II—Definitions

"ACTUAL CASH VALUE" means the replacement cost of an insured item of property in its condition at the time of loss, less the value of physical depreciation as to the item damaged.

"APPLICATION" means the statement made and signed by the Insured, or the Insured's agent, and giving information on the basis of which the Insurer determines the acceptability of the risk, the policy to be issued and the correct premium payment, which must accompany the application for the policy to be issued. The application is a part of this flood insurance policy.

"BUILDING" means a walled and roofed structure, other than a gas or liquid storage tank that is principally above ground and affixed to a permanent site, including a mobile home on foundation, subject to Article V(H), and a walled and roofed building in the course of construction, alteration or repair.

"CANCELLATION" means that ending of the insurance coverage provided by this policy prior to the expiration date.

"DECLARATION PAGE" is a computer generated summary of information furnished by the Insured in the application for insurance. The declarations page is a part of this flood insurance policy.

"DWELLING" means a building designed for use as a residence for no more than four families.

"DIRECT PHYSICAL LOSS BY FLOOD" means any loss in the nature of actual loss of or physical damage to the insured property (building or personal property) which is directly and proximately caused by a "flood" (as defined in this Agreement), while the insured property is located: 1. at the property address shown on the application for this insurance, which is a part of this Agreement; and 2. for forty-five days, at a place to which any of the property shall necessarily be removed by you in order to protect and preserve it from a flood or from the imminent danger of flood (provided, personal property so removed must be placed in a fully enclosed building to be insured against loss), in which case the reasonable expenses incurred by you including the value of your own labor at prevailing Federal minimum wage rates in moving your insured property away from the peril of flood and storing your property at the temporary location shall be reimbursed to you. The term "Direct Physical Loss By Flood" shall not include compensation for loss of use, loss profits, or loss resulting from interruption of business, profession or manufacture, or reimbursement for your additional living expenses, incurred by reason of your having to live in rented quarters while the insured building is being repaired or replaced, or allowance for any increased cost of repair or reconstruction as a result of any ordinance regulating reconstruction or repair, or other economic loss (this enumeration is not exclusive).

"EXPENSE CONSTANT": The expense constant is a flat charge per policy term, paid by the Insured to defray the Federal Government's policywriting and other expenses.

"EXPIRATION DATE" means the ending of the insurance coverage provided by this policy on the expiration date shown on the delaration page.

"FLOOD": Wherever in this policy the term "flood" occurs, it shall be held to mean:

A. A general and temporary condition of partial or complete inundation of normally dry land areas from:

1. The overflow of inland or tidal waters.

2. The unusual and rapid accumulation or runoff of surface waters from any source.

3. Mudslides (i.e., mudflows) which are proximately caused by flooding as defined in subparagraph A-2, above or by accumulations of water on or under the ground are akin to a river of liquid and flowing mud on the surfaces of normally dry land areas, including your premises.

B. The collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding the cyclical levels which result in flooding as defined in A-1 above.

"POLICY" means the entire written contract between us; it includes this printed form, the application and declarations page, any endorsements which may be issued and any renewal certificates indicating that coverage has been instituted for a new policy and policy term.

Article III—Losses Not Covered

We only provide coverage for direct physical loss by flood which means we do not cover:

A. Losses from other casualties, including:

1. Loss caused by theft, lost profits, fire, windstorm, wind, explosion, earthquake, land sinkage, land subsidence, landslide or any other earth movement except such mudslide (i.e., mudflow) or erosion as is covered under the peril of flood.

2. Loss caused by rain, snow, sleet, hail, water spray, freezing, thawing, the pressure or weight of ice or water; sewer backup and seepage of water unless your property has been, at the same time, damaged by a flood.

3. Water or moisture damage resulting primarily from any condition substantially confined to the insured building or from any condition which is within your control (including but not limited to design, structural or mechanical defects, failures, stoppages or breakages of water or sewer lines, drains, pumps, fixtures or equipment).

4. Loss caused intentionally by you.

B. Losses of the following nature:

1. Loss caused by your failure to use means reasonably accessible to you to save the property from loss at the time of a flood and to preserve the property after a flood; however, the reasonable expenses incurred by you in saving and preserving the property at the premises after a flood—including the value of your own labor at prevailing Federal minimum wage rates—may, at our sole option be a covered loss.

2. A loss which is already in progress as of 12:01 A.M. of the first day of the policy term.

3. A loss from a flood which is confined to your insured premises unless the flood is displaced over two acres of your premises.

4. A loss caused by your modification to the described premises or insured property, which materially increases the risk of flooding.

Article IV—Property Covered

We will pay for physical damage caused by flood to the building at the property address you have furnished, as well as the contents of the building, if you have purchased contents coverage, and provided you have paid the correct premium for the insurance, as follows:

A. We cover your dwelling, which includes:

1. A residential building, designed for principal use as a dwelling place for no more than four families;

2. Additions in contact with the dwelling;

3. Building equipment, fixtures and outdoor equipment used in connection with the dwelling while stored inside the dwelling or another fully enclosed building at the property address;

4. Materials and supplies to be used in constructing, altering or repairing the

dwelling or another building at the property address while stored inside a fully enclosed building at the property address or on an adjacent property at the time of loss;

5. Other buildings, at your option at the time of loss, in an amount up to 10% of the amount of insurance you have purchased to cover the dwelling, including additions to the dwellings; to the extent you exercise this option, you reduce the amount of insurance available to cover loss to the dwelling and, except for a building used only for private garage purposes, this option may not be chosen so as to extend coverage to buildings:

(i) rented or leased in whole or in part (or held for such use) to any person other than a tenant of the dwelling as it is described at A(1) of this Article, or (ii) used in whole or in part for commercial manufacturing or farming purposes (or held for such uses).

B. We cover your Personal Property as contents under the policy, subject to "C" below, and that belonging to members of your family in your household and, at your option within the limits of contents coverage purchased for personal property loss, guests' and servants' personal property and the personal property of others for which you may be responsible—all while stored within a building at the property address. Personal property in the open and not stored in a building shall not be covered against loss by flood under this policy. At your option at the time of loss, in an amount up to 10% of the amount of insurance you have purchased to cover personal property, this policy will also cover:

1. Loss to improvements, alterations, and additions made by you, as a Tenant, to a building at the property address;

2. if you are an individual condominium unit owner, loss to the interior walls, floors, and ceilings of your unit that are not otherwise covered under a condominium association policy.

C. Limitation: As a limitation on "B", above, we shall not reimburse you for loss in any one flood as to the following personal property to the extent the total loss of such property exceeds $250.00: paintings, etchings, pictures, tapestries, art, glass windows and other works of art (such as but not limited to statuary, marbles, bronzes, antique furniture, rare books, antique silver, porcelains, rare glass or bric-a-brac), watches, necklaces, bracelets, gems, precious or semi-precious stones, articles of gold, silver, or platinum and furs or any article containing fur which represents its principal value.

D. Debris Removal: We cover any expense you incur, including the value of your own labor at prevailing Federal minimum wage rates, as a result of removing debris of or on the insured building from the property address you have furnished so long as the debris problem was directly caused by a flood.

E. Demolition Coverage: You may apply all or part of the proceeds of any flood insurance claim you make under this policy toward the expenses you incur in removing damaged portions of the insured building from the property location following a flood loss.

Article V—Property Not Covered

WE DO NOT COVER and will not pay for damage to or loss of any of the following:

A. Accounts, bills, currency, deeds, evidences of debt, money, coins, medals, postage stamps, securities, bullion, manuscripts or other valuable papers or records.

B. Buildings located seaward of mean tide, or in, on or partially over water; fences, retaining walls, seawalls, outdoor swimming pools, bulkheads, wharves, piers, bridges, docks; other open structures located on or partially over water, including boat houses or other similar structures or buildings into which boats are floated or personal property in the open.

C. Land values, lawn, trees, shrubs or plants, growing crops, or livestock; underground structures and equipment including wells, septic tanks or septic systems; those portions of walks, driveways and other paved or poured surfaces outside the foundation walls of the structure; and machinery or equipment servicing the building not contained within the foundations walls of the described building or below the lowest floor used for razing the building in order to calculate the premium paid for this policy.

D. Animals, birds, fish; aircraft and motor vehicles (other than motorized equipment pertaining to the services of the premises and not licensed for highway use) including their parts and equipment, trailers on wheels, watercraft including their furnishings and equipment; and business property.

E. Units which are primarily containers, rather than buildings (such as gas and liquid tanks, chemical or reactor container tanks or enclosures, brick kilns, and similar units) and their contents (silos and grain storage buildings including their contents, may be insured even though they may be of container-type construction).

F. Contents which may become a pollutant to a community during flooding unless such contents are at or above the base flood elevation, or above ground level where there are no established elevations).

G. Buildings and their contents, including machinery and equipment, which are part of the building, where 50 percent or more of the actual cash value of such buildings is below ground, unless the lowest level is at or above the base flood elevation (in the Regular Program) or the adjacent ground level (in the Emergency Program) by reason of earth having been used as an insulation material in conjunction with energy efficient building techniques.

H. A mobile home located within a FEMA designated Special Flood Hazard Area that is not anchored to resist flotation or lateral movement by providing ties to ground anchors. This anchorage must be a kind to resist flotation, collapse, or lateral movement by providing over-the-top and frame to ground anchors.

Specific requirements shall be that (1) over-the-top ties be provided at each of the four corners of the mobile home, with two additional ties per side at intermediate locations and mobile homes less than 50 feet long requiring one additional tie per side; (2) frame ties be provided at each corner of the mobile home, with additional ties per side at intermediate locations and mobile homes less than 50 feet long requiring one additional tie per side; (3) frame ties be provided at each corner of the home with five additional ties per side at intermediate points and all components of the anchoring system be capable of carrying a force of 4,800 pounds; and (4) any additions to the mobile home be similarly anchored.

I. A mobile home and its contents located within a FEMA designated coastal high hazard area (Zones VI–V30 on a FEMA Flood Insurance Rate Map) which is not located in a mobile home park or subdivision in existence prior to April 1, 1982.

J. On and after April 1, 1982, in any Zone V (numbered or unnumbered) identified on a FEMA Flood Insurance Map, obstructions below the building's lowest floor, including solid walls, open wood constructed lattice "breakaway walls", insect screening or other "breakaway walls", and any personal property or other contents located below the building's lowest floor where the initial placement of any part of the aforementioned items occurs on or after April 1, 1982.

Article VI—Deductibles

A. Each loss sustained by you is subject to a deductible provision under which you bear a portion of the loss before payment is made under the policy.

E. The loss deductible shall apply separately to each building loss and personal property (contents) loss including, as to each, debris removal, and any expenses incurred under Article II or III in connection with the removal of insured property.

C. The amount of the deductible for each loss occurrence is determined as follows: we shall be liable only when such loss exceeds $500 or, at your option, should you so choose when purchasing a policy covering property located in a coastal high hazard area, $5,000.00.

Article VII—Replacement Cost Provisions

These provisions shall apply only to a Single Family Dwelling which is the principal residence of the insured and which is covered under this policy. Outdoor radio and television antennas and aerials, carpeting, awnings, domestic appliances and other outdoor equipment: all whether attached to the building structure or not, are excluded from the replacement cost coverage. For purposes of this Article VII, a single family dwelling qualifies as your principal residence provided that, at the time of the loss, you or your spouse have lived in your building for either (1) 80% of the calendar year immediately preceding the loss or (2) 80% of the period of your ownership of the insured building, if less than one calendar year immediately preceded the loss.

A. We will pay you the full cost of repair or replacement of the flood damaged portions of your dwelling, without deduction for depreciation, as follows:

1. Under the Emergency Program of the National Flood Insurance Program, if at the time of loss the amount of insurance covering the dwelling is 80% of its full replacement cost of $35,000; and

2. Under the Regular Program of the National Flood Insurance Program, if at the time of loss insurance covering the dwelling is 80% of its full replacement cost or $70,000,

3. In determining whether the amount of insurance covering your dwelling is 80% or more of its full replacement cost, we will not count—in arriving at the 80% figure—the cost of excavations, underground flues and pipes, underground wiring and drains, and brick, stone and concrete foundations, piers and other supports which are below the under surface of the lowest basement floor, or where there is no basement, which are below the surface of the ground inside the foundation walls,

4. In any case, the amount we pay you shall not exceed the lesser of the amount of coverage you have purchased to cover the dwelling or the replacement cost of that portion of the dwelling damaged or destroyed by a flood.

B. We will not pay you the full cost of repair or replacement of the flood damaged portions of your dwelling without deduction for depreciation if, at the time of loss, the amount of insurance convering the dwelling is less than 80% of its full replacement cost and less than $35,000 under the Emergency Program or $70,000 under the Regular Program (determination on whether you have full replacement cost coverage will be as described at A(3), above). In this event, we will pay you, in respect to your flood loss, the larger of the following amounts:

1. The actual cash value (meaning replacement cost less depreciation) of that part of the dwelling damaged or destroyed; or

2. That portion of the full cost of repair or replacement without deduction for depreciation of that part of the dwelling damaged or destroyed, which the total amount of insurance applicable to said dwelling bears to 80% of the full replacement cost of such dwelling. For example, assume your dwelling had a replacement cost value of $20,000 at the time of loss and you had purchased dwelling coverage of $12,000. Assume, further, that the cost to replace the damaged portion of your dwelling is $800. The amount to be paid you under this provision would be determined as follows:

$12,000 (amount of coverage)

$16,000 (80% of replacement cost) × 800 (damage)

Equals $600 (¾ × 800).

In addition, if 80% of the full replacement cost of the dwelling exceeds $35,000 under the Emergency Program or $70,000 under the Regular Program, the program figure will be used in determining the amount to be paid in place of the 80% figure. For example, assume your dwelling had a replacement cost value of $50,000 and you had purchased $30,000 of dwelling coverage. Assume, further, that the cost to replace the damaged portion of your dwelling is $21,000. The amount to be paid you under the Emergency Program would be determined as follows:

$30,000 (amount of coverage) × $21,000

$35,000 (Emergency Program available limit of coverage)

Equals $18,000 (⅞ × 21,000).

C. These Replacement Cost Provisions do not apply to any mobile home and personal property covered under this policy, nor do they apply to any loss where insured property is abandoned or remains as debris at the property address following a loss.

D. If your dwelling sustains a total loss or if we should pay you the entire building loss proceeds under these replacement cost provisions, there is no requirement that you rebuild the building at the insured property address.

Article VIII—General Conditions and Provisions

A. *Pair and Set Clause:* If you lose an article which is part of a pair or set, we will have the option of paying you an amount equal to the cost of replacing the lost article, less depreciation, or an amount which represents the fair proportion of the total value of the pair or set that the lost article bears to the pair or set.

B. *Concealment, Fraud:* We will not cover you under this policy if you have sworn falsely, or willfully concealed or misrepresented any material fact or done any fraudulent acts concerning this insurance.

C. *Other Insurance:* You may have other flood insurance covering the dwelling and personal property and, if you have such other insurance in effect at the time of a loss, we will not pay a greater portion of any loss than the proportion of our insurance to the total flood insurance covering the dwelling and personal property.

D. *Amendments, Waivers, assignment:* This Standard Flood Insurance Policy cannot be amended nor can any of its provisions be waived without the express written consent of the Federal Insurance Administrator. No action we take under the terms of this policy can constitute a waiver of any of our rights. Assignment of this policy is, however, allowed without the consent of the Administrator.

E. *Cancellation of Policy By You:*

1. You can cancel this policy at any time but a refund of premium money will only be made to you when:

a. You cancel because you have transferred ownership of the insured property to someone else. In this case, we will refund to you, once we receive your request for cancellation accompanied by the original policy, the excess of premiums paid by you which apply to the unused portion of the policy's term, pro-rata but with retention of the expense constant.

b. You cancel because we have determined that your property is not, in fact, in a special flood hazard area; and you were required to purchase flood insurance coverage by a private lender or Federal agency pursuant to P.L. 93–234, § 102; and the lender or Federal agency no longer requires the retention by you of the coverage. In this event, if no claims have been paid or are pending, your premium payments will be refunded to you in full, according to our applicable regulations, but with retention of the expense constant.

F. *Cancellation or Voidance of Policy By Us:*

1. Where an error(s) involving a misrating resulting in an underpayment of premium to us is apparent on the face of the flood insurance application, renewal endorsement or other form, or is caused by any willful misrepresentation or concealment of any material fact, including facts relevant to the rating of a flood insurance risk, by you, your agent or any other legal representative, the entire policy shall be void (that is, it never became effective) and all premium payments will be returned to you; in the case of willful misrepresentation or concealment, only, the entire policy shall be void as of the date the wrongful act was committed, and coverage prior to the date of the wrongful act shall not be affected;

2. Where an error(s) involving a misrating resulting in an underpayment of premium to us is not apparent on the face of the flood insurance application, renewal, endorsement or other form and has not been willfully made by you, your agent or other legal representative, upon our discovery of the error, you shall be given written notice of premium due and, provided you remit the additional premium due within thirty (30) days from the date the notice of additional premium due is mailed, the policy shall be reformed, from its inception date, to provide flood insurance coverage to you in the amounts of coverage you initially requested;

3. Where an error involving a misrating resulting in an underpayment of premium to us is not apparent on the face of the flood insurance application, renewal, endorsement or other form, we may at our sole option, cancel the entire policy for nonpayment of premium in the event you refuse, after we mail to you a notice of additional premium due, to pay the additional premium. Silence on your part after thirty (days) have elapsed from the date of the mailing of notice of premium due to your mailing address, as shown on the flood insurance application, shall be deemed to be refusal to pay additional premium within the meaning of this policy condition. Upon your refusal to pay the additional premium due, we may cancel the policy, in which case:

(a) Any premium you paid shall be deemed to be fully earned by us and the term of the policy shall be reduced by an adjustment reflecting the number of calendar year days (based on a 360 day calendar year) of requested coverage and limits the paid premium will purchase and, with the term thereby reduced, the policy shall continue in force to the end of the adjusted term, at which time the policy shall be deemed cancelled; and

(b) Any paid premiums for policies issued in prior terms shall be deemed fully earned, with a commensurate reduction in the term of any such policy, and, in the event a claim has been paid under any such prior policy which arose after the end of the policy's term, as reduced to reflect the payment of insufficient premium, you shall be indebted to us in the amount of the claim, unless, upon written demand for the additional premium due in respect to such prior policy, you pay the additional premium within thirty (30) days from the date of mailing of the written demand.

4. This policy will be considered void if we determine:

a. The property listed on the application is not eligible for coverage;

b. The community in which the property is located was not participating in the National Flood Insurance Program on the policy's

inception date and did not qualify as a participating community during the policy's term and before any loss for which you may receive compensation under the policy.

5. This policy will be considered void if, during the term of the policy, the participation in the National Flood Insurance Program of the community in which your property is located ceases, in which case the policy shall be deemed void effective the end of the last day of the policy year in which such cessation occurred and shall not be renewed. In the event the voided policy was for a term of three years, you shall be entitled to a refund of any premium applicable to the remainder of the policy's term after voidance of the policy.

G. *Policy Renewal:* The term of this policy commences on its inception date and ends on its expiration date, as shown on the "Declarations Page" which is attached to the policy. We are under no obligation to send you any renewal notice or other notice that your policy term is coming to an end and the receipt of any such notice by you shall not be deemed to be a waiver of this provision on our part. We are under no obligation to assure that policy changes reflected in endorsements submitted by you during the policy term and accepted by us are included in any renewal notice or new policy which we send to you. "Policy changes" includes the addition by you of new coverage (e.g. contents coverage added to a building coverage policy or vice versa) or any increases in the amounts of coverage.

This policy shall not be renewed and the coverage provided by its shall not continue into any successive policy term unless the premium payment for any such successive policy term is received by us at the National Flood Insurance Program (NFIP), prior to the expiration date of this policy. The renewal premium payment shall be deemed to be received by the NFIP if the renewal payment is mailed to the NFIP prior to the expiration date and is received by the NFIP prior to or within five (5) days following the expiration date or if the renewal payment is mailed by certified mail to the NFIP prior to the expiration date. In all other cases, whether the renewal premium payment is received by the NFIP after the expiration date of this policy or not, this policy shall be deemed terminated as of the expiration date of the last policy term for which the premium payment was timely received by the NFIP and, in that event, we shall not be obligated to provide you with any cancellation, termination, policy lapse, or policy renewal notice advising you of any such cancellation, termination, policy lapse or policy renewal; *Provided,* however, with respect to any mortgagee (or trustee) named in the declarations form attached to this policy, this insurance shall continue in force only for the benefit of such mortgagee (or trustee) for 30 days after written notice to the mortgagee (or trustee) of termination of this policy, and shall then terminate.

H. *Alterations and Repairs:* You may, at any time, make alterations, additions and repairs to the insured property and complete structures in the course of construction. Consistent with your obligation to protect insured property damaged by a flood from durther damage, as set forth in "I", below, you may also—following a loss by flood—make reasonable repairs of a temporary or permanent nature to protect the damaged, insured property from further damage and, to the extent you keep an accurate record of such repair expenditures, the cost of any such repairs—including the value of your own labor at prevailing Federal minimum wage rates—shall be included in determining the amount of loss covered by this policy.

I. *Requirements in Case of Loss:* Should a flood loss occur to your insured property, you must:

1. Notify us in writing as soon as practicable;

2. Protect the property from further damage;

3. As soon as reasonably possible, separate the damaged and undamaged property, putting it in the best possible order so that we may examine it; and

4. Within 60 days after the loss, send us a proof of loss, which is your statement as to the amount you are claiming under the policy signed and sworn to by you and furnishing us with the following information:

a. The date and time of the loss,

b. A brief explanation of how the loss happened,

c. Your interest in the property damaged (for example, "owner") and the interests, if any, of others in the damaged property,

d. The actual cash value of each damaged item of insured property after depreciation is deducted from the cost of replacement of the property (unless the policy's "REPLACEMENT COST PROVISIONS" apply, in which case the replacement cost without allowance for depreciation should be furnished) and the amount of damages sustained,

e. Names of mortgagees or anyone else having a lien, charge or claim against the insured property,

f. Details as to any other contracts of insurance covering the property, whether valid or not,

g. Details of any changes in ownership, use, occupation, location or possession of the insured property since the policy was issued.

h. Details as to who occupied any insured building at the time of loss and for what purpose, and

i. The amount you claim is due under this policy to cover the loss, including statements concerning:

(i) The limits of coverage stated in the policy,

(ii) The cost to repair or replace the damaged property (whatever costs less).

5. The insurance adjuster whom we hire to investigate your claim may furnish you with a proof of loss form, and she or he may help you to complete it. However, this is a matter of courtesy only, and you must still send us a proof of loss within 60 days after the loss even if the adjuster does not furnish the form or help you complete it. In completing the proof of loss, you must use your own judgment concerning the amount of loss and the justification for that amount; the adjuster is not authorized to approve or disapprove claims or to tell you whether your claim will be approved by us.

J. *Our Options After a Loss.* Options we may, in our sole discretion, exercise after a loss include the following:

1. *Evidence of Loss*—If we specifically request it, in writing, you may be required to furnish us with a complete inventory of the destroyed, damaged and undamaged property, including details as to quantities, costs, actual cash values, amounts of loss claims, and any written plans and specifications for repair of the damaged property which you can make reasonably available to us.

2. *Examination Under Oath*—We may require you to show us or our designee, the damaged property, to be examined under oath by our designee and to sign any transcripts of such examinations; to, at such reasonable times and places as we may designate, permit us to examine and make extracts and copies of all books of accounts, bills, invoices and other vouchers, or certified copies thereof if the originals are lost, pertaining to the damaged property.

3. *Options to Repair or Replace*—We may take all or any part of the damaged property at the agreed or appraised value and, also, to repair, rebuild or replace the property destroyed or damaged with other of like kind and quality within a reasonable time, on giving you notice of our intention to do so within 30 days after the receipt of the proof of loss herein required under "G", above.

4. *Adjustment Options*—We may adjust loss to any insured property of others with the owners of such property or with you for their account. Any such insurance under this policy shall not inure directly or indirectly to the benefit of any carrier or other bailee for hire.

K. *When Loss Payable.*—Within 60 days after you file your proof of loss, we will either approve the claim, reject the proof of loss, deny the claim, or request appraisal. If we approve the claim, we will pay you within 60 days from the date you filed the proof of loss. If either of us requests appraisal, we will pay your claim within 60 days after the award of the appraisers and umpire is filed. If we reject your proof of loss because of the amount claimed, but do not deny the entire claim, you may file another proof of loss as long as it is filed within 60 days of the date of the loss or any extension of time allowed by the Administrator.

L. *Abandonment.* You may not abandon damaged or undamaged insured property to us.

M. *Appraisal.* If at any time after a loss, we are unable to agree with you as to the actual cash value—or, if applicable, replacement cost—of the damaged property so as to determine the amount of loss to be paid to you, then, on the written demand of either one of us, each of us select a competent and disinterested appraiser and notify the other of the appraiser selected within 20 days of such demand. The appraisers shall first select a competent and disinterested umpire; and failing for 15 days to agree upon such umpire, then, on your request or our request, such umpire shall be selected by a judge of a court of record in the State in which the insured property is located. The appraisers shall then appraise the loss, stating separately

replacement cost, actual cash value and loss to each item; and, failing to agree, shall submit their differences, only, to the umpire. An award in writing, so itemized, of any two (appraisers or appraiser and umpire) when filed with us shall determine the amount of actual cash value and loss or, should this policy's replacement cost provisions apply, the amount of replacement cost and loss. Each appraiser shall be paid by the party selecting him and the expenses of appraisal and umpire shall be paid by both of us equally.

N. *Loss Clause.* If we pay you for damage to property sustained in a flood loss, you are still eligible, during the term of the policy, to collect for a subsequent loss due to another flood. Of course, all loss arising out of a single, continuous flood of long duration shall be adjusted as one flood loss.

O. *Mortgagee Clause.* (Applicable to building coverage only.)

Loss shall be payable to mortgagees (or trustees) named in the Application and Declaration page, to the extent of their interest and in the order of precedence.

1. *Our* Duties

We will:

(a) protect the mortgagee's interests in an insured building in the case of breach of warranty, increase in hazard, change of ownership, or foreclosure if the mortgagee has no knowledge of these conditions,

(b) give mortgagee 30 days notice before cancelling this policy.

Mortgagee's Duties

The mortgagee will

(a) Furnish proof of loss within 60 days if the *insured person* fails to do so

(b) Pay upon demand any premium due (if the *insured person* fails to do so),

(c) Notify *us* of any change of ownership or occupancy or any increase in hazard of which the mortgagee has knowledge,

(d) Give *us* the right of recovery against any party liable for loss,

(e) After a loss, permit *us* to satisfy the mortgage requirements and receive full transfer of the mortgage.

P. Conditions for filing a lawsuit—You may not sue us to recover money under this policy unless you have complied with all the requirements of the policy. If you do sue, you must start the suit within twelve (12) months from the date we mailed you notice that we have denied your claim, or part of your claim, and you must file the suit in the United States District Court for the district in which the insured property was located at the time of the loss.

Q. Subrogation—Whenever we make a payment for a loss under this policy, we are subrogated to your right to recover for that loss from any other person. That means that your right to recover for a loss that was partly or totally caused by someone else is automatically transferred to us, to the extent that we have paid you for the loss. We may require you to acknowledge this transfer in writing. After the loss, you may not give up our right to recover this money or do anything which would prevent us from recovering it. If you make any claim against any person who caused your loss and recover any money, you must pay us back first before you may keep any of that money.

Article IX—Liberalization Clause

While this policy is in force, should we have adopted any forms, endorsements, rules or regulations by which this policy could be broadened or extended for your benefit by endorsement or substitution of policy form, then, such matters shall be considered to be incorporated in this policy without additional premium charge and shall inure to your benefit as though such endorsement or substitution of policy form had been made.

Article X—What Law Governs

This policy is governed by the flood insurace regulations issued by FEMA, the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001, *et seq.*) and Federal common law.

IN WITNESS WHEREOF, we have signed this policy below and hereby enter into this Insurance Agreement.

Jeffrey S. Bragg,

Administrator, Federal Insurance Administration.

4. Appendix A(2) referenced at § 61.13 of the Standard Flood Insurance Policy is revised, in the following particulars:

(a) A new provision is added just before the provision titled "DEFINITION OF 'FLOOD' ", as follows:

Persons Insured

The following are insured under this policy:

A. The named insured and legal representatives:

B. Any mortgagee and loss payee named in the application and declaration page in the order of precedence and to the extent of their interest but for no more, in the aggregate, than the interest of the named insured.

* * * * *

(b) The provision titled "DEFINITION OF 'FLOOD' " is removed and a new provision titled "DEFINITIONS" is added in its place and stead, as follows:

Definitions

Article II—Definitions

"ACTUAL CASH VALUE" means the replacement cost of an insured item of property in its condition at the time of loss, less the value of physical depreciation as to the item damaged.

"APPLICATION" means the statement made and signed by the Insured, or the Insured's agent, and giving information on the basis of which the Insurer determines the acceptability of the risk, the policy to be issued and the correct premium payment, which must accompany the application for the policy to be issued. The application is a part of this flood insurance policy.

"BUILDING" means a walled and roofed structure, other than a gas or liquid storage tank that is principally above ground and affixed to a permanent site, including a walled and roofed building in the course of construction, alteration or repair.

"CANCELLATION" means that ending of the insurance coverage provided by this policy prior to the expiration date.

"DECLARATION PAGE" is a computer generated summary of information furnished by the Insured in the application for insurance. The declarations page is a part of this flood insurance policy.

"DIRECT PHYSICAL LOSS BY FLOOD" means any loss in the nature of actual loss of or physical damage to the insured property (building or personal property) which is directly and proximately caused by a "flood" (as defined in this Agreement), while the insured property is located: 1. at the property address shown on the application for this insurance, which is a part of this Agreement; and 2. for forty-five days, at a place to which any of the property shall necessarily be removed in order to protect and preserve it from a flood or from the imminent danger of flood (provided, personal property so removed must be placed in a fully enclosed building to be insured against loss). The term "Direct Physical Loss By Flood" shall not include compensation for loss of use, loss profits or loss resulting from interruption of business, profession or manufacture, allowance for any increased cost of repair or reconstruction as a result of any ordinance or repair regulating reconstruction or repair, or other economic loss (this enumeration is not exclusive).

"EXPENSE CONSTANT" is a flat charge per policy term, paid by the Insured, to defray the Federal Government's policywriting and other expense.

"EXPIRATION DATE" means the ending of the insurance coverage provided by this policy on the expiration date shown on the declaration page.

"FLOOD": Wherever in this policy the term "flood" occurs, it shall be held to mean:

A. A general and temporary condition of partial or complete inundation of normally dry land areas from:

1. The overflow of inland or tidal waters.

2. The unusual and rapid accumulation or runoff of surface waters from any source.

3. Mudslides (i.e., mudflows) which are proximately caused by flooding as defined in subparagraph A–2 above or by accumulations of water on or under the ground and are akin to a river of liquid and flowing mud on the surface of normally dry land areas.

B. The collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding the cyclical levels which result in flooding as defined in A–1 above.

"POLICY" means the entire written contract between the Insured and the Insurer, including this printed form, the application and declarations page, any endorsements which may be issued and any renewal certificates indicating that coverage has been instituted for a new policy and policy term.

* * * * *

(c) New paragraphs "G", "H", "I" and "J" are added to the "PERILS EXCLUDED" provisions as follows:

Perils Excluded

The Insurer shall not be liable for loss:

* * * * *

G. Caused intentionally by the Insured.

H. Which is already in progress as of 12:01 a.m. of the first day of the policy term.

I. From a flood which is confined to the insured premises unless the flood is displaced over two acres of the insured premises.

J. Caused by any modification by the Insured to the described premises or insured property which materially increases the risk of flooding.

* * * * *

(d) Under the provision titled "PROPERTY COVERED", at paragraph B(2.)(a) and (b), the $500.00 limitation is reduced to $250.00 in both instances.

* * * * *

(e) The provisions titled "PROPERTY NOT COVERED" are revised to read as follows:

Property Not Covered

This policy shall not cover:

A. Accounts, bills, currency, deeds, evidences of debt, money, coins, medals, postage stamps, securities, bullion, manuscripts or other valuable papers or records.

B. Buildings located seaward of mean tide, or in, on or partially over water; fences, retaining walls, seawalls, outdoor swimming pools, bulkheads, wharves, piers, bridges, docks; other open structures located on or partially over water, including boat houses or other similar structures or buildings into which boats are floated or personal property in the open;

C. Land values, lawn, trees, shrubs, or plants, growing crops, or livestocks; underground structures and equipment including wells, septic tanks or septic systems; those portions of walks, driveways and other paved or poured surfaces outside the foundation walls of the structure; and machinery or equipment servicing the building not contained within the foundations walls of the described building, or below the lowest floor used for rating the building in order to calculate the premium paid for this policy.

D. Aircraft and motor vehicles (other than motorized equipment pertaining to the services of the premises and not licensed for highway use) including their parts and equipment, trailers on wheels, watercraft including their furnishings and equipment.

E. Units which are primarily containers, rather than buildings (such as gas and liquid tanks, chemical or reactor container tanks or enclosures, brick kilns, and similar units) and their contents (Silos and grain storage buildings including their contents, may be insured even though they may be of container-type construction).

F. Contents which may become a pollutant to a community during flooding unless such contents are at or above the base flood elevation, or above ground level (where there are no established elevations).

G. Buildings and their contents, including machinery and equipment, which are part of the building, where 50 percent or more of the actual cash value of such buildings is below ground, unless the lowest level is at or above the base flood elevation (in the Regular Program) or the adjacent ground level (in the Emergency Program) by reason of earth having been used as an insulation material in conjunction with energy efficient building techniques.

H. A mobile home located within a FEMA designated Special Flood Hazard Area that is not anchored to resist floation or lateral movement by providing ties to ground anchors. This anchorage must be a kind to resist flotation, collapse, or lateral movement by providing over-the-top and frame to ground anchors.

Specific requirement shall be that (1) over-the-top ties be provided at each of the four corners of the mobile home, with two additional ties per side at intermediate locations and mobile homes less than 50 feet long requiring one additional ties per side; (2) frames ties be provided at each corner of the mobile home, with additional ties per side at intermediate locations and mobile homes less than 50 feet long requiring one additional tie per side; (3) frame ties be provided at each corner of the home with five additional ties per side at intermediate points and all components of the anchoring system be capable of carrying a force of 4,800 pounds; and (4) any additions to the mobile home be similary anchored.

I. A mobile home and its contents located within a FEMA designated coastal high hazard area (Zones V1–V30 on a FEMA Flood Insurance Rate Map) which is not located in a mobile home park or subdivision in existence prior to April 1, 1982.

J. On and after April 1, 1982, in any Zone V (numbered or unnumbered) identified on a FEMA Flood Insurance Rate Map, obstructions below the building's lowest floor, including solid walls, open wood constructed lattice "breakway walls", insect screening or other "breakaway walls", and any personal property or other contents located below the building's lowest floor where the initial placement of any part of the aforementioned items occurs on or after April 1, 1982.

* * * * *

(f) The provisions titled "DEDUCTIBLES" are revised to read as follows:

Deductibles

A. With respect to loss to the building, appurtenant private structures, and debris removal covered hereunder, the Insurer shall be liable for only that portion of the loss in any one occurrence which is in excess of $500.00.

B. With respect to less to contents or debris removal covered hereunder or to expenses, incurred under paragraph F of "Perils Excluded", the Insurer shall be liable for only that portion of the loss in any one occurrence which is in excess of $500.00.

C. The amount of the deductible in "A" and "B", above is $3,000.00 in the event the Insured has elected, when purchasing this policy, to have such a deductible. The election by the Insured is conditioned upon the insured property being located in a coastal high hazard area.

* * * * *

(g.) Under the provisions titled "GENERAL CONDITIONS AND PROVISIONS", paragraph "E" titled "CANCELLATION OF POLICY OR REDUCTION IN AMOUNT OF INSURANCE" is revised to read as follows:

General Conditions and Provisions

* * * * *

E. *Cancellation or Voidance of Policy.*

1. Cancellation of the policy by Insured:

a. The Insured can cancel this policy at any time but a refund of premium money will only be made when:

i. The policy is cancelled because the Insured has transferred ownership of the insured property to someone else. In this case, once the Insurer receives the request for cancellation accompanied by the original policy, the excess of premium paid will be refunded to the Insured, which apply to the unused portion of the policy's term, pro-rata but with retention of the expense constant.

ii. The policy is cancelled because FEMA has determined that the insured property is not, in fact, in a special flood hazard area; and the Insured was required to purchase flood insurance coverage by a private lender or Federal agency pursuant to Pub. L. 93–234, s102; and the lender or Federal agency no longer requires the retention of the coverage. In this event, if no claims have been paid or are pending, the premium payments will be refunded in full, according to applicable regulations, but with retention of the expense constant.

2. Cancellation or voidance of the policy by the Insurer:

a. The following rules provide for voidance or cancellation of coverage, issued under a Standard Flood Insurance Policy, by the Insurer:

(i) Where an error(s) involving a misrating resulting in an underpayment of premium is apparent on the face of the flood insurance application, renewal endorsement or other form, or is caused by any willful misrepresentation or concealment of any material fact, including facts relevant to the rating of a flood insurance risk, by the Insured, the agent or any other legal representative of the Insured, the entire policy shall be void and all premium funds returned to the Insured; in the case of willful misrepresentation or concealment, only, the entire policy shall be void as of the date the wrongful act was committed, and coverage prior to the date of the wrongful act shall not be affected,

(ii) Where an error(s) involving a misrating resulting in an underpayment of premium is not apparent on the face of the flood insurance application, renewal, endorsement or other form and has not been willfully made by the Insured, agent or other legal representative of the Insured, upon discovery of the error by the Insurer, the Insured shall be given written notice of premium due by the Insurer and, provided the Insured remits the additional premium due to the Insurer within thirty (30) days from the date the notice of additional premium due is mailed, the policy shall be reformed, from its inception date, to provide flood insurance coverage to the Insured in the amounts of coverage initially requested by the Insured,

(iii) Where an error(s) involving a misrating resulting in an underpayment of premium is not apparent on the face of the flood

insurance application, renewal, endorsement or other form, the entire policy may be cancelled, at the Insurer's option, for nonpayment of premium in the event the Insured refuses, after mailing of notice of additional premium due by the Insurer, to pay the additional premium. Silence on the part of the Insured after thirty (30) days have elapsed from the date of the mailing of notice of premium due to the Insured's mailing address, as shown on the flood insurance application, shall be deemed to be refusal to pay additional premium within the meaning of this subsection. Upon the Insured's refusal to pay the additional premium due, the Insurer may cancel the policy, in which case:

(A) The paid premium shall be deemed to be fully earned and the term of the policy shall be reduced by an adjustment reflecting the number of calendar year days (based on a 360 day calendar year) of requested coverage and limits the paid premium will purchase and, with the term thereby reduced, the policy shall continue in force to the end of the adjusted term, at which time the policy shall be deemed cancelled by the Insurer and the Insured; and

(B) Paid premiums for policies issued in prior terms shall be deemed fully earned, with a commensurate reduction in the term of any such policy, and, in the event a claim has been paid under any such prior policy which arose after the end of the policy's term, as reduced to reflect the payment of insufficient premium, the Insured shall be indebted to the Insurer in the amount of the claim, unless, upon written demand for the additional premium due in respect to such prior policy, the Insured pays the additional premium within thirty (30) days from the date of mailing of the written demand.

(IV) This policy will be considered void if the Insurer determines:

a. The property listed on the application is not eligible for coverage;

b. The community in which the property is located was not participating in the National Flood Insurance Program on the policy's inception date and did not qualify as a participating community during the policy's term and before any loss for which the Insured may receive compensation under this policy.

(V) This policy will be considered void if, during the term of the policy, the participation in the National Flood Insurance Program of the community in which the insured property is located ceases, in which case, the policy shall be deemed void effective the end of the last day of the policy year in which such cessation occurred and shall not be renewed. In the event the voided policy was for a term of three years, the Insured shall be entitled to a refund of any premium applicable to the remainder of the policy's term after voidance of the policy.

* * * * *

(h.) General Condition "J" titled "Statutory Provisions", is deleted from and a new general condition "J", titled "Policy Renewal" is added to the section titled "GENERAL CONDITIONS AND PROVISIONS" as follows:

General Conditions and Provisions

* * * * *

J. *Policy Renewal:* The term of this policy commences on its inception date and ends on its expiration date, as shown on the "Declarations Page" which is attached to the policy. The Insurer is under no obligation to send any renewal notice or other notice that the policy term is coming to an end and the receipt of any such notice by the Insured, Mortgagee or Agent of the Insured shall not be deemed to be a waiver of this provision on the Insurer's part. The Insurer is under no obligation to assure that policy changes reflected in endorsements submitted by the Insured or Agent during the policy term and accepted by the Insurer are included in any renewal notice or new policy which is sent. "Policy changes" includes the addition of new coverage (e.g. contents coverage added to a building coverage policy or vice versa) or any increases in the amounts of coverage.

This policy shall not be renewed and the coverage provided by it shall not continue into any successive policy term unless the premium payment for any such successive policy term is received by the National Flood Insurance Program (NFIP), prior to the expiration date of this policy. The renewal premium payment shall be deemed to be received by the NFIP if the renewal payment is mailed to the NFIP prior to the expiration date and is received by the NFIP prior to or within five (5) days following the expiration date or if the renewal payment is mailed by certified mail to the NFIP prior to the expiration date.

In all cases, whether the renewal premium payment is received by the NFIP after the expiration date of this policy or not, this policy shall be deemed terminated as of the expiration date of the last policy term for which the premium was timely received by the NFIP and the Insurer shall not be obliged to provide the Insured with any cancellation, termination, policy lapse, or policy renewal notice advising the Insured of any such cancellation termination, policy lapse or policy renewal; provided, however, with respect to any mortgagee (or trustee) named in the Declarations form attached to this policy, this insurance shall continue in force only for the benefit of such mortgagee (or trustee) for 30 days after written notice to the mortgagee (or trustee) of termination of this policy, and shall then terminate.

(National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968), 42 U.S.C. 4001–4128; Reorganization Plan No. 3 of 1978 (43 FR 41943), Executive Order 12127, dated March 31, 1979 (44 FR 19367) Executive Order 11988, dated May 24, 1977 and 44 CFR 9, Delegation of Authority to Federal Insurance Administrator)

Issued at Washington, D.C., December 24, 1981.

Jeffrey S. Bragg,

Federal Insurance Administrator.

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-5738]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Arkansas

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule: revision.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Clarksville, Johnson County, Arkansas.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 44 FR 67186 on November 23, 1979, and in *The Graphic* on October 9 and October 16, 1980, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for inspection at City Hall, Walnut Street, Clarksville, Arkansas 72830.

Send comments to: Mayor Sterling Hurley or Ms. Ann Schmatjen, Assistant Administrator, City Hall, P.O. Box 409, Clarksville, Arkansas 72830.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, P.E., National Flood Insurance Program, (202) 287–0230, Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in Clarksville, Arkansas in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(A).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood

insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 USC 605(b), the Associate Director to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not proscribe develpment. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

The proposed base (100-year) flood elevations are:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Arkansas	Clarksville, Johnson County	Spadra Creek (before levee overtopping).	Just downstream of Cherry Street	*378
	Just upstream of Missouri-Pacific Railroad	*380		
	Spadra Creek (after levee overtopping)	At the intersection of Laster Street and Kennon Street.	*365	
	At the intersection of Dunlop Street and Saver Street	*368		
	Tributary 1	Just upstream of Interstate Highway 40.	*358	
	Greenbriar Creek	Just upstream of the downstream crossing of Missouri-Pacific Railroad.	*390	
	Just upstream of Cherry Street	*406		
	Little Willett Branch	Just upstream of U.S. Highway 64	*365	
	Just upstream of Quarter-Line Road	*369		

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

Issued: December 16, 1981.

Lee M. Thomas,

Associate Director, State and Local Programs and Support.

Vol. 46, No. 250
Wednesday, December 30, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

1981 Peanut Program Price Support

AGENCY: Commodity Credit Corporation (CCC), USDA.

ACTION: Notice of determination of 1981-Crop Farm-Stored Peanut Loan and Purchase Program.

SUMMARY: The purpose of this notice is to set forth for 1981-crop farm-stored peanuts (1) loan and purchase rates, and (2) location adjustments. This notice is needed in order to provide price support on 1981-crop farm-stored peanuts.

EFFECTIVE DATE: December 30, 1981.

FOR FURTHER INFORMATION CONTACT: Bruce D. Starnes, (202) 447–7301. A final impact statement has been prepared and is available from the above-named individual.

SUPPLEMENTARY INFORMATION: This notice of determination has been reviewed under USDA procedures required by Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified "not major." It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal assistance program that this final rule applies to is: Title—Commodity Loans and Purchases; Number 10.051, as found in the Catalog of Federal Domestic Assistance. This action will not have a significant impact specifically on area and community development. Therefore, review as established by OMB Circular A–95 was not used to assure that units of local government are informed of this action.

It has been determined that the Regulatory Flexibility Act is not applicable to this Notice of Determination since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

The 1981-Crop Peanut Loan and Purchase Program was announced on February 13, 1981. A notice published in the **Federal Register** on July 20, 1981, (46 FR 37294) established the National average support values for the 1981 crop peanuts at $455 per ton for quota peanuts and $250 per ton for additional peanuts. Also, in that notice, CCC adjusted 1981-crop peanut loan and purchase rates for differences in type, quality, location and other factors.

It has been determined that the same method of calculating price support rates by type set forth in the **Federal Register** as to warehouse storage loans on July 20, 1981, should be adopted for farm-stored peanuts so that all producers will be treated fairly. Accordingly, the basic rates applicable to warehouse storage loans shall also be applicable for farm-stored loans.

Notice of Determination

1. *Loan and Purchase Rate.* Subject to the discounts specified in paragraph (b) of this section, the loan and purchase rates for quota peanuts placed under farm-stored loan or purchase shall be the following rates by type per ton:

Type	Dollars per ton
Virginia	$462
Runner	459
Spanish	438
Valencia	462

Loans on additional peanuts shall be made at 54.95 percent of the quota support rate.

2. *Location Adjustment to Support Prices.* The loan and purchase rates specified in paragraph 1 of this section shall be subject to the following discounts for farmers stock peanuts placed under a farm-stored loan in States where peanuts are not customarily shelled or crushed, as specified below.

State	Dollars per ton
Arizona	$25
Arkansas	10
California	25
Louisiana	7
Mississippi	10
Missouri	10
Tennessee	25

3. *Settlement Values.* The support prices, premiums, and discounts for use in computing the settlement value in accordance with § 1421.292(b)(2) of the continuing regulations governing the peanut farm-stored loan and purchase program with respect to peanuts acquired by CCC under loan or purchase, shall be those support prices, premiums, and discounts specified in notice of determination of the 1981-crop peanut warehouse storage loan supplement (46 FR 37296 published July 20, 1981) including the location adjustment specified therein for peanuts delivered to CCC in States where peanuts are not customarily shelled or crushed.

(Secs. 4, 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); secs. 101, 108, 401, 403, 405, 63 Stat. 1051, as amended (7 U.S.C. 1441, 1445, 1421, 1423, 1425))

Signed at Washington, D.C. on December 23, 1981.

Clarence L. Tardy,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

CIVIL RIGHTS COMMISSION

Vermont Advisory Committee Agenda; and Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Vermont Advisory Committee to the Commission will convene at 7:00 p.m., and will end at 9:00 p.m., on January 19, 1982, at the Vermont Federal Savings and Loan Association, in the Friendship Room, 99 State Street, Montpelier, Vermont 05602. The purpose of this meeting is to discuss the civil rights developments in 1981; Federal budget cuts to civil rights programs; and the Franco-American report.

Persons desiring additional information or planning a presentation to the Committee, should contact the

Chairperson, Philip Hoff, 192 College Street, Hoff, Wilson and Powell, PC, Burlington, Vermont 05401, (802) 658–4300 or the New England Regional Office, 55 Summer Street, 8th Floor, Boston, Massachusetts 02110, (617) 223–4671.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., December 28, 1981.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committee on Agriculture Statistics; Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), and Office of Management and Budget Circular A–63 (revised), and after consultation with GSA, it has been determined that the renewal of the Census Advisory Committee on Agriculture Statistics is in the public interest in connection with the performance of duties the law imposes on the Department.

The Committee was established July 16, 1962, and its charter expired on December 12, 1981. It was initially chartered under the Federal Advisory Committee Act in January 1973. The Committee's purpose is to advise the Director, Bureau of the Census, on the conduct of periodic censuses of agriculture and related surveys and the kind of information that should be obtained from respondents associated with the agricultural production; to make recommendations regarding the contents of agricultural reports; and to present the data needs of major suppliers and users of agriculture statistics. The Committee plays a vital role in advising the Census Bureau concerning the structuring and planning of the agriculture censuses and surveys.

The Committee will continue with a balanced representation of 21 member organizations, each appointing a person to the Committee subject to the concurrence of the Director, Bureau of the Census. A selected member chairs the Commitee which will function solely as an advisory body in compliance with the Federal Advisory Committee Act.

Copies of the Committee's revised charter will be filed with appropriate committees of the Congress.

Inquiries or comments may be addressed to the Committee Control Officer, Mr. Arnold L. Bollenbacher, Chief, Agriculture Division, Federal Building 4, U.S. Department of Commerce, Bureau of the Census, Washington, D.C. 20233, telephone 301/763–5230, or Mrs. Yvonne D. Barnes, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377–4217.

Dated: December 23, 1981.

Dennis C. Boyd,

Executive Director, Information Resources Management.

BILLING CODE 3510-07-M

Foreign-Trade Zones Board

[Docket No. 24–81]

Proposed Foreign-Trade Zone; City of Industry, California; Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Industry, California (the City), a municipal corporation, requesting authority to establish a general-purpose foreign-trade zone in the City of Industry, adjacent to the Los Angeles/Long Beach Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on December 22, 1981. The applicant is authorized to make this proposal under sections 6300–6305 of the Government Code of the State of California.

The City of Industry is an incorporated community which has been developed as a light industrial and commercial center. It covers 15 square miles some 20 miles southeast of downtown Los Angeles. The zone project is designed to provide special Customs services for the City's many firms engaged in international trade related operations. Covering 120 acres south of Valley Boulevard between Fairway Drive and Lemon Avenue, the zone will be the focal point of a 200-acre international trade complex known as the Industry Distribution and Commerce Center, Foreign-Trade Zone/Freeport. The project will be administered on behalf of the City by National Engineering Company, which will be responsible for developing the zone with City financing, and selecting a private operator/manager.

The application contains evidence of the need for large-scale zone services in the City of Industry. Prospective tenants have indicated an interest in using over 1.3 million square feet in the zone for warehousing, distribution, labeling, packing, and assembly of auto parts, hardware, electronic components, electrical appliances, shoes, toiletry products, alcoholic beverages and candy.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; John E. Brady, District Director, U.S. Customs Service, Region VII, 300 South Ferry Street, Terminal Island, San Pedro, California 90731; and Colonel Paul W. Taylor, District Engineer, U.S. Army Engineer District Los Angeles, P.O. Box 2711, Los Angeles, California 90053.

As part of its investigation, the Examiners Committee will hold a public hearing on January 27, 1982, beginning at 10:00 a.m., in Room 2032 of the U.S. Customshouse Building, 300 South Ferry Street, Terminal Island, California 90731. The purpose of the hearing is to help inform interested persons about the proposal, to provide an opportunity for their expression of views, and to obtain information useful to the examiners.

Interested parties are invited to present their views at the hearing. They should notify the Board's Executive Secretary of their desire to be heard in writing at the address below or by phone (202/377–2862) by January 18, 1982. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through February 26, 1982. Evidence submitted during the post-hearing period is not desired unless it is clearly shown that the matter is new and material and that there are good reasons why it could not be presented at the hearing. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

U.S. Department of Commerce District Office, 11777 San Vicente Boulevard, Room 800, Los Angeles, California 90049

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3721, 14th and E Streets NW., Washington, D.C. 20230

Dated: December 23, 1981.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-25-M

International Trade Administration

Licensing Procedures Subcommittee of the Computer Systems Technical Advisory Committee; Open Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on October 5, 1981 pursuant to the charter of the Committee. The Licensing Procedures Subcommittee was formed to review the procedural aspects of export licensing and recommend areas where improvements can be made.

TIME AND PLACE: January 13, 1982, at 10:00 a.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Ave., NW., Washington, D.C.

Agenda: General Session

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Continuing business:

(a) Discussion of ITA-6031A—Computer System Parameters form (short version).

(b) Discussion of the role of Department of Commerce to provide for technical consultation with exportes in order to establish pre-agreement on the technical parameters of export items.

(c) Use of "Swiss Blue" import certificate.

(d) Software regulation—Section 376, 379 of the OEA regulations.

(e) Questions relating to the utility of the Qualified General License as currently framed.

(f) Discussion of the current "relaxation" of reexport controls.

(4) Adequacy of Committee attendance and ways to improve it.

(5) Report on OEA case backlog, East European export policy, and PRC export policy.

(6) Recent experiences of COCOM's processing of cases.

(7) Procedures for licensing for exhibitions and fairs.

(8) Disposition of controlled country (Bloc) applications not requiring multilateral review.

PUBLIC PARTICIPATION: The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written Statements may be submitted at any time before or after the meeting.

FOR FURTHER INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230; Telephone: 202-377-2583.

Dated: December 24, 1981.

Vincent F. DeCain,

Acting Director, Office of Export Administration.

[FR Doc. 81-37183 Filed 12-29-81; 8:45 am]

BILLING CODE 3510-25-M

Switching Subcommittee of the Telecommunications Equipment Technical Advisory Committee; Partially Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Telecommunications Equipment Technical Advisory Committee was initially established on October 23, 1973, and rechartered on September 18, 1981, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was established on October 5, 1981, pursuant to the charter of the Committee.

The Switching Subcommittee was formed to study computer controlled switching equipment with the goal of making recommendations to the Department of Commerce relating to the appropriate parameters for controlling exports for reasons of national security.

TIME AND PLACE: January 19, 1981, at 10:00 a.m. The meeting will take place at the Main Commerce Building, Room 5611, 14th Street and Constitution Avenue, NW., Washington, D.C.

Agenda: General Session

A short open session will be held to provide an opportunity for submissions of industry recommendations for revisions of the following CCL entry: 1565 (switching portions only).

Executive Session

Discussion of matters properly classified under Executive Order 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

PUBLIC PARTICIPATION: The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive order 12065.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce, telephone: 202-377-4217.

FOR INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret Cornejo, Committee Control Officer, Office of Export Administration, Room 1609, U.S. Department of Commerce, Washington, D.C. 20230; Telephone: 202-377-2583.

Dated: December 24, 1981.

Vincent F. DeCain,

Acting Director, Office of Export Administration.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council and its Administrative Subcommittee; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Caribbean Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265), has established an Administrative Subcommittee. The Council and its Administrative Subcommittee will hold separate public meetings. The Council will hold its 39th regular meeting to consider status

reports on fishery management plans under development; draft FMP for shallow-water reef fishery; draft FMP for coastal migratory pelagics resources; draft Caribbean section of the Atlantic billfish FMP; draft FMP for the fishery resources of the Puerto Rican and St. Croix geological platforms, as well as discuss administrative matters and other Council business. The Administrative Subcommittee will meet to consider matters related to the Council's budget, the new draft standard operating practices and procedures and regular administrative operations.

DATES: The Council's public meeting will convene on Wednesday, January 27, 1982, at approximately 9 a.m., and will adjourn on Thursday, January 28, 1982, at approximately noon. The Council's Administrative Subcommittee public meeting will convene on Tuesday, January 26, 1982, at approximately 1:30 p.m., and will adjourn at approximately 5 p.m.

ADDRESS: The meetings will take place in the Conference Room of the Frederiksted Fort, Frederiksted, St. Croix, U.S. Virgin Islands.

FOR FURTHER INFORMATION: Caribbean Fishery Management Council, Suite 1108–Banco de Ponce Building, Hato Rey, Puerto Rico 00918, Telephone: (809) 753–4926.

Date: December 23, 1981.

Jack L. Falls,

Chief, Administrative Support Staff, National Marine Fisheries Service.

[FR Doc. 81–37130 Filed 12–30–81; 8:45 am]

BILLING CODE 3510–22–M

Marine Fisheries Advisory Committee; Public Meetings

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., Appendix I, notice is hereby given of meetings of the Marine Fisheries Advisory Committee (MAFAC). The Committee meeting (MAFAC XXVI) will be held on Tuesday, Wednesday and Thursday, January 19–21, 1982, at the Department of Commerce, 15th and Pennsylvania Avenue, NW, Washington, D.C., Room 4830 with meetings starting at 8:30 a.m. Adjournment is planned for noon on Thursday.

Two Subcommittees will meet as part of the full Committee session on Wednesday, January 20, 1982, at the Department of Commerce address noted above. The Subcommittee on Consumer Affairs will meet at 10:30 a.m. and the Subcommittee on Marine Recreational Fishing at 1:30 p.m. Agenda items for the MAFAC Committee meeting include: the FY 1982 Program, future objectives, organization and programs of the National Oceanic and Atmospheric Administration (NOAA); an overview of NOAA's FY 1982 appropriations and FY 1983 submission and their effect upon the National Marine Fisheries Service (NMFS); the role of the National Advisory Committee on Oceans and Atmosphere (NACOA) and its relationship to MAFAC; the views of the Assistant Administrator for Fisheries on the future of NMFS; fisheries legislative activities; fisheries policy issues; the two subcommittee meetings; a presentation on mariculture; and a discussion of the role and future of MAFAC.

The Committee and Subcommittee meetings are open to the public and there will be seating for approximately 20 public members available on a first come, first served basis. Members of the public having an interest in specific items for discussion are advised that agenda changes are at times made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact: Ms. Robin Tuttle Waxman, Acting Executive Secretary, Marine Fisheries Advisory Committee, National Marine Fisheries Service, Washington, D.C. 20235, Telephone: (202) 634–7283.

At the discretion of the Chairperson, interested members of the public may speak for a reasonable amount of time at points which allow an orderly conduct of Committee business.

Interested members of the public who wish to submit written comments should do so at the address noted above. To receive due consideration and facilitate their inclusion in the record of the meeting, written statements should be received within 10 days after the close of the committee meeting.

Dated: December 23, 1981.

William H. Stevenson,

Deputy Assistant Administrator for Fisheries.

BILLING CODE 3510–22–M

New England Fishery Management Council; Public Meeting With a Partially Closed Session and Public Meeting of Its Scientific and Statistical Committee

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of public meeting with a partially closed session.

SUMMARY: As required by the Federal Advisory Committee Act, this notice sets forth the schedule and proposed agendas for the forthcoming separate public meetings of the New England Fishery Management Council (with a partially closed session) and the public meeting of the Council's Scientific and Statistical Committee (SSC). The New England Fishery Management Council was established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265), and the Council has established a SSC to assist the Council in carrying out its responsibilities to manage and conserve America's fisheries as specified by the Act.

DATES: Council—January 26–27, 1982. SSC—January 20, 1982.

ADDRESSES: The Council's separate public meeting (with partially closed session) will take place at the King's Grant Inn, Route 128 at Trask Lane, Danvers, Massachusetts. The SSC's separate public meeting will take place at the Council's Headquarters Office, Suntaug Office Park, Five Broadway, Route One, Saugus, Massachusetts.

FOR FURTHER INFORMATION CONTACT: New England Fishery Management Council, Suntaug Office Part—5 Broadway (Route One), Saugus, Massachusetts 01906, Telephone: (617) 231–0422.

Agendas

Council (open meeting)—January 26–27, 1982 (10 a.m. to 3 p.m. on January 26; 9 a.m. to 5 p.m. on January 27)—review the status of the herring and lobster fishery management plans (FMPs); review status of recommendations of the policy review committee; further discussion of future groundfish management measures and review of joint venture permit applications, as well as other fishery management business.

Council (closed session)—January 26, 1982 (3 p.m. to 5 p.m.)—discussion of the status of maritime boundary and resource negotiations between the U.S. and Canada. Only those Council members and selected staff having security clearances will be allowed to attend this closed session.

SSC (open meeting)—January 20, 1982 (10 a.m. to 5 p.m.)—review of the interim groundfish FMP; review of research proposals as well as other fishery management business. The meeting may be lengthened or shortened or agenda items rearranged depending upon progress of same.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of the General Counsel, formally determined on November 17, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, that

the agenda item covered in the closed session is exempt from the provisions of the Act relating to open meetings and public participation therein, because the meeting will be concerned with matters that are within the purview of 5 U.S.C. 552(c)(1), as information which will disclose matters that are (A) specifically authorized under criteria established by an executive order to be kept secret in the interests of national defense or foreign policy and (B) in fact properly classified pursuant to such executive order. (A copy of the determination is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, Department of Commerce.) All other portions of the Council's meeting (as well as the SSC's meeting) will be open to the public.

Dated: December 23, 1981.

Jack L. Falls,

Chief, Administrative Support Staff, National Marine Fisheries Service.

[FR Doc. 81-37132 Filed 12-29-81; 8:45 am]

BILLING CODE 3510-22-M

Office of the Secretary

Economic Advisory Board; Renewal

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 1976) and the Office of Management and Budget Circular A-63 of March 1974, and after consultation with the General Services Administration, the Secretary of Commerce has determined that the renewal of the Economic Advisory Board is in the public interest.

The Advisory Board was first established by the Secretary of Commerce on January 12, 1967. Its purpose is to advise the Secretary of Commerce on economic policy issues. It has discharged this mission regularly by convening quarterly to discuss various specific industry situations in terms of consumer spending and inventory status; the near-term outlook and policies; and the outlook, in terms of output and employment, for the forthcoming several quarters.

In renewing the Advisory Board, the Secretary has reaffirmed the importance of the timely and accurate information it has provided concerning business conditions and the current state of the economy. The Secretary has also requested that members of the Advisory Board, in addtition to presenting their individual forecasts, also provide their analyses of specific economic issues as designated by the chairperson, the Assistant Secretary for Economic Affairs.

As initially chartered under the Federal Advisory Committee Act in January 1973, the Economic Advisory Board will continue with a balanced representation of 16 members and will operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Board's charter will be filed with the appropriate committees of the Congress.

Inquiries or comments may be addressed to the Committee Control Officer, Virginia R. Marketti, Office of the Assistant Secretary for Economic Affairs, Room 4848, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-3523, or Mrs. Yvonne D. Barnes, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-4217.

Dated: December 23, 1981.

Dennis C. Boyd,

Executive Director, Information Resources Management.

[FR Doc. 81-37128 Filed 12-29-81; 8:45 am]

BILLING CODE 3510-CW-M

DEPARTMENT OF ENERGY

Office of Hearings and Appeals

Implementation of Special Refund Procedures and Solicitation of Comments

AGENCY: Office of Hearings and Appeals, Energy.

ACTION: Notice of implementation of special refund procedures and solicitation of comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to eligible claimants $4,750,000 obtained by the DOE under the terms of a consent order entered into with OKC Corp. The funds were provided by the firm in order to settle enforcement proceedings brought by the Office of Enforcement.

DATES AND ADDRESS: Comments must be filed on or before January 29, 1982 and should be addressed to the Office of Hearings and Appeals, Department of Energy, 2000 M Street, NW., Washington, D.C. 20461. All comments should display conspicuously a reference to case number BEF-0032.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, Department of Energy, 2000 M Street, NW., Washington, D.C. 20461; (202) 653-3137.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the Procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision and Order tentatively establishes procedures to distribute to eligible claimants a total of $4,750,000 obtained by the DOE under the terms of a consent order entered into with OKC Corp. on July 17, 1980. The funds were provided to the DOE by the firm in order to settle all claims which the Office of Enforcement (OE) could have pursued under the DOE price regulations relating to transactions by OKC involving crude oil, residual fuel oil or refined petroleum products for the period from August 1973 to the settlement date. In the consent order, the parties stipulated that the OE would file with the OHA a petition for the implementation of special procedures for the distribution of refunds from the settlement fund, pursuant to 10 CFR Part 205, Subpart V.

The Proposed Decision and Order sets forth the procedures and standards that the DOE has tentatively formulated to distribute the contents of the escrow account funded by OKC. The DOE has tentatively decided that Applications for Refund should be accepted from the initial purchasers of covered products from OKC during the audit period. In addition, the DOE determined that Applications for Refund also should be accepted from all persons who bought OKC products during the relevant time period. The Proposed Decision and Order provides that in order to be entitled to receive any portion of the settlement funds, a purchaser must furnish the DOE with evidence which demonstrates that the claimant was injured by the alleged unlawful prices for covered products charged by OKC, including specific documentation concerning the date, place, price, and volume of product purchased, whether the increased costs were absorbed by the claimant or passed through to other purchasers, and the extent of any injury alleged to have been suffered.

The Proposed Decision and Order also provides for the distribution of any funds remaining after all valid claims are paid. The Proposed Decision and Order states DOE's view that refunds might be made in the form of lowered energy or energy-related costs in the areas where the persons who are likely to have been injured by the alleged overcharges may reside. The DOE also solicits proposals from first purchasers of covered products and from the public concerning the distribution of any funds

remaining after claims have been paid. In the alternative, the DOE suggests that any remaining funds which would otherwise go undistributed be deposited in the Treasury of the United States.

It should be pointed out that until final procedures are adopted, no claims for refunds will be accepted. Applications for Refund therefore should *not* be filed at this time. Appropriate public notice, including notice published in the **Federal Register**, will be provided prior to the acceptance of claims.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted on or before January 29, 1982, and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection in the Public Docket Room of the Office of Hearings and Appeals, Room B–120, 2000 M Street, NW., Washington, D.C. between the hours of 1:00 to 5:00 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., on December 23, 1981.

George B. Breznay,

Director, Office of Hearings and Appeals.

December 23, 1981.

Proposed Decision and Order of the Department of Energy

Special Refund Procedures

Name of Petitioner: Office of Enforcement, Economic Regulatory Administration; in the Matter of OKC Corp.

Date of Filing: February 5, 1981.

Case Number: BEF–0032.

Under Subpart V of the Department of Energy's procedural regulations, the Economic Regulatory Administration's Office of Enforcement (OE) may petition the Office of Hearings and Appeals (OHA) for implementation of special refund procedures in situations where the DOE is unable to readily identify persons entitled to refunds as a result of alleged violations of DOE regulations. (*1*) 10 CFR Part 205, Subpart V. The OE filed such a petition on February 5, 1981, requesting that OHA establish special refund procedures for moneys received pursuant consent order with OKC Corp. (OKC). Under the terms of the consent order agreed to on July 17, 1980, OKC has remitted $4,750,000 to the DOE in settlement of enforcement actions alleging violations of DOE's price regulations. This money is being held in an escrow account in the United States Treasury pending instructions from DOE regarding the disposition of the funds.

I. Background

OKC is a producer and refiner of crude oil as those terms were defined in 10 CFR 212.31. During the relevant time period, OKC was therefore subject to the Manadatory Petroleum Price Regulations contained in 10 CFR Part 212. In settlement of possible enforcement actions based upon these regulations, OKC entered into a consent order with DOE on July 17, 1980, in which it agreed to pay $4,750,000 to the DOE. The consent order settled all claims which the OE could have pursued under the price regulations relating to transactions by OKC involving crude oil, residual fuel oil, or refined petroleum products for the period from August 1973 to the settlement date. The Consent order also established procedures to audit OKC's compliance with the DOE allocation regulations including those governing the Entitlements Program, 10 CFR 211.67.

Notice of the consent order was published in the **Federal Register** for public comment on July 31, 1980, and a press release was issued, 45 FR 50865. Interested parties were invited to submit written notice to DOE of potential claims against the settlement fund. Notice of claims were filed by 24 persons, two of whom commented on the consent order. A notice responding to the comments was published in the **Federal Register** on February 12, 1981. 46 FR 12051.

II. Subpart V Jurisdiction and Authority to Fashion Refund Procedures

In an Interlocutory Order issued on April 6, 1981, we determined that the jurisdictional prerequisites for the establishment of special refund procedures were satisfied in the case of OKC. *Office of Enforcement,* 8 DOE ¶ 82,651 (1981). In that decision we found that the persons who may be entitled to a portion of the OKC consent order fund are not readily identifiable, and the amounts to which those persons may be entitled are not readily ascertainable. 10 CFR 205.280. We therefore concluded that a proceeding under Subpart V to implement special refund procedures was appropriate in this case.

In comments which it submitted on the consent order, Town and Country Markets, Inc. objects to the implementation of special refund procedures in this case. The firm contends that both the persons to whom refunds are owed and the amounts which they are due are readily ascertainable. The firm maintains that this information is available to the Office of Enforcement by virtue of its access to OKC's books and records and that the OE is therefore better suited than the OHA to make decisions as to who was overcharged. Finally, the firm alleges that the shift in the locus of decision-making from OE to OHA unfairly burdens overcharged purchasers, who will be required to prove damages before the OHA.

We disagree with Town and Country's contentions. We note initially that Subpart V proceedings are part of an overall enforcement program designed to accomplish two independent purposes: disgorgement of the fruits of a regulatory violation from the wrongdoer, and refunding money to persons injured by the alleged regulatory violation. *See generally Office of Enforcement,* 8 DOE ¶ 82,597 (1981) (hereafter cited as *Vickers*); *Sauder* v. *DOE,* 648 F.2d 1341 (Temp. Emer. Ct. App. 1981). It is this second objective to which the Subpart V regulations are specifically addressed, providing a means of distributing funds to those persons ijjured as a result of ahleged regulatory violations. While it may be possible to obtain a list of direct purchasers from OKC's records, this group is not necessarily the same as the group of persons injured by the alleged overcharges because skme of these purchasers may have passed on the overcharges to their customers. Thus, implementation of Subpart V proceedings is appropriate in this case.

Recent chajges in the regulatory system have also made Subpart V proceedings appropriate in a case such as this. Until January 28, 1981, crude oil and refined petroleum products were subject to a comprehensive price regulation scheme which could be utilized to facihitate the channeling of refunds to perskns adversely affected by alleged violations of those regulations through price rollbacks. However on January 28, 1981, the President exempted crude oil and all refined petrkleum products from the DOE regulatory program. Exec. Krder No. 12287, 46 FR 9909 (1981). As a result of decontrol, there is no maximum lawful price upon which a rollback krder may be based. Therefore, to refund money to parties affected by the alleged overcharges, a determination must be made regarding the extent to which purchasers of the products involved absorbed the overcharges or passed the higher costs through to their customers by raising sales prices. Although DOE's enforcement officials may agree to a mechanism for making refunds to first purchasers alone in the context of a consent order, a Subpart V proceeding is governed by different standards. Under

Subpart V, refunds are to be made "*to injured persons.*" 10 CFR 205.280 (emphasis added). In this context, refunds to first purchasers alone, now that decontrol has occurred, could produce a windfall to them with no benefit to their customers through lowered prices. Under these circumstances, we believe that Subpart V provides the most useful mechanism to affect restitution to those persons who were likely to have been injured by these alleged pricing violations.

III. Proposed Refund Procedures

In view of the objectives expressed in the statutes and regulations discussed above, and the OKC consent order, the procedures to be implemented in this case should, to the maximum extent practicable, provide for the distribution of the moneys involved to parties who bore the adverse effects of the alleged regulatory violations.

As we have stated before, refunding money obtained through enforcement actions is the primary focus of Subpart V, which authorizes the Office of Hearings and Appeals to formulate and implement a process "pursuant to which refunds may be made to injured persons in order to remedy the effects of a violation" of DOE regulations. 10 CFR 205.280; *see Vickers.* It offers a means of compensating many individuals who, because they either lack the resources or do not have a substantial financial stake in the outcome to institute their own private lawsuits under Section 210 of the Economic Stabilization Act of 1970, as amended (ESA), 12 U.S.C. 1904 note, have suffered injuries which would otherwise go unredressed. The Subpart V process is also an efficient administrative mechanism for returning overcharges to injured parties because it may eliminate the need for long and costly court actions.

In our view, the distribution of funds should generally take place in two stages: (i) Payment to persons and firms who file applications for refunds and prove they are entitled to a portion of the funds, and (ii) payment on behalf of injured persons to entities which are in a position to devise and implement compensatory measures which effectuate the restititutionary purposes discussed above. *Vickers,* 8 DOE ¶82,597 at 85,392. In the event that implementation of the methods discussed above would not accomplish its intended objectives or fails to exhaust all of the settlement fund, § 205.287(c) provides that "any remaining funds * * * shall be deposited in the United States Treasury or distributed in any other manner specified in the Decision and Order referred to in Section 205.282(c)." 10 CFR 205.287(c).

A. Refunds to Identifiable Purchasers

As a first stage, the consent order funds should be distributed to claimants who satisfactorily demonstrate that they have been adversely affected by the alleged overcharges in sales of covered products by OKC. The persons most directly affected by the alleged overcharges are those persons who purchased covered products directly from OKC. To the extent that any of these initial purchasers can establish that it absorbed the alleged overcharges rather than passed them on to its customers, it will be entitled to a *pro rata* share of the consent order funds. In order to qualify for a refund, however, a purchaser will be required to demonstrate that during the period covered by the consent order it could have kept its prices at the same level had it experienced a cost reduction equal to the amount of the refund claimed. In other words, a firm must demonstrate that at the time it purchased covered products from OKC it had unrecovered product costs which were at least equal to the amount of the refund claimed, and that market conditions would not permit it to increase its prices to pass through the higher costs. At a minimum, the firm must have maintained a "bank" of unrecovered costs during each month thereafter in order to support a showing that it did not subsequently recover these costs by increasing its prices. In addition, firms or individuals that purchased OKC covered products from intermediate suppliers may also submit Applications for Refund.

In order to establish an entitlement to a refund, any person claiming to be an injured party must satisfactorily demonstrate that it purchased, during the relevant time period, a specific quantity of products which were produced with or from the crude oil, residual fuel oil or refined petroleum products sold by OKC. Privity with either OKC or one of its first purchasers need not be established; evidence need only be presented that the products purchased by the claimants flowed through a chain of distribution leading back to OKC. In addition, unless the purchaser is an ultimate consumer, it must demonstrate that it did not pass through any cost increases resulting from the alleged overcharges to its own customers. For example, purchasers who resold the identified products must show that market conditions did not permit them to raise prices charged to downstream customers, and that consequently they were forced to absorb any cost increase incurred. In the absence of that showing, we must conclude that the claimant was not injured in a monetary sense by the alleged overcharge. *See Vickers,* 8 DOE ¶82,597 at 85,393; Office of Special Counsel for Compliance, 4 DOE ¶82,511 at 85,043–44. However, in the *Vickers* decision, we noted that the nature of the showing required could be too complicated for those individuals and firms who might otherwise be entitled to apply for refunds and who purchased relatively small amounts of products. We also observed that many of those purchasers might lack the type of records required to support such a showing. We therefore established in that case a threshold level of purchases under which applicants, primarily smaller firms and individuals, were not required to make a detailed showing of actual injury. For those applicants who were claiming less than that level of purchases, we required only proof of the amount of product purchased by the applicant during the consent order period. However, the *Vickers* decision did require applicants whose purchases exceeded the threshold level to provide detailed information which would establish that they did not pass through the price increases to their customers. This Proposed Decision is being published in the **Federal Register** so that interested parties will have an opportunity to submit comments on the tentative distribution scheme. We will consider using the same type of treatment for smaller claimants in this proceeding, and we specifically request comments from the public on this issue. *See Vickers; Office of Special Counsel for compliance,* 4 DOE ¶ 82,511, at 85,043–44.

Refunds to persons who establish their entitlement to a refund would be made on a volumetric basis—*i.e.,* the refund would be based on the proportion of a specific OKC covered product purchased by the applicant to the total amount of that covered product marketed by OKC during the relevant period.

In comments which it submitted to the consent order and in comments submitted in connection with the adoption of special refund proceedings, Town and Country Markets, Inc. has argued that the DOE lacks authority to distribute refunds to persons or entities other than direct purchasers. (*2*) The firm also objects to what it characterizes as a "presumption" against direct purchasers, requiring them to meet the difficult burden of proving that they did not pass on the overcharges. The firm cites as its main support for its positions

the antitrust case of *Illinois Brick Co. v. Illinois*, 431 U.S. 720 (1977) (hereinafter cited as *Illinois Brick*).

In *Illinois Brick*, the Court held that the "pass-on" theory could not be used offensively by a plaintiff who was not a direct purchaser from the defendant but claimed that the effects of an anti-trust violation had been passed on to it by an intermediate party. The Court had previously held, in *Hanover Shoe v. United Shoe Machine Corp.*, 392 U.S. 481 (1968) that "passing on" could not be used as a defense in a private antitrust action by a defendant alleging that the plaintiff had passed on the resulting overcharges to its customers and therefore suffered no injury.

We have discussed at great length the factors distinguishing private anti-trust actions brought under section 4 of the Sherman Act from government actions brought under section 209 of the Emergency Stabilization Act, such as the instant cased, in our recent decision in *Office of Enforcement*, 9 DOE ¶——, No. BEF–0036, (November 20, 1981) (hereinafter cited as *Coline*). In *Coline* we held that the considerations underlying the exclusion of pass-on evidence in private antitrust actions, as well as private actions brought under ¶ 210 of the ESA, were inapplicable to ¶ 209 actions. Consequently we reaffirmed our authority to require proof by a claimant that it absorbed overcharges in order to establish entitlement to a portion of the settlement fund. Town and Country has presented no new arguments in this proceeding which would lead us to alter our position on this matter.

We now turn to a consideration of the specific provisions recommended to us for adoption by the parties to the consent order. In order to encourage voluntary settlements in DOE enforcement proceedings, we give substantial weight to consent order provisions, even where they are not binding upon OHA. *See Vickers*. We note, however that the OKC consent order itself recognizes that its terms are not intended to be inflexible. That consent order states that "[t]he petition shall include a statement that the Office of Enforcement and OKC recommend that the OHA adopt the following requirements for the distribution of the monies under the Special Procedures * * *." July 17 Consent Order at 7. Thus, it is clear that the procedures subject to this condition are recommendations by OKC and the Office of Enforcement and are not binding on the OHA.

The first of the procedures which the OKC consent order advises us to adopt is a provision that any OKC purchaser accepting a refund from the consent order funds must waive its right to bring a private lawsuit under section 210 of the Economic Stabilization Act, 12 U.S.C. 1904 note, seeking damages for alleged overcharges by OKC during the audit period:

> [A]s a condition precedent to any claimant's eligibility to receive a refund, the claimant shall be required to waive and release all other claims and remedies against OKC with respect to any possible violation of applicable DOE petroleum price statutes or regulations which may have been committed during the settlement period.

July 17 Consent Order at 7. In comments on the consent order and on the adoption of Subpart V proceedings, Town and Country Markets, Inc., a potential claimant in this proceeding, has stated its objection to this provision. The firm points out that there is no danger of double recovery here since any refund obtained as a result of the consent order will reduce that claimant's recovery in any private cause of action. Thus, Town and Country argues, the waiver provision "has no purpose other than to deprive overcharged purchasers of their statutory right to bring a private cause of action against a party that has violated the regulations." Town & Country September 2, 1980 Comments at 4.

We have most recently considered this issue in *Vickers*, where we adopted the requested waiver requirement. Noting that requested provisions of this type will be carefully examined, we distinguished the situation in *Vickers* from the situation in *Conoco, Inc.*, 4 DOE ¶ 82,544 (1979) where a firm's request for such a provision was rejected. In *Conoco* no reference to such a provision was made in the consent order. In addition, we observed that the Conoco consent order was negotiated as a result of a criminal action in which the firm pleaded *nolo contendere* to a felony charge, making false records, and a misdemeanor charge of violation of Cost of Living Council Regulations. We found "wholly unreasonable" Conoco's attempt "to use the [consent order] payment which it had been ordered to make in connection with these criminal matters to gain considerable benefits at the expense of the statutory rights of the purchasers of its products." *Id.* at 85, 152–53. In contrast, in *Vickers* as in the present case, the proposed election provision is a part of the consent order and no criminal action has been brought. Thus, the proposed election provision is an integral part of the consent order, and represents a carefully negotiated compromise concerning OKC's possible liability for civil violations of the DOE price regulations. *See United States* v. *Armour & Co.*, 402 U.S. 673, 681 (1971).

For the reasons indicated below, we have decided to adopt the requested consent order provision. Adoption of the election of remedies provision is appropriate because it is not inconsistent with the purposes of Subpart V, it furthers important policies, and it implements the recommendation of the consent order.

Significantly, we believe that the adoption of the type of election provision requested in this case will encourage settlements between DOE and regulated firms. Regulated companies are more likely to be willing to enter into settlements with DOE if we determine that election of remedies provisions may be approved and we adopt the proposed provision. We reach this conclusion because of the effect election provisions may have on a company's potential liability under Section 210. When election of remedies provisions are executed by persons seeking administrative refunds, the regulated company's potential exposure to liability in private damage actions is reduced. Accordingly, approval of the proposed provision which was bargained for by OKC should foster settlements, and settlements as a general matter are in the public interest because they permit DOE to enforce its regulatory program efficiently and effectively and to bring its enforcement activities to a speedy conclusion.

Moreover, no rights of any injured party will be prejudiced by the adoption of the election provision. Notice of the right to file an Application for Refund under 10 CFR 205.283 from the OKC consent order fund will be widely publicized (see discussion below). This notice will apprise direct purchasers of their right to bring a section 210 action as well as the waiver requirement. We note that the Supreme Court has expressly approved as an appropriate exercise of equitable discretion a similar requirement that an individual who claims a portion of a money judgment obtained by the Equal Employment Opportunity Commission in the context of a Title VII action, 42 U.S.C. § 2000e, be required to relinquish the right to bring a private action under that Act. *General Telephone Co.* v. *EEOC*, 100 S. Ct. 1698, 1708 n.15 (1980); *see also United States* v. *Allegheny-Ludlum Industries, Inc.*, 517 F. 2d 826, 860–64 (5th Cir. 1975), *cert. denied*, 425 U.S. 944 (1976). We note that it is not necessary for a claimant to execute an election of remedies provision when filing an Application for Refund. Eligible claimants who have not filed an election

of remedies provision will be notified of the approved amount of their refunds, and a comparable statement must then be executed before payment is authorized.

The second recommendation contained in the consent order and advanced in the Subpart V petition is that no funds be disbursed for a period of two years from the effective date of the consent order. Both comments received in response to the consent order (from Southland Corp. and Town & Country Markets, Inc.) contain objections to this provision. Upon consideration of the provision and the comments, we find no significant justification for its adoption. OKC and OE have not indicated any beneficial purpose which would be served by this provision, and in our view a delay in disbursement of funds would only operate to the disadvantage of those persons rightfully entitled to refunds.

At this time we have determined that two groups of purchasers should not be eligible to receive refunds during the first-stage refund process. First, we will not approve Applications for Refund from firms who made only spot market purchases of OKC crude oil, residual fuel oil or refined petroleum products. We believe that those customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of OKC products at increased prices unless they were able to pass through the full amount of OKC's quoted selling price at the time of purchase to their own customers. Thus, these spot market purchasers as a group would not have incurred injury as a result of the OKC alleged regulatory violations, and should not be permitted to beneifit from the consent order.

The second group we will exclude from the first-stage refund procedure consists of a number of independent brokers who will be identified in the final Decision and Order. These brokers, who were resellers of OKC products, engaged in various activities in connection with Mr. Cloyce Box, then president of OKC, to circumvent DOE regulations. Their activities have been brought to our attention by the DOE Office of Special Investigations, which has investigated the activities of several of these brokers and referred the matter to the Department of Justice. We have been informed, and are in the process of obtaining supporting documentation, that criminal charges have been brought against these individuals in federal district court and they have been found guilty or pled guilty to the charges. In our view brokers who have criminally circumvented DOE regulations should not now be permitted to profit from their illegal activities at the expense of the rights of OKC's other purchasers. Consequently, these parties will be ineligible to receive any portion of the OKC consent order fund.

Any purchaser claiming a portion of the refund amount will be entitled to file an Application for Refund pursuant to 10 CFR 205.283. Applications should provide all relevant information necessary to establish a claim, including specific documentation concerning the date, place, price, and volume of product purchased, the retention of increased costs, and the extent of any injury alleged.

Detailed procedures for filing applications will be provided in a final Decision and Order. Before disposing of any of the funds received as a result of the consent order involved in this proceeding, we intend to widely publicize the distribution process and to provide an opportunity for any affected party to file a claim. In addition to publishing notice in the **Federal Register**, notice will be provided in trade journals and in other publications in the areas in which KKC marketed its products during the period covered by the consent order. As a final matter, we note that refund applications filed on behalf of groups of claimants identifying themselves as adversely affected purchasers also will be considered. Applications that are submitted on behalf of groups of purchasers will be evaluated on a case-by-case basis.

B. Distribution of the Remainder of the Refund Amount

After all meritorius claimants have received the share of the settlement fund to which they are entitled, the fund, while diminished, may not be exhausted. The remainder of the funds should be distributed during the second stage of the refund process in furtherance of the goals set forth in the DOE's enabling legislation and implementing regulations. In this decision, we are proposing several alternatives for the second-stage refund procedure. However, we wish to emphasize that any consideration of the second-stage procedure at this point in time involves a number of uncertainties. As we noted in *Vickers*, such a step would be difficult to take before the analysis and processing of Applications for Refund filed in the first stage of the distribution of the consent order funds to claimants, since the amount remaining after all meritorius claims have been paid directly affects the appropriateness of the second-stage distribution scheme. *Vickers*, 8 DOE ¶ 82,597 at 85,397. As in that case, we intend to set forth a number of second-stage alternatives in this proposed decision, consider the comments received after publication in the **Federal Register**, and then issue a final Decision and Order establishing procedures for the first stage. In that decision, we will summarize and address briefly the comments received concerning the proposed second-stage procedure, and will solicit another round of comments on the distribution of the funds remaining after payment of claims in the first stage. In this way, we will have several opportunities to consider the outstanding issues before reaching a final decision on the second stage.

Since refunding money is the primary concern of Subpart V proceedings, we believe that the remaining funds should, if administratively and economically feasible, be distributed to groups of ultimate consumers who were likely to have borne a portion of the higher prices charged by OKC. In view of the relatively small sums of money likely to be involved in claims by many ultimate consumers, and the improbability that members of this class will possess records sufficient to establish their claims, we anticipate that only a limited number of ultimate consumers who were actually injured by the alleged overcharges will be able to prove during the first stage of the refund process that they are entitled to refunds. *See Vickers*. The fact that claims to specific refunds may not have been proved, however, does not mean that injuries to ultimate consumers have not occurred. Rather, the absence of claims for the full amount of the settlement would tend to reflect the difficulty such parties encounter in establishing a valid claim for a portion of the consent order funds.

In *Office of Enforcement*, No. BEF-0021 (March 13, 1981) (proposed decision) (hereinafter referred to as *Alcoa*) we observed that the first purchasers of the products covered by the consent orders are in the best position to assist the DOE in identifying and distributing refunds to those persons who are likely to have been injured by the alleged overcharges. *Alcoa*, slip op. at 9. In this case as well, we believe that OKC's first purchasers can most effectively assist the DOE in channeling the remaining consent order funds to persons who are most likely to have been injured by the alged overcharges. Consequently, one alternative we propose is that after payments are made to successful claimants, any remaining funds be distributed through the first purchasers. We invite those firms to develop and

submit to us plans for returning these funds to the parties who likely paid increased prices as a result of the alleged overcharges. The plans should identify the end-users, or groups of end-users, who were most likely to have been adversely affected by the alleged overcharges made by the resellers in this proceeding. Each firm should take into account its distribution and marketing system and its method of calculating prices during the relevant period. To the extent that purchases of a product from particular firms can be isolated in the appropriate distribution system, the plans should limit the proposed refunds to customers who were downstream purchasers of the products covered by the consent order. The plans should also be designed to exclude from participation in this stage of the refund process any purchaser who recoverd a portion of the consent order funds during the first-stage distribution to successful claimants. In addition, consideration should also be given to the cost efficiency and administrative ease of any proposed refund plan.

Although the primary aim of the Subpart V process is to distribute the consent order funds to the parties who were injured as a result of alleged overcharges, we recognize that in some cases a firm would not be inclined to spend the time or resources necessary to develop and implement an effective restitutionary plan and thus, in several instances injuries may go unredressed. For example, the funds to be distributed by a particular firm may be so small in relation to the number of parties entitled to share in the proceeds that the costs to the firm would outweigh the benefits of the plan. (3) Under such circumstances, the costs associated with administering a refund plan would be out of proportion to the fund available for distribution. Therefore, it is likely that a first purchaser dealing with such a small amount would not be inclined to develop and implement a resitutionary plan.

As an alternative to the method of distribution outlined above, refunds might be made in the form of lowered energy or energy related costs in areas where the products associated with the alleged overcharges by OKC were marketed. For example, in *Office of Special Counsel for Compliance*, No. DFF-0003 (March 13, 1981) (proposed decision) we proposed that the second-stage refund to consumers who were likely to have been overcharged be effected by using rate-regulated utilities to pass through the remaining funds to consumers through fuel adjustment clauses or other appropriate mechanisms. We observed that it is likely that the persons who purchased motor gasoline or heating oil in a particular area would reside there as well and would be ultimate consumers of electricity. They would therefore benefit from the proposed rate reduction. We further suggested that state governments in the affected areas also may be designated as refund recipients for the purpose of reducing energy-related expenses subject to their direct control. Although we cannot yet determine what actions we will take in the second stage, we will consider this type of restitutionary scheme as one possible alternative.

In the event that the distribution schemes discussed above prove to be inappropriate because of administrative costs or the lack of accurate information, we propose that the portion of the settlement fund which would go undistributed be deposited in the United States Treasury. We also propose as an alternative to the distribution scheme outlined above that any funds remaining after the first stage claims procedure be deposited directly into the United States Treasury. Subpart V regulations specifically sanction this course of action, *see* 10 CFR 205.287(c), and direct payments to the Treasury may well be appropriate in those cases where other remedies would be ineffectual or administratively burdensome. *See Citronnelle-Mobile Gathering, Inc. v. O'Leary*, 499 F. Supp. 871 (S.D. Ala. 1980); *Golden Eagle Oil Co.*, 6 DOE ¶ 83,005 at 86,065 (1980); *Chana's Auto Service Center*, 8 DOE ¶ 83,002 (1981). However, as noted above, we will not be in a position to decide what should be done with any remaining funds until after the first-stage refund procedure is completed. Only then will we know the amount of money available for the second stage of the refund process. This factor, as noted above, will strongly influence the ultimate disposition of those funds.

It is therefore ordered that:

The $4,750,000 refund amount provided by OKC Corp. in accordance with the July 17, 1980 Consent Order will be distributed in the manner set forth in the foregoing Decision.

Footnotes

(1) The Economic Regulatory Administration has recently been reorganized. Under that reorganization, the Office of Enforcement has been integrated into the Office of Special Counsel. However, throughout this decision we will continue to refer to the Office of Enforcement.

(2) On July 2, 1981, Town and Country Markets, Inc. submitted comments to this office regarding the adoption of Special Refund Procedures under Subpart V. Town and Country acknowledged in its submission that comments had not been solicited at this stage of the proceeding but stated that it believed "that the significant interest it has in the disposition of the refunds makes these comments appropriate prior to the issuance of a proposed Decision and Order (PDO) in this matter." Letter from William W. Scott to Terry Johnson, June 30, 1981 at 1. Since these comments simply elaborate on Town and Country's September 2, 1980 comments on the consent order, and in view of our full discussion of these arguments in *Coline* (cited below), we find it unnecessary to consider whether these comments are appropriately before us.

(3) For example, in *Office of Enforcement*, No. BEF-0014 (May 22, 1981) (proposed decision), preliminary data supplied by the Office of Enforcement indicated that four of one firm's first purchasers would have available for distribution the following amounts: $56.25, $43.75, $518.75, and $537.50. *Id.*, slip op. at 10.

ENVIRONMENTAL PROTECTION AGENCY

[PF-146A; PH-FRL-2013-8]

E. I. Du Pont de Nemours and Co.; Amendment to Pesticide Petition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: E. I. du Pont de Nemours and Co. has amended a pesticide petition (PP 9F2238) proposing the establishment of a tolerance for residues of the insecticide oxamyl to include the raw agricultural commodity peanut forage.

ADDRESS: Written comments to: Jay S. Ellenberger, Product Manager (PM) 12, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Jay S. Ellenberger (703-557-2386).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the Federal Register of August 24, 1979 (44 FR 49789), announcing that E. I. du Pont de Nemours and Co., Wilmington, DE 19898, had submitted a pesticide petition (PP 9F2238) proposing that 40 CFR 180.303 be amended by establishing tolerances for residues of the insecticide oxamyl (methyl *N',N'*-dimethyl-*N*-[(methylcarbamoyl)oxy]-1-thiooxamimidate) in or on the raw agricultural commodities peanuts and peanut hulls at 0.2 ppm and peanut hay at 10.0 ppm.

E. I. du Pont de Nemours and Co. has submitted an amendment proposing to

include peanut forage at 2.0 ppm. The proposed analytical method for determining residues is by flame photometric gas chromatography.

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136))

Dated: December 10, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[PF-253; PH-FRL—2013-6]

Mobay Chemical Corp.; Amendments to Pesticide Petition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Mobay Chemical Corp. has amended a pesticide petition (PP 2F1244) proposing the establishment of tolerances for residues of the insecticide *O*-isopropoxyphenyl methylcarbamate and its carbamate metabolites in or on certain raw agricultural commodities.

ADDRESS: Written comments to: Jay S. Ellenberger, Product Manager (PM) 12, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Jay S. Ellenberger (703–557–2386).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of June 3, 1972 (37 FR 11198), announcing that Mobay Chemical Corp, PO Box 4913, Hawthorn Rd, Kansas City, MO 64120, had submitted a pesticide petition (PP 2F1244) proposing that 40 CFR Part 180 be amended by establishing tolerances for residues of the insecticide *O*-isopropylphenyl methlylcarbamate and its carbamate metabolites in or on the raw agricultural commodities alfalfa hay at 100 part per million (ppm); fresh alfalfa at 65 ppm; pasture grass hay at 55 ppm; pasture grass at 35 ppm; oat fodder and forage at 2 ppm; oat straw at 1 ppm; oat grain and meat, fat, and meat byproducts of cattle, sheep, and goats at 0.1 ppm; and milk at 0.01 ppm.

Mobay Chemcial Corp. has submitted amendments to the petition as follows:

(1) Increasing the proposed tolerances for meat, fat, and meat byproducts of cattle, goats, and sheep from 0.1 ppm to 0.2 ppm and milk from 0.01 ppm to 0.1 ppm.

(2) Adding a tolerance proposal of 0.2 ppm for meat, fat, and meat byproducts of hogs, horses, and poultry and eggs at 0.04 ppm.

The proposed analytical method for determining residues of the insecticide is a procedure in which the parent compound and its *N*-hydroxymethyl metabolite are hydrolyzed and reacted with trichloracetyl chloride, and the *O*-hydroxy metabolite reacted without prior hydrolysis. The derivatives are analyzed by gas chromatography using and electron capture detector.

[PP 1G2512/T341; PH-FRL—2014-1]

Methomyl; Establishment of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for residues of the insecticide methomyl, *S*-methyl *N*-[(methylcarbamoyl)oxy]thioacetimidate, in or on the raw agricultural commodities, pineapple at 0.2 part per million (ppm) and pineapple forage at 1.0 ppm.

DATE: These temporary tolerances expire October 27, 1983.

FOR FURTHER INFORMATION CONTACT: Jay Ellenberger, Product Manager (PM) 12, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 202, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2386).

SUPPLEMENTARY INFORMATION: Shell Oil Co., 1025 Connecticut Ave., NW., Suite 200, Washington, DC 20036, has requested the establishment of temporary tolerances for residues of the insecticide methomyl, *S*-methyl *N*-[(methylcarbamoyl)oxy]thioacetimidate, in or on the raw agricultural commodities, pineapple at 0.2 ppm and pineapple forage at 1.0 ppm.

These temporary tolerances will permit the continued marketing of the above raw agricultural commodities when treated in accordance with the provisions of experimental use permit 201–EUP–72, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and all other relevant material were evaluated, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Shell Oil Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire October 27, 1983. Residues in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

As required by Executive Order 122291, EPA has determined that these temporary tolerances are not a "Major" rule and therefore do not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted temporary tolerances from the OMB review requirements of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 610–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516, (21 U.S.C. 346a(j)))

Dated: December 10, 1981.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of three PMNs and provides a summary of each.

DATES: Written comments by:

PMN 81-642: February 16, 1982.
PMN 81-643 & 81-644: February 19, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS-51373]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, DC 20460, (202-382-3532).

FOR FURTHER INFORMATION CONTACT: David Dull, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M St., SW., Washington, DC 20460, (202-426-2601).

SUPPLEMENTARY INFORMATION: The following are summaries of information provided by the manufacturer on the PMNs received by EPA:

PMN 81-642

Close of Review Period. March 18, 1982.

Manufacturer's Identity. Calgon Corporation, P.O. Box 1346, Pittsburgh, PA 15230.

Specific Chemical Identity. Terpolymer of dimethyl diallyl ammonium chloride/acrylamide/sodium acrylate.

Use. The manufacturer states that the PMN substance will be used as an industrial thickner, stablizer, dispersant, coagulant, rheological modifer.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties.

Appearance—Viscous, white liquid free of gel with ammonical odor
pH—7-10
Specific gravity—0.95-1.05 g/ml
Boiling point—>212°F
Melting point—>100°C
Volatile matter @ 450°C—99.30%
@ 900°C—99.83%
Ash @ 450°C—0.70%
@ 900°C—0.17%
Solubility:
Water—Soluble
Ethyl alcohol—Slightly soluble
Methyl alcohol—Slightly soluble
Acetone—Insoluble
Isopropyl alcohol—Insoluble
Ethyl acetate—Insoluble
Ether—Insoluble
Hexane—Insoluble
Carbon tetrachloride—Insoluble
Kerosene—Insoluble
Water content—Variable—dilute aqueous solution through dried solid

Toxicity Data

Oral LD_{50} (rats)—
> 10 gm/kg highest level tested in male and female (1967)
> 4.64 gm highest level tested in male and female (1969)
Eye irritation, Draize (rabbits)—Not irritating, no corneal damage to eye
Primary skin irritation (rabbits)—Variable results "precluded precise scoring for primary irritation" (1967) 5 or 6 rabbits no effect; 6th rabbit showed a "corrosive type" reaction

Exposure. The manufacturer states that during manufacture and disposal up to 6 shift workers may experience dermal exposure up to 24 hrs/day, during blending, manufacturing, and cleaning.

Environmental Release/Disposal. The manufacturer states that 100-1,000 kg/yr will be released to air 24 hrs/day, 1,000-10,000 kg/yr to land and 10-100 kg/yr rarely to water.

PMN 81-643

Close of Review Period. March 21, 1982.

Manufacturer's Identity. Buckman Laboratories, Inc., 1256 N. McLean Boulevard, Memphis, TN 38108.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Cationic acrylamide copolymer.

Use. The manufacturer states that the PMN substance will be used as a paper making additive and flocculant.

PRODUCTION ESTIMATES

	Pounds per year	
	Minimum	Maximum
1st year	20,000	60,000
2d year	50,000	100,000
3d year	75,000	150,000

Physical/Chemical Properties

pH—2.0 to 3.5
Specific gravity—1.03 to 1.06
Flash point—> 200°F
Viscosity—1,000-5,000 cPs

Toxicity Data. Further clarification needed before information may be released to the public files.

Environmental Test Data. Further clarification needed before information may be released to the public files.

Exposure. The manufacturer states that during manufacture and processing 6 workers may experience dermal exposure 12 hrs/day, 30 days/yr.

Environmental Release/Disposal. Disposal is to a publicly owned treatment works (POTW).

PMN 81-644

Close of Review Period. March 21, 1982.

Manufacturer's Identify. Buckman Laboratories, Inc. 1256 N. McLean Boulevard, Memphis, TN 38108

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Cationic acrylamide copolymer.

Use. The manufacturer states that the PMN substance will be used as a paper-making additive and a flocculant.

PRODUCTION ESTIMATES

	Pounds per year	Minimum
		Maximum
1st year	20,000	60,000
2d year	50,000	100,000
3d year	75,000	150,000

Physical/Chemical Properties

pH—2.0 to 3.5
Specific gravity—1.03 to 1.06
Flash point—> 200°F
Viscosity—1,000-5,000 cPs

Toxicity Data. Further clarification needed before information may be released to the public files.

Environmental Test Data. Further clarification needed before information may be released to the public files.

Exposure. The manufacturer states that during manufacture and processing 6 workers may experience dermal exposure up to 12 hrs/day, 30 days/yr and that during use 250 workers may experience dermal exposure up to 1 hr/day, up to 100 days/yr. The manufacturer states that exposure will occur from splashing during sampling and drumming.

Environmental Release/Disposal. No data were submitted. Disposal is to a publicly owned treatment works (POTW).

Dated: December 23, 1981.

Woodson W. Bercaw,

Acting Director, Management Support Division.

BILLING CODE 6560-31-M

FEDERAL COMMUNICATIONS COMMISSION

Privacy Act of 1974; Annual Publication of Notices of Systems of Records

AGENCY: Federal Communications Commission (FCC).

ACTION: Notice; annual publication of notices of systems of records.

SUMMARY: The purpose of this notice is to meet the requirements of the Privacy Act of 1974 regarding the annual publication of an agency's notices of systems of records.

COMMENT DATE: Interested parties may submit written comments regarding any of the changed or new routine uses in these notices. To be considered, comments must be received on or before January 29, 1982.

ADDRESS: Address comments to the FCC Privacy Act Officer (Room A-102), Records Management Branch, Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554. Comments received will be available for public inspection between 8 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: The appropriate system manager.

SUPPLEMENTARY INFORMATION:

Table of Contents:

Broadcast Bureau (BCB)
BCB–1, Broadcast Station Ownership Interest File, Common Carrier Bureau (CCB)
CCB–1, Alphabetical Complaint and Inquiry File
CCB–2, Contracts for Personal Service
CCB–3, Employment Discrimination Complaints
CCB–4, Public Land Mobile Radio Operators File, Field Operations Bureau (FOB)
FOB–1, Radio Operator Records
FOB–2, Violators File Records Kept on Individuals, Office of Science and Technology (OST)—formerly Office of Chief Engineer (OCE)
OST–1, Experimental Radio Station Licensee File, Office of Managing Director (OMD)—formerly Office of Executive Director (OED)
OMD–1, Docket History Cards
OMD–2, Employee Relations Case File
OMD–3, National Industry Advisory Committee Membership
OMD–4, Security Office Control Files
OMD–5, State and Operational Areas Emergency Communications Commission
OMD–6, Money Received, Refunded and Returned, Office of General Counsel (OGC)
OGC–1, Alleged Violators File (Ex Parte Rules)
OGC–2, Attorney Misconduct Files
OGC–3, Employee Complaint Adjudication
OGC–4, Parties Involved in Current Litigation Before Federal Courts
OGC–5, Parties with Pending Civil Cases Before any District Court
OGC–6, Private or Civil Injury Claimants
Cable TV Bureau (CTB)
CTB–1, Cable Operator Ownership File, Private Radio Bureau (PRB)—formerly Safety and Special Radio Services, (SSRS)
PRB–1, Amateur and CB License Fees, Refunded and Uncollectable
PRB–2, Application and License File
PRB–3, Current Projects File
PRB–4, Licensees or Unlicensed Persons Operating Radios Improperly
PRB–5, Application Review List for Present or Former Licensees, Operators or Unlicensed Persons Operating Radio Equipment Improperly
FCC/Central–1, Pay, Leave and Travel Records
FCC/Central–2, Employee Locator Card Files
FCC/Central–3, Grievance Records
FCC/Central–4, Employee Activity Reporting System
FCC/Central–5, Alcoholism and Drug Abuse Case Files
FCC/Central–6, Personnel Investigation Records
FCC/Central–7, Freedom of Information Case Files

As required by the Privacy Act, 5 USC 552a(e)(4), this document sets forth the annual notice of the existence and character of the system of records maintained by the FCC. The complete text of all FCC notices of systems of records appears below. Effective 2/1/82, three new systems are being added due to administrative oversight: PRB–4, Application Review List for Present or Former Licensees, Operators, or Unlicensed Persons Operating Radio Equipment Improperly; OMD–4, Security Office Control Files; Central–7, Freedom of Information Case Files.

In a few cases no changes have been made to the notice and in some cases only slight, administrative changes have occurred, e.g., a change in location of records, a change in retention schedule. The majority of system changes include deleted systems which fall within the scope of established Office of Personnel Management (OPM) governmentwide systems, and deletions through consolidation of individual Bureau/Office systems under an FCC-wide system.

The following systems are being deleted because they fall within the scope of established OPM governmentwide systems. The Commission systems entitled, Employee Records, for the following offices are being deleted because they fall within OPM–1, General Personnel Records: BCB–4, CTB–3; COMM–2; CCB–6; FOB–1; ALJ–2; OCE–2; OGC–12; SSRSB–6; OOR–1; OPP–1; RB–1.

The systems regarding "Applications" for the following Offices are being deleted because they fall within OPM–5, Recruiting, Examining and Placement Records: CTB–1; COMM–1; CCB–2; OGC–4; OPP–2.

The systems being deleted which fall within the scope of OPM–8, Confidential Statements of Employment and Financial Interests, are OED–5, Financial Disclosures by Employees, and OGC–7, Conflict of Interest by Commission Employees and Prospective Employees.

Many of the Commission's systems are being consolidated under an FCC/Central identity to reflect systems common to two or more bureaus/offices within the agency, or which may include all Commission employees under the element, "Categories of Individuals Covered by the Systems". The new FCC/Central systems and their respective Bureau/Office consolidations are as follows:

FCC/Central-1, Pay, Leave and Travel Records replaces similar systems for the following: CTB–4; CCB–9; Administrative Law Judges (ALJ)–3; OGC–10; PRB–7; and OED–12.

FCC/Central-2, Employee Locator Card Files, replaces OED–13, Employee Locator Records. FCC/Central-3, Grievance Records, establishes a Commissionwide system since OPM discontinued its governmentwide system entitled, Grievance Records, OPM–GOVT–2. FCC/Central-4, Employee Activity Reporting System replaces the following similar systems: BCB–3; CTB–2; ALJ–1; OCE–1; OED–1; PRB–5. FCC/Central-5, Alcoholism and Drug Abuse Case Files replaces OED–2 of the same name. FCC/Central-6, Personnel Investigation Records, replaces OED–6, Personnel Investigations of Employees and OED–9, Personnel Investigations of Members of Advisory Committee.

The following systems are being deleted since they do not meet the Privacy Act system definition; that is, they are not accessible by individual identifiers: BCB–2, Complaints Against Broadcast Stations; CCB–3, AT&T Witness File; CCB–5, Correspondence Associated with Docketed Matters; OGC–1, Alien Rights Under Section 310; OGC–6, Communications Interception-Section 605; OGC–17, Witness Appearance Request File. OGC–3, Alleged Violators File is being deleted

because the records are contained in the case files of the Field Operations Bureau, FOB–2, Violators File. OGC–9, Convicted Felon Licensees and Suspensions is being deleted because the records are contained in FOB–1, Radio Operator Records. OGC–8, Contracts for Personal Services; OED–6, Index of Commission Agenda Items; OED–10, Project Management of the Data Automation Division; OGC–16, Recess and Interim Appointments of Employees; and PRB–3, Conditional Amateur Licensees, are being deleted because they are no longer maintained.

Requesting Records: Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required, to locate and retrieve the record.

FCC/BCB–1

SYSTEM NAME:

Broadcast Station Ownership Interest File.

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Owners of all licensed broadcast stations and officers, directors, and stockholders of corporate owners.

CATEGORIES OF RECORDS IN THE SYSTEM:

Forms 323 and 323E, Ownership Reports, which identify who has ownership interests and the extent of such interests.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 308, 309, 310 of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by staff attorneys to determine other broadcast interests, if any, of broadcast applicants; used as a cross check against new ownership reports to see whether any improper transfers of interest have taken place. If the records indicate a possible violation of law, they may be referred to the appropriate agency charged with the responsibility of prosecuting the violation and enforcing the statute or rule.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, index cards, magnetic tape.

RETRIEVABILITY:

By call letters of broadcast stations, by names of owners.

SAFEGUARDS:

Available to the public during Commission business hours.

RETENTION AND DISPOSAL:

Inactive segments are transferred to the Federal Records Center 6 months following the closure of second succeeding renewal period (renewal period is 3 years). Offered to the National Archives 45 years after transfer.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Broadcast Bureau, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Licensees.

FCC/CCB–1

SYSTEM NAME:

Alphabetical Complaint and Inquiry File.

SYSTEM LOCATION:

2025 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have made complaints or inquiries.

CATEGORIES OF RECORDS IN THE SYSTEM:

Complaints and related supporting information, company replies to complaints, letters of inquiry and Commission letters regarding such complaints and inquiries.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 208 of the Communications Act; FCC Rules, Section 1.711 et. seq.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used for handling individual letters of inquiry and complaint.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File cabinets.

RETRIEVABILITY:

Records are retrieved by individual name.

SAFEGUARDS:

Stored in unlocked files and secured in office after hours.

RETENTION AND DISPOSAL:

The records are retained in the Commission's offices for 5 years and then retired to the Federal Records Center.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Common Carrier Bureau, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Complaints and subject carriers.

FCC/CCB–2

SYSTEM NAME:

Contracts for Personal Services.

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Professional people who bid or are recommended as experts, and whose services are requested for a specific study or case.

CATEGORIES OF RECORDS IN THE SYSTEM:

Background histories, resumes of previous services provided the Commission, workcontracts, salary requests, internal memoranda.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 4(g) of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Record is used by administrative personnel to secure qualified persons to serve as expert witnesses or as consultants.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Information in this system is retrieved by name.

SAFEGUARDS:

Records are kept in file cabinets in the bureau administrative office. These offices are locked at the close of each business day.

RETENTION AND DISPOSAL:

These records are retained until their administrative need has ended, then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Common Carrier Bureau, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

FCC procurement office, previous employers, college or university officials.

FCC/CCB-3

SYSTEM NAME:

Employment Discrimination Complaints Against Common Carriers

SYSTEM LOCATION:

2025 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All individuals who send complaint letters to the FCC concerning alleged employment discrimination by common carriers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Complaint letters, responses of the Bureau, any materials gathered in investigating the complaints, and correspondence to other governmental agencies regarding complaints.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 403 of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by EEO counsel, members of the Hearing and Legal Division staff to investigate the complaint and take part in the resolution of the matter. The record system may also be referred as routine to the appropriate agency charged with the responsibility of investigating or prosecuting a possible violation of law or charged with enforcing the applicable statutes or rules.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

All records are retrieved by complainant's name.

SAFEGUARDS:

Records are maintained in file cabinets in offices that are locked at the close of each business day.

RETENTION AND DISPOSAL:

Indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Common Carrier Bureau, 1919 M Street, N.W., Washington, D.C. 20554

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Common Carrier officials.

FCC/CCB-4

SYSTEM NAME:

Public Land Mobile Radio Operators File

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Users of mobile units and applicants for service in the Public Land Mobile Radio Service.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for land mobile radio licenses, copies of licenses; a computerized list of licenses by name and by call sign.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 307 of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Mobile Service Division staff to grant, dismiss or revoke applications.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders (computer printout).

RETRIEVABILITY:

Records are retrieved by licensee name.

SAFEGUARDS:

Records are open to public inspection.

RETENTION AND DISPOSAL:

Records are maintained on open shelves for as long as the station is in existence. Files are held for one year after service is terminated, then destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Common Carrier Bureau, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Individuals making applications.

FCC/FOB-1

SYSTEM NAME:

Radio Operator Records

SYSTEM LOCATION:

Primary: 1919 M Street, N.W., Washington, D.C. 20554. Secondary: various field facilities (for addresses, See Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have applied for radio operator licenses.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for radio operator licenses, examination papers, records of documents issued, correspondence, etc.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Geneva Radio Regulations; 47 U.S.C. Section 303 (l), (m), and 318.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For use in connection with the administration of the Commission's radio operator program including examinations, applications, and determinations of license applicant qualifications. Limited file material concerning licensed radio operators is forwarded to the Office of Managing Director for inclusion of the material in the agency's central computer facility. If the records maintained indicate a possible violation of law, they may be referred, as routine, to the General Counsel and to the appropriate agency charged with the responsibility of investigating or prosecuting such violation.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, microfilm (applicants names only).

RETRIEVABILITY:

All records in this system are retrievable by applicant name.

SAFEGUARDS:

All records are kept in file cabinets, in offices that are secured at the close of each business day.

RETENTION AND DISPOSAL:

Applications are retained for a period of 6 years, transferred to the Federal Records Center for an additional 5 years, then destroyed. (Exception: Restricted Permits are issued for "life" and those applications are therefore retained indefinitely.)

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Field Operations Bureau, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

FOB field employees engaged in radio operator application processing.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Parts of this system of records are exempt from subsections (c) (3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f) of the Privacy Act because such parts contain investigatory material compiled solely for law enforcement purposes pursuant to Section (k)(2) of the Act.

FCC/FOB-2

SYSTEM NAME:

Violators File (records kept on individuals who have been subjects of FCC field enforcement actions)

SYSTEM LOCATION:

Primary: 1919 M Street, N.W., Washington, D.C. 20554. Secondary: various field facilities (for addresses, See Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have been subjects of FCC field enforcement actions (monitoring, inspection, investigation) for violations of radio law, FCC Rules and Regulations, or International Radio Treaties.

CATEGORIES OF RECORDS IN THE SYSTEM:

Inspection reports, complaints, monitoring reports, investigative cases, referral memos, correspondence, discrepancy notifications, warning notices, forfeiture actions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

47 U.S. Code, Sections 101, 102, 104, 301, 312, 315, 318, 386, 401, 404, 501, 502, 503.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

For use in connection with the Commission's field enforcement programs to determine levels of compliance among radio users; to issue marine certificates of compliance; to prepare requests for sanction action. Where sanctions are requested, file material is forwarded to appropriate offices within the Commission. If the records indicate a possible violation of law, they may be referred, as a routine use, to the appropriate agency charged with the responsibility of investigating or prosecuting such violation or charged with enforcing the applicable statutes or rules.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

All records in this system are retrievable by name and by FCC issued call sign.

SAFEGUARDS:

All records are kept in file cabinets, in offices which are secured at the close of each business day.

RETENTION AND DISPOSAL:

All violation notices are maintained for a period of 4 years, then destroyed (classified material is destroyed by burning or shredding).

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Field Operations Bureau, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Commission employees located in the Field Offices, District Offices and Monitoring Stations.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Parts of this system of records are exempt from subsections (c) (3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f) of the Privacy Act of 1974, 5 U.S.C. 552(a), and from §§ 0.554–0.557 of the Commission's Rules because such parts are maintained as a protective service for individuals described in Section 3056 of Title 18, and because they are necessary for Commission employees to perform their duties, pursuant to sections (k)(1), (2), and (3) of the Act.

FCC/OST-1

SYSTEM NAME:

Experimental Radio Station License Files

SYSTEM LOCATION:

Room 7216, 2025 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Those who have been granted a license to operate an experimental radio station under Part 5 of the Commission's Rules.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains the application form (FCC Form 442, Application for a New or Modified Station) or renewal form (FCC Form 405, Application for Renewal of Station License) and/or the application form required if a Federal contract is involved (FCC Form 440A) and supporting exhibits submitted by

the applicant. May also include experimental project reports submitted by the applicant as required by FCC Rules, Part 5. File also includes comments from other Commission bureaus nd interference potential of operation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Communications Act of 1934, as amended, Section 308. FCC Rules and Regulations, Part 5, Experimental Radio Services (other than Broadcast).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To make a determination of applicant's eligibility to operate a station in the experimental radio service; to determine interference potential to other radio services, as well as determine if project of experimentation is valid; to Federal agencies, other FCC bureaus, or to the public if it feels it may be impacted or wants to know what new experimentation is being conducted. FCC bureaus use the information to determine the interference potential as well as possible use in rulemakings. The information is available to anyone, unless the applicant has requested confidentiality under § 0.459 of the Commission's Rules or the information is classified.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

Files are retrieved by licensee name. If more than one station per licensee, then also filed by call sign.

SAFEGUARDS:

All files are available to the public except classified files and files that have been granted confidentiality under § 0.457 of the Commission's Rules. Classified files are kept in locked cabinets in accordiance with security regulations. Files that have been granted confidentiality under § 0.457 are marked "NOT FOR PUBLIC INSPECTION" and may only be accessed by Branch personnel and Commission employees who have a need to know the information.

RETENTION AND DISPOSAL:

Records are transferred to the Federal Records Center when 15 years old, or upon expiration date, cancellation or non-renewal; destroyed 7 years after transfer.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Frequency Liaison Branch, Room 7212, 2025 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

The majority of information comes from the individual. Other information comes from coordination with other FCC bureaus and from that which is generated within the Branch during the normal processing of the application.

FCC/OMD-1

SYSTEM NAME:

Docket History Cards

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Licensees whose applications have been designated for hearing and Petitioners who request an amendment of Commission's Rules.

CATEGORIES OF RECORDS IN THE SYSTEM:

Docket history cards and cross-reference cards.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 0.11(g) of the Commission's Rules.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Commission employees and general public use records to locate pleadings that have been filed, pertinent dates, and Commission actions that are filed in the public reference room.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

5 inches by 8 inches history card file cabinets by docket number, 3 inches by 5 inches alphabetically in electrical rotary file.

RETRIEVABILITY:

History cards are maintained by numerical docket numbers; and cross-reference cards are maintained alphabetically. Cross-reference cards contain the name of an individual and the docket number thus permitting access to the docket history card.

SAFEGUARDS:

Public access is controlled by Commission employees who provide necessary reference services.

RETENTION AND DISPOSAL:

Records are retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information is secured from pleadings and actions taken by Commission officials.

FCC/OMD-2

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FCC employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence of an employee relations nature including debt complaints and supervisory generated warnings or other forms of admonishment regarding disciplinary matters.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 4(i) of the Communications Act of 1934, as amended (47 U.S.C. 154(i)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by the Employee Relations Officer for reference and the development of an effective employee relations program.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

In file folders.

RETRIEVABILITY:

Records are filed alphabetically and retrieved by name of employee.

SAFEGUARDS:

Records are maintained in a file located in the office of the Employee Relations Officer, Personnel Division. The office is locked at the end of each business day.

RETENTION AND DISPOSAL:

Records are retained for a maximum of 2 years and then destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

RECORD SOURCE CATEGORIES:

Supervisors, employees, private citizens.

FCC/OMD-3

SYSTEM NAME:

National Industry Advisory Committee (NIAC) Membership.

SYSTEM LOCATION:

1229 20th Street, NW., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of the National Industry Advisory Committee and its Subcommittees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information showing individual name, business address, business and home telephone numbers, title and occupation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Pub. L. 92-463, October 6, 1972, Federal Advisory Committee Act.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used to distribute information to members of the committee, convene meetings, and conduct general committee business.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are filed and retrieved by name of committee members.

SAFEGUARDS:

Records are maintained on a division level in file cabinets in offices which are locked at the end of each business day.

RETENTION AND DISPOSAL:

Records are retained indefinitely while individual is a member of the committee; when member resigns or retires from business, individual file material is destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, NW., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Committee member.

FCC/OMD-4

SYSTEM NAME:

Security Office Control Files.

SYSTEM LOCATION:

1919 M St., NW., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUAL COVERED BY THIS SYSTEM:

Current and former employees of the FCC.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system consists of cards, filed alphabetically, containing date of birth, place of birth, Social Security Number, classification as to position sensitivity, types and dates of investigations, investigative reports, dates and levels of clearances.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10405 and Executive Order 12065.

PURPOSE(S):

These records are used exclusively by FCC Security Officers and the employees of the Security Office for administrative reference in connection with controlling position sensitivity and personnel clearances.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES FOR SUCH USES:

(1) To disclose information to an agency in the executive, legislative, or judicial branch, or the District of Columbia Government, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

(2) To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

(3) To disclose pertinent information to the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

(4) To disclose information to the security office of an agency in the executive, legislative, or judicial branch, or the District of Columbia Government, in response to its request for verification of security clearance, to FCC employees to have access to classified data or areas where their official duties require such access.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on cards.

RETRIEVABILITY:

Records are retreived by the name and date of birth of the individuals on whom they are maintained.

SAFEGUARDS:

The cards are stored within a secured area. The cards do not leave the security office.

RETENTION AND DISPOSAL:

Cards are retained for twenty years after the individual leaves the agency and then are disposed of by burning.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Individuals wishing to inquire whether this system of records contains information about them should contact the appropriate system manager indicated above. Individuals must furnish the following information for

their records to be located and identified:

a. Full name.

b. Date of birth.

RECORD ACCESS PROCEDURES:

Individuals wishing to request access to records about them should contact the appropriate system manager indicated above. Individuals must furnish the following information for their record to be located and identified:

a. Full name.

b. Date of birth.

An individual requesting access must also follow Privacy Act regulations regarding verification of identity and access to records (5 CFR 297.201 and 297.203).

CONTESTING RECORD PROCEDURES:

Individuals wishing to request amendment of their records should contact the appropriate system manager indicated above. Individuals must furnish the following information for their record to be located and identified:

a. Full name.

b. Date of birth.

An individual requesting amendment must also follow the Privacy Act regulations regarding verification of identity and amendment of records (5 CFR 297.201 and 297.208).

RECORD SOURCE CATEGORIES:

a. The individual to whom the information applies.

b. Investigative files maintained by the Division of Personnel Investigations.

c. Employment information maintained by the Director of Personnel.

FCC/OMD-5

SYSTEM NAME:

State and Operational Areas Emergency Communications Committees.

SYSTEM LOCATION:

1229 20th Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Chairmen and Vice Chairmen of State and Operational Area Emergency Communications Committees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information showing individual name, business address, business telephone number and title.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Pub. L. 92-463, Federal Advisory Committee Act.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used to forward appropriate information to State Committee members, each broadcast station in the State and to Federal, State and local government officials for Emergency Communications planning.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are filed by state and by name of committee member within the state.

SAFEGUARDS:

Records are maintained on a division level in file cabinets which are locked at the end of each business day.

RETENTION AND DISPOSAL:

Records are retained idefinitely while the individual is a member of the committee; when member resigns, individual file material is destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURES:

Same as above. Name of state must be provided with any request for information.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURE:

Same as above.

RECORD SOURCE CATEGORIES:

Committee member.

FCC/OMD-6

SYSTEM NAME:

Records of money received, refunded, and returned and personal checks destroyed.

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554, Route 116, Gettysburg, PA. 17325 and Room 207, Post Office Building, Gettysburg, Pa. 17325.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals and companies making payments to cover goods acquired, forfeitures assessed, and services rendered; refunds for incorrect payments or overpayments; billing and collection of bad checks; and miscellaneous monies received by the Commission.

CATEGORIES OF RECORDS IN THE SYSTEM:

Names of individuals or companies; addresses of individuals or companies; goods acquired or services rendered; forfeitures assessed and collected; amounts; dates; check numbers; locations; bank deposit information; transaction type information; United States Treasury deposit numbers; ship name and call sign; and information substantiating a refund issued to applicant.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Budget and Accounting Act of 1921; Budget and Accounting Procedures Act of 1950; and 31 U.S.C. 525.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Accounting for all monies received by the Commission from the Public, refunded to the public, returned to the public, and release of the information to Federal, State, or local Government agencies performing a tax, investigative, or regulatory function.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper copy, computer copy, microfilm, microfiche, magnetic disc, and magnetic tape.

RETRIEVABILITY:

By name and/or type of transaction; call sign; processing number, employer identification number, soundex number, or sequential number.

SAFEGUARDS:

Records are located in lockable metal file cabinets, metal vaults, and in metal file cabinets in secured rooms or secured premises, with access limited to those individuals whose official duties require access.

RETENTION AND DISPOSAL:

Retained for one year following the end of the fiscal year; then transferred to the Federal Records Center and destroyed when 6 years and 3 months old.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURE:

Same as above.

RECORD SOURCE CATEGORIES:

Subject individual and/or company; Federal Reserve Bank; Agent of Subject or company; or Attorney-At-Law.

FCC/OGC-1

SYSTEM NAME:

Alleged Violators File (Ex Parte Rules).

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals alleged to have violated the Commission's ex parte rules.

CATEGORIES OF RECORDS IN THE SYSTEM:

Complaint letters, memoranda, briefs, Commission decisions recommending action, and news releases.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 4(i) of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Record information is used by staff attorney to make a determination whether, in fact, a violation of the ex parte rules has occured. The records may be referred to the appropriate agency charged with the responsibility of prosecuting such violation or enforcing the applicable statute or rule.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are maintained by the name of the party accused of an ex parte violation.

SAFEGUARDS:

Records are maintained in unlocked file cabinets in an office that is secured at the end of each business day. Since only one or two office persons have need to routinely access this system, unauthorized examinations would be easily detected.

RETENTION AND DISPOSAL:

Destroy when 3 years old.

SYSTEM MANAGER(S) AND ADDRESS:

Office of General Counsel, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Complaints, Security Officer, Bureau Chiefs.

FCC/OGC-2

SYSTEM NAME:

Attorney Misconduct Files

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any attorney who appears in a representative capacity before the FCC and who is being charged with attorney misconduct.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence, briefs, related Commission agenda items, ABA recommendations, investigative findings, complaints of attorney misconduct, memoranda.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. Section 500(d)(2).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Record information is used by staff attorneys to prosecute a case for attorney misconduct before the administrative law judge and the Commission. Record information may be referred, as a routine use, to the appropriate agency charged with the responsibility of enforcing any Commission penalties imposed.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are retrieved by the name of the attorney charged with misconduct.

SAFEGUARDS:

Records are kept in file cabinets in offices that are secured at the end of each business day. Since only one or two staff persons routinely access this record system, unauthorized examination during business hours would be easily detected.

RETENTION AND DISPOSAL:

Destroy 5 years after case closure.

SYSTEM MANAGER(S) AND ADDRESS:

Office of General Counsel, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Letters from public, pleadings, agenda items, intra-agency memoranda.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system of records is exempt from Subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (1) and (f) of the Privacy Act of 1975, 5 U.S.C. 552a, and from Sections 0.554–0.557 of the Commission's Rules because it is maintained for law enforcement purposes pursuant to subsection (k)(2) of the Act.

FCC/OGC-3

SYSTEM NAME:

Employee Complaint Adjudication

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any Commission employee who is the subject of a complaint investigation involving internal personnel actions or activities, i.e., discrimination, grievance, political activity, separation or adverse action.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in this system involve internal personnel disputes that have reached the hearing stage, and may include correspondence, memoranda, transcripts of hearings, brief, investigative reports, decisions of hearing examiners and Commissioners.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S. Code Section 301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records are used by staff attorneys in the General Counsel's office in pre-hearing settlement negotiations with opposing parties; records are also used in preparation for the actual hearing.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are retrieved by the name of the subject individual in the investigation.

SAFEGUARDS:

Records are maintained in unlocked file cabinets in an office that is secured at the end of each business day.

RETENTION AND DISPOSAL:

Destroy 5 years after case closure.

SYSTEM MANAGER(S) AND ADDRESS:

Office of General Counsel, Room 614, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Co-workers, other supervisors, classification experts, other persons involved in the case.

FCC/OGC-4

SYSTEM NAME:

Parties Involved in Current Litigation Before Federal Courts

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any person who is a captioned party of record in an appeal from or petition for review of a Commission action, or other court filing.

CATEGORIES OF RECORDS IN THE SYSTEM:

Litigation Division docket files (duplicate files of those filed with the Court and other parties).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 402 of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Case preparation and reference.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Indexed by case name.

SAFEGUARDS:

Records are filed in the Litigation office and secured after working hours.

RETENTION AND DISPOSAL:

After cases have been decided or dismissed and reach the inactive mode, the precedent-setting or important cases are reviewed to delete duplicative or unnecessary material and then are forwarded to the Library for binding. The cases remain in the Library for reference and research purposes. The remainder of the case records are destroyed when no longer needed or three years after closure, whichever occurs first.

SYSTEM MANAGER(S) AND ADDRESS:

Office of General Counsel, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

U.S. Circuit Court of Appeals and parties to proceedings.

FCC/OGC-5

SYSTEM NAME:

Parties with Pending Civil Cases Before Any District Court That Affect the Commission

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any individual who has a miscellaneous case before any District Court that involves the Commission.

CATEGORIES OF RECORDS IN THE SYSTEM:

Letters, memoranda, briefs, bankruptcy papers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 402 of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Record information is used by commission attorneys to update information or furnish additional data for the Government agency handling the case.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are maintained by the individual's name filing the claim.

SAFEGUARDS:

Records are maintained in unlocked file cabinets in an office that is secured at the end of each business day.

RETENTION AND DISPOSAL:

The records are destroyed when no longer needed or after five years, whichever occurs first.

SYSTEM MANAGER(S) AND ADDRESS:

General Counsel, Office of the General Counsel, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Justice Department; U.S. Attorneys; other Federal agencies; U.S. District Courts; and parties to the proceedings.

FCC/OGC-6

SYSTEM NAME:

Private or Civil Injury Claimants

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any individual who files a damage claim against the Commission or commits a tort against a Commission employee.

CATEGORIES OF RECORDS IN THE SYSTEM:

Accident reports, tort claim vouchers, correspondence, memoranda, medical and payment receipts, repair and payment receipts, pictures.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Tort Claims Act, 28 U.S.C. Section 2672.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Record information is used by attorneys in the Office of General Counsel to determine whether a damage claim filed against the Commission should be paid and for reference when assigned a similar case. If it is determined that the claim should not be paid or in cases when, pursuant to the limitations set out in 28 U.S.C. Section 2672, the Commission cannot make the final determination whether or not to pay a claim, the record is routinely transferred to the appropriate agency charged with the responsibility of disposition.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are retrieved by the name of the individual who filed the claim.

SAFEGUARDS:

Records are kept in an unlocked file cabinet in an office that is locked at the end of each business day. Since only one or two office persons routinely access this system, unauthorized examination during business hours would be easily detected.

RETENTION AND DISPOSAL:

Destroy 5 years after case closure.

SYSTEM MANAGER(S) AND ADDRESS:

Office of General Counel, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Witnesses; General Counsel; Office of Managing Director; claimants; and employees.

FCC/CTB-1

SYSTEM NAME:

Cable Operator Ownership File

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

For each corporate operator of a cable television system or each corporation owning 25 percent or more of the stock of such a corporate operation, (A) Officers, (B) Directors, (C) Stockholders, owning 3 percent or more of the stock.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Owner Record consisting of information furnished on FCC Annual Report of Cable Television Systems, Form 325, Schedule 3, blocks 1 through 6.

(2) Controlling Person Record consisting of information furnished on FCC Annual Report of Cable Television Systems, Form 325, Schedule 3, block 7, and Schedule 4.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

47 U.S.C., Sections 151–155, 301, 302(a), 303, 307, 308, and 403.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Commission staff will utilize records to monitor communications media ownership configurations and monopolies which are not in the public interest. Records are routinely reviewed during processing of authorizations to ascertain that the record is current and that the applicant for the authorization is entitled under the Commission's Rules to its grant.

(2) Members of the public, pursuant to Commission rule, are allowed access to data system file listings or the source forms, if necessary.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Permanent magnetic tape file, temporary magnetic disc file, and temporary physical file for FCC 325 source forms.

RETRIEVABILITY:

Data system records are retrievable by any specified characteristic of any data field or character. FCC 325 source forms are retrievable alphabetically by owner or controlling person name.

SAFEGUARDS:

Files are available for public inspection.

RETENTION AND DISPOSAL:

Magnetic tape files are kept permanently. FCC 325 source forms are transferred to the Federal Records Center after 3 years and destroyed 10 years later.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Cable Television Bureau, 2025 M Street, N.W., Washington, D.C. 20554, (202) 632–7076

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Cable television operators who file FCC Form 325, individuals named in Schedules 3 and 4 of Form 325.

FCC/PRB-1

SYSTEM NAME:

Amateur and Citizen License Fees, Refunded or Uncollected.

SYSTEM LOCATION:

2025 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicant who was issued a refund by the Gettysburg Field Office or Washington, D.C. Office. Applicant whose check was returned by bank for such things as: insufficient funds, account closed, payment stopped, etc.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information substantiating a refund issued to applicant, or information indicating remittance was returned by bank as unnegotiable.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

31 U.S.C. 483(a).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records are used by administrative personnel as reference material.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are filed and retrieved by name of applicant involved in the transaction.

SAFEGUARDS:

Records are maintained on a division level in file cabinets in offices which are locked at the end of each business day.

RETENTION AND DISPOSAL:

Records are retained for one year and then forwarded to the Federal Records Center in accordance with the records control schedules.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Private Radio Bureau, 2025 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

For refunds, information is initiated and supplied by applicant and by bureau employees. For uncollected fees, information is furnished by banks; Fee Unit, Financial Management Division, or Washington Processing Section of the Amateur and Citizens Division act as collectors.

FCC/PRB-2

SYSTEM NAME:

Application and License File.

SYSTEM LOCATION:

2025 M Street, N.W., Washington, D.C. 20554, and Route 116, Gettysbury, PA 17325.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Radio service applicants and licensees under Parts 81, 83, 87, 89, 91, 93, 95, 97 and 99 of the Commission's Rules.

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications, licenses, and correspondence maintained by various radio categories: Aeronautical and Fixed Group, Aircraft Group, Alaskan Group, Amateur, Automobile Emergency, Aviation Auxiliary Group, Aviation Radio Navigation Land, Business, Citizens Class A, Citizens Class C and D, Civil Air Patrol, Coastal Group, Disaster, Fire, Forest Products, Forestry Conservation, General Mobile, Highway Maintenance, Industrial Radio Location, Interurban Passenger (Motor Carrier), Interurban Property (Motor Carrier), Local Government, Manufactuers, Marine Auxiliary Group, Marine Radar Land, Motion Picture, Operational Fixed Microwave, Personal Radio, Petroleum, Police, Power, Radio Amateur Civil Emergency Service (RACES), Railroad, Relay Press, Ship Group, Special Emergency, Special Industrial, State Guard, Taxicab, Telephone Maintenance, Urban Passenger (Motor Carrier), Urban Property (Motor Carrier).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 301, 303 of the Communications Act of 1934, and amendments.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records are used to administer the Commission's programs relating to radio categories listed above including licensing, enforcement, rulemaking, and other actions requiring record information; to evaluate unique systems; to provide a service of information for the general public. Selected informational elements are incorporated in the Commission's central computer facility to maintain a current inventory of licensees for those services which are computerized.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

In appropriate files in boxes or cabinets.

RETRIEVABILITY:

Records are filed alphabetically by name of applicant/licensee within each radio service.

SAFEGUARDS:

Records are maintained on division level in appropriate files in boxes or cabinets in offices which are locked at the end of each business day.

RETENTION AND DISPOSAL:

Records are normally retained as long as the station remains licensed, although some bulky files may be divided and older material sent to the Federal Records Center, and maintained a minimum of 2 years and a maximum of 11 years after expiration date.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Private Radio Bureau, 2025 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above, but in order to facilitate the location of a specific record, the name of the radio category under which the application was filed and the call sign of the license issued should be included with the request.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Original applications and supplemental material submitted by applicants; correspondence from complainants; inspection reports; application processors.

FCC/PRB-3

SYSTEM NAME:

Current Projects File (Applications that may not comply with rules; Licensees whose systems may not comply with rules.

SYSTEM LOCATION:

2025 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants and licensees under Parts 89, 91, and 93 of the Rules whose communication systems may not be in compliance with FCC Rules; and applicants for rule waivers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Pleadings, letters of complaint, correspondence, technical information, annual reports, and supporting documentation relating to the communication system and its operation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 308(b) of the Communications Act of 1934, and amendments.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records are used by Commission employees to resolve whether the system is in compliance with FCC Rules.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders.

RETRIEVABILITY:

Records are filed and retrieved by name of applicant or licensee involved.

SAFEGUARDS:

Records are maintained on a division level in file cabinets in offices which are locked at the end of each business day.

RETENTION AND DISPOSAL:

Records are retained for two years after decision is reached, then destroyed by tearing into pieces.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Private Radio Bureau, 2025 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURE:

Same as above.

RECORD SOURCE CATEGORIES:

Letters of petition or complaint initiate action. Letters of complaint are referred to licensees to advise them and to obtain additional information in response to the complaint.

FCC/PRB-4

SYSTEM NAME:

Licensess or Unlicensed Persons Operating Radio Equipment Improperly.

SYSTEM LOCATION:

2025 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Licensees operating under Parts 81, 83, 87, 89, 90, 91, 93, 95, and 97 of the Rules in violation of the Commission's Rules or the Communications Act of 1934. Unlicensed persons operating radio equipment.

CATEGORIES OF RECORDS IN THE SYSTEM:

Enforcement case history cards; investigatory and hearing files with inspection reports, complaints, correspondence, pleadings, legal memoranda, investigative findings, forfeiture notices.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 47 U.S.C. 301, 303, 309(e), 312, 362, 364, 386, 507, and 510.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by bureau employees in enforcement and hearing cases to document, to evaluate, and to impose sanctions for violations of the Rules or Act.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

In file folders, card files.

RETRIEVABILITY:

Records are filed and retrieved by name of licensee or unlicensed individual.

SAFEGUARDS:

Records are maintained on a division level in appropriate file cabinets in offices which are locked at the end of each business day.

RETENTION AND DISPOSAL:

The documentation portions of these records are retained in active files for no more than 2 years, and are maintained in the Federal Records Center for five years, after which they are destroyed. The case history card portion of these records is retained for 25 years and then destroyed when no longer useful.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Private Radio Bureau, 2025 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURE:

Same as above.

RECORD SOURCE CATEGORIES:

Information originates from various sources: FCC Field Engineers; private citizens; Department of Justice; other Commission personnel.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Parts of this system of records are exempt from subsections (c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f) of the Privacy Act of 1974, 5 U.S.C. 552(a), and from §§ 0.554–0.557 of the Commission's Rules because such parts contain investigatory material compiled solely for law enforcement purposes pursuant to Section 552(k)(2) of the Act.

FCC/PRB-5

SYSTEM NAME:

Application Review List for Present or Former Licensees, Operators or Unlicensed Persons Operating Radio Equipment Improperly.

SYSTEM LOCATION:

2025 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who are or have been licensed under Parts 13, 81, 83, 87, 95 or 97 of the Rules who have operated in violation of the Commission's Rules or the Communications Act. Unlicensed persons who have operated radio transmitting equipment. Persons who have had a license revoked or have had an application dismissed or denied, and are prohibited from filing another application within one year.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, address, date of birth (if known) of individual, authorization code of staff member who placed name in the file, and the date the name was placed in the file.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 47 U.S.C. 301, 303, 309(e), 312.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Needed by selected staff and field employees to determine whether the applications of these individuals should be granted, dismissed or set for hearing.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

On magnetic tape and computer printout.

RETRIEVABILITY:

Information is filed alphabetically by name of individual in a computer and is retrieved periodically through computer printout.

SAFEGUARDS:

Access to computer is controlled by password in a secured office and the printouts are available only to selected staff personnel.

RETENTION AND DISPOSAL:

The printouts are destroyed by machine shredding or by tearing into pieces when a new list is distributed. The computer tapes are retained for four back-up cycles and on the fifth update, the oldest tape is destroyed. Individual names are removed from the file when retention is no longer appropriate; entire list of names is reviewed quarterly.

SYSTEM MANAGER AND ADDRESS:

Chief, Private Radio Bureau, 2025 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information is obtained from applicants and from FCC Field Engineers.

FCC/Central 1

SYSTEM NAME:

Pay, Leave, and Travel Records

SYSTEM LOCATION:

Financial Management Division and administrative offices of the Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554, and FCC regional and field offices. (See list of FCC regional office addresses in the Appendix).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Commission employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains various records required to administer the pay, leave, and travel requirements of the Commission.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101, 3102, 3309.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records are used:

To authorize payroll deductions for allotments, savings bonds, charitable contributions, union dues, health benefits and life insurance; collect indebtedness for overpayment of salary and unpaid Internal Revenue taxes; pay income tax obligation to Internal Revenue Service; authorize issuing of salary checks by Treasury Department; obtain reimbursement of travel expenses for official business report gross wages and separation information for unemployment compensation; pay any uncollected compensation due a deceased employee; and provide for a summary of employees payroll data and retirement contributions.

B. As a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel research or other personnel management functions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in manual files in folders, cards, magnetic tapes, and loose leaf binders.

RETRIEVABILITY:

Records are indexed by name.

SAFEGUARDS:

Records are maintained in filing cabinets in an office that is locked when not occupied by staff. Records are available only to authorized personnel whose duties require access.

RETENTION AND DISPOSAL:

Records are maintained for varying periods of time from one year to permanently. Disposal is by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of the Managing Director, 1919 M St. NW., Washington, D.C. 20554 or the appropriate administrative office in which the individual is employed.

NOTIFICATION PROCEDURE:

Same as above. It is necessary to furnish the following information in order to identify the individual whose records are requested:

A. Full name.
B. Date of birth.
C. Social Security Number.
D. Mailing address to which the reply should be mailed.

RECORD ACCESS PROCEDURES:

Same as above. Requesters should reasonably specify the record contents being sought.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information is provided by management officials and by the individual on whom the record is maintained.

FCC/Central 2

SYSTEM NAME:

Employee Locator Card Files

SYSTEM LOCATION:

Personnel and administrative offices of the Federal Communications Commission, 1919 M Street, NW., Washington, D.C. 20554, and FCC regional and field offices. (See list of FCC regional office addresses in the Appendix).

CATEGORIES OF INDIVIDUALS COVERED BY THIS SYSTEM:

Current employees of the Federal Communications Commission.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains information regarding the organizational location and telephone extension of individual office employees. The system also contains the home address and telephone number of the employee and the name, address, and telephone number of an individual to contact in the event of a medical or other emergency involving the employee.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The record serves to identify an individual for office officials to contact, should an emergency of a medical or other nature involving the employee occur while the employee is on the job. These records may be used to locate individuals for personnel research.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

3" x 5" paper.

RETRIEVABILITY:

Records are retrieved by the name of the individual on whom they are maintained.

SAFEGUARDS:

Records are maintained in secured areas and are available only to authorized personnel whose duties require access.

RETENTION AND DISPOSAL

Records are maintained as long as the individual is an employee of the Commission. Expired records are destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Appropriate Personnel or administrative office in which the employee is employed.

NOTIFICATION PROCEDURE:

Office employees wishing to inquire whether this system contains information about them should contact the appropriate FCC administrative officer where employed. Individuals must supply the following information for their records to be located and identified: full name.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Individual on whom record is maintained.

FCC/Central 3

SYSTEM NAME:

Grievance Records

SYSTEM LOCATION:

1919 M Street, NW., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THIS SYSTEM:

Current or former Commission employees who have submitted grievances.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains records relating to grievances filed by Commission employees. These case files contain all documents related to the grievance, including statements of witnesses, reports of interviews and hearings, examiner's findings and recommendations, a copy of the original and final decision, and related correspondence and exhibits. This system includes files and records of internal grievance and arbitration systems established through negotiations with recognized labor organizations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 1302, 3301, 3302, E.O. 10577, 3 CFR 1954–1958 Comp. p218.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

a. To disclose pertinent information to the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or ciminal law or regulation.

b. To disclose information to any source from which additional information is requested in the course of processing a grievance, to the extent necessary to identify the individual, inform the source of the purpose(s) of the request and identify the type of information requested.

c. To disclose information to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to requesting the agency's decision on the matter.

d. To disclose information to officials of the Merit Systems Protection Board, including the Office of the Special Counsel, the Federal Labor Relations Authority and its General Counsel, or the Equal Employment Opportunity Commission when requested in performance of their authorized duties.

e. To disclose in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial or administrative proceeding.

f. To provide information to officials of labor organizations reorganized under the Civil Service Reform Act when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders.

RETRIEVABILITY:

These records are retrieved by the names of the individuals on whom they are maintained.

SAFEGUARDS:

These records are maintained in lockable metal filing cabinets to which only authorized personnel have access.

RETENTION AND DISPOSAL:

These records are disposed of 3 years after closing of the case. Disposal is by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Management Division, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURE:

Same as above.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided:

a. By the individual on whom the record is maintained.

b. By testimony of witnesses.

c. By Commission officials.

d. From related correspondence from organizations or persons.

FCC/Central 4

SYSTEM NAME:

Employee Activity Reporting System.

SYSTEM LOCATION:

1919 M Street, N.W.; 2025 M Street, N.W., and 1229 20th Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All current FCC employees whose bureau or office is a participant in the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual activity reporting forms containing a person's name, social security number, organization code, activity code and number of hours spent working on the reported activity during a semimonthly reporting period. Monthly reporting forms listing total Bureau/Office output of selected production measures.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 4 and 5 of the Communications Act of 1934, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Bureau and Office management personnel use data to measure time expended on various programs, services or activities and productivity at Divisional or Bureau level. Financial Management Division used data to develop future budget estimates.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

5 inches by 8 inches and 8 inches by 10 inches original forms are stored in file cabinets by reporting period and organizational unit. Data is also contained on magnetic tapes stored in computer room, also denoted by reporting period.

RETRIEVABILITY:

Forms and tapes are maintained by semimonthly or monthly reporting period to facilitate aggregation for monthly report. Error listings from the computer are indexed by social security number to facilitate correction on an individual basis. Data is not retrieved for an individual, only for various organizational levels and program, service or activity codes. Forms will be filed in each participating bureau to facilitate location for correction purposes only.

SAFEGUARDS:

Records are maintained in file cabinets in an office that is locked at the end of each business day. Access to tapes is controlled by computer room personnel.

RETENTION AND DISPOSAL:

Original forms are retained for three months and then destroyed by tearing into pieces. The only purpose in maintaining the original input document for three months before destruction is to facilitate correction of error listings. Tapes are retained for up to two years.

SYSTEM MANAGER(S) AND ADDRESS:

Appropriate bureau or office chief in the Commission located at 1919 M Street, N.W., 2025 M Street, N.W., or 1229 20th Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURE:

Same as above.

RECORD SOURCE CATEGORIES:

Individual Activity Reports of employees participating the system. Monthly output measures reports from Bureau/Office management personnel.

FCC/Central 5

SYSTEM NAME:

Alcoholism and Drug Abuse Case Files.

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FCC employees who seek guidance and counseling through the agency Alcoholism and Drug Abuse Program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personal history as it relates to the employee's problem. Records on employees referred for counseling.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

FPM 792.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Reference material for the use of the Program Administrator and Counselors.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in locked metal cabinets in the Program Administrator's Office.

RETRIEVABILITY:

Records are filed and retrieved by name of employee.

SAFEGUARDS:

Records are maintained in an office that is locked when not occupied by the Program Administrator. They are maintained in strict confidence and are accorded the same security and accessibility restrictions provided for medical records.

RETENTION AND DISPOSAL:

Records are kept indefinitely or until the employee leaves the FCC, at which time they are destroyed by shredding.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Employee, employee's supervisor, and counselors.

FCC/Central-6

SYSTEM NAME:

Personnel Investigations Records.

SECURITY CLASSIFICATION:

None for the system; however, items or records within the system may have national defense/foreign policy classifications up through secret.

SYSTEM LOCATION:

1919 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF RECORDS IN THE SYSTEM:

a. Current and former employees or applicants for employment in the Federal service.

b. Individuals considered for access to classified information or restricted areas and/or security determinations as contractors, experts, instructors, and consultants to Federal programs.

c. Individuals who are neither applicants nor employees of the Federal Government, but who are or were involved in Federal programs under a co-operative agreement.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain investigative information regarding an individual's character, conduct, and behavior in the community where he or she lives or lived; arrests and convictions for violations against the law; reports of interviews with present and former supervisors, coworkers, associates, educators, etc.; reports about the qualifications of an individual for a specific position; reports of inquiries with law enforcement agencies, employers, educational institutions attended; reports of action after OPM or FBI Section 8(d) Full Field Investigation; Notices of Security Investigation; and other information developed from the above. Certificates of Clearance. Also contained is investigative information concerning allegations of misconduct by an FCC employee, miscellaneous complaints not covered by the FCC's formal or informal grievance procedure, and inquiries conducted under the President's Program to eliminate waste and fraud in Government.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 2, Civil Service Act of 1883, original authority; Title 5, CFR Part 5; Sections 1303, 1304, and 3301, Title 5, U.S.C.; Sections 7, 8(b), 8(c), 9(a), 9(c), and 14 of E.O. 10450; E.O. 11222; Section 19.735–107, FCC Rules and Regulations.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES FOR SUCH USES:

To provide investigatory information for determinations concerning compliance with Federal regulations and for individual personnel determinations including suitability and fitness for Federal employment, access and security clearances, evaluations of qualification, loyalty to the U.S., and evaluations of qualifications and suitability for performance of contractual services for the U.S. Government; to document such determinations; to take action on or respond to a complaint or inquiry concerning an FCC employee or to counsel the employee; to otherwise comply with mandates and Executive orders.

a. To designated officers and employees of agenices, offices, and other establishments in the executive, legislative, and judicial branches of the Federal Government, and the District of Columbia Government, when such agency, office, or establishment conducts an investigation of the

individual for the purpose of granting a security clearance, or for the purpose of making a determination of qualifications, suitability, or loyalty to the United States Government, or access to classified information or restricted areas.

b. To the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order where the FCC becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

c. To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

d. To the intelligence agencies of the Department of Defense, the National Security Agency, the Central Intelligence Agency, and the Federal Bureau of Investigation for use in intelligence activities.

e. To another Federal agency or to a court when the Government is party to a judicial proceeding before the court.

f. To the National Archives and Records Service (General Services Administration) for records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

g. To respond to a request for discovery or for appearance of a witness, when relevant to the subject matter involved in a pending judicial or administrative proceeding.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

STORAGE:

Records are maintained in file folders.

RETRIEVABILITY:

Records are retrieved by the name of the individual on whom they are maintained.

SAFEGUARDS:

Records are maintained within a secure, access-controlled area, and stored in approved security containers. Access is limited to cleared Security Office Personnel and to Commission officials on a "need to know" basis when required to take decisional action on the records.

RETENTION AND DISPOSAL:

Records are retained during employment; records are returned to investigating agencies after employment terminates, those originated by the FCC are retained for 20 years from the date of the most recent investigative activity. Records are destroyed by burning.

SYSTEM MANAGER(S) AND ADDRESS:

Managing Director, Office of Managing Director, 1919 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Individuals wishing to inquire whether this system contains information about them should contact the system manager indicated above, in writing. Individuals must furnish the following information for their records to be located and identified:

a. Full name.
b. Date of birth.
c. Social security number.
d. Signature.
e. Any available information regarding the type of record involved.
f. The category of covered individuals under which the requester believes he or she fits.

RECORD ACCESS PROCEDURES:

Specific materials in this system have been exempted from Privacy Act provisions at 5 U.S.C. 552a (c)(3) and (d), regarding access to records. The section of this notice titled "Systems exempted from certain provisions of the Act," which appears below, indicates the kinds of material exempted and the reasons for exempting them from access. Individuals wishing to request access to their records should contact the system manager indicated above, in writing. Individuals must furnish the following information for their records to be located and identified.

a. Full name.
b. Date of birth.
c. Social security number.
d. Signature.
e. Any available information regarding the type of records involved.
f. The category of covered individuals under which the requester believes he or she fits.

Individuals requesting access must also comply with Privacy Act regulations regarding verification of identity and access to records (5 CFR 297.201 and 297.203).

CONTESTING RECORD PROCEDURES:

Specific materials in this system have been exempted from Privacy Act provisions at 5 U.S.C. 552a(d), regarding amendment to records. The section of this notice titled "Systems exempted from certain provisions of the Act," which appears below, indicates the kinds of material exempted and the reasons for exempting them from amendment. Individuals wishing to request amendment to their non-exempted records should contact the system manager indicated above, in writing. Requests should be directed only to the system manager, whether the record sought is in the primary system or in a decentralized segment. Individuals must furnish the following information for their records to be located and identified:

a. Full name.
b. Date of birth.
c. Social security number.
d. Signature.
e. Any available information regarding the type of record involved.
f. The category of covered individuals under which the requester believes he or she fits.

Individuals requesting amendment must also comply with the Privacy Act regulations regarding verification of identity and amendment of records (5 CFR 297.201 and 297.206).

RECORD SOURCE CATEGORIES:

a. Applications and other personnel and security forms furnished by the individual.

b. Investigative and other record material furnished by Federal agencies.

c. Notices of personnel actions furnished by Federal agencies.

d. By personnel investigation or written inquiry from sources such as employers, educational institutions, references, neighbors, associates, police departments, courts, credit bureaus, medical records, probation officials, prison officials, newspapers, magazines, periodicals, and other publications.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system may contain the following types of information:

a. Properly classified information, obtained from another Federal agency during the course of a personnel investigation, which pertains to national defense and foreign policy. The Privacy Act, at 5 U.S.C. 552a(k)(1), permits an agency to exempt such materials from certain provisions of the Act.

b. Investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment. The Privacy Act, at 5 U.S.C. 552a(k)(5), permits an agency to exempt such material from certain provisions of the Act. Materials may be exempted to the extent that release of the material to the individual whom the information is about would:

1. Reveal the identity of a source who furnished information to the Government under an express promise (granted on or after September 27, 1975) that the identity of the source would be held in confidence; or,

2. Reveal the identity of a source who, prior to September 27, 1975, furnished information to the Government under an implied promise that the identity of the source would be held in confidence.

The Federal Communications Commission has claimed these exemptions from the requirements of 5 U.S.C. 552a (c)(3) and (d). These requirements relate to providing an accounting of disclosures to the individual whom the records are about and access to and amendment of records.

FCC/Central 7

SYSTEM NAME:

Freedom of Information Act Case Files

SYSTEM LOCATION:

1919 M Street, N.W.; 2025 M Street, N.W., Washington, D.C. 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals or organizations requesting access to inspect and/or copy records of the Commission under provisions of the Freedom of Information Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, address, and other individually identifying information about the requestor and the records sought.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Freedom of Information Act, Pub. L. 93-402 (5 U.S.C. 552).

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In the event the Commission deems it desirable or necessary, in determining whether particular records are required to be disclosed under the Freedom of Information Act, disclosure may be made to the Department of Justice for the purpose of obtaining its advice.

Where the appropriate official of the Commission, pursuant to the Commission's Freedom of Information Regulation determines that it is in the public interest to disclose a record which is otherwise exempt from mandatory disclosure, disclosure may be made from this system of records.

The Commission contracts with a private firm for the purpose of searching, duplicating, and distributing to the public the documents maintained by the Commission and available for inspection under the Act. The contractor is required to maintain Privacy Act safeguards with respect to such records.

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where the defendant is (a) the Commission, or any employee of the Commission in his or her official capacity; (b) the United States where the Commission determines that the claim, if successful, is likely to directly affect the operations of the Commission; or (c) any Commission employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Commission may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to present an effective defense, provided such disclosure is compatible with the purpose for which the records were collected.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Original or copy of incoming request and written response maintained in case files.

RETRIEVABILITY:

For the most part, records are indexed by name of individual requestor. Records are available to FOI staff involved in correspondence and investigative processes, including appeals officials and members of the Office of General Counsel.

SAFEGUARDS:

Records are maintained in file cabinets in the offices of the Freedom of Information Liaisons throughout the Commission with limited access.

RETENTION AND DISPOSAL:

Individual case files are maintained for two years and then disposed of.

SYSTEM MANAGER(S) AND ADDRESS:

Appropriate bureau or office chief in the Commission located at 1919 M Street, N.W., or 2025 M Street, N.W., Washington, D.C. 20554.

NOTIFICATION PROCEDURE:

Same as above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Individuals and organizations making requests under the Freedom of Information Act or from bureaus or offices of the Commission reporting on the handling of such requests for inclusion in the annual report to Congress.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[Docket No. FEMA-REP-6-LA-2]

Louisiana; Radiological Emergency Preparedness Plans

AGENCY: Federal Emergency Management Agency.

ACTION: Notice of receipt of plans.

SUMMARY: This is a notice that the State of Louisiana has submitted Radiological Emergency Preparedness Plans to the Federal Emergency Management Agency, Region VI for review and approval. These plans include the Louisiana Peacetime Radiological Response Plan and Attachment I to this plan which is the Peacetime Radiological Response Plan for the Waterford Steam Electric Station Unit No. 3.

DATE PLANS RECEIVED: November 23, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Joe Winkle, Acting Regional Director, FEMA Region VI, Federal Center, Denton, Texas 76201—(817)–387–5811.

NOTICE: This provides notice in accordance with 44 CFR 350.8 of the FEMA Proposed Rule, "Review and Approval of State and Local Radiological Emergency Plans and Preparedness", 44 FR 42341, that the Federal Emergency Management Agency, Region VI Office, received on November 23, 1981, from the State of Louisiana, Radiological Emergency Preparedness Plans for the State of Louisiana.

These plans include the State of Louisiana Peacetime Radiological Response Plan which is Annex J. Appendix 7 to the Louisiana Preparedness Plan for Emergency Operations and Attachment I, Waterford 3 Steam Electric Station. Copies of these plans are available for review and copying at the FEMA Region VI Office.

Copies will be made available upon request in accordance with the fee schedule for FEMA Freedom of Information Act requests. This schedule which covers exemptions from the fee, is set forth in Subpart C of 44 CFR Part 5. Reproduction fees are $0.10 a page for this document. There are approximately 500 pages in the documents, excluding implementing procedures. (As the cost will be over $25.00, the fee is to be paid in advance.)

Comments regarding the plans may be submitted in writing to Mr. Joe Winkle, Acting Regional Director, at the above address within thirty days.

FEMA Proposed Regulation 44 CFR 350.10 calls for a public meeting in advance of FEMA approval. A Public Meeting will be conducted in St. Charles/St. John's Parish prior to FEMA approval of the plan.

Joe Winkle,

Acting Regional Director.

December 11, 1981.

FEDERAL RESERVE SYSTEM

Coffee County Bancshares, Inc.; Formation of Bank Holding Company

Coffee County Bancshares, Inc., Manchester, Tennessee, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 per cent or more of the voting shares of Coffee County Bank, Manchester, Tennessee. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than January 21, 1982. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, December 22, 1981.

Theodore E. Downing, Jr.,

Assistant Secretary of the Board.

Corrections

In FR Doc. 81-34228 appearing on page 58192 in the issue for Monday, November 30, 1981, make the following changes:

1. On page 58194, second column, under I-8116, the third line should read: "E½SW¼; 280 acres.", under I-8420, third line, "* * * NE¼ * * *" should read "* * * SW¼ * * *"; third column, "I-90093" should read "I-9093", under I-12023, the second line should read: "Sec. 34: NE¼SW¼;" and the fourth line should read: "Sec. 9: NW¼NE¼; 80 acres.", under I-12308, the first and second lines should read as follows:

"T. 7 S., R. 3 E., B.M.,

Sec. 30: SE¼SW¼;".

2. On page 58195, first column, "I-47855" should read "I-14785", under I-14786, the second line should read:

"Sec. 19: NE¼SW¼, SE¼, SE¼SW¼;"

3. On page 58195, second column, under I-8902, second line, "* * *SW¼;" should read "* * *SW¼;".

4. On page 58196, second column, the third line from the top should read as follows:

"Sec. 27: S½NW¼, N½SW¼, SW¼SW¼,"

And in the third paragraph under *Proposed*, fourth line, "* * * 60-* * *" should read "* * * 59-* * *".

5. On page 58197, second column, under I-8894, sixth line, remove the comma after "NE¼", and in the eighth line, "* * * NW¼ * * *" should read "* * * NE¼ * * *; and in the third column, twenty-ninth line from the top, "* * * 752.50 * * *" should read "* * * 757.50 * * *", and the last line at the

bottom of the page, "* * * NW¼;" should read "SW¼;".

BILLING CODE 1505-01-M

Adoption of Final Leasing Target for Fort Union Coal Production Region, North Dakota and Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Adoption of the Final Coal Leasing Target for the Fort Union Coal Production Region, North Dakota and Montana.

SUMMARY: Under the Federal Coal Program Management regulations (43 CFR 3420.3–2(j)), the Secretary of the Interior has the responsibility for establishing a Federal coal leasing target for each of the Federal coal production regions. This notice is to inform the public that on December 18, 1981, the Assistant Secretary for Land and Water Resources, acting under authority delegated to him by the Secretary of the Interior, adopted a leasing target of 0.8 to 1.2 billion tons of Federal coal reserves for the Fort Union Coal Production Region.

EFFECTIVE DATE: December 18, 1981.

FOR FURTHER INFORMATION CONTACT: Monte Jordan, Division of Coal, Oil Shale and Tar Sands, Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240, (202) 343–4636

SUPPLEMENTARY INFORMATION: The decision of the Assistant Secretary for Land and Water Resources is set out below.

The Secretary of the Interior has delegated to me his authority under 43 CFR 3420.3 to set Federal coal leasing targets. It is my decision, after careful consideration, to set the final leasing target for the Fort Union Coal Production Region at 0.8–1.2 billion tons with the understanding that this level may be altered at Departmental discretion if necessary to fulfill program goals.

This decision is based on a number of considerations including the input received from the Regional Coal Team (RCT), the comments received from the public, and consultation with the Governors of affected States. Although a number of comments supported the adoption of a lower leasing target of 0.4–0.8 billion tons, I do not believe they outweigh the arguments for the higher target. In my judgment, the Federal coal leasing program must insure free competition and compensate for unexpected occurrences of increased demand or shortfalls in supply. I have serious doubts that a leasing target less than the 0.8–1.2 billion tons would assure the fulfillment of these criteria.

The following briefly outlines the major factors which influenced my decision.

I. Free Competition

A major goal of this Administration is to reduce governmental interference in the workings of the market system. Therefore, it is our intent in the coal leasing program, as well as in our other programs, to encourage free competition. Only through such a system can the American consumer be guaranteed an adequate supply of energy and other essential resources at the lowest possible cost.

Setting targets which allow for leasing only one ton of recoverable coal for every ton of needed production has been criticized by both the Department of Justice and the General Accounting Office as being inefficient and potentially anti-competitive. The Justice report concludes that a target leasing system unduly supplants the market place as the allocator of coal resources. At present, competition takes place in the coal industry through the rivalry among many sellers, each of which has one or more parcels of coal to supply to a given utility. This competitive market efficiently matches coal deposits with utilities and causes the coal that is the cheapest to mine to be produced, the most efficient mining techniques to be used, and coal to be sold at a price commensurate with its cost. Setting unnecessarily restrictive leasing targets will cause a gradual decline in the use of market mechanisms for making these decisions and many lead to an eventual elimination of competition.

The Federal Government owns an estimated 62 percent of all Western coal reserves, and, because of scattered checkerboard ownership, controls another 14 percent. Over time, the proportion of Western coal production on Federal lands is expected to rise dramatically, thereby reducing the importance of production from private lands. Because the control of this vast resource is vested in the government, it is essential that any leasing program insures that a competitive market is maintained. However, this cannot be achieved under a restrictive leasing program with minimum leasing targets since there can be no rivalry among sellers.

Furthermore, a target system requires the government to make all resource allocation decisions by leasing only those tracts which it finds best meet the needs of a particular consumer, such as a utility planning a coal fired plant in the leasing region. This gives each lessee/supplier what is, in effect, a government granted monopoly of the coal supply allotted to that consumer and therefore substantial control over the price. To avoid this situation, our program must allow the market to efficiently match the coal supplies to the consumer and allow market forces to control prices.

II. Resource Pool to Enhance Strategic Planning

A market-oriented leasing policy also means that there is a need for creating a pool of reserves well in advance of planned production to allow for strategic planning by the industry and to accommodate the 10 year (or longer) leadtime from lease sale to full production. Greater flexibility in planning allows the industry to operate in a more cost efficient manner, which tends to hold prices down to the consumer and insure adequate supplies are available to meet demands for energy.

III. Uncertainties in Supply and Demand

Frequently, significant shortfalls of leasing occur as a result of matching leasing levels to needed production on a ton-for-ton basis. The information available to DOI is not sufficient to allow us to exactly determine 10 years in advance the amount of coal that should be produced or the deposits from which that coal should come. One cannot know with any reasonable degree of certainty the future demand for coal by electric utilities and producers of synthetic fuels. Even if these things were known, there still would not be enough information to set precise leasing targets because we do not know the amount of coal that will be produced by existing mines. Thus, any attempt to match leasing levels to needed production on a ton-for-ton basis guarantees that much of the time there will be significant shortfalls in leasing. Whenever this happens, private reserves that are more costly to mine than Federal reserves will be forced into production, and coal prices will rise. With this in mind it becomes apparent that we should allow as much flexibility in our program as possible to provide for the uncertainties of the future.

IV. Easy Entry into Coal Industry

Finally, a market-oriented leasing policy should not impose any unnecessary constraints on entry into the coal industry. Insofar as easy entry into the industry has a disciplining effect on prices and output as a result of stimulating potential competition from new entrants, it is an important factor in

assessing the competitiveness of the industry. For regions such as Fort Union, where future mining will depend on the availability of Federal coal, severe limitations on such availability could create an artificially higher barrier to entry, as well as shifting substantial market power to present industry participants. Any leasing of less than the preliminary target established for the region may be anti-competitive in that it would effectively limit the number of coal producers who can gain access to Federal coal and, thereby, limit the number of those who can compete for contracts to supply coal consumers. In general, new leasing is one method of improving entry conditions, which in turn increases the number of different producers and stimulates competition.

V. Fort Union Region Considerations

In view of the above reasons favoring expanded leasing, a security factor of proper magnitude should be embodied in the process of establishing the leasing target. Little margin for error is allowed by a leasing target in the range of 0.4–0.8 billion tons. This is barely enough to cover the Department of Energy's (DOE's) "low" to "medium" projection of demand. This target would probably be insufficient to meet future demands if: (1) Electricity demand were to grow faster than anticipated; (2) synthetic fuels development came on line faster than projected; (3) Fort Union Region coal captured an even larger share of the domestic market than anticipated; and (4) many of the existing leases and the preference right lease applications within this region do not go into production as assumed.

The final target decision for this region is further supported by an examination of the leasing target implied by the production goals set by DOE.

Based on the following assumptions:

- The baseline coal production from existing Federal leases and non-Federal lands without new Federal coal leasing is projected to be 43 million tons in 1995;
- The average lifetime expectancy of a coal mine is 40 years;
- The share of Federal coal reserve is 36% in this region;
- The recovery rate of lignite coal is 90%; and
- A 25% security factor is allowed;

the leasing targets that correspond to DOE's low, medium, and high demand scenarios are 220, 860, and 1,260 million tons, respectively.

Considering the possible inadequacy of the 25% security factor coupled with DOE's demand projections as noted above, it is evident that the final target, should range from a minimum of 800 million tons (corresponding to DOE's medium demand projection) to 1.2 billion tons (corresponding to DOE's high projection). With this leasing target, we can help insure that the large social costs resulting from restricted leasing can be minimized.

VI. Proposed Burlington Northern Land Exchange

The possibility of a Burlington Northern land exchange is a final consideration which should be discussed in the context of the leasing program. If the exchange is successfully negotiated it would most likely take place sometime during the period scheduled for the Fort Union lease sale. Currently the Government owns a tract, Circle West III, containing approximately 175 million tons in the central portion of the proposed exchange area. This tract is also being analyzed as two smaller tracts; Circle West I and Circle West II. The Circle West tracts occur in all alternatives being considered by the Fort Union Coal Team to meet the leasing target. An exchange would result in the consolidation of a Federal tract which would contain approximately 350 million tons of coal. Should the exchange occur, the consolidated tract (350 million tons) may possibly be offered for lease. This means that if all tracts offered are leased, including the consolidated tract, we may actually increase our sale total by the 175 million tons gained in the exchange. However, because of my concern that the 25% security factor may be inadequate to compensate for demand uncertainties and to further stimulate competition, I believe that offering the increased tonnage, if it becomes available, is consistent with and will further the goals of the coal leasing program.

VII. Conclusion

In conclusion, I believe that the national interest will best be served by a final regional leasing target for the Fort Union Region of 0.8–1.2 billion tons. Thus the proposed action for the regional environmental impact statement becomes 0.8–1.2 billion to be arrayed with a number of other alternatives.

As new data on the demand for reserves becomes available over the next year, we may find that a higher or lower recommendation may be necessary to forward to the Secretary for the ultimate decision regarding which tracts are to be offered for lease.

Dated: December 23, 1981.

Garrey E. Carruthers,

Assistant Secretary, Land and Water Resources.

National Park Service

Renewal of San Antonio Missions Advisory Commission

This notice is published in accordance with the provisions of Section 7(a) of the Office of Management and Budget Circular A63 (revised). Pursuant to the authority contained in Section 14(a) of the Federal Advisory Committee Act (Pub. L. 92–463), the Secretary of the Interior has determined that renewal of the San Antonio Missions Advisory Commissions is necessary and in the public interest.

The purpose of the committee is to advise the Secretary of the Interior on matters relating to the San Antonio Missions National Historical Park.

The General Services Administration concurred in the renewal of this committee on November 30, 1981.

Further information regarding this committee may be obtained from Shirley M. Luikens, Advisory Boards and Commissions, National Park Service, Department of the Interior, Washington, DC 20240 (202–343–2012).

Dated: December 23, 1981.

Office of the Secretary

Insignificant Revision in 5-Year OCS Leasing Schedule; Gulf of Mexico

AGENCY: Office of OCS Program Coordination, Office of the Secretary.

ACTION: Notice.

SUMMARY: The 5-Year OCS Leasing Schedule issued on June 16, 1980, provided for OCS Sale #67 (Gulf of Mexico) to be held in March 1982. After considering the relative merits of advancing the sale to February 1982, it has been concluded that advancing the sale serves the national interest. After analyzing whether moving the sale by one month was a significant revision under section 18 of the OCS Lands Act, we have concluded that it would not be a significant revision of the 5-Year Program. Copies of this analysis are available from the address mentioned later.

FURTHER INFORMATION: Contact Chris Oynes, Office of OCS Program Coordination, U.S. Department of the Interior, 18th and C Streets, Room 5150, Washington, D.C. 20240, (202) 343–9311.

Dated: December 23, 1981.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-1 (Sub-No. 129)]

Chicago and North Western Transportation Co.; Abandonment Between Geneva and Aurora, in Kane County, IL; Findings

The Commission has issued a certificate authorizing Chicago and North Western Transportation Co., to abandon its 8.2 mile rail line between Geneva milepost 35.8 and Aurora milepost 44.0 in Kane County, IL. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) a financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, D.C. 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10 day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1121.38.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931, and 10932.

We find

Each transaction is exempt from section 11343 (formerly section 5) of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsiderations; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1132.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will indicate that consummation of the transfer will be presumed to occur on the 20th day following service of the notice, unless either applicant has advised the Commission that the transfer will not be consummated or that an extension of time for consummation is needed. The notice will also recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 30 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is Ordered

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–79356. By decision of December 4, 1981 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to IOWA DELIVERY SERVICE, INC., of Des Moines, IA of Certificate No. MC–129802 (Sub-No. 12) issued to GAIL R. KALDENBERG d.b.a. ABC CARTAGE, of Des Moines, IA, authorizing the transportation by irregular route of general commodities (with the usual exceptions) from Des Moines, IA to points in IOWA within 100 miles of Des Moines, except Kellogg, Grinnell, Newton and Marengo. Applicant's representative is: Thomas E. Leahy, Jr., 1980 Financial Center, Des Moines, IA 50309.

MC–FC–79401. (as amended) By decision of December 8, 1981 issued under 49 U.S.C. 10926 and the transfer rules at 49 C.F.R. 1132, Review Board No. 3 also approved the transfer to JOHN L. NOVAK d.b.a. SAFEWAY MOTOR FREIGHT COMPANY of McDonald, OH, of Permit No. MC–92550 (Sub-No. 9) issued to J. G. STOCK d.b.a. SAFEWAY MOTOR FREIGHT COMPANY authorizing the transportation of *Steel wire* between

points in the U.S. under continuing contract(s) with Brainard Rivet Co. of Girard, OH. Applicant's representative is: Lreid S. Witherspoon, 2455 North Star Road, Suite 100, Columbus, OH 43221.

MC–FC–79403. By decision of December 8, 1981, Review Board 3 vacated its prior decision of October 15, 1981, and approved the transfer to William and Carole Littlefield a partnership d.b.a. Master Refigerated Transport, of Shady Cove, OR, of Certificates No. MC–144054 (Sub-Nos. 2, 3, 6, 7, 10, 11, and 12) issued to Bill Littlefield Trucking, Inc., of Medford, OR, authorizing: Named commodities, including foods, commodities dealt in by retail gift shops, fireplace logs and barbecue supplies, from and to facilities of Harry and David (a corporation) and Husky Industries, Inc. at Medford and White City, OR, from and to named states throughout the U.S. Condition's submission of a revised purchase agreement. Applicant's representative: Larry Knox, 600 Hubbell Bldg., Des Moines, IA 50309.

Note.—TA lease is not sought. Transferee is not a carrier.

MC–FC–79410. By decision of October 14, 1981 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to INTERNATIONAL CONTAINER SERVICES, of Baltimore, MD, of Certificate No. MC–70272, issued to KING VAN LINES, INC., JAMES R. BARR, TRUSTEE IN BANKRUPTCY, of Wichita, KS, which authorizes the transportation, as a motor common carrier, of *household goods*, as defined by the Commission, between points in the United States (except AK and HI); *emigrant movables*, between specified counties in OK, on the one hand, and, on the other, points in AR, KS, LA, MO, NM, and TX; and *new furniture*, uncrated, from Los Angeles, CA, to Bisbee and Douglas, AZ. This transfer is subject to the following condition: Charles E. Bradley, President and owner of transferee, must divest himself of all control and management of Routed Thru-Pac, Inc., a freight forwarder, prior to consummation of this transaction. Representative: Alan F. Wohlstetter, 1700 K Street, NW., Washington, D.C. 20006.

Notes.—TA has been filed. Transferee is a non-carrier.

MC–FC–79510. By decision of December 9, 1981, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to Edgar W. Root, Inc. of Permit No. MC–126776 issued to Royal Service, Incorporated authorizing the transportation of (1) *new uncrated school furniture*, from Westfield, MA to points in ME, NH, VT, RI, and CT and (2) *returned shipments* of new uncrated school furniture in possession of consignee, from points in ME, NH, VT, RI, and CT to Westfield, MA, under a continuing contract or contracts with Columbia Manufacturing Company, Inc. of Westfield, MA. Applicants' representative: David M. Marshall, 101 State Street, Suite 304, Springfield, MA 01103.

Note.—Transferee is a motor carrier pursuant to authority issued in MC–75835.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Temporary Authority Application

The following are notices of filing of applications for temporary authority under section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–177

The following applications were filed in Region 4. Send protests to: Interstate Commerce Commission, Complaint and Authority Branch, P.O. Box 2980, Chicago, IL 60604.

MC 48501 (Sub–4–2–TA), filed December 17, 1981. Applicant: INDIANA MOTOR BUS COMPANY, 715 South Michigan, South Bend, IN 46624. Representative: Jeremy Kahn, Suite 733, Investment Bldg., 1511 K Street, N.W., Washington, D.C. 20005. *Contract* irregular: *Passengers and their baggage*, in roundtrip charter operations, beginning and ending at points in IN, MI, IL, OH, PA, KY, MO, WI, IA, TN, NY, VA, NC, MN, MD and WV and extending to points in FL, under contract with Echo Travel, Inc., Carol Stream, IL. BILLING CODE 7035–01–M

[Ex Parte No. MC–142 (Sub-1)]

Motor Carriers; Removal of Restrictions From Authorities of Motor Carriers of Property

AGENCY: Interstate Commerce Commission.

ACTION: Reappointment of employee review board members.

SUMMARY: On January 15, 1981 (46 FR 3532), the ICC published notice of establishment of a special Restriction Removal Employee Board. This Board has been delegated the functions set forth in 49 CFR 1011.6(1), which was added in that document. Under that section the Board decides applications seeking to remove operating restrictions or to broaden unduly narrow authority in outstanding certificates or permits filed under 49 CFR Part 1137. On December 18, 1981, the Commission voted to reappoint the following employees to serve as members of the Restriction Removal Board for terms of 12 months each: Howell I. Sporn, Chairman, Jane Ewing, and Mark S. Shaffer.

FOR FURTHER INFORMATION CONTACT:

Ombudsman's Office, (202) 275–7440
Edward E. Guthrie, (202) 275–7691.

This action is taken under the authority of 49 U.S.C. 10321 and 5 U.S.C. 553.

Dated: December 18, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Republications of Grants of Operating Rights Permanent Authority Prior to Certification; Decision Notice

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register.**

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this **Federal Register** notice. Such pleading shall comply with Special Rule 247(e) of the Commission's general rules of practice (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 44445, (Sub-10) (Republication) filed July 7, 1981, published in the **Federal Register** issue of July 22, 1981, and republished this issue. Applicant: HAROLD KLEIN CARTAGE, INC., 5235 North Hopkins Street, Milwaukee, WI 53209. Representative: William C. Dineen, 710 North Plankinton Ave., Milwaukee, WI 53203. A Decision of the Commission, Review Board Number 3, decided October 29, 1981, and served November 17, 1981, finds that the performance by applicant of the service described herein will be consistent with the public interest and the national transportation policy to operate as a *contract carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except classes A and B explosives), between points in the United States, under continuing contracts(s) with International Nu-way Shippers, Inc., of Chicago, IL; that applicant is fit, willing, and able properly to perform such service and to conform to statutory and administrative requirements. The purpose of this

republication is to allow any proper party in interest to file an appropriate petition for leave to intervene setting forth in detail the precise manner in which it has been so prejudiced by the authorization to serve between points in the United States instead of between points in Wisconsin and Illinois, who may have relied upon the previous notification in the **Federal Register**

MC 99775 (Sub-4) (Republication) filed August 3, 1981 published in the **Federal Register** issue of August 26, 1981, and republished this issue. Applicant: TRIANGLE EXPRESS, INC., 1015 S.W. 2nd, Oklahoma City, OK 73109. Representative: William P. Parker, 141 N.E. 38th Terrace, Oklahoma City, OK 73105. A Decision of the Commission, Review Board Number 1, decided November 12, 1981, served December 1, 1981, finds that the performance by applicant of the service described herein will serve a useful public purpose, responsive to a public demand or need in (PART A) to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over regular routes, transporting *general commodities,* and serving all intermediate points: (1) between Shawnee and Aydelotte, OK, over Oklahoma Hwy 18: (2) between Shawnee and Oklahoma City, OK, over U.S. Hwy 270 and also over Oklahoma Hwy 3; (3) between Oklahoma City and El Reno, OK, over U.S. Hwy 66, serving the off-route points of Warr Acres (Putnam City), Overholser Dam and Dam Site, Cimarron Field, Mustang Field, Mustang Station (Council), Concho Indian School, Fort Reno, and Federal Reformatory, with alternate route over Oklahoma Hwy 4 (10th St. Cut-off) between Oklahoma City and Yukon, OK; (4) between Guthrie and Oklahoma City, OK, over U.S. Hwy 77, restricted against any shipment originating in Oklahoma City and destined to Edmond or originating in Edmond and destined to Oklahoma City; (5) between Guthrie and Perry, OK, over Interstate Hwy 35 and U.S. Hwy 77; (6) between Perry and Lucien, OK, over Oklahoma Hwy 164; (7) between Perry, OK, and junction U.S. Hwy 64 and Oklahoma Hwy 99, over U.S. Hwy 64, serving the off-route point of Maramec, OK; (8) between junction U.S. Hwy 64 and Oklahoma Hwy 99 and Drumright, OK, over Oklahoma Hwy 99; (9) between Drumright and Guthrie, OK, over Oklahoma Hwy 33, serving the off-route point of Ripley, OK; (10) between junction interstate Hwy 40 and U.S. Hwy 177 and junction U.S. Hwy 177 and U.S. Hwy 64, over U.S. Hwy 177, serving the off-route points of Carney and Tryon, OK; (11) between junction Interstate Hwy 35 and Oklahoma Hwy 51 and junction Oklahoma Hwy 51 and Oklahoma Hwy 99, over Oklahoma Hwy 51, serving the off-route points of Glenco, OK; (12) between Aydelotte, OK, and junction Oklahoma Hwy 18 and U.S. Hwy 64, over Oklahoma Hwy 18. (PART B) To operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over regular routes, transporting *general commodities* (except classes A and B explosives), serving all intermediate points, (1) between Perry, OK, and Wichita, KS, (a) from Perry over U.S. Hwy 64 to junction U.S. Hwy 177, then over U.S. Hwy 177 to junction U.S. Hwy 77, at or near Ponca City, OK, then over U.S. Hwy 77 to junction U.S. Hwy 54 at Augusta, KS, then over U.S. Hwy 54 to Wichita, and return over the same route, and (b) from Perry over Interstate Hwy 35 to Wichita, and (2) between Pawnee, OK, and Tulsa, OK, over U.S. Hwy 64. Condition: (1) Issuance of the certificate authorized in this proceeding is subject to the prior or coincidental cancellation, at applicant's written request, of Certificates of Registration No. MC 99775 (Sub-Nos. 1, 2, and 4); and (2) To the extent the certificate issued embraces the transportation of classes A and B explosives, it shall be limited to 5 years from its date of issuance; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to indicate that the authority granted here exceeds the scope of the authority published in the notice in the **Federal Register**, inasmuch as it includes service over certain regular routes within Oklahoma as contained in applicant's certificates of registration. It is possible that persons, who have relied upon the notice of the application as published may have an interest in and would be prejudiced by the lack of proper notice of that portion of the authority which exceeds the scope of the previous publication. Therefore, any proper party in interest may file an appropriate petition for leave to intervene with respect to that portion not previously noticed, setting forth in detail the precise manner in which it has been so prejudiced by authorization of that part of the authority.

MC 151264 (Republication), filed May 26, 1981, published in the **Federal Register** issue of June 15, 1981, and republished this issue. Applicant: CHESAPEAKE & NORTHERN TRANSPORTATION CORP., 5604 Capelle Road, Portsmouth, VA 23703. Representative: James C. Riffe (same address as applicant). A Decision of the Commission, Division 2, Acting as an Appellate Division, decided November 23, 1981, served November 30, 1981 and a Decision of the Commission, Review Board Number 1, decided September 8, 1981, and served September 17, 1981 finds of further consideration that the present and future public convenience and necessity require applicant's performing the service as described herein to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *passengers and their baggage,* in charter and special operations, beginning at Norfolk, Portsmouth, Virginia Beach, Suffolk, Chesapeake, Newport News, Hampton, Williamsburg, Franklin, Hopewell, and Petersburg, VA, and points in Isle of Wight, Sussex, Surry, York, Southampton, and Accomack Counties, VA, and Pasquotank County, NC, and extending to points in the United States: that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to note that the original publication contained two errors: (1) the seven Virginia counties named in the appendix were identified as counties in North Carolina; and (2) Elizabeth City was identified as a county in North Carolina rather than a point in Pasquotank County, NC.

MC 156965 (Republication), filed July 27, 1981, published in the **Federal Register** issue of August 13, 1981, and republished this issue. Applicant: HARWARD & SONS FREIGHT, INC., Rural Route 3, Fairfield, IA 52556. Representative: Richard D. Howe, 600 Hubbell Building, Des Moines, IA 50309. A Decision of the Commission, Review Board Number 1, decided November 9, 1981, served November 27, 1981, finds that the performance by applicant of the service described herein will serve a useful purpose, responsive to a public demand or need to operate as a *common carrier* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *metal products,* (1) between points in Jefferson County, IA, on the one hand, and, on the other, points in IL, KS, MO, and NE, and Tulsa, OK; and (2) between points in Lee County, IA, and points in Illinois; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to broaden the territorial description to include the State of Illinois.

By the Commission.

Volume OPY–4–497

Decided: December 22, 1981.

MC 30446 (Sub-21) (Republication), filed August 31, 1981, published in the **Federal Register** issue of September 15, 1981; and republished this issue. Applicant: BRUCE JOHNSON TRUCKING CO., INC., 3408 North Graham Street, P.O. Box 5647, Charlotte, NC 28225. Representative: Leon Thompson (same address as applicant); Phone: (704) 376–0101. In a decision by the Commission, Review Board 2, decided December 7, 1981, and finds that performance by the applicant as *a contract carrier*, by motor vehicle, in interstate or foreign commerce, *over irregular routes*, transporting *such commodities* as are dealt in by retail department stores, between points in the United States, under continuing contract(s) with The Cato Corporation, of Charlotte, NC, will be consistent with the public interest and the national transportation policy. Applicant is fit, willing and able properly to perform the granted service and to confrom to statutory and administrative requirements.

Note.—The purpose of this republication is to give notice of the applicants authority to serve "points in the United States."

MC 60186 (Sub-73) (Republication), filed July 27, 1981; published in the **Federal Register** issue of August 18, 1981; and republished this issue. Applicant: NELSON FREIGHTWAYS, INC., 47 East Street, P.O. Box 1358, Rockville, CT 06066. Representative: Richard J. Miller (same address as applicant); (203) 871–2050. In a decision by the Commission, Review Board 1, decided December 7, 1981, and finds that performance by the applicant as *a common carrier*, by motor vehicle, in interstate or foreign commerce, *over irregular routes*, transporting (1) *general commodities* (except classes A and B explosives and commodities in bulk), between the District of Columbia and points in Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Virginia, West Virginia, Delaware, Maryland, Ohio, Alabama, Florida, Georgia, Louisiana, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia, on the one hand, and, on the other, points in the United States; (2) *pulp, paper, and printed matter*, between points in Texas, Illinois, Oregon, Nevada, Michigan, and Wisconsin, on the one hand, and, on the other, points in the United States; (3) *glass products*, between points in Indiana, Minnesota, and Oklahoma, on the one hand, and, on the other, points in the United States; and (4) *plastic and rubber articles*, between points in Illinois and Texas, on the one hand, and, on the other, points in the United States, will serve a useful public purpose responsive to a public demand or need. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements.

Note.—The purpose of this republication is to give proper notice of the authority actually granted.

By the Commission.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Ex Parte No. 387 (Sub-75)]

Rail Carriers; Boston and Maine Corp. Exemption for Contract Tariff ICC–BM–C–0005

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Petitioner is granted a provisional exemption under 49 U.S.C. 10505 from the notice requirement of 49 U.S.C. 10713(e). This contract tariff to be filed may be revoked if protests are filed within 15 days of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Jane F. Mackall (202) 275–7656.

SUPPLEMENTARY INFORMATION: The Boston and Maine Corporation (BM) filed a petition on December 11, 1981, seeking an exemption under 49 U.S.C. 10505 from the statutory notice provisions of 49 U.S.C. 10713(e), to advance the effective date of its contemporaneously-filed contract tariff ICC–BM–C–0005 (now scheduled to become effective on January 10, 1982), so that it can become effective on one day's notice. This contract involves use of surplus BM boxcars for track storage of pulp, paper, and paper products at local stations on the BM.

Under 49 U.S.C. 10713(e), contracts must be filed on not less than 30 nor more than 60 days' notice. There is no provision for waiving this requirement. Cf. former section 10762(d)(1). However, the Commission has granted relief under our section 10505 exemption authority in exceptional situations.

The BM has surplus boxcars which are not in use and the paper industry has exhausted other available short-term storage facilities in the area. Thus, BM has offered several large shippers of paper products the option of loading cars from origin to destinations, plus use of the cars for storage until the paper products are sold, and to bill them on this basis, which apparently avoids demurrage charges.

A shipper has developed a production problem and needs immediate, additional storage space. It has, therefore, requested BM to establish the tendered contractual arrangement on its behalf, as soon as possible. Accordingly, BM seeks expedited action to permit the described tariff to become effective on short notice.

BM's contract tariff ICC–BM–C–0005 may become effective on one day's notice. We will apply the following conditions which have been imposed in similar exemption proceedings;

If the Commission permits the contract to become effective on one day's notice, this fact neither shall be construed to mean that this is a Commission approved contract for purposes of 49 U.S.C. 10713(g) nor shall it serve to deprive the Commission of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to disapprove it.

Subject to compliance with these conditions, under 49 U.S.C. 10505(a) we find that the 30 day notice requirement in these instances is not necessary to carry out the transportation policy of 49 U.S.C. 10101a and is not needed to protect shippers from abuse of market power. Further, we will consider revoking these exemptions under 49 U.S.C. 10505(c) if protests are filed within 15 days of publication in the **Federal Register.**

This action will not significantly affect the quality of the human environment or the conservation of energy resources.

(49 U.S.C. 10505)

Dated: December 23, 1981.

By the Commission, Division 1, Commissioners Clapp, Gresham, and Taylor. Commissioner Clapp was absent and did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Finance Docket No. 29705]

Apache Railway Co.—Abandonment Between McNary and Snowflake, AZ—Exemption

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts the abandonment by The Apache Railway Company of a

39.5-mile branch line between McNary and Snowflake, AZ, from the requirement of prior approval under 49 U.S.C. 10903.

DATES: The exemption is effective on or before January 29, 1982. Petitions for reconsideration of this action must be filed on or before January 19, 1982.

ADDRESSES: Send pleadings to:

(1) Interstate Commerce Commission, Section of Finance, Room 5414, 12th Street and Constitution Ave., NW., Washington, DC 20423

(2) Petitioner's representatives, Eugene D. Gulland, Roger S. Greene, Covington & Burling, 888 Sixteenth Street, NW., Washington, DC 20006

For copies of the full decision write to: Interstate Commerce Commission, Room 2227, Washington, D.C. 20423 or call Toll Free 800–424–5403

Pleadings should refer to Finance Docket No. 29705.

FOR FURTHER INFORMATION CONTACT: Ellen D. Hanson (202) 275–7245.

SUPPLEMENTARY INFORMATION: For further information, see the Commission's decision in Finance Docket No. 29705.

Decided: December 21, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

[Permanent Authority Decisions Volume No. 214]

Motor Carriers; Restriction Removals; Decision-Notice

Decided: December 23, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR Part 1137. Part 1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Ewing, and Shaffer.

Agatha L. Mergenovich,

Secretary.

MC 2202 (Sub-676)X, filed December 16, 1981. Applicant: ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Boulevard, Akron, OH 44310. Representative: William O. Turney, Suite 1010, 7101 Wisconsin Ave., Washington, D.C. 20014. Sub 552 certificate (pages 36 and 37, irregular route), broaden points in PA north of a line beginning at the OH–PA State line and extending through Oil City, DuBois, Williamsport, and Scranton, PA, to the PA–NY State line to "points in PA in and north of Mercer, Venango, Clarion, Jefferson, Clearfield, Centre, Clinton, Lycoming, Columbia, Luzerne, Lackawanna, Wayne, and Pike Counties, PA."

MC 85718 (Sub-21)X, filed December 10, 1981. Applicant: SEWARD MOTOR FREIGHT, INC., P.O. Box 126, Seward, NE 68434. Representative: Michael J. Ogborn, P.O. Box 82028, Lincoln, NE 68501. Subs 4, 6, 9F, 11F, 13F, 14F, 15F, and 17F: (1) Broaden Sub 4, pole line transmission materials to "such commodities as are used in the lying or erection of transmission lines"; Subs 6, 9, 15F, and 17F, automotive parts and accessories, Subs 15F, 17F tools, Sub 6, automotive jacks and shock absorbers, Subs 6, 9 automotive cranes, hand, electric and pneumatic tools and materials, equipment and supplies used in the manufacture, production, and distribution thereof to "transportation equipment and machinery; Sub 11, sugar, Sub 13F, bakery products (except frozen); Sub 14F, animal feed to "food and related products"; (2) Subs 4, 6, 9, 11, 13, 14, and 15 broaden to radial authority; (3) remove facilities limitations, Subs 4, 9, 14F, 15F; (4) change to county-wide authority: Seward, NE to Seward County, NE, Subs 4, 6, 9, 15F; Boise, Pocatello and Twin Falls, ID to Ada, Bannock and Twin Falls County, ID, Sub 9; Idaho Falls, ID to Bonneville County, ID, Subs 9 and 11F; Garland, UT to Box Elder County, UT, Sub 11F; Crete and Lincoln, NE to Saline and Lancaster Counties, NE and Billings, MT to Yellowstone County, MT, Sub 14F; Batavia, IL to Kane County, IL, Sub 15F; (5) delete originating at and destined to restriction, Subs 6, 9, 14F; (6) remove exceptions: other than self-propelled, commodities in bulk, in tank vehicles, Subs 6, 9, 14, and the transportation of commodities which because of size or weight require the use of special equipment, Subs 6, 9; frozen, Sub 13F; and (7) remove limitation in bags, Sub 11F.

MC 103051 (Sub-491)X, filed November 27, 1981. Applicant: FLEET TRANSPORT COMPANY, INC., 934 44th Avenue, North, P.O. Box 90408, Nashville, TN 37209. Representative: Russell E. Stone (same address as applicant). Sub-Nos. 356, 362, 416, 417, 421, 426F, 444F, and 471F certificates, Sub-No. E2 E-letter notice, and No. MC–114106 (Sub-Nos. 16 and 20) certificates, acquired in docket MC–F–11001, (1) broaden to "commodities in bulk," from corn products and blends, from products of corn, cane, and beets, from lard, from vegetable oils, from petroleum and petroleum products, vehicle body sealer, and sound deadner compound, from animal oils, fats and blends, from lacquers, lacquer sealer, enamels, varnishes, stains, thinners, and finishing materials, and from liquid and invert sugar, and blends of liquid sugar and corn syrup, all in bulk; (2) remove restrictions limiting service to transportation of traffic moving only "in tank vehicles"; (3) remove the restriction against transportation of specific commodities (Sub-No. 356); (4) expand facilities and cities to countywide authority: Sub-No. 356, Shelby County, TN (facilities near Memphis); Sub-No. 362, Morgan County, AL (facilities near Decatur); Sub-No. 416, Mecklenburg County, NC (Charlotte); Sub-No. 421, Marion County, IN (Jasper); Sub-No. 426, Adams County, IN (Decatur), and Ford County, IL (Gibson City); Sub-No. 444, Lee and Clay Counties, MS (Tupelo and West Point); Sub-No. 471, Warren County, MS (facilities in Warren County); and MC–114106 (Sub-No. 16), Kent County, MI (Grand Rapids); (5) change from one-way to radial authority; (6) remove "originating at and destined to" restrictions (Sub-Nos. 426 and 471); and (7) remove restrictions prohibiting service at named points involving less-than-countywide, and prohibiting service from and to certain States: Lexington and Salisbury, NC (Sub-No. 356); Alabama (Sub-No. 362); North Carolina (Sub-No. 417); Chattanooga, TN (Sub-No. 444); and Rochester, NY, Jacksonville, IL and points within 5 miles thereof,

Champaign and Chicago, IL, and Columbus and Cincinnati, OH (Sub-No. E2).

MC 112786 (Sub-9)X, filed November 25, 1981. Applicant: JOHN F. COYNE d.b.a. COYNE TRUCKING CO., P.O. Box 549, New Castle, PA 16103. Representative: John A. Pillar, 1500 Bank Tower, 307 Fourth Avenue, Pittsburgh, PA 15222. Broaden: (1)(a) lead, to "clay, concrete, glass or stone products" from earthenware and clay products: "metal products" from brass fittings: and "food and related products" from packinghouse products and supplies, dairy products, and fresh and frozen fish; (b) Subs 1 and 5F, to "clay, concrete, glass or stone products, rubber and plastic products, and metal products," from bathroom or lavatory fixtures, and from plumbing supplies, bathroom vanities, and accessories; and (c) Sub 7F, to "rubber and plastic products" from battery boxes and parts; (2) to countywide authority: lead, Clinton County, IN (Frankfort), Beaver County, PA (New Galilee), Columbiana County, OH, (Salem), Summit, Stark and Mahoning Counties, OH (Ashtabula, Conneaut, and Painesville), and Armstrong County, PA (Ford City); lead and Sub 1, Lawrence County, PA (New Castle); and Sub 5, Lawrence County, PA, Columbiana County, OH, and Montgomery and Jasper Counties, IN (facilities at New Castle, PA, Salem, OH, and Crawfordsville and Rensselaer, IN); and (3) to radial authority, lead and Subs 1 and 7.

MC 121742 (Sub-3)X, filed November 30, 1981. Applicant: MISTLETOE TEX-PACK EXPRESS, INC., 702 E. 40th Street, Lubbock, TX 79404. Representative: Austin L. Hatchell, P.O. Box 2023, Austin, TX 78768. Sub-No. 2, remove the restriction relating to shipments weighing more than 500 pounds moving from one consignor at one location to one consignee at one location in any one day.

MC 123226 (Sub-4)X, filed December 11, 1981. Applicant: SUPERIOR CARRIERS, INC., P.O. Box K, Kenvil, NJ 07847. Representative: Chester A. Zyblut, 366 Executive Building, 1030 Fifteenth Street, NW., Washington, DC 20005. Subs 1 and 3. Broaden: vegetable oils to "commodities in bulk" in paragraph 1 (Sub 1) and paragraph 7 (Sub 3); salt to "chemicals and related products"; fuller's earth to "ores and minerals"; pumice to "clay, concrete, glass or stone products"; castor beans to "farm products"; linseed cakes to "food and related products"; and from bags to "pulp, paper and related products and rubber and plastic products", in paragraphs 1 and 2 (Sub 3); to points in New Jersey within 40 miles of City Hall, New York, NY, to Bergen, Essex, Hudson, Hunterdon, Mercer, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset and Union Counties, NJ (Sub 1) and paragraph 7 (Sub 3); Edgewater to Bergen County, NJ, and New York, Bronx and Queens Counties, NY, in paragraphs 1 and 2 (Sub 3); to radial authority in Sub 1, paragraphs 1 and 2 (Sub 3); and remove in tank vehicles restriction in Sub 1.

MC 125037 (Sub-30)X, filed November 24, 1981. Applicant: DIXIE MIDWEST EXPRESS, INC., P.O. Box 372, Greensboro, AL 36744. Representative: John R. Frawley, Jr., Suite 200, 120 Summit Parkway, Birmingham, AL 35209. Subs 9, 11, 12, 13, 14, 15 and 18 broaden (1) from (a) dry animal and poultry feeds, dry animal and poultry mineral feed mixtures, livestock and poultry feeders, insecticides and related premium and advertising matter to "animal and poultry feed, chemicals and related products, pulp, paper and related products and advertising materials", Sub 9; (b) petroleum resins and synthetic resins to "chemicals and related products and petroleum products", Sub 11; (c) furniture and office furniture parts to "furniture and fixxtures", Sub 12; (d) furniture, toys and games to "furniture and fixtures and recreational equipment": part 1 of Sub 14; (e) packaging boards, blocks and panels of expanded honeycomb to "packaging materials, and pulp, paper and related products" (2) remove in bulk restrictions, Subs 11, 12, 13 and 14; facilities limitations, Subs 11 and 12; (3) city to countywide authority (a) Quincy, IL to Adams County, IL and Lewis and Marion Counties, MO, Sub 9; (b) Moundville, AL to Tuscaloosa and Hale Counties, Sub 11; (c) Leeds, AL to Jefferson, Shelby and St. Clair Counties, Sub 12; (d) Brent, AL to Bibb County, Sub 14; (e) Park Forest South, IL to Cook County and Michigan City, IN to LaPorte and Porter Counties, Sub 15, (4) to radial authority, Sub. 9.

MC 125353 (Sub-3)X, filed December 7, 1981. Applicant: ROCHESTER AIR FREIGHT SERVICE CORPORATION, 73 Deep Rock Road, Rochester, NY 14624. Representative: Robert D. Gunderman, Can-Am Building, 101 Niagara Street, Buffalo, NY 14202. Sub 1 by: (A) broaden general commodities (with usual exceptions) to "general commodities (except Classes A and B explosives)"; (B) eliminate restriction having an immediately prior or subsequent movement by aircraft; and (C) expand to: Rochester, NY, for the Rochester-Monroe County Airport, NY; Newark, NJ for Newark Airport, NJ; Albany, NY, for Albany County Airport, NY; Broome County, NY, for Broome County Airport, NY; Chemung County, NY, for Chemung County Airport, NY; Buffalo, NY, for the Greater Buffalo International Airport, NY; Jefferson County, NY, for Watertown Airport, NY; Oneida County, NY, for Oneida County Airport, NY; Onondaga County, NY, for Clarence E. Hancock Airport, NY; New York, NY for LaGuardia Airport and John F. Kennedy International Airport, NY; St. Lawrence County, NY, for Massena Airport, NY; Tompkins County, NY, for Tompkins County Airport, NY; and Cleveland, OH, for Cleveland-Hopkins Airport, OH.

MC 126660 (Sub-16)X, filed December 10, 1981. Applicant: G & G CARRIERS, INC, 509 Cooper Street, P.O. Box 102, Camden, NJ 08101. Representative: Francis W. Doyle, 323 Maple Ave., Southampton, PA 18966. Lead permit, broaden (1) to "waste or scrap materials not identified by industry processing" from waste paper and rags, and scrap metals; and (2) to between points in the U.S. under continuing contract(s) with named shipper.

MC 127042 (Sub-309)X, filed December 14, 1981. Applicant: HAGEN, INC., P.O. Box 3208, Sioux City, IA 51102. Representative: Joseph B. Davis, (same address as applicant) Subs 21, 50, 248F and 304, (1) broaden Subs 21, 50, and 248F to "food and related products" from meat and meat products and articles distributed by meat packing houses, described in Sections A and C of 61 M.C.C. 209 and 766, (except hides and commodities in bulk); (2) replace facilities (a) at Le Mars, with Plymouth County, IA in Sub 21; (b) at Sioux Center, with Sioux County, IA in Sub 50; (c) at Carroll, Denison, Iowa Falls, Des Moines, Ft. Dodge, Cherokee, and Sioux City, with Carroll, Crawford, Hardin, Polk, Webster, Cherokee, and Woodbury Counties, IA; and at Omaha and Lincoln, NE with Mills and Pottawattamie Counties, IA, and Douglas, Sarpy and Lancaster, Counties, NE, in Sub 248F; and (3) to radial authority in Subs 21, 50 and 248F.

MC 129857 (Sub-12)X, filed December 9, 1981. Applicant: G.R.M., Inc., d.b.a. PORT TERMINAL TRANSPORT, INC., 700 Henry Ford Ave., Long Beach, CA 90810. Representative: Patricia M. Schnegg, 707 Wilshire Blvd., Ste. 1800, Los Angeles, CA 90017. Sub 4F (part 1) certificate: (a) broaden imported automobiles to "transportation equipment"; (b) change one-way to radial authority; and (c) eliminate in secondary movement and truckaway service restriction.

MC 143112 (Sub-2)X, filed December 16, 1981. Applicant: WESTERN KANSAS EXPRESS, INC., 3833 S. West St., Wichita, KS 67213. Representative: John E. Jandera, P.O. Box 1979, Topeka, KS 66601. Lead certificate (1) authorize service at all intermediate points and (2) expand the off-route point of Lewis, KS to Edwards County, KS.

MC 145067 (Sub-10)X, filed December 14, 1981. Applicant: LAWRENCE E. SPAIDE, INC., Box 111, Avoca, PA 18643. Representative: Joseph A. Keating, Jr., 121 S. Main St., Taylor, PA 18517. Subs 3F, 4F, 5F, 6F, and 8F: (1) broaden: metal castings to "metal products" in Sub 3F; vinyl coated metal sheets to "metal products" in Sub 5F; and fabricated metal products and materials, equipment, and supplies used in the manufacture and distribution of fabricated metal products to "metal products and materials, equipment, and supplies" in Sub 6 (part b); (2) broaden territorial description: Bloomsburg to Columbia County, PA; Defense to Bowie County, TX; Parson to Labette County, KS; Exeter, Kingston, and Hanover Township to Luzerne County, PA; Atlanta to Fulton County, GA; New Orleans to Orleans Parish, LA; Tulsa to Tulsa and Osage Counties, OK; Houston to Harris County, TX; Denver to Denver County, CO; Odessa to Ector County, TX; Melvindale to Wayne County, MI; Addison to DuPage County, IL; St. Louis to St. Louis, MO and St. Louis County, MO; Scranton to Lackawanna County, PA; and Auburn to King County, WA; (3) eliminate the facility limitation in Sub 3F; and (4) remove restrictions against commodities in bulk in Sub 6F, and limiting service to transportation for a named shipper association in Sub 8F.

MC 148275 (Sub-5)X, filed December 18, 1981. Applicant: J. L. MCCOY, INC., P.O. Box 525, Ravenswood, WV 26164. Representative: John M. Friedman, 2930 Putnam Ave., P.O. Box 428, Hurricane, WV 25526. Sub 3 certificate: broaden fabricated metal products, except ordinance to "metal products and materials, supplies and equipment used in the manufacture thereof."

MC 149214 (Sub-4)X, filed November 24, 1981. Applicant: TRANSPORT ASSOCIATES, INC., P.O. Box 68701, Indianapolis, IN 46268. Representative: Donald W. Smith, P.O. Box 40248, Indianapolis, IN 46240. Broaden: (1) Sub-Nos. 1F and 2F certificates to "electrical machinery, and equipment and supplies used in the manufacture, construction and maintenance thereof," from audio and audio-visual recording and playing systems and accessories and component parts, and from telephone equipment, and materials and supplies used in the manufacture, construction maintenance of telephone; (2) Sub-No. 3 certificate, to "metal products, and automobile parts," from iron and steel castings and automobile parts; and (3) Sub-No. 1, to radial service, and plantsites to countywide authority: Monroe and Marion Counties, IN (facilities at Bloomington and Indianapolis).

MC 149546 (Sub-29)X, filed December 11, 1981. Applicant: D & T TRUCKING CO., INC., P.O. Box 12505, New Brighton, MN 55112. Representative: Samuel Rubenstein, P.O. Box 5, Minneapolis, MN 55440. No. MC–117644 Subs-46 and 54F permits, broaden to between points in the U.S., under continuing contract(s) with named shippers.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's rules of practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to the Ombudsman's Office, (202) 275–7326.

Volume No. OPI–326

Decided: December 15, 1981.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Parker not participating in part.)

MC 159581, filed December 7, 1981. Applicant: TRANS CARGO, INC., P.O. Box 1019, Turnersville, NJ 08012. Representative: James W. Patterson, 1200 Western Savings Bank Bldg., Philadelphia, PA 19107 (215) 735–3000. As a *broker* of *general commodities* (except household goods), between points in the U.S.

Volume No. OPY–2–246

Decided: December 16, 1981.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 153018 (Sub-8), filed December 4, 1981. Applicant: RONNEY L. ROGERS, d.b.a. R. L. ROGERS TRUCKING, Rt. 1 B 1724, Clatskanie, OR 97016. Representative: Lawrence V. Smart, Jr.,

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and

that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

BILLING CODE 7035–01–M

NATIONAL CREDIT UNION ADMINISTRATION

Privacy Act of 1974: Systems of Records, Annual Publication

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice of Annual Publication of Systems of Records.

SUMMARY: In accordance with 5 U.S.C. 552a(e)(4), NCUA publishes its systems of records as currently maintained by the agency.

ADDRESS: National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Beatrix Fields, Attorney-Advisory, Office of General Counsel, at the above address, or telephone, (202) 357–1030.

SUPPLEMENTARY: Pursuant to 5 U.S.C. 552a(e)(4), the National Credit Union Administration (NCUA) hereby publishes its systems of records as currently maintained by the agency. These systems were last published in the **Federal Register** at 45 FR 2778 through 2787 on January 14, 1980. Public notice of a new system of records was made in the **Federal Register** at 45 FR 85232 on December 24, 1980.

Editorial changes were made to clarify certain system notices, but none of these alterations are substantive so as to require prior notice and comment period.

By the National Credit Union Administration Board on December 24, 1981.
(Section 3, 80 Stat. 1997 (5 U.S.C. 552))
Rosemary Brady,
Secretary of the Board.

Table of Contents

List of Systems

1. Employee Security Investigations Containing Adverse Information, NCUA.

Note.—See Appendixes for general "routine uses" applicable to each system of records and for a listing of the locations of NCUA regional offices.

NCUA–1

SYSTEM NAME:

Employee Security Investigations Containing Adverse Information, NCUA.

SYSTEM LOCATION:

Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NCUA employees on whom a routine Office of Personnel Management (OPM) security investigation has been conducted, the results of which contain adverse information.

CATEGORIES OF RECORDS IN THE SYSTEM:

Police records and/or information on moral character, integrity, or loyalty to the United States.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Records maintained pursuant to OPM requirements. A separate notice is published because these records are maintained separately to provide extraordinary safeguards against unwarranted access and disclosures.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Records are reviewed by the NCUA Security Officer. If the records are determined to be of a substantive nature, they are forwarded to the NCUA Board for whatever action, if any, is deemed necessary. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper hard copy.

RETRIEVABILITY:

Records are indexed by name.

SAFEGUARDS:

Records are maintained in a separate, locked room which is accessible only to the Security Officer and his designated assistants. The records are further secured in a locked safe accessible only to the Security Officer and his designated assistants.

RETENTION AND DISPOSAL:

Once disposition, if any, has been made, a record is maintained until the individual whom it concerns has left the employ of NCUA, whereupon it is either returned to the originating agency or destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Security Officer, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Adjudication Branch, Division of Personnel Investigation, OPM; Federal Bureau of Investigation.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

In addition to any exemption to which this system is subject by Notices published by or regulations promulgated by the OPM, the system is subject to a specific exemption pursuant to 5 U.S.C. 552a(k)(5) to the extent that disclosures would reveal a source who furnished information under an express promise of confidentiality, or prior to September 27, 1975, under an express or implied promise of confidentiality.

NCUA–2

SYSTEM NAME:

Security Clearance Records of Personnel Occupying Sensitive Positions, NCUA.

SYSTEM LOCATION:

Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Background investigations on individuals to determine fitness for security clearance. Information consists chiefly of records of interviews conducted by the Office of Personnel Management (OPM) and the Federal Bureau of Investigation (FBI) officials with parties acquainted with the individual under investigation. Interview questions concern character, integrity and loyalty to the United States.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 44 U.S.C. 3301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information is used to determine fitness for security clearance. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are in the form of paper hard copy.

RETRIEVABILITY:

The system is indexed by name.

SAFEGUARDS:

Records are maintained in a separate, locked room accessible only to the Security Officer and his designated assistants.

RETENTION AND DISPOSAL:

Records are maintained until the individual leaves the employ of NCUA, whereupon they are returned to the originating agency.

SYSTEM MANAGER(S) AND ADDRESS:

Security Officer, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURE:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

FBI; Division of Personnel Investigation, OPM; Central Intelligence Agency.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system is subject to a specific exemption pursuant to 5 U.S.C. 552a(k)(5) to the extent that disclosure would reveal a source who furnished information under an express promise of confidentiality, or prior to September 27, 1975, under an express or implied promise of confidentiality.

NCUA-3

SYSTEM NAME:

Payroll Records System, NCUA.

SYSTEM LOCATION:

(1) Division of Financial Operations, Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

(2) General Services Administration, Region VI, Kansas City, Missouri.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of NCUA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Salary and related payroll data, including time and attendance information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 703; 44 U.S.C. 3301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information is used to ensure proper compensation to all NCUA employees and to formulate financial reports and plans used within the agency or is sent to the General Services Administration (GSA). (2) Also, information is used to document time worked and provide a record of attendance to support payment of salaries and use of annual, sick, and nonpaid leave. (3) Users of the time and attendance information include the employee's supervisor, the office's timekeeper, the payroll officer, and the GSA National Payroll Center in Kansas City, Missouri. (4) Further, information in this system is used to make reportings to state and local taxing authorities. (5) Standard routine uses set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on computer tape, paper hard copy and microfilm.

RETRIEVABILITY:

Records are retrieved by name or social security number.

SAFEGUARDS:

Records are maintained in secured offices, accessible by written authorization only.

RETENTION AND DISPOSAL:

Records are retained and disposed in accordance with GSA policy.

SYSTEM MANAGER(S) AND ADDRESS:

(1) Primary: Payroll Officer, Division of Financial Operations, Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456; (2) Secondary: Office Timekeepers, National Credit Union Administration, Central Office (1776 G Street, N.W., Washington, D.C. 20456) and Regional Offices (see Appendix B for Regional Offices' addresses).

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURE:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Information is primarily obtained from the individual whom the record concerns, the Office of Personnel Management, and the GSA. Also, time and attendance information is prepared and submitted by the timekeeper in a given employee's office.

NCUA-4

SYSTEM NAME:

Verified Employee Mailing List, NCUA.

SYSTEM LOCATION:

(1) Office of Administration, National Credit Union Administration, 1776 G Street NW., Washington, D.C. 20456.

(2) Contractor's Address: Mail America, Bumpy Oak Road, Bryan's Road, Maryland.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NCUA Employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains the following information for each employee: name, address, telephone number, birthdate, ethnic and sex codes, GS grade, employee type, and employee identification number. The contractor is provided a tape containing all employees' names, addresses, employee numbers, regional locations, and GS grades.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information is used to produce mailing labels and make reportings to the EEO Director and other NCUA employees with an official need for a listing of NCUA employees. (2) Also, the information is used to generate an NCUA telephone directory for distribution to all NCUA employees. (3) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in computer magnetic disc storage.

RETRIEVABILITY:

Records are maintained by employee identification number.

SAFEGUARDS:

Accessibility is limited to specific written requests. The file itself is password protected.

RETENTION AND DISPOSAL:

Information is maintained on active, returned and deceased employees for an indefinite period of time.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Administration, National Credit Union Administration, 1776 G Street NW., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURE:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

NCUA Form 1042 is completed for each new employee by personnel staff or the regional office manager. Form 1051 is completed by same to report changes.

NCUA-5

SYSTEM NAME:

Travel Advance and Voucher Information System, NCUA.

SYSTEM LOCATION:

Division of Financial Operations, Office of Administration, 1776 G Street NW., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All professional and semiprofessional NCUA employees who have traveled in the course of performing their duty and who have been reimbursed for the expense of such travel.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains information from the following forms: Travel Vouchers (NCUA 1012), Reimbursement for COS Expenses (NCUA 1302), Authorization of Moving and Related Travel Expenses for COS (NCUA 11301), Travel Orders (NCUA 1500), Suspension Statements (NCUA 1311), Application for Advance of Funds (NCUA 1399), and Travel Voucher Cover Sheet (NCUA 1364).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5701–5752; Executive Order 11609 (July 22, 1971); Executive Order 11012 (March 27, 1962); 5 U.S.C. 4401–4118; Federal Travel Regulations, FPMR 101–7, Chapter 2, Section 6.3.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Records are used to provide documentary support for reimbursements to employees for on-the-job travel expenses. (2) Users of the information include first and second line supervisors, NCUA accounting staff and budgeting staff. (3) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in paper hard copy form and in an on-line ADP system.

RETRIEVABILITY:

Records are retrievable by social security number.

SAFEGUARDS:

The paper hard copy records are maintained in secured offices. The computer disc is located in a secured office and its access is limited to three user employees who know the logical identification access number.

RETENTION AND DISPOSAL:

Records are maintained in the Division of Financial Operations until the annual GAO audit is completed. After the audit, the paper hard copy records are stored in a Federal Records Center for a minimum of three years and the computer disc is purged.

SYSTEM MANAGER(S) AND ADDRESS:

Accounting Officer, Division of Financial Operations, Office of Administration, National Credit Union Administration, 1776 G Street NW., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Records are prepared by the individual whom the record concerns.

NCUA-6

SYSTEM NAME:

New Examiner Training Files, NCUA.

SYSTEM LOCATION:

(1) Division of Personnel and Training (DOPT), Office of Administration, National Credit Union Administration, 1776 G Street NW., Washington, D.C. 20456.

(2) Regional office where new employee is assigned. (See Appendix B for regional offices' locations.)

(3) Office of Examination and Insurance (EI) and Office of Consumer Affairs (CA), National Credit Union Administration, 1776 G Street NW., Washington, D.C. 20456. At the end of the training period in the region, either EI or CA transfers the records to the DOPT.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NCUA examiners, from entry level to one year on staff.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biweekly training reports, training progress reports, on-the-job trainers' evaluations of class room training, trainees' evaluations of training program.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 4101–4118.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information is used to determine retention or termination of a new examiner after 23 weeks of on-the-job training. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on paper hard copy.

RETRIEVABILITY:

Records are retrievable by employee name.

SAFEGUARDS:

Records are maintained in metal file cabinets in secured offices of each regional office and in secured offices in the Washington central offices.

RETENTION AND DISPOSAL:

Records are purged annually for those employees no longer participating in the program.

FCC/OMD–4

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Personnel and Training, Office of Administration, National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained; on-the-job trainers; supervisors; Office of Personnel Management.

NCUA–7

SYSTEM NAME:

Region I Employee Development/ Correspondence Records, NCUA.

SYSTEM LOCATION:

Region I Regional Office, National Credit Union Administration, 441 Stuart Street, Sixth Floor, Boston, Massachusetts 02116.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NCUA Region I employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains information on NCUA examiners and professional staff related to some or all of the following areas: work performance appraisals; district management; chartering efforts; reactions from FCU officials; personal development plans; copies of personnel records; supply and equipment information; training; work performance; suggestions; awards; travel vouchers; and data on leave and pay activities. Also, the system contains information on NCUA clerical staff related to: work performance and development activities, which may include work product samples; memos or notations from professional staff; personal development plans; evaluations by superiors; copies of personnel records; and data on pay and leave activity.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) The information in this system is used for recording time and attendance, controlling equipment inventories, training staff, evaluating employee work performance, and conducting general administrative matters. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper hard copy.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Physical security consists of maintaining records in locked metal file cabinets within secured offices.

RETENTION AND DISPOSAL:

Current and relevant information are maintained generally for a period of at least one to two years. Obsolete material is maintained in the same file cabinets and is periodically destroyed or returned to the originator.

SYSTEM MANAGER(S) AND ADDRESS:

Administrative Officer, Region I Regional Office, National Credit Union Administration, 441 Stuart Street, Sixth Floor, Boston, Massachusetts 02116.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the Regional Director where the system is located. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the Regional Director will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the Regional Director.

RECORD SOURCE CATEGORIES:

Sources may include the individual whom the record concerns, supervisors of the individual, fellow employees, credit union officials, administrative officer or office assistant and other persons whom the individual may encounter in the course of work

performance. For payroll and personnel related information, the sources may include the General Services Administration and the Office of Personnel Management.

NCUA–8

SYSTEM NAME:

Region II Employee Development/ Correspondence Records, NCUA.

SYSTEM LOCATION:

Region II Regional Office, National Credit Union Administration, 310 North Second Street, Harrisburg, Pennsylvania 17101.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NCUA Region II employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains information on NCUA examiners and professional staff related to some or all of the following areas: work performance appraisals; district management; chartering efforts; reactions from FCU officials; personal development plans; copies of personnel records; supply and equipment information; training; work performance; suggestions; awards; travel vouchers; and data on leave and pay activities. Also, the system contains information on NCUA clerical staff related to: work performance and development activities, which may include work product samples; memos or notations from professional staff; personal development plans; evaluations by superiors; copies of personnel records; and data on pay and leave activity.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 44 U.S.C. 3301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) The information in this system is used for recording time and attendance, controlling equipment inventories, training staff, evaluating employee work performance, and conducting general administrative matters. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper hard copy.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Physical security consists of maintaining records in locked metal file cabinets within secured offices. Cabinets may be locked depending on the nature of the information which they contain.

RETENTION AND DISPOSAL:

Current and relevant information are maintained generally for a period of one to two years. Obsolete material is maintained in the same file cabinets and is periodically destroyed or returned to the originator.

SYSTEM MANAGER(S) AND ADDRESS:

Administrative Officer, Region II Regional Office, National Credit Union Administration, 310 North Second Street, Harrisburg, Pennsylvania 17101.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the indivudual by addressing a request in person or by mail to the Regional Director where the system is located. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURE:

Upon request, the Regional Director will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the Regional Director.

RECORD SOURCE CATEGORIES:

Sources may include the individual whom the record concerns, supervisors of the individual, fellow employees, credit union officials, and other persons whom the individual encounters in the course of work performance. For payroll and personnel related information, the sources may include the General Services Administration and the Office of Personnel Management.

NCUA–13

SYSTEM NAME:

Retirement File, NCUA.

SYSTEM LOCATION:

Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any employee who submits an application for retirement.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains a copy of each individual's application for retirment and any supporting material, i.e., supervisor's statement, physician's report, and hospital records. Also, the system contains the decisions of the

Office of Personnel Management (OPM) on agency disability cases.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 CFR Part 831.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) The information maintained is a duplicated copy which is retained in the event the original papers are lost before adjustication of the claim. (2) Information is used by the Division of Personnel and Training staff in processing the application. (3) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on paper.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Records are maintained in a locked file drawer.

RETENTION AND DISPOSAL:

Records are disposed of one year after retirement.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Personnel and Training, Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained; supervisor of individual; individual's physician; hospital attending individual; Office of Personnel Management.

NCUA-14

SYSTEM NAME:

Emergency Information (Employee) File, NCUA.

SYSTEM LOCATION:

Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NCUA Central Office employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains personal information on an employee, i.e., height, weight, hair color, eye color, current address, and telephone number. Also, this system identifies the individual to contact in case of an emergency involving the employee.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) The Division of Personnel and Training (DOPT) uses certain personal information for preparing the employee ID cards. (2) The information on the individual to contact in cases of emergency is used by DOPT and others on a need-to-know basis. (3) The Security Officer mainains a list of all employees, with their addresses and telephone numbers. This list is updated monthly. The listed information is used when there is a national emergency. (4) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on paper hard copy.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Records are maintained in locked file drawer.

RETENTION AND DISPOSAL:

Records are disposed of after an employee is separated from the agency.

SYSTEM MANAGER(S) AND ADDRESS:

(1) Director, Division of Personnel and Training, Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456. (2) Security Officer, Office of Administration, at the same address, above.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the appropriate system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the appropriate system manager listed above.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained.

NCUA-15

SYSTEM NAME:

Employee Injury File, NCUA.

SYSTEM LOCATION:

Office of Administration, National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any employee who has sustained a job-related injury or disease.

CATEGORIES OF RECORDS IN THE SYSTEM:

Copies of reports submitted by individual who has sustained a job-related injury or disease. Copies of any further claims made regarding the same injury or disease or any other material required for documenting and adjudicating the claim.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Occupational Safety and Health Act 1970, 29 CFR Part 1960.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

(1) Information is maintained to provide appropriate data to the Department of Labor, when needed, for adjudication of a claim. (2) Further, information is used for reporting purposes as required by the Department of Labor on a recurring basis. (3) Use of information is limited to the Division of Personnel and Training staff. (4) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on paper.

RETRIEVABILITY:

Records are indexed alphabetically by name.

SAFEGUARDS:

Records are maintained in locked file drawer.

RETENTION AND DISPOSAL:

Records are disposed of five years after the year to which they relate.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Personnel and Training, Office of Administration, National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained; supervisors of individual; individual's physician; hospital attending individual; Department of Labor.

NCUA-16

SYSTEM NAME:

Investigative Reports Involving Possible Felonies and/or Violations of Federal Credit Union Act, NCUA.

SYSTEM LOCATION:

Office of Administration, Nation Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This system includes credit union employees who have misused or are suspected of having misused their trust in the credit union, and who have subsequently been investigated or prosecuted. Also, records may be maintained concerning credit union members involved or suspected of involvement in felonies or in fractions under the Federal Credit Union Act. Records are maintained on robberies, burglaries, and other crimes against credit unions. Information in this system is rarely indexed by the names or other identities of suspected perpetrators.

CATEGORIES OF RECORDS IN THE SYSTEM:

Investigative reports relating of possible felonies and violations of the Federal Credit Union Act (embezzlements, improper allocation of credit uion funds, etc.).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1776 and 1789.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information is used to determine if any further agency action should be taken. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper hard copy.

RETRIEVABILITY:

System is indexed by credit union name.

SAFEGUARDS:

Records are maintained in a separate locked room accessible only to the Security Officer and his designated assistants. The records are further secured in a locked safe accessible only to the Security Officer and his designated assistants.

RETENTION AND DISPOSAL:

After records have served the operational needs of NCUA and after disposition of the subject matter of the records, they are returned to the originating agency or destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Security Officer, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Federal Bureau of Investigation.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system is subject to a specific exemption pursuant to 5 U.S.C. 522a(k)(2), as the system of records is investigatory material compiled for law enforcement purposes.

NCUA-17

SYSTEM NAME:

Breach of Trust Statement; Nonfederal Credit Union/Share Insurance Applicants, NCUA.

SYSTEM LOCATION:

Office of Examination and Insurance, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Directors, officers, committee members and employees of nonfederal credit union applicants for insurance, by the National Credut Union Share Insurance Fund (NCUSIF), who have been convicted of a criminal offense involving dishonesty or a breach of trust.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1781(c)(1)(C).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS, AND THE PURPOSES OF SUCH USES:

(1) The only recurring use is internal, i.e., to consider the soundness of management of nonfederal credit union share insurance applicants. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on paper.

RETRIEVABILITY:

Records are retrievable by name of credit union combined with name of individual.

SAFEGUARDS:

Records obtained prior to November 11, 1976, are maintained in the National Credit Union Administration's central credit union filing system, accessible only to authorized NCUA employees. Records obtained on or after November 11, 1976, are maintained in a locked file cabinet under the custody of the system manager.

RETENTION AND DISPOSAL:

Records are retained indefinitely, as long as the subject credit union retains its NCUSIF-insured status.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Corporate Structure and Insurance, Office of Examination and Insurance, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Nonfederal credit union share insurance applicants.

NCUA–18

SYSTEM NAME:

Adverse Reports of Officials; Federal Credit Union Charter Applicants, NCUA.

SYSTEM LOCATION:

Office of Examination and Insurance, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Prospective officials of Federal credit union charter applicants who have been convicted of criminal offenses involving dishonesty or breach of trust.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports of Officials (NCUA Form 4012) and related correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1781(c)(1)(C).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) The only recurring use is internal, i.e., to consider the soundness of proposed officials of a Federal credit union. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are retrievable by name of credit union combined with name of individual.

SAFEGUARDS:

Records obtained prior to November 11, 1976, are maintained in the National Credit Union Administration's central credit union filing system, accessible only to authorized NCUA employees. Records obtained on or after November 11, 1976, are maintained in a locked file cabinet under the custody of the system manager.

RETENTION AND DISPOSAL:

Records are retained indefinitely, as long as the subject credit union retains its NCUSIF-insured status.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Corporate Structure and Insurance, Office of Examination and Insurance, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURE:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Request to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Federal credit union charter applicants.

NCUA–19

SYSTEM NAME:

Acquired Assets and Share Payouts Records System, NCUA.

SYSTEM LOCATION:

Division of Liquidations, Office of the Insurance Fund, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of liquidating federally-insured credit unions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Share and account balances; personal data regarding income and debts; payment history.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1787.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Data used for payment of insurance claims to shareholders in liquidating federally-insured credit unions. (2) Also, data is used in the collection of outstanding loans, which may include, referral of information to the General Accounting Office or the Department of Justice. (3) Generally, information is used for all purposes necessary to close out the affairs of the liquidated credit union and carry out all appropriate liquidation related functions of NCUA, including referral of necessary information to facilitate a purchase of the credit union's assets by NCUA or sale to a third party (before or after such purchase), referral of noncredit information to outside address locators, or referral of information to a surety company in pursuit of a fidelity bond claim. (4) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information is initially compiled on data conversion sheets prepared by NCUA examiners acting as on-site liquidators. This data is stored on computer tape, from which loan registers may be prepared and furnished to NCUA regional offices or prospective purchasers of the assets of closed credit unions. In addition to data stored on computer tape, the following records are maintained on paper hard copy; data conversion sheets, loan registers, essential share and loan documents, and

members' filed claim forms. Copies of share and loan documents, incoming payments, and loan portfolios may also be maintained on microfilm copy.

RETRIEVABILITY:

Records are indexed by name of member and by name of closed insured credit union.

SAFEGUARDS:

Records are maintained in secured offices.

RETENTION AND DISPOSAL:

Information is disposed of after ten years retention.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Liquidations, Office of the Insurance Fund, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised. Written inquiries should include name of inquirer, name of closed insured credit union of which inquirer was a member, and share and loan account numbers, if known, in addition to any requirements set by 12 CFR Part 720, Subpart B.

RECORD ACCESS PROCEDURE:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained; outside address locators; and share and loan account files of the liquidating credit union of which the individual was a member.

NCUA-20

SYSTEM NAME:

Member Accounts; Credit Unons Closed for Involuntary Liquidation, NCUA.

SYSTEM LOCATION:

Records within this system of records are located at one of the NCUA regional offices (listed in Appendix B) for a period of time necessary to answer inquiries of credit union members and to transfer share and loan record information to the Division of Liquidations, Office of the Insurance Fund, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C., or an outside purchaser. After such time, the remaining records are transferred for storage to one of twelve General Services Administration record storage centers. Records are located in the regional office covering the state in which the main office of the liquidating credit union is located (see Appendix B for states covered by each regional office).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Information is maintained on those individuals who were members or employees of a federally-insured credit union closed for liquidation and for which the Board served as liquidating agent pursuant to 12 U.S.C. 1787. Records in this system are subject to the provisions of the Privacy Act only upon completion of the liquidation of a closed federally-insured credit union and three years after cancellation of the credit union charter. Prior to such time, records of a closed insured credit union which are held by the Board, only in its capacity as liquidating agent for the closed credit union, are not "agency records" within the meaning of the Privacy Act, and thus the provisions of the Act have no applicability. Prior to charter cancellation, however, records or information may be transmitted from this system into another NCUA system of records, such as, NCUA System 19—Acquired Assets and Share Payouts Records System, and in such a case, the records as contained in the second system will be considered agency records to the extent that they are maintained for a purpose other than those attributable to functions of the liquidating agent (e.g., for share insurance payout purposes, collection of purchased assets, etc.).

CATEGORIES OF RECORDS IN THE SYSTEM:

This system contains information concerning an individual's membership in and share and loan transactions with the credit union which has been closed for liquidation; membership card; individual share and loan ledgers; notes; security documents; promissory notes and extension agreements, if any. Also included are employee payroll records and data. As further explained above, in the "Categories of individuals * * *" portion of this descriptive system notice, records of a closed insured credit union are generally subject to the provisions of the Privacy Act three years after completion of the liquidation of the credit union and cancellation of the credit union charter.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1766(c) and 1787.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Actions necessary to close out the affairs of liquidating federally-insured credit unions, including: (a) referral of information to affected credit union members, the NCUA Loan Management System, and any purchasers or prospective purchasers of the closed credit union's assets; (b) referral of information to the credit union's surety in pursuit of fidelity bond claims; and (c) referral of relevant information to any appropriate agency or official in the course of collecting a claim of the United States. (2) Standard routine uses as set forth in Appendix A. (While it is the full intent to comply with the spirit of the Privacy Act with regard to records maintained within this described system, it should again be noted that the provisions of the Privacy Act of 1974, including a limitation of routine uses to those described herein, do not technically apply to the records until they become "agency" records, i.e., until such time as they are transferred to another system within NCUA or at such time as they revert to NCUA three years after the cancellation of the charter of a closed credit union.)

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records on individual credit union members or employees in this system of records are maintained on member account documents as compiled by individual credit unions prior to entering liquidation.

RETRIEVABILITY:

Member and employee records are generally ordered or indexed by name or account number.

SAFEGUARDS:

Records within this system are maintained under the control of a designated agent for the liquidating agent who makes only such disclosures from the records as are necessary or part of responsibilities under the Federal Credit Union Act (12 U.S.C. 1751–1795).

RETENTION AND DISPOSAL:

The records are maintained in a regional office, as indicated under the location section of this notice, for a

period necessary to answer inquiries of credit union members and transfer appropriate share and loan information to the NCUA Loan Management System, Washington, D.C. After such time, the records are transferred for permanent storage to one of twelve General Services Administration record storage centers.

SYSTEM MANAGER(S) AND ADDRESS:

The system managers for this system of records are the six regional directors located at the regional office addresses set forth in Appendix B.

NOTIFICATION PROCEDURE:

If an individual wants to find out whether the records of a closed credit union within this system include records pertaining to that individual, the individual should contact the regional director whose jurisdiction includes the state where the main office of the closed credit union was located (see addresses in Appendix B) by mail or in person. The inquiry should contain the name of the inquirer, the name of the closed credit union, the inquirer's credit union account number (if known), a description of the records sought, the approximate date covered by the records sought, the approximate dates covered by the record, and the name of the system of records. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the regional director will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the appropriate regional director.

RECORD SOURCE CATEGORIES:

The sole source of information for this system of records is the member-related files and accounting records of federally-insured credit unions which have been closed for liquidation and for which the Board, or its designee, serves as liquidating agent.

NCUA-21

SYSTEM NAME:

Trusteed Account Records System, NCUA.

SYSTEM LOCATION:

Division of Liquidations, Office of Insurance Fund, National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of liquidating federally-insured credit unions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Share balances and last known addresses of individuals by whom or on whose behalf insured share account payout claims have been filed.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1787.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information is used to ensure proper payment of all trusteed account funds. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on computer printout forms. Signature cards and account records are also maintained on microfilm copy. In addition, information in the system is stored on computer tape by a private contractor pursuant to an agreement which provides that the information will remain confidential.

RETRIEVABILITY:

Records are retrievable by individual name, credit union name, or a combination thereof.

SAFEGUARDS:

Records are stored in secured offices.

RETENTION AND DISPOSAL:

Records are maintained until processing of claims is completed and, thereafter, are escheated to the appropriate state agency.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Liquidations, Office of the Insurance Fund, National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Files of federally-insured credit unions which are closed for liquidation.

NCUA-22

SYSTEM NAME:

Investigation Files, NCUA.

SYSTEM LOCATION:

Office of Internal Audit and Investigation, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of the NCUA.

CATEGORIES OF RECORDS IN THE SYSTEM:

Investigative reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1766(i)(1) and 1789(a)(7).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information gathered is used for intra-agency purposes. (2) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Reports are maintained on paper hard copy.

RETRIEVABILITY:

This system is indexed by name of complainant.

SAFEGUARDS:

Records are maintained in locked file cabinet inside a locked room; and are accessible only to the Director, Office of Internal Audit and Investigation, and designated assistants.

RETENTION AND DISPOSAL:

After the report is reviewed by the Board and has served its intended purpose, it is retained for five years and then destroyed unless otherwise directed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Internal Audit and Investigation, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained; supervisors; files maintained by the Director, Division of Personnel and Training, NCUA; and Office of Personnel Management.

NCUA-23

SYSTEM NAME:

Consumer Complaints Against Federal Credit Unions, NUCA.

SYSTEM LOCATION:

(1) Office of Consumer Affairs, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

(2) Related information may be maintained in credit union files in NCUA's six regional offices (see Appendix B for regional offices' locations).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who submit complaints concerning operating Federal credit unions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Complaint letters, investigation reports, and related correspondence concerning the complainants and the involved Federal credit unions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1766(i)(1) and 1789(a)(7); 5 U.S.C. 301; 15 U.S.C. 1601–1693.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

(1) Information may be disclosed to officials of Federal credit unions and other persons mentioned in a complaint or identified during an investigation. (2) Disclosures may be made to the Federal Reserve Board, other Federal financial regulatory agencies, the Federal Financial Institutions Examination Council, the White House Office of Consumer Affairs, and the Congress or any of its authorized committees in fulfilling reporting requirements or assessing implementation of applicable laws and regulations. (Such disclosures will be made in a nonidentifiable manner when feasible and appropriate.) (3) Referrals may also be made to other Federal and nonfederal supervisory or regulatory authorities when the subject matter is a complaint or inquiry which is more properly within such agency's jurisdiction. (4) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on paper or computer tape.

RETRIEVABILITY:

Records are retrievable from files by Federal credit union name and from the *Complaint Handling Information Program* (CHIP), by complainant name or assigned control number.

SAFEGUARDS:

Records are maintained in secured offices in either a file cabinet or in the computer.

RETENTION AND DISPOSAL:

Records are retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Consumer Affairs, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Request to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Complainant (and his or her representative, which may include, e.g., a member of Congress or an attorney); Federal credit union officials; employees and members of the credit union involved; and NCUA examiners and central files on Federal credit unions.

NCUA-24

SYSTEM NAME:

Litigation Case Files, NCUA.

SYSTEM LOCATION:

Office of General Counsel, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Records are maintained in files by the case name of individuals who are: the subject of NCUA investigations made in contemplation of legal action; involved in civil litigation with NCUA; involved in administrative proceedings; involved in litigation of interest to NCUA; or pursuing tort claims.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in case files include: investigative reports relating to possible felonies or violations of the Federal Credit Union Act; transcipts of testimony or affidavits; documents and other evidentiary matter; pleadings and other documents filed in court; orders filed or issued in civil, administrative, or criminal proceedings; correspondence relating to investigatory or litigation matters; information provided by the individual under investigation or from a Federal credit union; and other memoranda gathered and prepared by staff in performance of their duties.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

12 U.S.C. 1766, 1786, 1787, and 1789; 28 U.S.C. 2671–2680.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) The staff of the Office of General Counsel may use such records to render legal advice concerning investigations or courses of legal action; to represent NCUA in all judicial and administrative proceedings in which NCUA or any of its employees who, within the scope of employment and in an official capacity, is a party; or to intervene as an amicus curiae. (2) Standards routine uses set forth in Appendix A.

SYSTEM MANAGER AND ADDRESS:

General Counsel, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record

pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

CONTESTING RECORD PROCEDURES:

Requests to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Record source categories vary depending upon the legal issue but generally are obtained from the following: NCUA staff and internal agency memoranda; Federal employees and private parties involved in torts; contracts; Federal credit union files or officials; general law texts and sources; law enforcement officers; witnesses and others; administrative and court pleadings, transcripts or judicial orders/decisions; evidence gathered in connection with the matter involved; and from individuals to whom the records relate.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system is subject to the specific exemption provided by 5 U.S.C. 552a(k)(2), as the system of records is investigatory material compiled for law enforcement purposes.

NCUA–25

SYSTEM NAME:

Grievance Records, NCUA.

SYSTEM LOCATION:

Division of Personnel and Training, Office of Administration, National Credit Union Administration, 1776 G Street, N.W., Washington, D.C. 20456.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former Federal employees who have submitted grievances with NCUA in accordance with Part 771 of the Office of Personnel Management (OPM) regulations. (5 CFR Part 771.)

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains records relating to grievances filed by agency employees under Part 771 of the OPM's regulations. These case files contain all documents related to the grievance including statements of witnesses, reports of interviews and hearings, examiners findings and recommendations, a copy of the original and final decision with related correspondence and exhibits.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 1302, 3301, and 3302, E.O. 10577, 3 CFR 1954–1958 Comp., p. 218; E.O. 10987; 3 CFR 1959–1963 Comp., p. 519, agency employees for personal relief in a matter of concern or dissatisfaction which is subject to the control of agency management.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Information is used by the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation or order where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

(2) Information is used by any source from which additional information is requested in the course of processing a grievance to the extent necessary to identify the individual, inform the source of the purpose(s) of the request and identify the type of information requested.

(3) Information is used by a Federal agency in response to its request in connection with the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the classifying of jobs, the letting of a contract or the issuance of a license, grant, other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

(4) Information is used by a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

(5) Information is used by another Federal agency or by a court when the Government is party to a judicial proceeding before the court.

(6) Information is used by the National Archives and Records Service (General Services Administration) in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

(7) Information is used by NCUA in the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related work force studies. While published statistics and studies do not contain individual identifiers, in some instances, the selection of elements of data included in the study may be structured in such a way as to make the data individually identifiable by inference.

(8) Information is used by officials of the Office of Personnel Management, the Merit Systems Protection Board including the Office of the Special Counsel, the Federal Labor Relations Authority and its General Counsel, or the Equal Employment Opportunity Commission when requested in performance of their authorized duties.

(9) Information (that is relevant to the subject matter involved in a pending judicial or administrative proceeding) is used to respond to a request for discovery or for appearance of a witness.

(10) Information is used by officials of labor organizations reorganized under the Civil Service Reform Act when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

(11) Standard routine uses as set forth in Appendix A.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders.

RETRIEVABILITY:

Records are retrievable by the names of the individuals on whom they are maintained.

SAFEGUARDS:

Records are maintained in lockable metal filing cabinets to which only authorized personnel have access.

RETENTION AND DISPOSAL:

Records are disposed of three (3) years after closing of the case. Disposal is by shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Division of Personnel and Training, Office of Administration, National Credit Union Administration, 1776 G Street, N.W. Washington, D.C. 20456.

NOTIFICATION PROCEDURE:

An individual may inquire as to whether the system contains a record pertaining to the individual by addressing a request in person or by mail to the system manager listed above. If there is no record on the individual, the individual will be so advised.

RECORD ACCESS PROCEDURES:

Upon request, the system manager will set forth the procedures for gaining access to available records.

CONTESTING RECORD PROCEDURES:

Request to amend or correct a record should be directed to the system manager listed above.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained; testimony of witnesses; agency officials; related correspondence from organizations or persons.

Appendix A—Standard Routine Uses Applicable to NCUA Systems of Records

1. In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a "routine use," to the appropriate agency, whether Federal, State, local or foreign charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

2. A record from a system of records may be disclosed as a "routine use" to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary, to obtain information relevent to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract or the issuance of a license, grant, or other benefit.

3. A record from a system of records may be disclosed as a "routine use" to a Federal agency, in response to its request, for a matter concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision in the matter.

4. A record from a system of records may be disclosed as a "routine use" to an authorized appeal grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee. Further, a record from any system of records may be disclosed as a "routine use" to the Office of Personnel Management in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

5. A record from a system of records may be disclosed as a "routine use" to officers and employees of a Federal agency for purposes of audit.

6. A record from a system of records may be disclosed as a "routine use" to a member of Congress or to a congressional staff member in response to an inquiry from the congressional office made at the request of the individual about whom the record is maintained.

7. A record from a system of records may be disclosed as a "routine use" to the officers and employees of the General Services Administration (GSA) in connection with administrative services provided to this agency under agreement with GSA.

Appendix B—List of Regional Offices (Addresses and States Covered by Each Region)

I. NCUA Region I Regional Office: 441 Stuart Street, Sixth Floor, Boston, Massachusetts 02116, Phone: (617) 223–6807.

States covered: Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Puerto Rico, Rhode Island, Virgin Islands, Vermont.

II. NCUA Region II Regional Office: 310 North Second Street, Harrisburg, Pennsylvania 17101, Phone: (717) 782–4505.

States covered: District of Columbia, Delaware, Maryland, Pennsylvania, Virginia, West Virginia.

III. NCUA Region III Regional Office: 1365 Peachtree Street, Suite 500, Atlanta, Georgia 30367, Phone: (404) 881–3127.

States covered: Arkansas, Alabama, Republic of Panama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Tennessee, South Carolina.

IV. NCUA Region IV Regional Office: New Federal Office Building, Room 704, 234 N. Summit Street, Toledo, Ohio 43604, Phone: (419) 259–7510.

States covered: Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, North Dakota, Ohio, South Dakota, Wisconsin.

V. NCUA Region V Regional Office: 515 Congress Avenue, Suite 1400, Austin, Texas 78701, Phone: (512) 397–5131.

States covered: Arizona, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Texas, Utah, Wyoming.

VI. New Region VI Regional Office: 77 Geary Street, Second Floor, San Francisco, California 94108, Phone: (415) 556–6277.

States covered: Alaska, California, Guam, Hawaii, Oregon, Washington.

BILLING CODE 7535–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–219]

Jersey Central Power & Light Co.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 58 to Provisional Operating License No. DPR–16, issued to Jersey Central Power & Light Company (the licensee), which revised the Technical Specifications for operation of the Oyster Creek Nuclear Generating Station (the facility) located in Ocean County, New Jersey. The amendment is effective as of its date of issuance.

This amendment incorporates Technical Specification requirements on additional fire protection systems that were installed during the 1980 refueling outage.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 14, 1980, and a revision thereto dated May 6, 1981, (2) Amendment No. 58 to License No. DPR–16, including the Commission's letter of transmittal, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Ocean County Library, Brick Township Branch, 401 Chambers Bridge Road, Brick Town, New Jersey 08723. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 21st day of December, 1981.

For the Nuclear Regulatory Commission.

Thomas V. Wambach,

Acting Chief, Operating Reactors Branch #5, Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. STN 50–482]

Kansas Gas & Electric Co. et al.; Issuance of Amendment to Construction Permit

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the

Commission) has issued Amendment No. 1 to Construction Permit No. CPPR–147 to Kansas Gas and Electric Company, Kansas City Power and Light Company and Kansas Electric Power Cooperative, Inc. The amendment reflects a change in ownership and transfer of shares of the Wolf Creek Generating Station, Unit No. 1, located in Coffey County, Kansas.

The amendment provides for the addition of Kansas Electric Power Cooperative, Inc. as an applicant for all licenses previously requested and an ownership share of six percent of the facility. The amendment is effective as of the date of issuance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the amendment. Public notice of the proposed issuance of this amendment was published in the Federal Register on September 24, 1979 (44 FR 55071). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

For further details with respect to this action, see (1) the application for amendment, dated July 30, 1979 and amendment to the application, dated November 20, 1981; (2) Amendment No. 1 to Construction Permit No. CPPR–147, and (3) the staff's safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the William Allen White Library, Emporia State University, 1200 Commercial Street, Emporia, Kansas 66801.

A copy of items 2 and 3 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Division of Technical Information and Document Control.

Dated at Bethesda, Maryland, this 22nd of December 1981.

B. J. Youngblood,

Chief, Licensing Branch No. 1, Division of Licensing.

BILLING CODE 7590–01–M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft, temporarily identified by its task number, CE 913–5 (which should be mentioned in all correspondence concerning this draft guide), is proposed Revision 2 to Regulatory Guide 1.13 and is entitled "Spent Fuel Storage Facility Design Basis." It is being developed to describe procedures acceptable to the NRC staff complying with the Commission's regulations with respect to the design of spent fuel storage facilities at nuclear power plants. The draft guide endorses ANSI N210–1976/ANS–57.2, "Design Objectives for Light Water Reactor Spent Fuel Storage Facilities at Nuclear Power Stations," with certain modifications.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch by March 5, 1982.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

BILLING CODE 7590–01–M

OFFICE OF MANAGEMENT AND BUDGET

Cost of Hospital and Medical Care and Treatment Furnished by the United States; Certain Rates Regarding Recovery From Tortiously Liable Third Persons

By virtue of the authority vested in the President by section 2(a) of the Act of September 25, 1962, (76 Stat. 593: 42 U.S.C. 2652), and delegated to the Director of the Office of Management and Budget by Executive Order No. 11541 of July 1, 1970, (35 FR 10737), the following three sets of rates are established for use in connection with the recovery, as authorized by such Act, from tortiously liable third persons of the cost of hospital and medical care and treatment furnished by the United States (Part 43 of Chapter I of Title 28 of the Code of Federal Regulations) through three separate Federal agencies. These rates have been determined to represent the reasonable cost of hospital, nursing home, medical, surgical or dental care and treatment (including prostheses and medical appliances) furnished or to be furnished:

(a) For such care and treatment furnished by the United States in Federal hospitals, nursing homes, and outpatient clinics, administered by any of the three Federal agencies—Department of Defense, Veterans Administration, or Department of Health and Human Services—with the exception of Department of Defense operated medical treatment facilities in Panama.

(b) For such care and treatment furnished at Government expense in a facility not operated by the United States, the rates shall be the amounts expended by the United States for such care and treatment.

(c) For such care and treatment at the United States Government medical

treatment facilities in Panama, Panama-specific rates shall be those established and in effect at the time the care and treatment is furnished by the Department of Defense for such care and treatment furnished in Panama to beneficiaries of other United States Government agencies. The Panama-specific rates will be discontinued on March 31, 1982, and replaced with the Department of Defense rates used worldwide.

	DOD[1]	VA[1]	HHS[1]
Hospital care per inpatient day:			
General medical, surgical, and tuberculosis care	$406	$285	$254
In Panama	358		
Psychiatric care		170	
Nursing home care		109	
Burn Center, U.S. Army Institute of Surgical Research, Brooke Army Medical Center, Fort Sam Houston, Texas	1,866		
Outpatient medical and dental treatment:			
Per outpatient visit	40	81	80
In Panama	37		

[1] Effective January 4, 1982 and thereafter.

For the period beginning January 4, 1982, the rates prescribed herein supersede those established by the Director of the Office of Management and Budget on May 11, 1981, (46 FR 25736). Effective April 1, 1982, the Panama-specific health care reimbursement rates will be replaced with the Department of Defense worldwide reimbursement rates.

Dated: December 21, 1981.

David A. Stockman,

Director, Office of Management and Budget.

BILLING CODE 3110-01-M

Office of Federal Procurement Policy; Solicits Views

Proposed Policy Letter; Opportunity for Review and Comment

AGENCY: Office of Federal Procurement Policy; Office of Management and Budget.

ACTION: Solicitation of views.

SUMMARY: Section 6(d)(3) and 14(b) of the Office of Federal Procurement Policy Act, Pub. L. 93-400, as amended by Pub. L. 96-83 (41 U.S.C. 407(d)(3), 412(b)), require the Administrator for Federal Procurement Policy to:

Establish criteria and procedures for an effective and timely method of soliciting the viewpoints of interested parties in the development of procurement policies, regulations, procedures, and forms.

Require by regulation that formal meetings of the Office of Federal Procurement Policy, as designated by the Administrator, for the purpose of developing procurement policies and regulations, shall be open to the public, and that public notice of each such meeting shall be given not less than ten days prior thereto.

The proposed Policy Letter would implement these statutory requirements by establishing uniform procedures for all agencies issuing procurement policies, regulations, procedures, and forms, and by publicizing the procedures of the Office of Federal Procurement Policy for the conduct of public hearings and open meetings.

DATE: Comments must be received by February 28, 1982.

ADDRESS: Send comments to Mr. LeRoy J. Haugh, Associate Administrator for Regulatory Policies and Practices, Office of Federal Procurement Policy, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Mr. LeRoy J. Haugh, address as above, telephone (202) 395-6166.

Donald E. Sowle,

Administrator.

OFPP Policy Letter No. 82-

To the Heads of Executive Departments and Establishments

Subject: Public Participation in the Development of Federal Procurement Policies and Regulations

1. *Purpose.* The purpose of this Policy Letter is to establish uniform criteria and procedures for soliciting the views of all interested parties in the development of Federal procurement policies, regulations, procedures and forms.

2. *Authority.* This Policy Letter is issued pursuant to section 6(d)(3) and section 14(b) of the Office of Federal Procurement Policy Act, Pub. L. 93-400, as amended by Pub. L. 96-83 (41 U.S.C. 407(d)(3), 412(b)).

3. *Policy.* The views of all interested parties, including Government agencies, private organizations and associations, business firms, educational institutions and individuals are to be obtained and considered by any executive agency proposing to develop or amend a procurement policy, regulation, procedure, or form.

4. *Criteria.* The policy applies to all significant proposed procurement policies, regulations, procedures and forms. A proposal is considered to be significant if it has any affect beyond the internal operating procedures of the issuing agency.

5. *Waiver.* The solicitation of views from outside the Government may be waived, by the heads of executive departments or establishments or their deputies when circumstances make such solicitation impracticable, such as an emergency or a requirement to implement a new statute in a relatively short time.

6. *Procedures.* All significant proposed procurement policies, regulations, procedures, and forms shall be published in the Federal Register for public comment. The views of Government agencies shall be solicited by letters addressed to the agencies. The normal comment period shall be 60 days, but in no case less than 30 days. When new material is being developed on a coordinated uniform basis for the Defense Acquisition Regulation, the Federal Procurement Regulations, and the National Aeronautics and Space Administration Procurement Regulation, publication and receipt of comments should be handled by only one agency, to be agreed upon by the Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration. Matters which have been through a public comment period by one agency, including the Office of Federal Procurement Policy, and are being adopted or implemented without significant change by another agency, need not be published again for comment.

7. *Content of Notice.* The Federal Register notice shall include the following:

a. The basis for the proposal;

b. An analysis of the significant features of the proposal;

c. A description of the results anticipated from implementation of the proposal; and an estimate of the effect on both Government and private sector workload;

d. The anticipated effect on the procurement process.

e. The text of the proposed issuance. However, if it is impracticable to publish the full text in the Federal Register, a summary shall be published, and the notice shall advise where the full text may be obtained or examined.

8. *Mailing List.* Agencies are encouraged to maintain lists of organizations, associations, and other interested parties that have expressed a continuing desire to be informed of proposed changes to procurement policies, regulations, procedures, and forms, and to solicit their comments directly in addition to any notice published in the Federal Register.

9. *Public Hearings or Meetings of the Office of Federal Procurement Policy.* Public hearings or formal meetings, open to the public, may be held by OFPP to provide an opportunity for discussion of policies under consideration. Criteria and procedures are as follows:

a. *Criteria.* A public hearing or open meeting shall be held in connection with the adoption, amendment, or repeal of an OFPP policy whenever the Administrator determines that such a hearing or meeting would—

(i) materially benefit the consideration of the issues;

(ii) be likely to develop significant additional information or views or;

(iii) provide useful public visibility to the policy determination of the Office.

The convening of such a hearing or meeting may be forgone if the Administrator determines that it is not feasible, as in matters of urgency or for other good cause.

b. *Notice and Procedures.* Notice of any public hearing or open meeting shall normally be published in the Federal Register at least 30 days in advance, and in the "Business News" section in the *Commerce Business Daily.* Anyone may make a brief oral

presentation, provided a written statement is submitted to OFPP by the day preceding the hearing or meeting. Only one representative of any organization may make an oral presentation, and the Administrator may require that such presentations be limited to summarizing the main points of written submissions. If time permits, others in attendance may be allowed to comment briefly on matters under discussion. Hearings and meetings will not ordinarily be recorded by OFPP; anyone attending may record the proceedings provided that OFPP be furnished a copy of any transcript made.

10. *Effective Date.* This Policy Letter is effective ————.

11. *Expiration.* This Policy Letter shall expire upon the effective date of the Federal Acquisition Regulation, now being developed.

Donald E. Sowle,

Administrator.

BILLING CODE 3110-01-M

OFPP Policy Letter 81-2; Supplement No. 1; Policy Guidance for the Labor Surplus Area Program

AGENCY: Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Supplement to OFPP Policy Letter 81-2, May 29, 1981.

SUMMARY: OFPP Policy Letter 81-2 May 29, 1981, published in the **Federal Register** on June 5, 1981, provided uniform policy guidance on the labor surplus area program.

This supplement to Policy Letter 81-2 deletes paragraph 2 "GSA Multiple Award Schedule Contracts" of OFPP Policy Letter 81-2. Paragraphs 2a and 2b are now regarded as inappropriate since GSA advises that it is not feasible to indicate in the Federal Supply Schedules whether an item was manufactured in a labor surplus area. Paragraphs 2c and 2d are regarded as inappropriate since, starting with Fiscal Year 1981, purchases by agencies against GSA schedules are not to be counted as awards in fulfillment of individual agency LSA targets. This supplement also amends paragraph 1b in its statement of which agency set-aside awards shall be recorded in fulfillment of their labor surplus area targets.

DATE: The provisions of the supplementary Policy Letter will be effective December 31, 1981.

CONTACT:
Owen Birnbaum, Deputy Associate Administrator for Regulatory Policies and Practices, 395-3455.

Dated: December 23, 1981.

Donald E. Sowle,

Administrator.

Policy Letter 81-2, Supplement No. 1

To the Heads of Executive Departments and Establishments

Subject: Policy Guidance for the Labor Surplus Area Program

Government procurement policy should be uniform and consistent in application. The purpose of this supplementary Policy Letter is to provide a uniform amendment in response to changed conditions subsequent to OFPP Policy Letter 81-2, May 29, 1981 (45 FR 30225, June 3, 1981).

1. The Office of Federal Procurement Policy issued Policy Letter 81-2, May 29, 1981 which was published in the **Federal Register** on June 5, 1981. The Policy Letter provides uniform clarification of issues raised in connection with existing policy guidance on the labor surplus area program. Paragraph 2 covered GSA Multiple Award Schedule contracts.

2. Paragraph 2a of Policy Letter 81-2 requires GSA to "ensure that firms performing in labor surplus areas are so listed in Federal Supply Schedule." Paragraph 2b then encourages agencies to use LSA firms to the maximum extent possible when placing orders under these schedules. Paragraph 2c of the Policy Letter states, in part, that "GSA will establish Government-wide LSA targets for each agency for these schedule contracts, based on performance and future estimated potential." Paragraph 2d states, in part, that: "Each agency will report its individual performance on the basis of actual obligations under these schedules."

3. With respect to paragraphs 2a and 2b, GSA advises that it is not feasible to indicate in the schedules whether an item was manufactured in a labor surplus area. As to paragraphs 2c and 2d, starting with Fiscal Year 1981, purchases by agencies against GSA Schedules are not to be counted as awards in fulfillment of their LSA targets.

4. Accordingly, paragraph 2 of OFPP Policy Letter 81-2, May 29, 1981, is deleted in its entirety.

5. Paragraph 1b of Policy Letter 81-2 sets forth which agency awards, resulting from set-aside programs under section 15 (d), (e), and (f) of the Small Business Act, are to be recorded in fulfillment of individual agency labor surplus area targets. The statement included in sections 1b(1)(ii) and 1(b)(1)(iii) awards under total and partial small business set-asides. Since such set-asides are not restricted to labor surplus area firms it would be inappropriate for agencies to record awards thereunder in fulfillment of targets. Accordingly, the last section of paragraph 1(b)(1) of Policy Letter 81-2 is amended to read as follows. "Contracts awarded under priorities (i), (iii) and (v) shall be recorded by departments and agencies in fulfillment of their labor surplus area targets."

Effective date: This supplementary Policy Letter is effective December 31, 1981.

Concurrence: This supplementary Policy Letter has been concurred in by the Office of Management and Budget.

Donald E. Sowle,

Administrator.

BILLING CODE 3110-01-M

POSTAL SERVICE

Notice of Increase in Rates for Preferred-Rate Mailers Caused by Decrease in Congressional Subsidy

AGENCY: Postal Service.

ACTION: Notice of increases in preferred postage rates.

SUMMARY: This is to give notice that postage rates for preferred-rate mailers will be increased, as directed by Congress in the continuing resolution H.J. Res. 370, signed into law on December 15, 1981 (Pub. L. 97-92). The increase in postage rates is required to make up the difference between the amount of revenue forgone subsidy appropriated by Congress in Pub. L. 97-92, and the amount which is authorized to be appropriated by 39 U.S.C. 2401(c). The new rates are contained in the Appendix to this notice.

EFFECTIVE DATE: 12:01 a.m., January 10, 1982.

FOR FURTHER INFORMATION CONTACT:
Don S. Allen (202)— 245-4418.

SUPPLEMENTARY INFORMATION: Section 108 of Pub. L. 97-92 sets forth the appropriation levels for the Postal Service, including an appropriation for revenue forgone on free and reduced-rate mail. The amount appropriated is less than that authorized under 39 U.S.C. 2401(c). In Pub. L. 97-92, Congress directed the Postal Service to promptly adjust preferred rates so as to recover the difference between the amount authorized to be appropriated under 39 U.S.C. 2401(c), and the amount actually appropriated. Consistent with this, the Board of Governors of the Postal Service met on December 23, 1981, and adopted the following Resolution.

In keeping with section 108 of Pub. L. 97-92, which directs the Postal Service to promptly adjust preferred rates so as to recover the difference between the amount which was authorized to be appropriated under section 2401(c) of title 39, United States Code, and the amount appropriated by Pub. L. 97-92, the rates for all preferred rate categories except second-class within-county and fourth-class library rate will be adjusted to the full step 16 (unphased) level of the Schedules contained in Appendix Two of the Governors' Decision of September 29, 1981 (46 FR 51691-92). Second-class within-county rates and fourth-class library rates will be adjusted to the step 13 level of the Schedules. The adjustments shall become effective at 12:01 a.m. on January 10, 1982.

Accordingly, effective at 12:01 a.m. on January 10, 1982, the rates for all preferred-rate categories except second-class within-county and fourth-class library rate are adjusted to the full step 16 (unphased) level of the Schedules

contained in Appendix Two of the Governors' Decision of September 29, 1981 (46 FR 51691–92). Second-class within-county rates and fourth-class library rates are adjusted to the step 13 level of the Schedules contained in Appendix Two of the Governors' Decision of September 29, 1981 (46 FR 51691–92). (39 U.S.C. 401, 403, 404, 2401(c), 3626, 3627).

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

SMALL BUSINESS ADMINISTRATION

[SBLC No. 02/B-0023]

Beneficial Funding Corp.; Issuance of Small Business Lending Company Participation Certificate

On September 8, 1981, a Notice was published in the **Federal Register** (46 FR 44951) stating that an Application has been filed with the Small Business administration pursuant to § 120.4(b) of the Regulations governing Small Business Lending Companies (13 CFR 120.4(b)) by Beneficial Funding Corporation, 1212 Avenue of the Americas, New York, New York 10036, to participate with the SBA as a Small Business Lending Company (SBLC).

Interested parties were given until the close of business on September 23, 1981, to submit their comments on the Applicant and/or its management. Only one comment was received and considered.

Notice is hereby given that after review of the Application and all other pertinent information, SBA issued Small Business Lending Company Participation Agreement No. SBLC No. 02/B-0023 to Beneficial Funding Corporation to operate as an SBLC on this date.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, January 4, 1982, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be move to the discussion agenda.

Disposition of minutes of previous meetings.

Applications for Federal deposit insurance:

Bank of Cochise, a proposed new bank, to be located at the southeast corner of Carmichael Avenue and Wilcox Drive, Sierra Vista, Arizona.

Redding Bank of Commerce, a proposed new bank, to be located at the southwest corner of East and Placer Streets, Redding, California.

Application for Federal deposit insurance and for consent to exercise full trust powers:

Union Trust Company, an operating noninsured bank, located at 250 Tanca Street, Old San Juan, Puerto Rico.

Request for an extension of time to establish a branch:

Bank of Clarksville, Clarksville, Tennessee, for an extension of time within which to establish its proposed Hillsdale Branch to be located at 1734 Memorial Drive, Clarksville, Tennessee.

Request for modification of a previously imposed condition of an order issued pursuant to section 18(c) of the Federal Deposit Insurance Act:

American Pacific State Bank, Los Angeles (P.O. Sun Valley), California, in connection with its proposed acquisition of a portion of the assets of and assumption of the liability to pay a portion of the deposits made in the Granada Hills Branch of Manufacturers Bank, Los Angeles, California.

Recommendations regarding he liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 44,983–L—The Hamilton National Bank of Chattanooga, Chattanooga, Tennessee

Case No. 45,046–L—The Hamilton Bank and Trust Company, Atlanta, Georgia; and The Hamilton National Bank of Chattanooga, Chattanooga, Tennessee

Memorandum and Resolution re: Final amendments to Part 327 of the Corporation's rules and regulations, entitled "Assessments," which would (1) require insured banks to pay interest on delinquent assessment payments owed to the Corporation if the delinquencies are not caused by the Corporation, and (2) require the Corporation to pay interest on assessment overpayments by insured banks if the overpayments are caused by the Corporation.

Reports of committees and officers:

Minutes of the actions approved by the Committee on Liquidations, Loans and Purchases of Assets pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Director, Division of Liquidation:

Memorandum re: Reports Required Under Delegated Authority Release of Collateral for Fair Market Value

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: December 28, 1981.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of agency meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, January 4, 1982, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors pursuant to sections 552b(c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Application for assistance under section 13(c) of the Federal Deposit Insurance Act:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(A)(ii)).

Requests for relief from adjustment for violations of Regulation Z:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act"(5 U.S.C. 552b(c)(8) and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalities) against certain insured banks or officers, directors, employees, agents, or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Applications for consent to establish a branch:

The Howard Savings Bank, Newark, New Jersey, for consent to establish a Branch at the northwest corner of Bay Avenue and Hooper Avenue, Dover Township, New Jersey.

Industrial Valley Bank and Trust Company, Jenkintown, Pennsylvania, for consent to establish a branch at 161 West DeKalb Pike, King of Prussia, Pennsylvania.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsection (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: December 28, 1981.

Request for Comments on Applicants for Designation in the Areas Currently Assigned to Denver Grain Exchange Association, Inc., Lincoln Inspection Service, Inc., and Omaha Grain Inspection Service, Inc.

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for designation as the official agency in the areas currently assigned to the Denver Grain Exchange Association, Inc. (Denver), Lincoln Inspection Service, Inc. (Lincoln), and Omaha Grain Inspection Service, Inc. (Omaha). The three designations terminate effective 12 p.m., April 30, 1982.

DATE: Comments to be postmarked on or before March 1, 1982.

DATES: Comments must be submitted in writing, in duplicate, to Lewis Lebakken, Jr., Regulations and Directives Management Staff, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 1642, South Building, 1400 Independence Avenue, SW., Washington, DC 20250, telephone (202) 447–9172. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 447–9172.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Secretary's Memorandum 1512–1; therefore the Executive Order and Secretary's Memorandum do not apply to this action.

The October 30, 1981, issue of the **Federal Register** (46 FR 54064) contained a notice from the Federal Grain Inspection Service (FGIS) requesting applications for designation to perform official inspection services under the U.S. Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (Act), in the areas currently assigned to Denver, Lincoln, and Omaha, respectively. Applications were to be postmarked by November 30, 1981.

One applicant requested designation for all of the gegraphic area currently assigned to Denver. That applicant is the Denver Grain Exchange Association, Inc., Commerce City, Colorado. Denver applied for a renewal of designation for an additional 3-year period.

One applicant requested designation for all of the geographic area currently assigned to Lincoln. That applicant is the Lincoln Inspection Service, Inc., Lincoln, Nebraska. Lincoln applied for a renewal of designation for an additional 3-year period.

One applicant requested designation for all of the geographic area currently assigned to Omaha. That applicant is the Omaha Grain Inspection Service, Inc., Omaha, Nebraska. Omaha applied for a renewal of designation for an additional 3-year period.

In accordance with § 800.206(b)(2) of the regulations under the Act, this notice provides interested persons the opportunity to present their views and comments concerning the applicants. All comments must be submitted to the Regulations and Directives Management Staff, specified in the address section of this notice, and postmarked not later than March 1, 1982.

Consideration will be given to all comments filed and to all other information available to the Administrator of FGIS before a final decision is made with respect to this matter. Notice of the final decision is made with respect to this matter. Notice of the final decision will be published in the **Federal Register** and the applicants will be informed of the decision in writing.

BILLING CODE 3410-EN-M

Termination of Designations of the Sioux City Inspection and Weighing Agency, Inc., and A. V. Tischer and Son, Inc.

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces that the designations of two official agencies will terminate on June 30, 1982, and requests applications from parties interested in being designated as agencies to conduct official inspection services in the geographic areas currently serviced by each of the two present agencies. The two official agencies are the Sioux City Inspection and Weighing Agency, Inc., and A. V. Tischer and Son, Inc.

DATE: Applications to be postmarked on or before January 29, 1982.

ADDRESS: James R. Conrad, Chief, Regulatory Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 2405 Auditors Building, Washington, DC 20250, telephone (202) 447–8525.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Secretary's Memorandum 1512–1; therefore the Executive Order and Secretary's Memorandum do not apply to this action.

Section 7(f)(1) of the U.S. Grain Standards Act, as amended (7 U.S.C. 71, *et seq.*, at 79(f)(1)) (Act), specifies that the Administrator of the Federal Grain Inspection Service is authorized, upon application by any qualified agency or person, to designate such agency or person to perform official inspection services after a determination is made that the applicant is better able than any other applicant to provide official inspection services in an assigned geographic area.

The Sioux City Inspection and Weighing Agency, Inc. (Sioux City), 310 S. Floyd Boulevard, Room 302, Sioux City, Iowa 51101, was designated as an official agency under the Act for the performance of official grain inspection functions on May 1, 1979. A. V. Tischer and Son, Inc. (Tischer), 137 10th Street, NW., P.O. Box 339, Fort Dodge, Iowa 50501, was designated as an official agency under the Act for the performance of official grain inspection functions on February 1, 1979. The two agencies' designations will terminate on June 30, 1982. This date reflects administrative extensions of official agency designations as discussed in the July 16, 1979, issue of the **Federal Register** (44 FR 41275). Section 7(g)(1) of the Act states generally that designations of official agencies shall terminate no later than triennially and may be renewed in accordance with the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Sioux City in the States of Iowa, Nebraska, and South Dakota pursuant to section 7(f)(2) of the Act and which is the geographic area that may be assigned to the applicant selected for designation is the following:

In Iowa, the area shall be:

Bounded: on the North by the northern Iowa State line from the Big Sioux River east to U.S. Route 59;

Bounded: on the East by U.S. Route 59 south to B24; B24 east to the eastern O'Brien County line; the O'Brien County line south; the northern Buena Vista County line east to U.S. Route 71; U.S. Route 71 south to the southern Sac County line;

Bounded: on the South by the Sac and Ida County lines; the eastern Monona County line south to State Route 37; State Route 37 west to State Route 175; State Route 175 west to the Missouri River; and

Bounded: on the West by the Missouri River north to the Big Sioux River; the Big Sioux River north to the northern Iowa State line.

In Nebraska the area includes Cedar, Dakota, Dixon, and Thurston Counties, and Pierce County north of U.S. Route 20 and west of U.S. Route 81.

In South Dakota the area shall be:

Bounded: on the North by State Route 44 (U.S. 18) east to State Route 11; State Route 11 south to A54B; A54B east to the Big Sioux River;

Bounded: on the East by the Big Sioux River; and

Bounded: on the South and West by the Missouri River.

Also, the following locations which are outside of the foregoing contiguous area, and which are presently assigned to Sioux City and which are part of the geographic area that may be assigned to the applicant selected for designation [illegible]:

1. Charter Oak Grain & Seed and Delanty Grain Company, Charter Oak, Iowa, in Crawford County;

2. Gooch Seed Mill and Ernie's Seed & Field Service, Storm Lake, Iowa, in Buena Vista County; and

3. Farmers Elevator Company and Feeders Mill & Elevator, Inc., Platte, South Dakota, in Charles Mix County.

The geographic area presently assigned to Tischer in the State of Iowa pursuant to Section 7(f)(2) of the Act and which is the geographic area that may be assigned to the applicant selected for designation is the following:

In Iowa, the area shall be:

Bounded: on the North by the Iowa-Minnesota State line from U.S. Route 71 east to U.S. Route 169;

Bounded: on the East by U.S. Route 169 south to State Route 9; State Route 9 west to U.S. Route 169; U.S. Route 169 south to the northern Humboldt County line; the Humboldt County line east to State Route 17; State Route 17 south to C54; C54 east to U.S. Route 69; U.S. Route 69 south to the northern Hamilton County line; the Hamilton County line west to R38; R38 south to U.S. Route 20; U.S. Route 20 west to the eastern and southern Webster County lines to U.S. Route 169; U.S. Route 169 south to E18; E18 west to the eastern Greene County line; the Greene County line south to U.S. Route 30;

Bounded: on the South by U.S. Route 30 west to E53; E53 west to N44; N44 north to U.S. Route 30; U.S. Route 30 west to U.S. Route 71; and

Bounded: on the West by U.S. Route 71 north to the Iowa-Minnesota State line.

Also, the following locations which are outside of the foregoing contiguous area, and which are presently assigned to Tischer and which are part of the geographic area that may be assigned to the applicant selected for designation [illegible]:

1. Cargill, Inc., Algona, Iowa, in Kossuth County;

2. Farmers Coop Elevator, Boxholm, Iowa, in Boone County;

3. Big Six Elevator, Burt, Iowa, in Kossuth County;

4. Farmers Elevator, Goldfield, Iowa, in Wright County; and

5. Farmers Coop Elevator, Holmes, Iowa, in Wright County.

Exceptions to the described geographic area are the following locations situated inside Tischer's area which have been and will continue to be serviced by the following official agencies:

1. Farmers Coop Company, Eagle Grove, Iowa, in Wright County to be serviced by the D. R. Schaal Agency; and

2. Gooch Seed Mill and Ernie's Seed & Field Service, Storm Lake, Iowa, in Buena Vista County to be serviced by Sioux City Inspection and Weighing Agency, Inc.

Interested parties, including Sioux City and Tischer, are hereby given opportunity to apply for designation as the official agency for each respective specified geographic area, as described above, under the provisions of section 7(f) of the Act and § 800.196(b) of the regulations issued thereunder. The designations in each specified geographic area are for the period beginning July 1, 1982, and terminating June 30, 1985. Parties wishing to apply for any of these designations should contact the Chief, Regulatory Branch, Compliance Division, at the address listed above for appropriate forms and information. Applications must be postmarked not later than January 29, 1982 to be eligible for consideration.

In making a determination as to which applicant will be designated to provide official inspection service in the geographic areas, consideration will be given to all applications submitted and all other information available to the Administrator. All applications submitted pursuant to this notice will be available for public inspection at the Regulatory Branch, Compliance Division, during regular business hours.

(Sec. 8, Pub. L. 94-582, 90 Stat. 2873 (7 U.S.C. 79))

Dated: December 15, 1981.

BILLING CODE 3410-EN-M

Renewals of Designation of the California Department of Food and Agriculture and the Washington Department of Agriculture

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces the renewals of designation of the California Department of Food and Agriculture (California) and the Washington Department of Agriculture (Washington) as official agencies responsible for providing grain inspection and weighing services under the U.S. Grain Standards Act (7 U.S.C. 71, *et seq.*) (Act).

EFFECTIVE DATE: February 1, 1982.

ADDRESS: James R. Conrad, Chief, Regulatory Branch, Compliance Division, Federal Grain Inspection Service, U.S. Depatment of Agriculture, 1400 Independence Avenue, SW., Room 2405 Auditors Building, Washington, DC 20250, telephone (202) 447-8525.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Secretary's Memorandum 1512-1; therefore the Executive Order and Secretary's Memorandum do not apply to this action.

The August 4, 1981, issue of the **Federal Register** (46 FR 39775) contained a notice from the Federal Grain Inspection Service (FGIS) announcing that the designations of California and Washington were terminating on January 31, 1982, and requesting applications for designation as the agency to provide official inspection and weighing services within each specified assigned area. Applications were to be postmarked by September 3, 1981.

FGIS announced the names of the applicants for designation for each of the two agencies and requested comments on the applicants in the October 1, 1981, issue of the **Federal**

Register (46 FR 48419). Comments were to be postmarked by November 2, 1981.

One favorable comment was received regarding the renewal of designation of California (the only applicant) as the official agency in the area cited in the August 4, 1981, issue of the Federal Register.

After considering all available information in relation to the criteria for designation in section 7(f)(1)(A) of the Act, and in accordance with section 7(f)(1)(B), it has been determined that California is able to provide official services in the geographic area for which its designation is being renewed. This assigned area is the entire geographic area as described in the August 4, 1981, issue of the Federal Register.

No comments were received regarding the renewal of designation of Washington (the only applicant) as the official agency in the area as cited in the August 4, 1981, issue of the Federal Register.

After considering all available information in relation to the criteria for designation in section 7(f)(1)(A) of the Act, and in accordance with section 7(f)(1)(B), it has been determined that Washington is able to provide official services in the geographic area for which its designation is being renewed. This assigned area is the entire geographic area as described in the August 4, 1981, issue of the Federal Register.

Effective February 1, 1982, the responsibility for providing official inspection services in each geographic area as specified above will be assigned to California and Washington, respectively. Designations of each of the two agencies will terminate January 31, 1985.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspection and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the agencies will provide official inspection services not requiring a licensed inspector to all other areas within their geographic area.

Interested persons may obtain a list of the specified service points by contacting the specific agencies at the following addresses:

California Department of Food and Agriculture, 1220 N. Street, Room A–150, Sacramento, CA 95823

Washington Department of Agriculture, 406 General Administration Building, Olympia, WA 98504

Interested persons may also contact the Regulatory Branch at the address listed above to obtain the information concerning specified service points.

(Sec. 8, Sec. 9, Pub. L. 94–582, 90 Stat. 2873, 2875 (7 U.S.C. 79, 79a))

Dated: December 15, 1981.

Part III

Panama Canal Commission

Revised Shipping and Navigation Rules for the Panama Canal

PANAMA CANAL COMMISSION

35 CFR Ch. I

Revised Shipping and Navigation Rules for the Panama Canal

AGENCY: Panama Canal Commission.

ACTION: Final rule.

SUMMARY: Upon entry into force on October 1, 1979, of the Panama Canal Treaty of 1977, the United States relinquished and Panama assumed plenary jurisdiction over what was the Canal Zone. Under the Panama Canal Act of 1979, the statute implementing the new treaty, the Canal Zone Government was disestablished and the Panama Canal Company was replaced by the Panama Canal Commission, which will operate the waterway until the termination of the treaty of December 31, 1999. This rule contains the regulations of the Commission relating to shipping and navigation in the Panama Canal.

DATE: These rules are effective December 30, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Rhode, Jr., Secretary, Panama Canal Commission, (202) 724–0104, or Mr. Dwight A. McKabney, General Counsel, Panama Canal Commission, Telephone in Balboa Heights, Republic of Panama 52–7511.

SUPPLEMENTARY INFORMATION:

On November 27, 1981, a notice of proposed rulemaking was published in the **Federal Register** (46 FR 57915) setting forth revisions to the shipping and navigation regulations of the Commission. The vast majority of the proposed changes were designed to eliminate references to functions which, as a result of the Panama Canal Treaty of 1977 between the United States and the Republic of Panama and the legislation implementing the terms of that international accord, are no longer the responsibility of the Canal agency. The revised regulations reflect the organization, structure and responsibilities of the Panama Canal Commission. Among the substantive changes, some provisions were added to fill gaps in the former rules, while others were intended to incorporate into formal regulations existing requirements which, to date, have been published in Marine Director's Notices to Shipping. Finally, other changes clarified and simplified the regulations and made the wording of the sections uniform.

Interested parties were given the opportunity to submit comments by December 20, 1981.

A. All comments with respect to the proposed revision were given due consideration. In addition to the correction of typographical errors and language changes for clarification, the following changes in the revised rules are made:

1. Section 101.10(a) is reworded for clarification purposes and to eliminate items (9)—"Report of structural alterations and of changes in use of tanks or other spaces since last transit" and (11)—"Declaration as to vessel's port(s) of departure, destination, and ports of call, within the last three months, with the corresponding actual or approximate dates" among the list of documents that must be ready for delivery to the Commission's boarding officer upon the arrival of a vessel at the Canal.

2. Section 119.10 is revised to indicate that proficiency in English of applicants for licenses will be determined by the Supervisory Language Training Instructor of the Office of Personnel Administration rather than the Marine Bureau Committee as had been stated in the proposed revision.

3. In order to be consistent with § 119.16(c), § 119.17(e) is revised to exempt applicants for renewal of license as engineer from the requirement that they be certified as having normal color sense.

4. Section 103.6(d), which establishes the minimum draft requirements for transiting vessels, is amended in accordance with the suggestion of Bethlehem Steel Corporation to permit some exceptions to the requirements. A new paragraph (4) is added to § 103.6(d) to provide that a vessel whose ballast draft does not meet the minimum draft requirements established by the section may obtain permission to transit at the discretion of the Canal authorities on a regular basis or on a one-time basis. Such permission to transit may be granted after the operator of the vessel has submitted certain information, specified in the regulation, that relates to the vessel's suitability for transit. When a single transit is authorized, the Canal authorities may impose any special conditions that may be required for reasons of safety or continuance of regular Canal operations. Consequently, the words "having a draft of less than the minimum authorized draft provided in paragraph (d) of this section or one * * *" are deleted from the proposed revision of § 103.6(h), to delete the proposed provision which would have allowed vessels whose ballast draft do not meet the minimum requirements to transit only on a one-time basis.

B. Certain other recommendations have been carefully considered but have not been accepted. The following suggestions were not adopted for the reasons assigned:

1. It has been recommended that § 101.13, which authorizes the Marine Director to deny entry to a vessel for failure to comply with Panama Canal regulations, be revised to delimit that authorization for fear that it could be used at some future time to justify the exclusion of vessels under certain flags from the Canal for political or other reasons. This concern is not deemed valid inasmuch as the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal signed by the United States and the Republic of Panama on September 7, 1977 provides that the waterway shall remain permanently neutral and open to peaceful transit by the vessels of all nations on terms of entire equality and precludes any discrimination against any nation or its citizens or subjects in the application of rules and regulations governing navigation through the Panama Canal.

2. The authority extended to the Chief, Navigation Division or his designee by § 109.6 for determining if vessels arriving for transit are properly equipped and for approving new construction requirements for vessels utilizing the Panama Canal is deemed necessary for reasons of safety in view of the peculiar characteristics of this waterway. Therefore, while the requirements of the International Convention for Safety of Life at Sea or other international agreements currently in force are taken into account in determining whether a vessel is acceptable for transit of the Canal, the Commission reserves the right to impose a more rigid standard if that is necessary for safety reasons.

3. The recommendation that § 113.1 be amended to state specifically that vessels meeting the hazardous cargo requirements of the Intergovernmental Maritime Consultative Organization (IMCO) shall be considered as meeting the Panama Canal requirements, is rejected. Although no specific mention of IMCO is made in § 113.1(a), it provides that definitions and classification of dangerous cargoes established by international regulatory authorities, which would include IMCO, are acceptable to the Canal authorities. Furthermore, § 113.22 provides that a vessel that is in compliance with the regulations of the United States or of other national or international regulatory authorities meeting IMCO standards, provided the vessel is acceptable for entering waters over which the U.S. Coast Guard has jurisdiction, will be acceptable for

transit of the Panama Canal. In view of the foregoing provisions, we think it is unnecessary to mention IMCO specifically in § 113.1.

4. A recommendation that the regulations provide for the suspension and revocation of licenses of marine personnel is rejected. We note that, under existing regulations (§ 119.4(e)), the revocation and suspension of license provisions are not applicable to marine personnel employed by the Commission. Inasmuch as, under the revised regulations, marine licenses will be issued only to Commission personnel, and employees of other U.S. Government agencies operating in the Canal, the deletion of the licensing revocation and suspension provisions, does not represent a change in the policy of the agency.

5. It was mistakenly suggested that the revised regulations deleted the vision and color sight test requirement for original license issuance. Such a requirement, however, is included in § 119.12(a).

6. It was erroneously suggested that the revised regulations deleted the requirement for examination of candidates for pilot's license. While the list of subjects to be tested upon examination provided by § 119.142 is being deleted, the requirement that candidates pass written and practical examinations is contained in the revised §119.14.

7. It has been recommended that the definition of an "integrated tug-barge combination" provided in § 103.6(a)(5) be revised to agree with 33 CFR 157.03(ee) and with the "Navigation and Vessel Inspection Circular No. 2–81." This recommendation is rejected on the grounds that the definition provided in § 103.6(a)(5), although somewhat simplistic and not containing the concept of a rigid mechanical connection, is certainly adequate and probably less susceptible of misinterpretation.

8. It has been suggested that, in order to be consistent throughout the regulations in the use of the word "length", the table of minimum drafts provided in § 103.6(d)(1) be revised to state "maximum length" as is stated in § 103.6(e). This recommendation is rejected as unnecessary.

9. It has been recommended that the regulations use metric measurements throughout. The change is not warranted at this time and the recommendation is rejected. It will, however, be given further consideration in future revisions of 35 CFR.

Accordingly, Subchapter C of Chapter I of title 35, Code of Federal Regulations is revised as set forth below.

OMB Clearance: In accordance with the Paperwork Reduction Act of 1980, (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this final rule have been approved by the Office of Management and Budget (OMB). The control number is 3207–0001.

D. P. McAuliffe,
Administrator.

1. Part 101 heading is revised as follows:

PART 101—ARRIVING AND DEPARTING VESSELS: VARIOUS COMMUNICATION, DOCUMENTATION, SANITATION AND ADMEASUREMENT REQUIREMENTS

2. Part 101 Table of contents is revised as follows:

Sec.
101.1 Signal stations at the Canal entrances.
101.2 Boarding of arriving vessels.
101.3 Definition and functions of the boarding officer.
101.4 Measurement of vessel making maiden transit.
101.8 Merchant vessel and small craft anchorages.
101.9 Papers required by boarding officer.
101.10 Same; list.
101.13 Entry and departure of vessels.
101.14 Panama Canal waters; definition.

3. Authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

4. Section 101.1 is revised as follows:

§ 101.1 Signal stations at the Canal entrances.

The Panama Canal Commission maintains established signal stations at both the Atlantic and Pacific entrances of the Canal. A vessel arriving at the Canal must communicate with the signal station which is located at the entrance of the Canal at which that vessel arrives. Vessels required to be equipped with a radiotelephone pursuant to Part 123 of this subchapter must, upon arrival, communicate with the appropriate signal station on Channel 12, 156.000 MHz. All other vessels may use International Code and flashing light. Such stations are also utilized to assist in control of traffic within Panama Canal waters.

5. The cross reference which follows § 101.1 is revised as follows:

Cross Reference: See Part 123 for provisions respecting radio communication by vessels prior to arrival and while they are in Panama Canal waters.

6. Section 101.2 is revised as follows:

§ 101.2 Boarding of arriving vessels.

(a) Unless otherwise directed, all arriving vessels will anchor in designated anchorages to await boarding officers. No person other than boarding officers of the Panama Canal Commission and the Republic of Panama may go on board or leave any vessel until such vessel has been entered by the Commission and, where applicable, by the Republic of Panama.

(b) Arriving vessels that are subject to inspection for compliance with Panama Canal shipping and navigation regulations will be boarded upon arrival. The boarding will occur inside the breakwater at the Atlantic entrance of the Canal or off the seaward end of the dredged, marked channel at the Pacific entrance. It will be performed by a Commission boarding officer in accordance with the procedures established under this Part. When such vessels are not boarded immediately upon arrival, they shall anchor in a designated anchorage area and await the boarding officer.

(c) Admeasurement functions shall be performed on arriving vessels either while at anchor or during transit.

7. Section 101.3 is revised as follows:

§ 101.3 Definitions and functions of the boarding officer.

(a) Boarding officer means any official or employee of the Panama Canal Commission who is duly assigned the functions of a boarding officer, including admeasurement and sanitation.

(b) The Commission boarding officer shall perform the functions of admeasurer for the purpose of determining Panama Canal tolls and shall make inspection for the purpose of insuring compliance with Panama Canal shipping, navigation and sanitation regulations.

§ 101.5 [Removed]

8. Section 101.5 is removed.

§ 101.6 [Removed]

9. Section 101.6 is removed.

§ 101.7 [Removed]

10. Section 101.7 is removed.

11. Section 101.8(e) is revised as follows:

§ 101.8 Merchant vessel and small craft anchorages.

* * * * *

(e) If there are any discrepancies between the designated anchorage areas as described in this section and the anchorage areas as described in paragraph 4 of Annex A of the Agreement in Implementation of Article

III of the Panama Canal Treaty of 1977 and the attachments thereto, the description in the treaty documents shall govern.

12. Section 101.9 is revised as follows:

§ 101.9 Papers required by boarding officer.

On arrival, there shall be ready for immediate inspection or delivery, as the case may be, to the boarding officer the required number of copies of papers concerning tonnage of vessel, cargo, and such other matters upon which information is necessary, as are prescribed by § 101.10. The required manifests, lists and statements shall be sworn to by the Master or agent of the vessel. Vessels will not be permitted to transit until properly cleared by the boarding officer. Failure to present the required papers to boarding officers could result in loss of the vessel's relative position in the movement schedule and delay in granting the necessary permission to depart.

13. Section 101.10 is revised as follows:

§ 101.10 Same; list.

(a) *Documents for Commission boarding officer.* All documents listed below shall be ready for immediate delivery to the boarding officer when he boards the vessel upon each arrival of the vessel at the Canal.

Documents required and number of sets

(1) Ship's information (Panama Canal Form 4398)—1

(2) Clearance from last port—1 [1]

(3) All certificates of a sanitary nature—1 [1]

(4) Stores list—1

(5) Cargo declaration (Panama Canal Form 4363)—1 [2]

(6) Panama Canal tonnage certificate—1

(7) National Register—1 [1]

(8) General arrangement and engine room plans—1 [3]

(9) Declaration of all arms and munitions of war aboard other than explosives declared separately—2 [3, 4]

(10) Crew list (Panama Canal Form 1509)—2

(11) Passenger lists, transiting and landing (Panama Canal Forms 18 and 20)—2

(b) *Crew list.* For purposes of additional identification of crew members, all copies of the crew list required by this section shall include for each seaman the serial number of his certificate of identification, continuous discharge book, passport or other satisfactory identifying documentation. In addition, the given name and middle initial, as well as the family name, shall be shown for all seamen.

(c) *Passenger list.* All copies of the passenger list required by this section shall be accurate and legible and shall be delivered to the boarding officer. The list shall show passengers in alphabetical order.

(Control number 3207–0001)

§ 101.11 [Removed]

14. Section 101.11 is removed.

15. Section 101.13 is revised as follows:

§ 101.13 Entry and departure of vessels.

(a) An arriving vessel shall be entered at either the Pacific or Atlantic entrance. A vessel is entered by the Canal Commission authorities upon the report of the boarding officer and it is not necessary for the Master to come ashore for that purpose. At the discretion of the Marine Director, a vessel may be denied entry for failure to comply with Panama Canal regulations. In certain cases vessels may be provisionally entered. When provisional entry is granted, vessels may remain in Canal waters only under the conditions set forth in the provisional entry. Permission to enter port waters will be given by the Republic of Panama.

(b) Any vessel that has entered or has provisionally entered the Canal shall, prior to its departure therefrom, obtain permission from the Chief, Navigation Division or his designee. Permission to depart shall be issued only after the Chief, Navigation Division has satisfied himself that:

(1) All documents and statistical data required for entry or provisional entry by the Canal authorities respecting the vessel and its cargo have been furnished; and

(2) Tolls and other charges for services or supplies furnished by the Panama Canal Commission have been paid or the payment secured.

16. Section 101.14 is added as follows:

§ 101.14 Panama Canal waters; definition.

As used in this Subchapter, the term "Panama Canal waters" or "Canal waters" refers to all waters lying within the Canal operating area described in Annex A of the Agreement in Implementation of Article III of the Panama Canal Treaty of 1977 between the United States of America and the Republic of Panama and depicted in attachments thereto.

Part 103 is amended as follows:

PART 103—GENERAL PROVISIONS GOVERNING VESSELS

17. Part 103 Table of Contents is revised as follows:

Sec.

103.1 Regulations to be kept aboard.
103.2 Denial of passage to dangerous vessel.
103.3 Discovery of defect in vessel during transit or while underway.
103.4 Load and trim.
103.5 Deck load.
103.6 Size and draft limitations of vessels.
103.7 Temporary holding of vessels.
103.8 Order of transiting of vessels.
103.9 Passenger steamers given preference in transiting.
103.10 Vessels required to be equipped with certain indicators.
103.11 Vessels without mechanical signal system to engine room subject to delay in transiting.
103.12 Discharge of firearms.
103.13 Firing of salutes.
103.14 Colors and house flags.
103.15 Boarding vessels at anchor or underway.
103.16 Meals to be furnished by vessel in certain cases.
103.17 Boat for handling lines.
103.18 Pilot ladders, hoists and side ports.
103.19 Requirements for pilot platforms.
103.20 Disabling of engines.
103.21 Precautions against emission of sparks, smoke or noxious gases.
103.25 Fishing or placing of nets or other obstructions prohibited.
103.26 Obstructions not to be placed across channels or anchorages.
103.27 Clear view forward from the bridge and steering light requirement for certain vessels.
103.28 Towing of certain vessels required.
103.29 Anchoring in Panama Canal waters.
103.30 Requirements for all dead tows.
103.32 Engine orders to be recorded.
103.33 Navigation in Gaillard Cut.
103.34 Same; Control by Chief, Navigation division.
103.39 Arrow signals; locks.
103.40 Transit schedules; pennants.
103.41 Ships to display schedule number.
103.42 Maneuvering characteristics; data required.

18. Authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, FR 36043.

19. Section 103.3 is revised as follows:

§ 103.3 Discovery of defect in vessel during transit or while underway.

Upon the discovery during transit of the Canal, or at any time while underway, of any defect in a vessel of such serious nature that it might interfere with further passage or with

---

[1] For examination and possible retention.

[2] Not required of vessels of war or auxiliary vessels as those terms are defined in the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal (September 7, 1977).

[3] Not required unless ship transits Canal.

[4] Not required unless such cargo is carried.

her safe navigation, the vessel shall stop and, if practicable, be anchored or moored at the first available place. A full report shall be made immediately to the Chief, Navigation Division or his designee by radio or by the best means available.

20. Section 103.4(b) and (c) are revised as follows:

§ 103.4 Load and Trim.

* * * * *

(b) A vessel having a list of between 3 degrees and 10 degrees, or which is so loaded or so trimmed as to adversely affect her manuverability, may be permitted to transit at the discretion of the Chief, Navigation Division or his designee. If such vessel is allowed to transit, however, it may do so only at its own risk and, to the extent and in the proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel on behalf of said vessel, her owners, operators, or any other persons having any interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage, or liability incurred by the Commission, or the United States under or in respect to:

(1) Sections 1411 through 1416, inclusive, of Pub. L. 96–70, 93 Stat. 485–487.

(2) Property of the Panama Canal Commission or the United States; and

(3) Panama Canal Commission employees under the Federal Employees' Compensation Act, 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for any damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her owners, or any other person having an interest in her from liability incurred as a result of the vessel's failure to meet the requirements of this section.

(c) Nothing shall be done, or permitted to be done, by the Master or any member of the crew, which would alter the trim or draft of a vessel while it is transiting the Canal, without the prior, express approval of the pilot.

21. Section 103.5 is revised as follows:

§103.5 Deck load.

(a) A vessel carrying a deck load shall have it so stowed as to be sufficiently clear to provide safe working space around all chocks, bitts, and other gear used in transiting and so arranged as to not obstruct any direct lead from chocks to bitts.

(b) Vessels may transit with deck cargo protruding over one side not to exceed 15.0 feet if the maximum beam, including protrusions, does not exceed 85.0 feet. Pursuant to section 1411 of Pub. L. 96–70, 93 Stat. 485, however, the Commission may not consider any claim for damages on account of any injury to such cargo which might be sustained while the vessel is passing through the locks of the Canal.

22. Section 103.6 is revised as follows:

§ 103.6 Size and draft limitations of vessels.

(a) *Definitions as used in this section:*

(1) "TFW" means Tropical Fresh Water of Gatun Lake, density .9954 gms/cc at 85°F. (Transition to fresh water frequently alters the trim of large vessels 3" to 4" by the head.)

(2) "Published TFW maximum draft" means the deepest point of immersion in Gatun Lake waters as promulgated by the Marine Director, taking into account the water level of Gatun Lake and other limitations deemed necessary because of restrictions in the Canal.

(3) "Maximum authorized transit draft" means the deepest point of immersion in TFW of a particular vessel authorized at anytime, Gatun Lake level and Canal restrictions permitting.

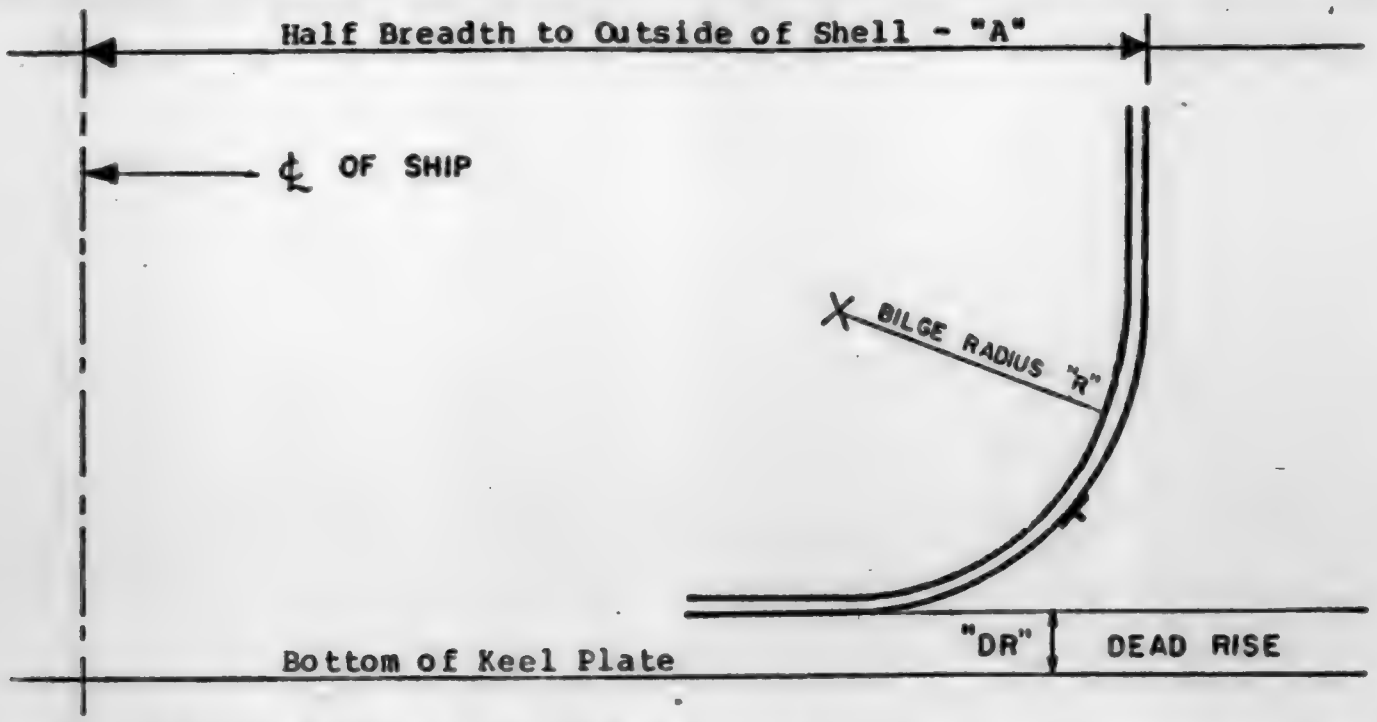
(4) "Commercial vessel" means a self-propelled vessel, other than a naval, military or other public vessel.

(5) "Integrated tug-barge combination" means a barge that is specifically configured to receive a tugboat and with the tug, becomes, in effect, a single self-propelled unit.

(6) "Non-self-propelled vessel" means a vessel which either does not have an installed means of propulsion, or has an installed means of propulsion which is not functioning during transit.

(7) "Barge" means a flat-bottomed vessel of full body and heavy construction without installed means of propulsion.

(b) Maximum authorized transit draft of vessels with draft in excess of 35 feet, six inches.



(1) Prior to the initial transit of a vessel whose transit draft will exceed 35 feet, six inches, owners, operators, or agents must supply in full the information required in subparagraph (b)(2) of this section and request the maximum authorized transit draft for the vessel (deepest point of immersion TFW) from the Chief, Navigation Division or his designee, no later than two weeks prior to loading of the vessel. This request will be returned with the approved maximum authorized transit draft stamped thereon.

(2) The information required by subparagraph (b)(1) of this section shall be submitted in the following format:

Information Needed Prior to Initial Transit Through the Panama Canal

Bilge Information

Name of vessel ———— Date ———
Authorized Tropical Fresh Water Load Line ———
Admeasurer ———— Certified as Correct ———
[Master-Owners—Agents]
(1) "A"—Half breadth of vessel to the outside of shell ————
(2) "R"—Radius of turn of bilge (Feet & Inches) ————
(3) "DR"—Dead rise at side of vessel (Inches) ————

Note.—On an off-center lockage with the vessel touching the lock wall, the turn of the bilge will clear the lock-wall batters at the most critical point as shown in the Table of Limiting Drafts, subparagraph (d)(3) of this section.

(c) *Draft during initial transit.* The initial transit is permitted at the maximum authorized transit draft. After the initial transit, unless the vessel's agent or owner is notified of any restrictions imposed by Canal authorities, this maximum authorized transit draft will remain in effect.

(d) *Minimum transit drafts, measured in salt water.*

(1) All vessels transiting the Canal must have sufficient ballast to permit safe handling during transit. The following are minimum salt water drafts (TSW) for ships anticipating transit:

Length	Minimum drafts
Up to 425'	Trimmed so pilot can see the ranges over the forecastle from center of navigation bridge.
Over 425' but not more than 475.0'.	8' forward, 14' aft, TSW.
Over 475' but not more than [illegible]5.0'.	18' forward, 20' aft, TSW.
Over 525' but not more than 580.0'.	20' forward, 22' aft, TSW.
Over 580' but not more than 625.0'.	22' forward, 24' aft, TSW.
Over 625'	24' forward, 20' aft, TSW.

(2) The vessel's drag must not adversely affect maneuverability.

(3) The following table provides the limiting drafts due to bilge radius:

TABLE OF LIMITING DRAFTS DUE TO BILGE RADIUS CONTACTING CHAMBER BATTERS

[Allows for 6-inch thick rubber fenders on lock walls at [illegible] locations]

	Radius of turn of bilge (feet)				
	1'	2'	3'	4'	5'
0"	36'8"	36'6"	37'4"	38'2"	39'0"
1"	36'9"	36'7"	37'5"	38'3"	39'1"
2"	36'10"	36'8"	37'6"	38'4"	39'2"
3"	35'10"	36'8"	37'6"	38'5"	39'3"
4"	35'11"	36'9"	37'7"	38'5"	39'3"
5"	36'0"	36'10"	37'8"	38'6"	39'4"
6"	36'1"	36'11"	37'9"	38'7"	39'5"
7"	36'2"	37'0"	37'10"	38'8"	39'6"
8"	36'3"	37'1"	37'11"	38'10"	
9"	36'3"	37'1"	38'0"	38'10"	
10"	36'4"	37'2"	38'0"	38'10"	
11"	36'5"	37'3"	38'1"	38'11"	

Example: To find draft of ship having a radius-of-turn-of-bilge of 4'4" read across top of table to column headed 4' thence down column opposite 4 inches—Read 38'5".

Note: *Dead Rise* not included in above tabulations and must be added to above readings.

(4) A vessel whose ballast draft does not meet the minimum draft requirements established by this section may be accepted for transit on a regular basis, provided the vessel operator requests permission and submits the following information to the Marine Bureau of the Panama Canal Commission: (i) principal dimensions of the vessel; (ii) deepest attainable minimum draft (fore and aft); (iii) limitations on visibility fore and aft from the navigation bridge; (iv) necessary excerpts from the vessel's plans, drawings and maneuvering data that relate to the vessel's suitability for transit.

(5) The vessel will be inspected by the Canal authorities upon its first visit after such a request is made. If the vessel is acceptable for transit at less than the prescribed minimum draft, the operator will be notified that transit on a regular basis is authorized provided the vessel meets the special minimum draft that is specified in the notice.

(6) If the vessel is found not to be acceptable for transit on a regular basis, a single transit may be authorized, at the discretion of the Canal authorities, subject to the imposition of any special conditions that may be required for reasons of safety or continuance of regular Canal operations.

(e) *Maximum length.*

(1) The maximum length overall, including bulbous bow, for a commercial vessel acceptable for regular transit is 900.0 feet, except passenger and container ships which may be 950.0 feet in overall length.

(2) The maximum length for integrated tug-barge combination acceptable for regular transit is 900.0 feet overall, including the tug. A tug-barge combination must transit together as one unit, with the tug supplying the propelling power.

(3) The maximum aggregate overall length for non-self-propelled vessels acceptable for transit is 850.0 feet, including accompanying tugs. Accompanying tugs must lock through with the non-self-propelled vessel.

(f) *Maximum beam.*

(1) The maximum extreme beam for a commercial vessel and the integrated tug-barge combination acceptable for regular transit is 106.0 feet.

(2) In the discretion of the Chief, Navigation Division or his designee, commercial vessels, including integrated tug-barge combinations, having an extreme beam of between 106.0 and 107.0 feet may be permitted to transit on a one-time basis only if the deepest point of immersion does not exceed 37.0 feet TFW.

(3) The maximum extreme beam for non-self-propelled vessels (other than integrated tug-barge combinations) acceptable for transit is 100.0 feet.

(g) *Previous approvals and one-time transits.* Vessels approved for regular transit prior to December 20, 1976 whose maximum length or beam slightly exceed the limits set forth in paragraphs (e) and (f) may continue to transit on a regular basis. After that date, approval will not be given for transit of other commercial vessels whose extreme beam exceeds 106.0 feet by any amount, except for vessels transiting on a one-time delivery basis.

(h) *Release from liability.* If a vessel having a beam in excess of 106.0 feet is permitted to transit on a one-time basis, such vessel may do so only at its own risk and, to the extent and in proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel, on behalf of said vessel, her owners, operators, or any other person having an interest in her, and for himself, will be considerd to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage or liability incurred by the Panama Canal Commission or the United States under, or in respect to:

(1) Sections 1411 through 1416, inclusive, of Pub. L. 96–70, 93 Stat. 485–87;

(2) Property of the Panama Canal Commission or the United States; and

(3) Panama Canal Commission employees under the Federal Employees' Compensation Act 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for any damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her owners, or any other person having an interest in her from liability incurred as a result of the vessel's failure to meet the requirements of this section.

(i) *Denial of transit.* A vessel shall not be permitted to transit the Canal under the following circumstances:

(1) When the vessel's maximum point of immersion exceeds its maximum authorized draft;

(2) when the vessel's maximum point of immersion exceeds the published TWF maximum draft then in effect;

(3) when the length overall, including bulbous bow, exceeds that stated in paragraph (e) of this section, unless the vessel was approved for regular transit prior to March 16, 1961; or

(4) when the extreme beam exceeds that stated in paragraph (f) of this section by any amount, unless the vessel was approved for regular transit prior to March 10, 1961.

(j) *General.*

(1) Vessels of 100.0 feet beam and over whose list, trim or handling characteristics are such as to endanger themselves, Panama Canal appurtenances or a third party, may have such further limitations placed on them as Canal authorities deem necessary to insure reasonable safety.

(2) The draft of non-self-propelled barges of 550.0 feet or more in length may be limited when, in the opinion of Canal authorities, such a limit is necessary to insure reasonable safety.

(3) Non-self-propelled vessels, other than integrated tug-barge combinations, will be accepted only on an individual basis; advance permission for initial transit as a non-self-propelled vessel is required. Displacement of these vessels is limited to 35,000 tons and the draft requirements of paragraph (d) of this section are applicable. Riding crews must be provided in sufficient numbers, as required by the Chief, Navigation Division, to safely handle towboat lines and boarding ladders, and to assist in mooring.

(4) The numerous constraints affecting the transit schedules of vessels and tows make it important that information provided in advance of the initial transit of a vessel include a capacity plan, general arrangement plans, engine room plans, and whenever possible, a photostatic copy of national register, load line certificate and Panama Canal tonnage certificate. This advance information will minimize the time spent aboard the vessel by Panama Canal officials before commencement of the initial transit.

23. Section 103.7 is revised as follows:

§ 103.7 Temporary holding of vessels.

The Canal authorities may hold a vessel for the purpose of investigating a marine accident under Parts 115 or 117 of this chapter. A vessel may also be held until, in the opinion of the Canal authorities, its tenderness, trim, list, cargo, hull, machinery, and equipment have been put into such condition as will make the vessel reasonably safe for her passage through the Canal. No claim for damages shall be allowed or considered because of any such temporary holding of vessels.

24. Section 103.10(e) is revised as follows:

§ 103.10 Vessels required to be equipped with certain indicators.

* * * * *

(e) Any vessel which fails to meet the requirements of this section may be denied transit. If the Canal authorities decide that a vessel can be handled without undue danger to equipment or to personnel, notwithstanding her failure to comply with other requirements of this section, and permit her to transit, such vessel may do so only at its own risk and, to the extent and in the proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel, on behalf of said vessel, her owners, operators or any other persons having any interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage or liability incurred by Panama Canal Commission or the United States under, or in respect to:

(1) Sections 1411 through 1416, inclusive, of Pub. L. 96–70, 93 Stat. 485–87;

(2) Property of the Panama Canal Commission or the United States; and

(3) Panama Canal Commission employees under the Federal Employees' Compensation Act, 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her owners, or any other person having an interest in her from liability incurred as a result of vessel's failure to meet the requirements of this section.

25. Section 103.12 is revised as follows:

§ 103.12 Discharge of firearms.

No firearms of any kind may be discharged from vessels while in Canal waters, except that authorized salutes by vessels of war will be permitted by prior arrangement with Canal authorities.

26. Section 103.13 is revised as follows:

§ 103.13 Firing of salutes.

Vessels of war may not fire salutes while at a Commission dock, in the locks, or in Gaillard Cut.

27. Section 103.14 is revised as follows:

§ 103.14 Colors and house flags.

During daylight, vessels in Canal waters shall display their colors and house flags.

28. Section 103.15 is revised as follows:

§ 103.15 Boarding vessels at anchor or underway.

Except for members of the Canal boarding party, pilots, Republic of Panama boarding officials, and agents, in the performance of their official duties, and such other persons as may be authorized by Canal authorities, no person, with or without the consent of the Master, may board a vessel at anchor or underway in the Canal waters.

29. Section 103.16 is revised as follows:

§ 103.16 Meals to be furnished by vessel in certain cases.

Vessels shall furnish meals to Panama Canal pilots without charge during the ship's regular meal hours and shall furnish a meal to the pilot between 2200 hours and 0400 hours if the vessel is transiting the Canal during such hours. In addition, vessels shall provide meals without charge during the ship's regular meal hours to any other Panama Canal Commission personnel, other than linehandlers, whose assignment will require them to be aboard the vessel for four or more hours. If a vessel is unable to furnish such meals, they may be furnished by the Panama Canal Commission at the expense of the vessel.

30. Section 103.18 is revised as follows:

§ 103.18 Pilot ladders, hoists and side ports.

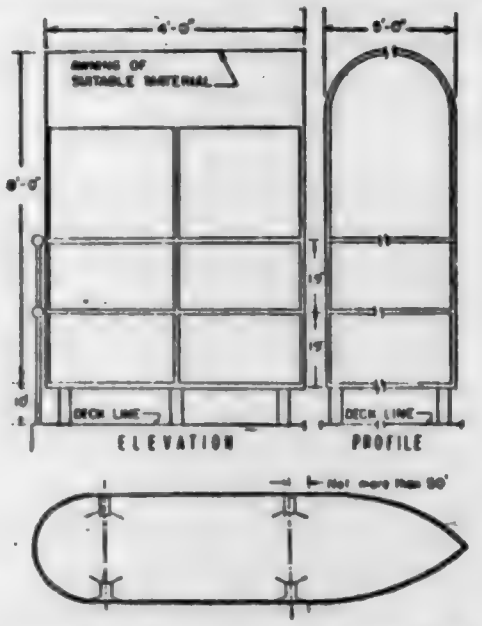
(a) A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal waters.

(b) The pilot ladder shall be constructed and rigged in accordance with Regulation 17, Chapter V, International Convention for Safety of Life at Sea, 1974, TIAS 9700, except that:

(c) When the distance from the water line to the point of access of the vessel exceeds nine meters or 30 feet, a combination pilot ladder and short brow accommodation ladder must be provided for boarding purposes.

(d) A mechanical pilot hoist may be used for boarding officials and pilots only at their discretion, and provided that the design and construction of the hoist and ancillary equipment are in accordance with Regulation 17, Chapter V, International Convention for Safety of Life at Sea, 1974.

(e) When a mechanical pilot hoist is used, a ring buoy fitted with a lifeline and self-igniting light shall be available and ready for immediate use. The pilot ladder required by § 103.18(a) shall be in close proximity to the pilot hoist, ready for immediate use but lashed up so as not to interfere with the pilot hoist.



(f) When the side ports are used for boarding, the minimum vertical distance between the waterline and the bottom of the side port at any draft shall be six feet.

31. Section 103.19 is revised as follows:

§ 103.19 Requirements for pilot platforms.

(a) Any vessel that, in accordance with Panama Canal operation standards, is required to have four pilots aboard, shall provide suitable pilot platforms for the assisting pilots. The purpose for the pilot platforms is to provide shelters from sun and rain for pilots working near the bow or the stern of a vessel and to provide adequate visibility around the Locks in order to reduce the danger of damage.

(b) The following is a sketch of a simplified pilot platform which is acceptable to the Panama Canal Commission:

(c) Each platform is to be erected over the furthest forward point of the extreme beam at the waterline and not more than six inches from the vertical plane of shell plating. For vessels of unorthodox design requiring aft platforms, they shall be erected at a position which is approximately over the aftermost point of extreme beam at the waterline and not more than six inches inboard from the vertical plane of shell plating.

(d) The awning indicated in the sketch in paragraph (b) of this section is to be made of suitable material to provide shelter from sun and rain. The deck of the pilot's platform is to be made of wood or other material with non-skid surface.

32. Section 103.20 is revised as follows:

§ 103.20 Disabling of engines.

Except when specifically authorized by the Canal authorities, no vessel at any dock or mooring within Canal waters shall have its engines disabled or otherwise rendered inoperative.

33. Section 103.21 is revised as follows:

§ 103.21 Precautions against emission of sparks, smoke or noxious gases.

Vessels in Canal waters shall take all necessary precautions to avoid the issuance of sparks, excessive smoke, or noxious gases.

§ 103.22 [Removed]

34. Section 103.22 is removed.

§ 103.23 [Removed]

35. Section 103.23 is removed.

§ 103.24 [Removed]

36. Section 103.24 is removed.

37. Section 103.25 is revised as follows:

§ 103.25 Fishing or placing of nets or other obstructions prohibited.

No fishing nets or other obstructions shall be placed in any of the navigable waters of the Panama Canal. Fishing boats shall not anchor for the purpose of fishing nor haul nets or trawls in the anchorages or navigable channels of the Canal. Fishing from small craft in the anchorages or navigable channels of the Canal is prohibited.

38. Section 103.26 is revised as follows:

§ 103.26 Obstructions not to be placed across channels or anchorages.

No line, pipe, or other obstruction shall be passed across any channel or anchorage so as to obstruct the passage of vessels.

39. Section 103.27 (a), (b), (c) and (e) are revised as follows:

§ 103.27 Clear view forward from the bridge and steering light requirement for certain vessels.

(a) A vessel may not be navigated in Canal waters unless there is a clear, unobstructed view from the bridge.

(b) Vessels having a distance from the bridge to the stern of 250 feet or more shall have installed, at or near the stem, a steering range equipped with a fixed blue light which shall be clearly visible from the bridge along the centerline. If said range and light so placed would be partially or completely obstructed, then two such ranges and lights must be installed at an equal distance from the centerline and shall be clearly visible from the bridge along lines parallel to the keel.

(c) Naval or military vessels exempted from the requirements of Part 111 of this chapter shall also be exempt from the requirements of paragraphs (b), (d), and (e) of this section.

* * * * *

(e) The use of this steering light shall be at the discretion of the Panama Canal pilot who has control of the navigation and movement of the vessel.

40. Section 103.28 is revised as follows:

§ 103.28 Towing of certain vessels required.

A vessel arriving at an entrance to the Canal and having a mean draft in excess of that allowed under the Load Line Regulations for the tropical zone, applicable for the voyage on which the vessel is engaged, as determined by the American Bureau of Shipping, Lloyd's Register or other acceptable certifying agency, is required to take the services of a Panama Canal tug or tugs from the Pacific entrance Channel Buoys 1 and 2 to Gamboa Reach, from the north end of Gatun Locks to Buoy 3 in the Atlantic harbor, and vice versa. However, in the instances where the overdraft is negligable, the assignment of a tug or tugs may be waived at the discretion of the Chief, Navigation Division or his designee. Any vessel without mechanical motive power, or the machinery of which is or becomes disabled, or which steers badly, or which is liable to become unmanageable for any reason, shall be towed through the Canal. The Canal authorities may require any vessel to take a tug or tugs through Gaillard Cut, in the approaches to the locks, or in any other part of the Canal, when in their judgment such action is necessary to insure reasonable safety to the vessel or to the Canal and its appurtenances. The tug service in any of these cases shall be chargeable to the vessel. The Master of a vessel which steers badly, or which is liable to become unmanageable for any reason, shall report such fact and request the services of a tug.

41. Section 103.29 is revised as follows:

§ 103.29 Anchoring in Panama Canal waters.

No vessel shall anchor within the navigable waters of the Canal in other than a designated anchorage, except in an emergency, and no craft shall tie up to any aid-to-navigation in Canal waters.

42. Section 103.30 is revised as follows:

§ 103.30 Requirements for all dead tows.

(a) *Preparation for Transit.*

(1) Upon arrival, the tug will break up the tow and secure the bridle so that no part of it extends below the surface of the water.

(2) Tows shall have the capability of anchoring.

(3) Tows will be inspected before being scheduled for transit.

(4) Agents, operators and owners will be responsible for making any required alterations or additions to equipment or stowage.

(5) Boarding facilities will comply with Regulation 17, Chapter V, International Convention for Safety of Life at Sea, 1974, TIAS 9700. There must be a clear passage, free of obstructions, from the boarding facility to all working areas, otherwise, catwalks with handrails and steps must be provided.

(6) The working area near chocks and bitts on all dead tows must be clear of obstructions and fitted with safety rails or lines at the vessel's sides.

(b) *Transit requirements.*

(1) Tows must provide a pilot shelter with a clear view forward, on the center line, approximately midway between the bow and stern. This shelter may be permanent or portable, but must protect the pilot from the elements. All tows with a beam in excess of 79.9 feet shall provide, in addition to the center line shelter, pilot shelters at the extreme beams from which the pilots may readily view the vessel's sides.

(2) Dead tows must be equipped with the chocks and bitts as set forth in § 109.6 of this chapter.

(3) Tows must provide mooring and heaving lines and have mooring arrangements, and bitts or cleats for securing tugs that do not interfere with those chocks and bitts required for locomotive wires.

(4) All barges will be fitted so that a pusher tug can be secured with its stem held firmly to the center line of the barge. Pushing tugs are to be equipped with wire cable snubbers and springs.

(5) All barges will be required to have portable toilets on board prior to departure for transit.

43. Section 103.32 (a) and (c) are revised as follows:

§ 103.32 Engine orders to be recorded.

(a) Except as provided in paragraph (b) of this section, every power-driven vessel over 250 feet in length, while navigating in Panama Canal waters under the control of a Panama Canal pilot, shall maintain a bridge bell book and an engine room bell book. The bridge bell book shall consist of a contemporaneous record of each engine order and the time it is transmitted from the bridge to the engine room. The engine room bell book shall consist of a contemporaneous record of each engine order and the time it is received in the engine room.

* * * * *

(c) The bell books and automatic recording referred to in paragraphs (a) and (b) of this section, the record of an automatic course recording device, if one is available, and any log books must be surrendered, upon request, to the pilot or to the Board of Local Inspectors or other Canal authorities for the purpose of inspection and reproduction.

44. Section 103.34 is revised as follows:

§ 103.34 Same; control by Chief, Navigation Division.

The movement of vessels in Gaillard Cut shall be regulated by the Chief, Navigation Division, through Marine Traffic Control, or by such other persons and through such other stations or facilities as the Canal authorities may designate.

45. Section 103.35 is removed.

§ 103.35 [Removed]

46. Section 103.36 is removed.

§ 103.36 [Removed]

47. Section 103.37 is removed as follows:

§ 103.37 [Removed]

48. Section 103.38 is removed as follows:

§ 103.38 [Removed]

49. Section 103.41 is revised as follows:

§ 103.41 Ships to display schedule number.

Each ship shall display throughout her transit, the flag or flags designating the schedule number on which it is running.

50. Section 103.41a is redesignated as § 103.42 as follows:

§ 103.41a [Redesignated as § 103.42]

PART 105—PILOTAGE

Part 105 is amended as follows:

51. Part 105 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

52. Section 105.1 is revised as follows:

§ 105.1 Pilots required.

(a) Except as provided by §§ 105.2 and 105.3, or by paragraph (c) of this section, no vessel shall pass through, enter or leave the Canal, or maneuver in the Canal or waters adjacent thereto, including the ports of Cristobal and Balboa, without having a Panama Canal pilot on board.

(b) Normally a vessel will, unless advised to the contrary by the Chief, Navigation Division or his designee, be boarded by the Panama Canal pilot inside the breakwater at a point north of the Mole Beacon at the Atlantic entrance and in the Merchant Vessel Anchorage to seaward of Buoys 1 and 2 at the Pacific entrance.

(c) In conformity with past practice, vessels anchored in Anchorage Area C and Anchorage Area F, as shown in the Pilot Handbook, Limon Bay Chart, may proceed to sea without a Panama Canal Pilot on board. All such vessels, prior to getting underway, must obtain permission to depart from the Cristobal Signal Station.

(d) Whenever the Administrator finds there is a critical shortage of certified Panama Canal pilots available for movement of vessels in Canal waters, he may suspend the rule on compulsory pilotage set out in paragraph (a) of this section. The Administrator shall impose such conditions upon the suspension of the rule, with respect to any given vessel, as are reasonable and appropriate to protect human life and property and to safeguard the facilities of the Panama Canal.

53. Section 105.2 is revised as follows:

§ 105.2 Exemptions from compulsory pilotage.

The following vessels are exempt from compulsory pilotage, except when the Chief, Navigation Division or his designee considers a pilot necessary; nevertheless a pilot will be furnished any such exempted vessel if requested by the commanding officer or Master thereof:

(a) Local craft such as United States Army and United States Navy minesweepers, landing craft, patrol boats and tugs, and Panama Canal Commission tugs and equipment, except as limited by paragraph (c) of this section.

(b) Any vessel that makes frequent calls to Canal waters and whose current officers and crew are, in the opinion of the Chief, Navigation Division or his designee, capable, by reason of such frequent calls and otherwise, of safely navigating within Canal waters and are so certified, except as limited by paragraph (c) of this section.

(c) Vessels and craft enumerated in paragraphs (a) and (b) of this section may be permitted to transit the Canal without a pilot when, in the opinion of the Chief, Navigation Division or his designee, the current officers and crew have the necessary experience and ability to make safe transit and such transit is specifically approved. Whenever any such vessel or craft makes transit without a pilot, the Chief, Navigation Division or his designee shall dispatch it with a larger vessel carrying a pilot and it shall lock through with that vessel. The Chief, Navigation Division or his designee shall control the movements of such vessel or craft through Gaillard Cut so as to minimize the danger of its being a navigational hazard to larger vessels.

(d) Any other vessel or craft as and to the extent exempted by the Marine Director.

54. Section 105.3 is revised as follows:

§ 105.3 Vessels in distress.

A vessel in danger or distress is not prohibited from entering the waters of the Canal any time, but such vessel shall, when practicable, give due notice in advance, by radio or otherwise, and obtain a pilot, if possible. Such vessel shall, except in an emergency, anchor in the designated anchorage area.

55. Section 105.4 is revised as follows:

§ 105.4 Pilotage charges.

Pilotage for vessels in transit through the canal is free, but whenever any vessel requires a pilot for other than transit, it is liable for the applicable pilotage charge.

PART 107—MANNING OF VESSELS; REQUIREMENTS CONCERNING OFFICERS AND CREW

Part 107 is amended as follows:

56. Part 107 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

57. Section 107.1 is revised as follows:

§ 107.1 Vessels to be fully manned.

A vessel navigating the waters of the Canal shall be sufficiently manned in officers and crew to permit safe handling of the vessel. The Canal authorities may deny transit of the Canal to any vessel which, in their opinion, is insufficiently manned as to officers and crew.

58. Section 107.2 is revised as follows:

§ 107.2 Crew on watch.

(a) When underway in Canal waters, a vessel shall keep a full watch on deck and in the engine room. When approaching a lock, moored temporarily to a lock wall or when in a lock chamber, a vessel shall, when so requested by the pilot, have sufficient seamen forward and aft to handle lines expeditiously.

(b) Except as provided in subsection (c), when anchored, moored, or lying at a Panama Canal Commission pier a vessel shall at all times have on board at least one qualified deck officer, one qualified engineer officer familiar with the machinery and layout of the vessel, and sufficient crew to provide for the safety of the vessel.

(c) The manning levels of Commission vessels shall be determined by the Marine Director of his designee.

59. Section 107.3 (b) is revised and (c) is added as follows:

§ 107.3 When Master and officers must be on bridge or at other regular stations.

* * * * *

(b) At all other times when a vessel is moving in Canal waters, the Master of the vessel, or his qualified representative, shall be present on the bridge and shall keep the pilot informed concerning the individual peculiarities in the handling of the vessel so that the pilot may be better able to control the navigation and movement of the vessel. All other officers shall be at their regular stations throughout the maneuvers described herein.

(c) The Master, or his qualified representative, shall ensure at all times

that the pilot's orders are promptly and properly carried out by the vessel's personnel.

* * * * *

PART 109—ENTERING AND PREPARING TO ENTER THE LOCKS

Part 109 is amended as follows:

60. Part 109 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

61. Section 109·3 is revised as follows:

§109.3 Same; permits.

Permits for embarking or disembarking at the locks may be issued in the discretion of the Chief, Navigation Division or his designee.

62. Section 109.6 is revised as follows:

§ 109.6 Construction, number, and location of chocks and bitts.

(a) The Chief, Navigation Division or his designee is responsible for determining if vessels arriving for transit are properly equipped. The Navigation Division is also responsible for the approval of new construction requirements concerning chocks and bitts which are utilized for locomotives and tugs, relay operations, tie-up operations, boarding facilities, and wheelhouse design features, including visability factors.

(b) All chocks for towing wires shall be of heavy closed construction and shall have a convex bearing surface with a radius of not less than seven inches (178 milimeters). The convex surface shall extend so that a wire from the bitt, or from the towing locomotive through the chock, shall be tangent to the seven-inch (178 milimeter) radius at any angle up to 90 degrees with respect to a straight line through the chock.

(c) No part of the vessel which may be contacted by the towing wires, at any angle, shall have less than a seven-inch radius.

(d) Chocks designated as single chocks shall have a throat opening of not less than 100 square inches (645 square centimeters) in area—preferred dimensions are 12 x 9 inches (305 x 229 milimeters)—and shall be capable of withstanding a strain of 100,000 pounds (43,331 kilograms) on a towing wire from any direction.

(e) Chocks designated as double chocks shall have a throat opening of not less than 140 square inches (903 square centimeters) in area—preferred dimensions are 14 x 10 inches (356 x 254 milimeters)—and shall be capable of withstanding a strain of 140,000 pounds (64,000 kilograms) on the towing wires from any direction.

(f) Use of roller chocks is permissible provided they are not less than 14.94 meters (49 feet) above the waterline at the vessel's maximum Panama Canal draft and provided they are in good condition, meet all of the requirements for solid chocks as specified in paragraphs (a), (b), (c), and (d) of this section, as the case may be, and are so fitted that transition from the rollers to the chock body will prevent damage to towing wires.

(g) Each single chock shall have an accompanying bitt capable of withstanding a strain of 100,000 pounds (45,331 kilograms).

(h) Each double chock located at the stem and at the stern, in accordance with paragraph (h) of this section, shall have two pairs of heavy bitts with each bitt of each pair capable of withstanding a strain of 100,000 pounds (45,331 kilograms). Other double chocks shall have a pair of heavy bitts with each bitt capable of withstanding a strain of 100,000 pounds (45,331 kilograms).

(i) All vessels, except a vessel not requiring locomotives, shall be fitted with a double chock set athwartships right in the stem and another double chock set athwartships right in the stern, except that on vessels of less than 75 feet beam, two single chocks may be substituted for each double chock required by this subsection; on vessels of over 75 feet beam, two double chocks may be substituted for each double chock required by this section. If such substitution is made, the chocks shall be placed port and starboard not more than eight feet abaft the stem or 10 feet forward of the stern, provided that these chocks are not more than 10 feet from the center line of the vessel.

(j) Vessels under 60.06 meters (200 feet) in length and not exceeding 9.14 meters (30 feet) in beam shall have a double chock or two single chocks at the stem and stern. If the vessel is equipped with the two single chocks, they shall be placed, port and starboard, not more than eight feet abaft the stem or 10 feet forward of the stern, and not more than 10 feet off the center line.

(k) Vessels 60.96 to 121.92 meters (200 to 400 feet) in length and not exceeding 22.86 meters (75 feet) in beam shall have a double chock at the stem and at the stern or two single chocks at the bow and stern, port and starboard, not more than eight feet abaft the stem or 10 feet forward of the stern and not more than 10 feet off the center line and shall have two additional single chocks, port and starboard, nine to 16 meters (30 to 50 feet) abaft the stem and nine to 16 meters (30 to 50 feet) forward of the stern.

(l) Vessels 121.92 to 173.74 meters (400 to 570 feet) long and not more than 22.86 meters (75 feet) in beam shall have a double chock at the stem and stern or two single chocks at the bow and stern, port and starboard, and in addition shall have a chock, port and starboard, 12 to 16 meters (40 to 50 feet) abaft the stem, a single chock port and starboard, 24 to 28 meters (80 to 90 feet) abaft the stem, and a single chock, port and starboard, 12 to 16 meters (40 to 50 feet) forward of the stern.

(m) Vessels over 173.74 meters (570 feet) long or 22.86 meters (75 feet) in beam or over shall have a double chock at the stem and stern; a double chock, port and starboard, 24 to 28 meters (80 to 90 feet) abaft the stem; a double chock, port and starboard, 12 to 16 meters (40 to 50 feet) forward of the stern and a single chock, port and starboard, 24 to 28 meters (80 to 90 feet) forward of the stern.

(n) Vessels with large flared bows or unusually high freeboard such as container vessels or vehicle carriers will be required to provide single closed chocks located further aft than those required in paragraph (1) of this section for correct positioning of assisting tugs or may be required to fit recessed tug bollards into the hull so the tugs can work without coming in contact with the bow flare or having extra long lines and/or inefficient leads.

(o) A vessel not requiring locomotives shall have a chock arrangement similar to that described in paragraph (l) of this section, except that the chocks need only be single chocks or, if approved by the Canal authorities, of lesser strength.

(p) Any vessel which fails to meet the requirements of this section may be denied transit. If the Marine Director or his representative decides that such a vessel can be handled without undue danger to equipment or to personnel, notwithstanding her failure to comply with the requirements of this section, and allows it to transit, such vessel may do so only at its own risk and, to the extent and in proportion that such failure to meet the requirements of this section proximately causes or contributes to the casualty and resulting damages, the Master of such vessel, on behalf of said vessel, her owners, operators, or any other persons having any interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage, or liability incurred by the

Commission or the United States under, or in respect to:

(1) Section 1411 through 1416, inclusive, of Pub. L. 96–70, 93 Stat. 485–87;

(2) Property of Panama Canal Commission or the United States; and

(3) Panama Canal Commission employees under the Federal Employees' Compensation Act, 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her owners, or any other person having an interest in her from liability incurred as a result of the vessel's failure to meet the requirements of this section.

PART 111—RULES FOR THE PREVENTION OF COLLISIONS

Part 111 is amended as follows:

63. Subpart E table of contents is revised as follows:

Subpart E—Miscellaneous

Sec.
111.201 Distress Signals.
111.202 Orders to helmsman.
111.203 Diving operations; industrial and commercial; recreational skin diving; light, flag.
111.204 Water skiing prohibited.
111.205 Operation of small craft and recreation vessels on the Canal waters.
111.206 Lookout.

64. Part 111 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

65. Section 111.1 is revised as follows:

§ 111.1 Application of Part.

The provisions of this Part shall be applicable to vessels and seaplanes upon the navigable waters of the—

(a) Canal operating areas, as the same are described in Annex A of the Agreement in Implementation of Article III of the Panama Canal Treaty of 1977, and as they are depicted on Attachment I to that Annex, between a line connecting the East Breakwater Light and the West Breakwater Light at the Atlantic Entrance to the Canal in Limon Bay and a line passing through Channel Buoys 1 and 2 extended to the Canal boundary lines at the Pacific Entrance in Panama Bay; and

(b) Ports of Balboa and Cristobal. Upon all waters of the Canal to seaward, outside these limits, the International Rules apply. Where any naval or military vessel of special construction as certified by the Secretary of the Navy or the Secretary of Transportation in the case of Coast Guard vessels operating under the Transportation Department, or by a corresponding official of a state, other than the United States, shall by virtue of statute, convention or treaty, be exempted from compliance with the International Rules, such vessel shall similarly be exempted from compliance with any corresponding requirement under the provisions of this Part.

66. Section 111.58(d) is revised as follows:

§ 111.58 Lights and shapes; vessel at anchor.

* * * * *

(d) Vessels not more than 65 feet in length when at anchor in any special anchorage designated by the Chief, Navigation Division for such vessels shall not be required to carry or exhibit the white light specified in paragraph (a) of this section, nor the black ball specified by paragraph (c) of this section.

67. Section 111.150 (a) and (e) are revised as follows:

§ 111.150 Overtaking vessels.

(a) Notwithstanding anything contained in this Part, every vessel overtaking another shall keep out of the way of the overtaken vessel except that within the Canal channel all pleasure vessels and craft, even though they are an overtaken vessel, shall keep out of the way of transiting vessels and Panama Canal Commission floating equipment.

* * * * *

(e) Except as specially authorized by the Chief, Navigation Division, an overtaking power-driven vessel shall not overtake and pass another power-driven vessel in Gaillard Cut, Mamei Curve or Bohio Bend between buoys 38 and 40: *Provided, however,* that this paragraph shall not apply where either the overtaking or the overtaken vessel is less than 150 feet in length or is a Panama Canal Commission power-driven vessel or a U.S. Army or U.S. Navy local tug, with or without a tow.

68. Section 111.155 is removed as follows:

§ 111.155 [Removed]

69. Section 111.161 (d) and (e) are revised as follows:

§ 111.161 Speed and maneuvering of vessels in fog, mist, etc.

* * * * *

(d) Except as provided in paragraph (e) of this section, vessels moored or at anchor shall not get underway when, because of atmospheric conditions, visibility is less than 1,000 feet and vessels underway in such conditions shall anchor or moor as soon as practicable and report immediately to the Chief, Navigation Division by radio or other available means.

(e) Vessels specially equipped to navigate under conditions restricting visibility and which have a pilot aboard, and vessels which have a pilot aboard and which are assisted by Panama Canal Commission vessels which are specially equipped to navigate under such conditions, may, at the discretion of the Canal authorities, be navigated when visibility is less than 1,000 feet.

70. Section 111.162 is amended by revising (b), (c), and (d) as follows:

§ 111.162 Maximum speeds.

* * * * *

(b) A vessel in Panama Canal waters at locations other than those specified in paragraph (a) of this section, including Gatun Anchorage, when rounding Bohio and Darien bends, Miraflores Lake, and in or near the locks, shall not exceed a speed that is safe under the existing circumstances and conditions, except in an emergency.

(c) The Chief, Navigation Division may authorize departures from the maximum speeds established by this section in the case of particular vessels whose handling characteristics are such as to indicate that a higher speed or speeds can be prudently allowed.

(d) This section does not apply to motorboats, as defined in § 111.163(b), or to vessels of the Panama Canal Commission.

71. Section 111.163(a) is revised as follows:

§ 111.163 Same; motorboats and Panama Canal Commission vessels.

(a) Motorboats and vessels of the Panama Canal Commission when underway shall proceed at a speed which is reasonable under the existing circumstances and conditions and which does not create a hazard to life or property.

* * * * *

72. Section 111.203 (a) and (b) are revised as follows:

§ 111.203 Diving operations; industrial and commercial; recreational skindiving; light, flag.

(a) When industrial or commercial diving operations are underway in the Canal, or waters adjacent thereto, a revolving red light shall be displayed in all weathers from sunset to sunrise from the diving barge or other craft serving the diver. The light shall be so mounted and of sufficient intensity as to be visible for not less than 1 mile. A flag of the type described in paragraph (b) of this section shall be displayed from such craft from sunrise to sunset. Vessels approaching or passing an area where diving operations are underway shall reduce speed sufficiently to avoid creating a dangerous wash or wake.

(b) Recreational skindiving in waters of the Canal, including Gaillard Cut and the Channel through Gatun and Miraflores Lakes and in the waters of all ship's anchorages is prohibited unless authorized in writing by the Chief, Navigation Division. Authorization shall not be given for skindiving at night. When recreational skindiving activities are underway in the Canal, or waters adjacent thereto, a flag with a hoist or height of not less than 12 inches and a fly or length of not less than 18 inches and having a red background and a 3½ inch diagonal white stripe, running from the upper corner of the staff end of the flag to the lower corner of the outside end of the flag, shall be displayed from the mast of the craft serving the skindiver. Flags larger than the foregoing minimum dimensions shall preserve the same proportions. Vessels approaching an area where such skindiving activities are underway shall reduce speed sufficiently to avoid creating a dangerous wash or wake.

* * * * *

73. Section 111.204 is revised as follows:

§ 111.204 Water skiing prohibited.

No person shall operate a motorboat or other vessel in or across the navigable channels or merchant vessel anchorages while towing a person or persons on water skis, or aquaplane or similar device at any time.

74. Section 111.205 is revised as follows:

§ 111.205 Operations of small craft and recreational vessels on the Canal waters.

(a) For the purpose of this section, a small craft is defined as any vessel which is not required to have the assistance of locomotives when transiting the locks and public vessels not engaged in official business.

(b) A small craft shall not be operated by any person who is intoxicated or who is a habitual user, or under the influence of any narcotic drug or who is under the influence of any other drug to a degree which renders him incapable of safely operating the craft or vessel. The fact that one lawfully is or has been using any drug shall not constitute a defense against a charge of violating this section.

(c) No person shall operate a small craft so close to a transiting or other vessel so as to hamper the safe operation of either vessel; nor shall any person operate a small craft in a negligent manner so as to endanger life or property.

(d) No person shall operate a small craft in the navigation channel of the Canal except when such operation is incidental to movement between points on either side of the navigation channel.

75. Section 111.206 is revised as follows:

§ 111.206 Lookout.

Every vessel shall at all times while underway in Canal and adjacent waters maintain, at or near the bow, a proper lookout by sight and hearing as well as by all available means appropriated in the prevailing circumstances and conditions so as to make a full appraisal of the situation and the risk of collision. The person acting as lookout shall have no other assigned duties and shall report promptly all relevant and material observations to the person in charge of the navigation of his vessel.

76. Section 111.207 is removed as follows:

§ 111.207 [Removed.]

77. Part 113 is revised as follows:

PART 113—DANGEROUS CARGOES

Subpart A—General Provisions

Sec.

113.1 Definition and classification of dangerous cargoes; reporting requirements.
113.2 Anchorage areas for ships loaded with dangerous cargoes.
113.3 Vessels to anchor and await instructions.
113.4 Transit restrictions.
113.5 Places for loading and discharging explosives; restrictions.

Subpart B—Vessel and Cargo Requirements

113.21 Application.
113.22 Applicable regulations and standards.
113.23 Irradiated fuel elements and special nuclear materials; shipments originating in, or destined to, a port of the United States.
113.24 Irradiated fuel elements and special nuclear materials; shipments not originating in or destined to a port of the United States.
113.25 Certification by Commission.

Subpart C—Cargo Handling in Canal waters

Sec.

113.41 Explosives.
113.42 Other dangerous cargo.

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

Subpart A—General Provisions

§ 113.1 Definition and classification of dangerous cargoes; reporting requirements.

(a) The definition and classification of dangerous cargoes shall be in accordance with the regulations used by the United States Coast Guard or other national or international regulatory authorities recognized by the United States Coast Guard for that purpose, but in case of doubt as to the explosive nature of any commodity, or in case of conflict as to its classification, determination of the nature and classification of such cargoes shall be made by the Chief, Navigation Division or his designee.

Cross Reference: Title 46 CFR, Chapter I

(b) Dangerous cargoes include all explosives, solid and liquid hazardous materials, all petroleum products in bulk and nuclear materials. Vessels carrying petroleum products having a flashpoint greater than 80°F and classified lower than Grade C under the U.S. system, or having a flashpoint greater than 23°C and classified higher than 3.2 under the Inter-Governmental Maritime Consultative Organization (IMCO) system are not considered to be carrying dangerous cargo for purposes of these restrictions.

(c) Normal operational restrictions will generally apply unless dangerous cargoes are carried in bulk. Liquid is considered to be in bulk unless contained in portable tanks of less than 100 U.S. gallons (or packaged in accordance with 49 CFR or IMCO regulations) which are loaded and discharged with their contents intact. Solids are in bulk form when transported without mark or count which are loaded without containers or wrappers into holds. Explosives are considered in bulk if a vessel is carrying over 5 long tons.

(d) Additional operating restrictions may be imposed by the Chief, Navigation Division or his designee on vessels carrying especially hazardous materials such as radioactive material, Class A and B poisons and corrosives in other than bulk amounts.

(e) Vessels carrying dangerous cargo (including liquefied gases) in bulk will anchor in designated explosive anchorages as provided by § 113.3.

(f) Vessels carrying hazardous materials or dangerous cargoes shall send a report at least twenty-four hours prior to transit stating that all hazardous cargo alarms, safety and shutdown devices, including ship's firefighting systems, have been tested and are in good working order. There will be periodic inspections by Canal authorities to ensure compliance with appropriate United States or IMCO rules and regulations.

§ 113.2 Anchorage areas for ships loaded with dangerous cargoes.

The anchorage areas for ships loaded with explosives or with highly volatile products are designated as follows:

(a) *Atlantic end.* (1) Inside area included in rectangle one thousand yards wide immediately south of West breakwater starting at a point on West breakwater one thousand yards from West Breakwater Light and thence extending westward 2,000 yards along breakwater.

(2) Outside area bounded by a line from Point A at position 9° 23′ 53″N, 79° 56′ 29″W thence to Point B at position 9° 24′ 40″N, 79° 56′ 29″W thence to Point C at position 9° 24′ 40″N, 79° 57′ 00″W thence to Point D at position 9° 23′ 53″N, 79° 57′ 00″W thence to Point A.

(b) *Pacific end.* Area south of Naos Island bounded on the east by a line drawn south (true) from entrance gas buoy no. 1; on the south by a line drawn east (true) from Tortolita Island, and in the north and west by the curve of 30 foot depth.

§ 113.3 Vessels to anchor and wait instructions.

(a) Vessels carrying dangerous cargoes in bulk or more than 5 tons of explosives as defined by § 113.1(a) or tankers in ballast which are not gas free shall anchor in the outside explosive anchorage on the Atlantic end or the explosive anchorage in Pacific end, as described in §§ 113.2(a)(2) and 113.2(b) respectively. Such vessels will be allowed alongside Commission wharves in Canal waters only as prescribed in § 113.5 and each case will be handled individually by the Chief, Navigation Division, or his designee.

(b) Vessels arriving on the Atlantic side and carrying dangerous cargo in bulk will anchor in the outside anchorage. These vessels shall not enter the breakwater until given orders to do so. Such orders will be issued through the appropriate Commission signal station by the Canal authorities. Orders will be given only after the pilot is standing by to board and has received the assurance from the signal station that there are no outbound vessels. When weather and boarding conditions permit, the pilot may board outside the breakwater. On northbound vessels carrying dangerous cargo bound for sea, the pilot must remain on the bridge until the vessel passes the Mole Buoy. The pilot shall not leave the bridge until he has arranged with Marine Traffic Control and the signal station for one-way traffic outbound through the breakwater.

§ 113.4 Transit restrictions.

To better assure the safe passage of vessels carrying dangerous cargo, the following transit restrictions will apply:

(a) Pilots shall be notified that the letter "B" (BRAVO) will be added to the transit schedule number and flown as part of the schedule flag hoist by the ship. It will also be used by pilots and traffic controllers in calling via radio or referring to the vessel.

(b) Such vessels, (hereinafter referred to as "B" vessels) shall have safety towing pendents ready at hand, fore and aft, prior to entering the locks and rigged fore and aft, over the side, when anchoring or mooring in the Canal waters.

(c) "B" vessels and other vessels shall meet at a safe speed and shall, as far as practicable, avoid meeting on turns.

(d) "B" vessels shall not be scheduled to overtake or be overtaken by other vessels. If an overtaking situation occurs between a "B" vessel and another vessel, due care must be exercised by both vessels.

(e) When "B" vessels are required to anchor in Gatun anchorage, they shall be anchored well clear of the channel and as clear of other shipping as conditions permit. "B" vessels shall not be moored at Gamboa without prior approval of Chief, Navigation Division.

(f) Normally, there will be no tandem restrictions on "B" vessels unless the nature of the cargo or the condition of the vessel so indicates. In such instances, the appropriate restrictions will be imposed by competent authority.

(g) Insofar as possible, the Navigation Division will avoid scheduling a "B" vessel to enter a lock chamber where another vessel is clearing, or to clear a lock chamber where another vessel is entering. In case this type of scheduling is unavoidable, the pilot of the entering vessel will hold back to allow the departing vessel adequate maneuvering room.

(h) Tug assistance at the locks and in Gaillard Cut shall be assigned to "B" vessels if, in the judgment of the appropriate Canal authority, or upon request of the pilot, the assignment is required.

(i) Vessels possessing a valid Letter of Compliance from the United States Coast Guard will be accepted for transit within the restrictions outlined in the letter.

§ 113.5 Places for loading and discharging explosives; restrictions.

(a) The explosive dock at Mindi is hereby designated for loading and discharging explosive cargo. Explosive anchorages prescribed in § 113.2 may be used upon approval by the Chief, Navigation Division or his designee.

(b) The Chief, Navigation Division or his designee upon application may grant authority to discharge explosives, whether designated for civilian or military use, at Commission docks and piers within Canal waters in an emergency or when the character or packing of the explosives justifies such discharge.

Subpart B—Vessel and cargo requirements

§ 113.21 Application.

This subpart does not apply to vessels of war or auxiliary vessels, as those terms are defined in the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal (September 7, 1977). It does apply to all other vessels, regardless of character, tonnage, size, service, and whether self-propelled or not, and whether arriving or departing, underway, moored, anchored, aground, transiting or passing through Canal waters.

§ 113.22 Applicable regulations and standards.

All vessels within Canal waters carrying dangerous cargo shall be in substantial compliance with U.S. Government regulations applicable to U.S. flag vessels or regulations of other national or international regulatory authorities meeting Inter-Governmental Maritime Consultative Organization (IMCO) standards in effect for the product carried, providing such vessels are acceptable for entering waters over which the U.S. Coast Guard has jurisdiction. This requirement encompasses the construction, maintenance, inspection, certification and classification of the vessel, its safety, equipment, and its cargo handling system; the packaging, stowage, storage, marking, maintenance, handling, inspection and certification of cargo, and the operation of the vessel including crew requirements.

§ 113.23 Irradiated fuel elements and special nuclear materials; shipments originating in, or destined to, a port of the United States.

A vessel carrying irradiated fuel elements or special nuclear materials originating in, or destined to, a port of the United States, shall comply with all regulations issued by the United States Nuclear Regulatory Commission, the United States Department of Transportation and the United States Coast Guard with regard to the packaging, handling, stowage, storage, and movement of such cargo and the precautionary measures to be taken in connection therewith. In addition, the following requirements apply to the carrying of such cargo by such a vessel:

(a) A vessel carrying such cargo must obtain in advance approval from the Panama Canal Commission.

(b) Any cask containing irradiated fuel elements, or special nuclear materials, together with any attachments thereto, may not weigh more than 150 tons.

(c) Upon arrival at the Canal of a vessel carrying such cargo, the Master shall deliver to the boarding officer a loading certificate issued by the United States Coast Guard, or, if no such loading certificate is available, a declaration as follows:

Declaration of Irradiated Fuel Elements or Special Nuclear Materials Carried

I, the undersigned ————————, Master of the ———————— carrying (Irradiated Fuel Elements) (Special Nuclear Materials which are ————————) do hereby declare and certify on behalf of the owners of the vessel that (Irradiated Fuel Elements) (Special Nuclear Materials) were loaded at the port of ————————, and were packed and stowed in accordance with regulations of the U.S. Nuclear Regulatory Commission, the U.S. Department of Transportation and the U.S. Coast Guard.

The materials are in hold(s) ———————— or on deck in the following locations ————————. The packaging and stowing has not been disturbed since leaving the port of ————————.

(Master's signature) ————————

(Date) ————————.

§ 113.24 Irradiated fuel elements and special nuclear materials; shipments not originating in or destined to a port of the United States.

A vessel carrying irradiated fuel elements or special nuclear materials not originating in, or destined to, a port of the United States, may not transit the Canal or enter Canal waters unless prior permission therefore has been obtained from the Canal authorities. Such permission may not be granted without adequate provision for indemnity covering public liability and loss to the United States or any agency thereof, comparable in general scope to the protection afforded under section 170 of the United States Atomic Energy Act of 1954, as amended, 68 Stat. 919, 71 Stat. 576.

§ 113.25 Certification by Commission.

Vessels arriving at the Canal without prior permission of proper documentation attesting to compliance with these regulations may, after inspection by the Chief, Navigation Division or his designee, be issued a certification to enter or transit through the waters of the Canal for one or more trips. Such permission may not be granted without adequate provision for indemnity covering public liability and loss to the United States or any agency thereof, comparable in general scope to the protection afforded under section 170 of the United States Atomic Energy Act of 1954, as amended, 68 Stat. 919, 71 Stat. 576.

Subpart C—Cargo handling in Canal waters

§ 113.41 Explosives.

Explosives shall be handled as prescribed by appropriate Coast Guard regulations and only at the locations designated in § 113.4.

§ 113.42 Other dangerous cargo.

(a) All other dangerous cargo, including petroleum products in bulk, shall only be handled with prior approval of the Chief, Navigation Division or his designee and only at the locations approved by the Chief, Navigation Division or his designee. When handling these products, such handling will be done in strict compliance with the appropriate U.S. Coast Guard regulations.

(b) Certain dangerous cargoes indentified by 49 CFR 172.101 and prohibited from being transported over water are also not permitted aboard vessels in Panama Canal waters. In addition, the following substances, including Class A poisons, when carried in bulk, shall not be carried aboard vessels in Panama Canal waters:

1. Acrolein.
2. Chlorine.
3. Ethylenemine.
4. Hydrofluroic Acid.
5. Hydrogen.
6. Hydrogen Chloride.
7. Hydrogen Fluoride.
8. Hydrogen Peroxide Solution.
9. Nitric Acid (Greater than 70 Percent).
10. Nitrogen Peroxide Tetroxide.
11. Phosphous Trichloride.
12. Beta Propiolactone.
13. Oxygen.
14. Methyl Cyclopentadien (YL).
15. Meganese Tricarbonyl.

PART 115—BOARD OF LOCAL INSPECTORS: COMPOSITION AND FUNCTIONS

Part 115 is amended as follows:

78. Part 115 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1418, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

79. Section 115.1 is revised as follows:

§ 115.1 Board of Local Inspectors; Supervising Inspector.

(a) There is hereby continued the Board of Local Inspectors of the Panama Canal Commission, constituted as provided in § 115.2, which shall perform, conduct and execute, under the supervision of the Supervising Inspector:

(1) The investigations called for by § 1417, Pub. L. 96–70, 93 Stat. 487;

(2) The functions and responsibilities with which it is vested by this Part and by Parts 117, 119 and 121 of this chapter; and

(3) Such other duties in matters of a marine character as it may be assigned to it from time to time by the Administrator.

(b) The Marine Director of the Panama Canal Commission shall serve, ex officio, as Supervising Inspector of the Commission except when he is designated to serve as Chairman of the Board in accordance with § 115.2(c). When the Marine Director is so designated, the Deputy Administrator or such other official as the Administrator may designate in his stead, shall serve as Supervising Inspector.

80. Section 115.2 (a), (b), and (c) are revised as follows:

§ 115.2 Composition of the board.

(a) The Board of Local Inspectors, referred to in this Part as "the Board," shall, except as otherwise provided in paragraphs (b) and (c) of this section, consist of the following officials who shall serve in the capacities stated:

(1) Chairman, Board of Local Inspectors.

(2) Chief, Navigation Division, as member.

(3) Senior Canal Port Captain, as member.

(b) Where the subject matter of circumstances of a particular accident warrant such action, the Supervising Inspector may designate the Chief, Industrial Division to serve, ex officio, as member of the Board in place of the

members listed in paragraph (a)(2) or (3) of this section. In the absence of the Chairman, the Supervising Inspector will appoint a member to act as Chairman.

(c) If the Supervising Inspector deems it appropriate in a particular investigation, he may designate an alternate to replace any official regularly serving on the Board. If he himself serves as such an alternate, he shall serve as Chairman of the Board.

* * * * *

PART 117—MARINE ACCIDENTS: INVESTIGATIONS; CONTROL; RESPONSIBILITY

81. Part 117 table of contents is revised as follows:

Sec.
117.1 Investigation of marine accidents.
117.1a Scheduling of investigations.
117.1b Rights of party in interest.
117.2 Change in physical status or property affected by accident forbidden.
117.3 Reports by Board to the Administrator.
117.4 Reports of accidents by officer in command to Board.
117.5 Control of wrecked, injured, or burning vessels.
117.6 Liability of vessel for injury to Canal structures or equipment.

82. Part 117 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1417, 1418, Pub. L. 96–70, 93 Stat. 487; EO 12215, 45 FR 36043.

83. Section 117.1 is revised as follows:

§ 117.1 Investigation of marine accidents.

(a) Whenever, within Panama Canal waters, including the locks of the Canal, a vessel, or its cargo, crew, or passenger, meets with a serious marine accident, or whenever, within the harbors, anchorages, and areas adjacent thereto, including the ports of Balboa and Cristobal, there is a serious marine accident involving Commission personnel or equipment, the Board of Local Inspectors shall promptly investigate in detail the conditions and circumstances under which such accident occurred.

(b) Any other marine accident occurring in such waters may be investigated by the Board at the discretion of the Supervising Inspector.

(c) The Master of a vessel involved in a marine accident may request an investigation of an accident not considered by the Board to fall within paragraph (a) of this section. The request must be addressed to the Supervising Inspector or the Chairman of the Board, and must be in writing. If the Master does not so request such an investigation in writing, he shall be deemed to have waived all rights to the investigation called for by § 1417, Pub. L. 96–70, 93 Stat. 487, which provides that a claim may not be considered by the Panama Canal Commission, or an action for damages lie thereon, unless, prior to the departure from the Panama Canal of the vessel involved:

(1) The investigation by the competent authorities of the accident or injury giving rise to the claim has been completed; and,

(2) The basis for the claim has been laid before the Commission.

(d) For the purpose of this section, the term "serious marine accident" includes:

(1) Any accident involving substantial damage to any structure, plant, or equipment of the Panama Canal Commission or the United States; and

(2) Any accident (i) involving death or resulting in personal injury that requires admission of a person to a hospital as a bed patient; or (ii) resulting in damages to a vessel which require the making of repairs prior to the vessel's departure from the Canal; *Provided that* the Supervising Inspector or his designee has reason to believe that personnel or equipment of the Panama Canal Commission were then aboard or were assisting the vessel involved in the accident or were situated (aboard another vessel, ashore or otherwise) so as to have been a factor in the accident.

84. Cross reference is revised as follows:

Cross Reference: Compelling attendance and testimony of witnesses and production of books and papers by Board, see § 1418, Pub. L. 96–70, 93 Stat. 487.

* * * * *

85. Section 117.1b is revised as follows:

§ 117.1b Rights of party in interest.

Any Panama Canal pilot or other individual who is a party in interest at a marine-accident investigation may obtain counsel of his own choosing, testify in his own behalf, cross-examine witnesses, call witnesses, and introduce any relevant evidence. The Board shall advise all parties in interest of such rights.

86. Section 117.2 is revised as follows:

§ 117.2 Change in physical status of property affected by accident forbidden.

In the event of a marine accident or casualty affecting any property in Panama Canal waters, or waters adjacent thereto, or any property owned or operated by the Panama Canal Commission or the United States, which imposes on the Board an obligation to investigate, no change in the physical status of the property affected by the accident or casualty may be made or permitted prior to inspection by properly constituted authority, unless such change in status be imperative in order to preserve life or property.

87. Section 117.3 is revised as follows:

§ 117.3 Reports by Board to the Administrator.

The Board shall make reports forthwith in detail to the Administrator of all marine-accident investigations conducted by it, setting forth the facts and circumstances surrounding the accident and bearing upon its proximate causation, the nature and extent of the injury and the amount of damages, if any, occasioned by such injury. The reports shall include a transcript of the record of the Board's investigation, together with its findings and opinions respecting the accident. All findings and opinions of the Board shall be rendered by a full Board after a review of the entire transcript, even though the hearing may have been conducted by a single member of the Board or by a two-man Board. Reports to the Administrator shall be forwarded in duplicate through the Supervising Inspector, who may place thereon such endorsement as he may see fit.

88. Section 117.4 is revised as follows:

§ 117.4 Reports of accidents by officer in command to Board.

The Master or other officer in command of a vessel shall, prior to the vessel's departure from Panama Canal waters, report in writing to the Board any accident involving his vessel in Canal waters that resulted in loss of life or serious personal injury or in substantial damage to property.

89. Section 117.5 is revised as follows:

§ 117.5 Control of wrecked, injured, or burning vessels.

When a vessel in the Panama Canal waters goes aground, or is wrecked, or is so injured that it is liable to become an obstruction in such waters, or is on fire, the Canal authorities shall have the right to supervise and direct, or to take complete charge of and conduct, all operations which may be necessary to float the vessel, to clear the wreckage, to remove the injured vessel to a safe location, or to extinguish the fire, as the case may be. The Canal authorities may, when necessary, take such action without awaiting the permission of the owner or agent of the vessel, and may require the Master of the vessel and all persons under his supervision and control to place the vessel, and all equipment on board, at the disposal of the Canal authorities without costs to the Commission. Unless the Panama

Canal Commission is subsequently found or determined to be responsible for the accident or the condition necessitating action by the Canal authorities, the necessary expenses incurred by the Commission in carrying out the provisions of this section shall be a proper charge against such vessel, her owners and her operators.

90. Section 117.6 is revised as follows:

§ 117.6 Liability of vessel for injury to Canal structures or equipment.

A vessel, or her owner or operator, shall be held liable for any injury to any structure, plant, or equipment of or pertaining to the Canal, the Panama Canal Commission or the United States when the injury is proximately caused by the negligence or fault of the vessel or its master or crew. No vessel shall make fast, or run any line, to any marker, buoy, beacon, or other aid to navigation; and a vessel shall so navigate as not to strike such aids in passing.

PART 119—LICENSING OF OFFICERS

91. Part 119 table of contents is revised as follows:

Subpart A—General Provisions

Sec.

119.1 License defined; classification and licensing of Masters, mates, engineers, pilots, and motorboat operators.
119.2 Term of licenses.
119.3 Appeal from action refusing license.
119.5 Revocation for parting with license.
119.6 Employment of licensed officers.
119.7 Original license defined.
119.8 Application form.
119.9 Service records and endorsements.
119.10 Age and literacy requirements.
119.11 Knowledge of first aid.
119.12 Physical and experience requirements.
119.13 Burden of establishing qualifications.
119.14 Applicant to appear for examination.
119.15 Reexamination.
119.16 Raise of grade.
119.17 Renewal of license.
119.18 Sea service as member of armed forces of the United States or the Republic of Panama or on vessels owned by either nation.
119.19 Evaluation of equivalent experience.
119.20 Increase in scope of license; removal of limitations.
119.21 Written statement of reasons for denying license.
119.23 Limitations on license.
119.24 Oath of licensee.
119.25 Duplicate license.

Subpart B—Masters

119.61 Master, steam and motor vessels; experience required.
119.63 Master, non-self-propelled floating equipment; experience.

Subpart C—Mates

Sec.

119.103 Mate, steam or motor; experience required.

Subpart D—Pilots

119.141 Pilot, Panama Canal; qualifications.
119.143 Pilot, United States Government local vessel; employment requirement.

Subpart E—Motorboat operators

119.183 Motorboat operator; age and job requirements.
119.187 Operating test.

Subpart F—Engineers

119.221 Grade and type of engineer licenses.
119.222 Chief engineer, steam vessels; experience required.
119.223 Chief engineer, motor vessels; experience required.
119.224 Assistant engineer, steam vessels; experience required.
119.225 Assistant engineer, motor vessels; experience required.
119.227 Chief and assistant engineer; steam and motor vessel.

92. Part 119 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96–70, 93 Stat. 492, EO 12215, 45 FR 36043.

93. Section 119.1 is revised as follows:

§ 119.1 License defined; classification and licensing of Masters, mates, engineers, pilots, and motorboat operators.

(a) The word *license* when used in this Part means a Panama Canal Commission license unless specifically identified as one from another issuing authority.

(b) The Board of Local Inspectors shall recommend the classification of Masters, mates and engineers of steam and motor vessels owned and operated by the Panama Canal Commission, and of operators of U.S. Government motorboats operating in Panama Canal waters, excluding pleasure craft, and of Panama Canal pilots, and upon such recommendation licenses may be issued by the Supervising Inspector, or by such other officer as he may designate. No person shall act or serve as a pilot, Master, mate or engineer, or operate said motorboats, unless he holds a valid license to do so.

94. Section 119.2 is revised as follows:

§ 119.2 Term of licenses.

Licenses issued to marine personnel of the Panama Canal Commission are granted to such personnel for such periods as they are employed by the Commission in a position requiring such license. Annually, all marine personnel licensed by the Panama Canal Commission shall have a physical examination attesting to their physical condition to perform their assigned work. Such examination shall include an examination of the applicant's acuity of vision and color sense.

95. Section 119.3 is revised as follows:

§ 119.3 Appeal from action refusing license.

An applicant for a license as Master, mate, engineer, or pilot, for whom the Board of Local Inspectors has refused to recommend such license may appeal to the Supervising Inspector or to such other officer as the Supervising Inspector may designate. The appeal must be entered within 15 days after the final action of the Board. Upon the appeal, the Supervising Inspector or other designated officer has authority either to grant or to deny the license.

96. Section 119.4 is removed as follows:

§ 119.4 [Removed]

97. Section 119.6 is revised as follows:

§ 119.6 Employment of licensed officers.

Only persons who are actually employed in, or conditionally eligible for appointment to, a position subject to licensing under this Part, or who can establish that they have a bonafide intention to operate a U.S. Government local craft within Panama Canal waters, may be issued an original license under this part. Renewals may be issued irrespective of the employment requirement if, in the judgment of the Supervising Inspector, the likelihood of return to Canal employment or other circumstances warrant renewal.

98. Section 119.9 is revised as follows:

§ 119.9 Service records and endorsements.

(a) Applicants for original licenses or raise in grade of license other than motorboat operator, shall present to the Board, to be filed with their applications, letters, discharges, or other official documents, certifying to the amount and character of their experience and names of the vessels on which it was acquired. Certified photostatic copies of the aforementioned documents may be accepted.

(b) The Board shall, when practicable, require an applicant for Master's, mate's, pilot's, or engineer's license to have the written endorsement of the Master or chief engineer of the vessels upon which he has served. Applicants for license as pilot shall have the endorsement of at least two licensed pilots as to their qualifications.

99. Section 119.10 is revised as follows:

§ 119.10 Age and literacy requirements.

To be eligible for examination for any license an applicant must, except as provided by § 119.183(b), be at least 21 years of age, and have the necessary experience as specified in this Part. In addition, an applicant for license as pilot, Master, mate, or engineer must have a working knowledge of the English language. Proficiency in English will be determined by the Supervisory Training Instructor, Language Training Program, Office of Personnel Administration. The examination will be given in either English or Spanish, according to the choice of the applicant.

100. Section 119.12 (a), (f), and (h) are revised as follows:

§ 119.12 Physical and experience requirements.

(a) All applicants for original license must pass a physical examination given by a physician recognized by the Commission, and present a certificate executed by the examining physician to the Board. The certificate shall attest to the applicant's acuity of vision, color sense, and general physical condition.

* * * * *

(f) No original license shall be issued to any person unless 25 percent of the required experience has been obtained within the three years immediately preceding the date of application. Such period shall include, in addition to the three years specified, any service in the Armed Forces of the United States or the Republic of Panama that immediately preceded or interrupted the last three years spent by the applicant in a civilian status prior to the date of the application. When an applicant for a license as engineer does not meet the requirement of this paragraph, but is otherwise qualified, the Board may examine him and recommend to the Supervising Inspector that he be licensed. In such cases a license may be issued provided the applicant has satisfactorily completed a 90-day period as trainee aboard applicable equipment of the Panama Canal Commission.

* * * * *

(h) An applicant for a license may not be given a grade of license higher than that in which he has served. However, this paragraph shall not apply to persons qualifying for license under the Panama Canal pilot Master and engineer training programs.

101. Section 119.13 is revised as follows:

§ 119.13 Burden of establishing qualifications.

Applicants for licenses must establish to the satisfaction of the Board that they possess all of the qualifications necessary, such as age, experience and character before they shall be entitled to be issued licenses.

102. Section 119.14 is revised as follows:

§ 119.14 Applicant to appear for examination.

(a) Except as provided in paragraph (c) of this section, before an original license or raise in grade is issued to any person to act as Master, mate, pilot, or engineer, he shall personally appear before the Board and pass a written examination, covering such subjects as will demonstrate that the applicant has sufficient knowledge of maritime matters necessary for the license for which he has applied. A list of subjects to be tested may be obtained from the Board.

(b) Applicants will also be required to pass a practical examination.

(c) Upon the recommendation of the Board that he do so, the Supervising Inspector may, in his discretion, issue an original license either without an examination or with an examination covering only subjects of a local nature, to an applicant who possesses a currently valid marine license issued by a competent national authority and who is otherwise eligible under this Part.

103. Section 119.16 is revised as follows:

§ 119.16 Raise of grade.

(a) Upon the issuance of a license involving a raise of grade, the applicant shall surrender the old license to the Board.

(b) The Board shall, before granting a raise of grade of license, require the applicant to make written application on a prescribed form.

(c) The grade of a license as Master, mate, or pilot may not be raised except upon the certificate of a physician recognized by the Panama Canal Commission, attesting that the color sense of the applicant is normal. Applicants for raise of grade of engineer license are not subject to this requirement. Nothing herein contained shall debar an applicant who has lost the sight of one eye from securing a raise of grade of his license if he is qualified in all other respects and his vision in his one eye passes the test required for the better eye of an applicant having vision in both eyes.

(d) Applicants for raise of grade of license shall present to the Board letters, discharges, or other official documents certifying to the amount and character of their experience and the names of the vessels on which it was acquired.

(e) A raise of grade of license may not be granted to any applicant unless 25 percent of the required sea service shall have been served within the three years immediately preceding the date of application. Service in the armed forces of the United States or Republic of Panama shall not be counted in computing the three years.

(f) Sea service acquired prior to the issuance of the license held may not be accepted as any part of the service required for raise of grade.

104. Section 119.17 (e) revised and (f) removed as follows:

§ 119.17 Renewal of license.

* * * * *

(e) A license as Master, mate, or pilot may not be renewed except upon the official certificate of a physician recognized by the Commission that the color sense of the applicant is normal. Applicants for renewal of license as engineer are not subject to this requirement.

(f) [Removed]

* * * * *

105. Section 119.18 is revised as follows:

§ 119.18 Sea service as member of armed forces of the United States or the Republic of Panama or on vessels owned by either nation as qualifying experience.

(a) Sea service as a member of the armed forces of the United States or the Republic of Panama will be accepted as qualifying experience for an original, raise of grade, or extension of route of license. Such service will be subject to evaluation to determine its equivalent to the sea service required on merchant-type vessels, and to determine the appropriate grade, class, and limit of license for which the applicant is eligible. An applicant may be permitted to omit the examination for intermediate grades of license if his experience is of such character as to qualify him for a higher, or the highest, grade of license.

(b) If a person who has served in a civilian capacity as commanding officer, Master, mate, engineer, or pilot, etc., of any vessel owned and operated by the United States or the Republic of Panama, in a service in which a license as Master, mate, engineer, or pilot was not required at the time of the service, applies for examination for license, the Board shall evaluate the time or service and allow appropriate credit therefor.

§ 119.22 [Removed]

106. Section 119.22 is removed.

107. Section 119.23 is revised as follows:

§ 119.23 Limitations on license.

The Board may limit, as appropriate, the tonnage, length, horsepower, type of vessel(s) and the waters upon which any licensee may act. The Board will note any such limitations on the license.

108. Section 119.25 is revised as follows:

§ 119.25 Duplicate license.

If a person to whom a license has been issued loses his license, he shall promptly report the loss to the Board. The Board shall issue a duplicate license after receiving from the person a properly executed affidavit giving satisfactory evidence of the loss. The license shall be issued as a duplicate by the addition of the following written endorsement: "This license replaces License Number —— issued at —— on the above date." The duplicate license shall have the same force and effect as the original, lost license.

109. Section 119.61 is revised as follows:

§ 119.61 Master, steam and motor vessels; experience required.

In order to be eligible for a Panama Canal license as Master of steam and motor vessels, an applicant must—

(a) Hold a currently valid Panama Canal license as mate of steam and motor vessels, and have served at least 260 eight-hour watches in charge of a deck watch on Panama Canal Commission vessels of 75 feet in length engaged in towing; or

(b) Hold a license as Master or mate of steam and motor vessels issued by an authority outside the Panama Canal, and have served at least 260 eight-hour watches as a licensed officer in charge of a deck watch on steam or motor vessels over 75 feet in length engaged in towing.

§ 119.62 [Removed]

110. Section 119.62 is removed.

111. Section 119.63 is revised as follows:

§ 119.63 Master, non-self-propelled floating equipment; experience.

In order to be eligible for examination for the license of Master of non-self-propelled floating equipment, an applicant must have at least 260 eight-hour watches of experience as mate on Panama Canal Commission non-self-propelled floating equipment or such experience on other vessels as the Supervising Inspector determines to be equivalent thereto.

§ 119.64 [Removed]

112. Section 119.64 is removed.

§119.102 [Removed]

113. Section 119.102 is removed.

114. Section 119.103 is revised as follows:

§ 119.103 Mate, steam or motor; experience required.

In order to be eligible for examination for the license of mate of steam or motor vessels an applicant must—

(a) (1) Have graduated from either the Panama Nautical School's program for deck officers, a maritime academy in the United States recognized by the U.S. Coast Guard for licensing purposes, or from another maritime academy located outside the United States which is determined by the Supervising Inspector to have standards substantially equal to United States academies, and (2) be participating in an approved Panama Canal Commission training program for Master, steam and motor vessels; or

(b) Hold a license as mate issued by an authority outside the Panama Canal, and have at least 260 eight-hour watches of experience as a licensed officer in charge of deck watch on steam or motor vessels over 75 feet in length engaged in towing.

§ 119.104 [Removed]

115. Section 119.104 is removed.

116. Section 119.141 (a), (b), (c) and (e) are revised as follows:

§ 119.141 Pilot, Panama Canal; qualifications.

(a) An applicant for a license as Pilot, Panama Canal, Of Vessels Not Over 225 Feet in Length Upon All Panama Canal Waters must have been employed by the Panama Canal Commission as Pilot-in-Training for at least 17 weeks and must meet the following minimum requirements:

(1) He must have served at least three years as a licensed deck officer on vessels of 1,000 gross tons or over, one year of which must have been as a chief mate while holding a license issued by the U.S. Coast Guard as Chief Mate Unlimited, or its equivalent as determined by the Supervising Inspector; or

(2) He must have served at least three years as a pilot on vessels of 4,000 gross tons or over on the Great Lakes while holding license issued by the U.S. Coast Guard as First Class Pilot, Great Lakes; or

(3) He must have served at least two years as Master of Panama Canal Commission vessels of 1,000 horsepower or over while holding a Panama Canal license as Master of Steam and Motor Vessels; or

(4) He must have completed the Pilot Training Program conducted by the Panama Canal Commission.

(b) An applicant for a license as Pilot, Panama Canal, Of Vessels Not Over 526 Feet in Length Upon All Panama Canal Waters must have been employed by the Panama Canal Commission as pilot of vessels not over 225 feet in length for at least 12 weeks.

(c) An applicant for a license as Pilot, Panama Canal, Of Vessels of Any Tonnage Upon All Panama Canal Waters must have been employed by the Panama Canal Commission as pilot of vessels not over 526 feet in length for at least 52 weeks.

* * * * *

(e) The qualifying periods of employment specified in paragraphs (a), (b) and (c) of this section may be shortened or lengthened by the Administrator, upon recommendation of the Supervising Inspector where the pilot demonstrates other than normal competence.

§ 119.142 [Removed]

117. Section 119.142 is removed.

118. Section 119.143 is revised as follows:

§ 119.143 Pilot, United States Government local vessel; employment requirement.

An applicant for pilot, U.S. Government local vessel, must be in the employment of the Panama Canal Commission as Master or mate of a Panama Canal Commission vessel or the employment of the U.S. Army or U.S. Navy as Master or mate of a U.S. Government local vessel, such as a mine sweeper, landing craft, patrol boat or tug, or he must be conditionally eligible for such employment.

§ 119.144 [Removed]

119. Section 119.144 is removed.

120. Section 119.183 is revised as follows:

§ 119.183 Motorboat operator; age and job requirements.

(a) The Board may examine and the Supervising Inspector may issue licenses to operate motorboats to qualified applicants. To be eligible for examination, an applicant shall establish that his is conditionally eligible for appointment to a position with the Panama Canal Commission or with another U.S. Government agency operating in Canal waters requiring a motorboat operator's license. Licenses

to operate motorboats will be issued only to the extent, and subject to such conditions and limitations, as the Supervising Inspector determines appropriate.

(b) A person must be 18 years of age or over to be issued a motorboat operator's license.

121. Section 119.184 is removed as follows:

§ 119.184 [Removed]

122. Section 119.185 is removed as follows:

§ 119.185 [Removed]

123. Section 119.186 is removed as follows:

§ 119.186 [Removed]

124. Section 119.187 is revised as follows:

§ 119.187 Operating test.

An applicant for motorboat operator's license shall pass a practical demonstration of his ability to operate a motorboat properly and safely, in the presence of an inspector, or submit satisfactory proof of such capability.

125. Section 119.222 (a), (b) and (d) are revised as follows:

§ 119.222 Chief engineer, steam vessels; experience required.

In order to be eligible for examination for the license of chief engineer of steam vessels, an applicant must—

(a) Hold a valid license as assistant engineer of steam vessels, meet the experience requirements of paragraph (a) or (b) of § 119.224, and have served at least 260 eight-hour watches as assistant engineer on Panama canal Commission steam vessels; or

(b) Hold a valid license as assistant engineer of steam vessels, and have served at least 260 eight-hour watches as a licensed officer in charge of an engine room watch on steam vessels of at least 3,000 horsepower; or

* * * * *

(d) Hold a valid license as chief or assistance engineer of steam vessels issued by an authority outside the Panama Canal and meet the hourly watch requirements of paragraphs (a) (b) or (c) of this section.

126. Section 119.223 (a) and (c) are revised as follows:

§ 119.223 Chief engineer, motor vessels; experience required.

In order to be eligible for examination for the license of chief engineer of motor vessels, an applicant must—

(a) Hold a valid license as assistant engineer of motor vessels, meet the experience requirements of paragraphs (a) or (b) of § 119.225, and have served at least 260 eight-hour watches as assistant engineer of motor vessels; or—

* * * * *

(c) Hold a valid license as chief or assistant engineer of motor vessels issued by an authority outside the Panama Canal and have served at least 260 eight-hour watches as a licensed officer in charge of an engine room watch on motor vessels of at least 3,000 horsepower.

127. Section 119.224 (a) and (b) are revised as follows:

§ 119.224 Assistant engineer, steam vessels; experience required.

In order to be eligible for examination for the license of assistant engineer of steam vessels, an applicant therefor must—

(a) (1) Have graduated from either the Panama Nautical School's program for engineer officers, from a maritime academy in the United States recognized by the U.S. Coast Guard for licensing purposes, or from another maritime academy located outside the United States which is determined by the Supervising Inspector to have standards substantially equal to the U.S. Academies, and (2) be participating in an approved Panama Canal Commission training program for chief engineer of steam vessels; or

(b) Have satisfactorily completed an approved Panama Canal Commission training program for chief engineer of steam vessels of at least four years' duration and have completed at least 260 eight-hour watches in the engine room of a Panama Canal Commission steam vessel under the supervision of a licensed engineer.

* * * * *

128. Section 119.225 is revised as follows:

§ 119.225 Assistant engineer, motor vessels; experience required.

In order to be eligible for examination the license of assistant engineer of motor vessels, an applicant therefor must—

(a) (1) Have graduated from either the Panama Nautical School's program for engineer officers, from a maritime academy in the United States recognized by the U.S. Coast Guard for licensing purposes or from another maritime academy located outside the United States which is determined by the Supervising Inspector to have standards substantially equal to the U.S. Academies, and (2) be participating in an approved Panama Canal Commission training program for chief engineer of motor vessels; or

(b) Have satisfactorily completed an approved Panama Canal Commission training program for chief engineer of motor vessels of at least four years' duration and have completed at least 260 eight-hour watches in engine room of a Panama Canal Commission motor vessel under the supervision of a licensed engineer; or

(c) While holding a license as assistant engineer of steam vessels, have served at least 130 eight-hour watches as observer-assistant engineer on motor vessels.

129. Section 119.226 is removed as follows:

§ 119.226 [Removed]

PART 121—INSPECTION AND REGISTRATION OF VESSELS

Part 121 is amended as follows:

130. Part 121 authority citation is revised as follows:

Authority: Issued under authority vested in the Commission by sec. 1813, Pub. L. 96-70, 93 Stat. 493.

131. Section 121.1 is revised as follows:

§ 121.1 Applicability of Part.

Except as otherwise specifically herein provided, the regulations in this Part apply only to vessels, floating equipment and motorboats owned or operated by the Panama Canal Commission or by the United States or any of its agencies operating in Panama Canal waters.

132. Section 121.2(a) is revised as follows:

§ 121.2 Definitions.

* * * * *

(a) "Vessel" means any vessel as defined in § 111.2 other than a motorboat as defined in this section.

133. Section 121.3 is revised as follows:

§ 121.3 Inspection of vessels merely transiting, on request.

A vessel merely transiting the Canal may be inspected, fully or in part, by the Board of Local Inspectors, upon the request of the owner, agent, or Master of such vessel. Such inspection shall be at the expense of the vessel in accordance with charges established by the Canal authorities.

134. Section 121.43 is revised as follows:

§ 121.43 Fee for inspection.

Before a certificate of inspection may be issued to any transiting vessel, or U.S. Government local craft, the Master or owner of such vessel or other responsible person shall pay to the Treasurer, Panama Canal Commission the fees established by the Canal authorities for inspection and

examination and for the issuance of certificates.

135. Section 121.89(a) is revised as follows:

§ 121.89 Boiler steam hours.

(a) Boilers on floating equipment of the Panama Canal Commission which are inspected by the Board may not be operated under steam for more than the following prescribed number of hours between boiler washout periods:

* * * * *

136. Section 121.90 introductory test is revised as follows:

§ 121.90 Annual report of floating craft on hand.

The accountable officials of the Panama Canal Commission shall furnish the Board with an annual report of all vessels and floating craft on hand by January 1st of each year. This report shall show:

* * * * *

137. Section 121.92 is revised as follows:

§ 121.92 Lifesaving apparatus.

Unless otherwise provided by this Part, lifesaving apparatus for vessels navigating beyond Panama Canal waters, and subject to this Part, shall be in accordance with the requirements of the general rules and regulations for vessel inspection of the United States Coast Guard, or with the requirements of the International Convention for the Safety of Life at Sea.

138. Section 121.171 is revised as follows:

§ 121.171 Registration and numbering of motorboats.

All motorboats shall be registered, certificated, and assigned numbers by the Board of Local Inspectors, subject to the supervision of the Supervising Inspector.

139. Section 121.173 is revised as follows:

§ 121.173 Registration and numbering of vessels under 65 feet in length not propelled by machinery.

Vessels not more than 65 feet in length and not propelled in whole or in part by machinery shall be registered and numbered by the Board, under the supervision of the Supervising Inspector.

PART 123—RADIO COMMUNICATION

140. Part 123 table of contents is revised as follows:

Sec.
123.1 Radio communication defined.
123.2 Control of communication.
123.3 Radiotelephones required.
123.4 Advance information required by radio from vessels approaching the Canal.
123.5 Radio communication between vessels in Canal and other vessels or places.
123.7 Operator on board during transit.
123.8 Precedence of messages relative to vessel's movements and Canal business; use of vessel's radio by pilot.
123.9 Immediate report of accidents, delays, or casualties.
123.10 Operation of vessel radios in conformity with treaties.
123.11 Radio charges.

141. Part 123 Authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1801, Pub. L. 96-70, 93 Stat. 492; EO 12215, 45 FR 36043.

142. Section 123.2 is revised as follows:

§ 123.2 Control of communications.

The Panama Canal Commission shall, subject to the provisions of this Part, have control of radio communications in the Canal operating areas so far as concerns or affects vessels in Panama Canal waters or the navigation of such waters.

143. Section 123.3 (a) introductory text (b), (c), (d), and (e) revised as follows:

§ 123.3 Radiotelephones required.

(a) Except for vessels operated by the Panama Canal Commission or another agency of the United States, the following vessels shall comply with the requirements of this section: * * *

(b) A vessel of a type described in paragraph (a) of this section shall be equipped with a radiotelephone which can be operated from the navigation bridge and which can be used to communicate on the following channels in the 156–162 MHz frequency band:

(1) Channel 12, 156.600 MHz;
(2) Channel 13, 156.650 MHz;
(3) Channel 16, 156.800 MHz.

(c) A vessel of a type described in paragraph (a) of this section, which has notified the Chief, Navigation Division or his designee that it is ready to transit or otherwise navigate in Panama Canal waters and requires a Panama Canal pilot, shall, until a pilot boards the vessel, maintain a continuous watch on Channel 12. Channel 12 will be used for notification to vessels of their transit time and for advisory harbor control communication in Limon Bay.

(d) A vessel of a type described in paragraph (a) of this section shall maintain a continuous watch on Channel 13 when underway in Panama Canal waters without a Panama Canal pilot aboard, and shall use Channel 13 only for ship-to-ship or ship-to-coast navigational communications. When such vessels have a Panama Canal pilot aboard, Channel 13 may be used only by the pilot or at his direction for navigational communications.

(e) The signal stations on Flamenco Island and in Cristobal may be called on Channels 12 and 16. Channel 16 may also be used by all vessels for ship-to-coast communications with steamship agents or other commercial businesses.

144. Section 123.4 (a) is amended and (b) introductory text is revised as follows:

§ 123.4 Advance information required by radio from vessels approaching the Canal.

(a) Vessels approaching the Panama Canal shall communicate by radio to the Navigation Division not less than 48 hours in advance of arrival at the Canal (or earlier if radio communication is practicable at an earlier time), the information required by this section unless this information has been previously communicated to the Canal authorities by other means. Symbols of the phonetic alphabet shall be used to identify each item and the word "NEGAT" shall be used after the items that can be answered "no," "none," or "not applicable." The following items of information shall be provided:

* * * * *

Delta—Any changes in the vessel's name, country of registry, structure or use of tanks that have occurred since the vessel last called in Panama Canal waters.

* * * * *

India—Quarantine and immigration information:

(1) Is radio pratique desired?

(2) State the ports at which the vessel has called within 15 days preceeding its arrival at the Canal.

* * * * *

(b) The following additional information shall be transmitted via radio to Transit Operations Division from all vessels as applicable:

* * * * *

145. Section 123.5 is revised as follows:

§ 123.5 Radio communication between vessels in Canal waters and other vessels or places.

Except for emergency traffic and routine bridge-to-bridge VHF communication, no vessel in transit through the Canal shall communicate by radio with any other vessel or shore station, local or distant. This restriction shall not apply to government vessels of the United States or of the Republic of Panama.

146. Section 123.6 is removed as follows:

§ 123.6 [Removed]

147. Section 123.7 is revised as follows:

§ 123.7 Operator on board during transit.

All vessels equipped with radio shall have a qualified radio operator on board, available to operate the radio installation if necessary, at any time the vessel is underway in Panama Canal waters and at any other time her navigation is under the control of a Panama Canal pilot. Vessels equipped with radio telephones operating on the frequencies designated by the Panama Canal Commission are deemed to meet the requirements of this section provided they have someone aboard capable and qualified to operate such equipment.

148. Section 123.9 is revised as follows:

§ 123.9 Immediate report of accidents, delays, or casualties.

Vessels within Panama Canal waters shall report by radio to the Canal authorities any accident or anything else that may delay them or require assistance, any sickness or casualties that require medical attendance or any other matter of importance that may arise. If a pilot is on board, such report shall be made by the pilot or under his direction.

149. Section 123.10 is revised as follows:

§ 123.10 Operation of vessel radios in conformity with treaties.

Except as may be otherwise provided by this Part, while in Panama Canal waters, vessels equipped with radio shall operate such equipment at all times in conformity with the principles and rules stipulated in the treaties or conventions to which the United States is a party.

PART 125—SANITARY REQUIREMENTS: VESSEL WASTES; GARBAGE; BALLAST

Part 125 is amended as follows:

150. Part 125 authority citation is revised as follows:

Authority: Issued under authority vested in the President by secs. 1701 and 1801, Pub. L. 96–70, 93 Stat. 492; EO 12215, 45 FR 36043.

151. Section 125.1 is revised as follows:

§ 125.1 Discharging vessel wastes into waters.

(a) Vessels may not discharge or throw into Panama Canal waters any ballast, ashes, cinders, boxes, barrels, straw, paper, or other solid matter; nor discharge heavy slops, engine or fire room bilge water, oil, or any other matter that will tend to deface or make Canal waters unsanitary. This requirement does not apply to the water used in cooking or in cleaning tableware.

(b) Ballast tanks may not be discharged in Canal waters.

(c) Before arrival from sea at either of the terminal ports, vessels should, in a manner consistent with the requirements of the International Convention for the Prevention of Pollution of the Sea by Oil, 1954, and all amendments thereto which are currently in force, dispose of all waste forbidden to be discharged in Canal waters.

152. Section 125.3 is removed as follows:

§ 125.3 [Removed]

153. Section 125.4 is revised as follows:

§ 125.4 Removing wastes when anchored for considerable time.

A vessel anchored in Panama Canal waters for a considerable length of time may get rid of vessel wastes by requesting Canal authorities to place a garbage scow alongside. This service is chargeable to the vessel.

PART 129—[REMOVED]

154. Part 129 is removed.

PART 131—NEUTRALITY OF CANAL

155. Part 131 is revised as follows:

Authority: Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, signed September 7, 1977.

§ 131.1 Applicability of Treaty.

Matters concerning the neutrality of the Panama Canal are governed by the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, signed in Washington, D.C., on September 7, 1977.

PART 133—TOLLS FOR USE OF CANAL

156. Part 133 Subpart B table of contents is revised as follows:

Subpart B—Levying of Tolls

133.31 Measurement of vessels; vessels to secure tonnage certificates.
133.32 Measurement of vessels; making and correction of measurement; plans and copies.
133.33 Measurement of vessels; temporary retention of certificate at Canal.
133.34 Tolls for vessels in ballast.
133.36 Tolls for vessels making partial transit and return.
133.37 Partial transits by small vessels.

157. Part 133 authority citation revised as follows:

Authority: Issued under authority vested in the President by secs. 1601 and 1801, Pub. L. 96–70, 93 Stat. 489; EO 12215, 45 FR 36043.

158. Section 133.35 is removed as follows:

§ 133.35 [Removed]

159. Section 133.37 is revised as follows:

§ 133.37 Partial transits by small vessels.

Section 133.36 shall not be interpreted as authorizing vessels less than 65 feet in length, or barges, or rafts of any size not on regular transit schedules and not paying tolls, to navigate the waters of any locks, or of Gaillard Cut to or from Gatun Lake in partial transit of the Canal; specific authority of the Administrator must be obtained through the Marine Director for each such partial transit.

160. Section 133.71(b) is revised as follows:

§ 133.71 Time of making payment.

* * * * *

(b) All vessel charges shall be paid, or secured as provided by § 133.74, before permission to depart is given a vessel at the port of departure from the Canal: *Provided, however,* That in cases involving emergency or other special circumstances, the requirement of this paragraph may be waived by the Administrator of the Panama Canal Commission.

161. Section 133.74 is revised as follows:

§ 133.74 Same; exception; payment secured by deposit of cash or bonds.

(a) The payment of tolls and vessel charges may be secured by making cash deposits for that purpose with the Treasurer of the Panama Canal Commission or such United States depository as may be designated by the Panama Canal Commission.

(b) In lieu of payment in cash or a cash deposit, the payment of tolls and vessel charges may be secured by making deposits, pursuant to written agreement with the Panama Canal Commission, of negotiable bonds of the United States Treasury Department as collateral security for the deposit of public moneys. Such bonds shall be under the full control of the Panama Canal Commission; shall be deposited with the Treasurer of the Panama Canal Commission or such United States depository as may be designated by the Panama Canal Commission and shall be subject to sale or other disposition by the Panama Canal Commission upon

any failure in prompt payment of any bill for tolls or vessel charges for which the said bonds are deposited as security.

162. Section 133.75 is revised as follows:

§ 133.75 To whom payment is to be made.

Payment for tolls and vessel charges shall be made to the Treasurer, Panama Canal Commission.

PART 135—RULES FOR MEASUREMENT OF VESSELS

Part 135 is amended as follows:

163. Part 135 authority citation is revised as follows:

Authority: Issued under authority vested in the President by sec. 1601, Pub. L. 96–70, 93 Stat. 489; EO 12215, 45 FR 36043.

164. Section 135.443 is revised as follows:

§ 135.443 Substance and form of tonnage certificates; blank certificates.

The Panama Canal tonnage certificates issued by the measurement authorities of the United States and the several foreign countries shall correspond in substance and form to the (prescribed) sample certificate (available on request from the Board of Admeasurement, Panama Canal Commission, APO Miami, Florida 34011). Blank certificates will be furnished by the Secretary of the Army or Administrator of the Panama Canal Commission upon request of measurement authorities of foreign countries. The measurement authorities of any foreign country may also provide themselves with Panama Canal measurement certificates printed in English or in the language of the foreign country: *Provided,* That such certificates strictly correspond in substance and form to the sample certificate: *And provided further,* That if it is desired to have a certificate in the language of the foreign country, there must also be a corresponding certificate issued to the vessel in English.

165. Section 135.483 is revised as follows:

§ 135.483 Anchoring of warships to facilitate ascertainment of draft.

Every warship, other than army and navy transports, colliers, supply ships, and hospital ships (as defined in §§ 135.1–135.3) upon applying for passage through the Panama Canal shall, in order to facilitate the ascertainment of its mean draft, be anchored or placed at such station or location as shall be designated by the Administrator of the Panama Canal Commission or by the officials authorized to act for him.

166. Section 135.484 is revised as follows:

§ 135.484 Commander of warship to exhibit vessel's displacement scale and curves.

The commander of every warship, other than army and navy transports, colliers, supply ships, and hospital ships (as defined in §§ 135.1–135.3), applying for passage through the Panama Canal, shall exhibit for examination by the Administrator of the Panama Canal Commission, or by the officials authorized to act for the Administrator, an official document containing the vessel's curve of displacement for change of trim, and a scale so arranged that the displacement at any given mean draft is shown. Such document or documents shall be issued and be certified as correct by competent authorities of the government to which the vessel belongs.

167. Section 135.486 is revised as follows:

§ 135.486 Determining displacement of warship not supplied with displacement scale and curves.

Should any warship, other than army and navy transports, colliers, supply ships, and hospital ships (as described in §§ 135.1–135.3), apply for passage through the Panama Canal and for reasons satisfactory to the Administrator of the Panama Canal Commission, not have on board the duly certified document or documents specified in § 135.484, the Administrator, or the officials authorized to act for him, shall then determine the displacement of the vessel, using such reliable data as may be available, or by taking such dimensions of the vessel and using such approximate methods as may be considered necessary and practicable. The displacement tonnage so determined shall be considered to be the displacement of the vessel.

168. Section 135.511 is revised as follows:

§ 135.511 Administration of rules.

The rules of measurement provided in this Part shall be administered by the Administrator of the Panama Canal Commission.

Part IV

Department of Agriculture

Agricultural Marketing Service

Federally Licensed Warehouses; Fees for Services; Final Rule

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 102, 103, 104, 106, 107, 108, and 111

Federally Licensed Warehouses; Fees for Services

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule specifies the fees to be charged warehousemen licensed under provisions of the United States Warehouse Act for licenses and examinations of warehouses. Such fees are mandated by the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35, which amends the U.S. Warehouse Act to stipulate that the fees shall cover the costs of providing licenses and examinations including the administrative and supervisory costs as of October 1, 1981.

EFFECTIVE DATE: December 30, 1981.

FOR FURTHER INFORMATION CONTACT: Orval Kerchner, Chief, Warehouse Development Branch, Warehouse Division, Agricultural Marketing Service, Department of Agriculture, Washington, D.C. 20250 (202–447–3616).

SUPPLEMENTARY INFORMATION: On September 4, 1981, the Department of Agriculture published proposed regulations 46 FR 44680 amending 7 CFR Parts 101, 102, 103, 104, 106, 107, 108, and 111. The purpose of the proposed regulations was to suggest for comment fees for warehouse and service licenses, for original and reexamination or reinspection of warehouses and the annual fees for a licensed warehouse. Such fees are mandated by the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35 and due to the requirements contained in that Act it is necessary to make this regulatory action comply with an effective date of October 1, 1981. This action was reviewed under the USDA procedure established in accordance with Executive Order 12291 of February 17, 1981, and was classified "nonmajor" as it does not meet the criteria contained therein for major regulatory actions. William T. Manley, Deputy Administrator for Marketing Program Operations, determined that the action would not have a significant impact on a substantial number of small business entities because (i) use of the services is voluntary; and (ii) further, if there was any impact, the Secretary is required by statute to make the services available and to recover the costs of the services from the users of the services.

Written comments were to be filed no later than September 24, 1981. As of that date, 116 comments were filed. Ninety-nine comments were from the grain industry, 7 comments were from the cotton industry, and 10 comments were from persons who individually had an interest in the proposal. These are available for public inspection in the Office of the Hearing Clerk, USDA.

Principal Comments Related to the Following

A. Fee—Assessment and Structure

The majority opposed the assessment of fees for philosophical and practical reasons. The warehousemen who are the people to be assessed believe: (1) An assessment for the program is not justified because of the benefits to the public at large; (2) that for practical reasons all beneficiaries cannot be identified and assessed, therefore it is inequitable to single out the licensed warehouseman to bear the total; and (3) an assessment of total fees to licensed warehousemen likely will result in losses in licensees under the U.S. Warehouse Act weakening the network of federally licensed warehouses. These now make up 40 percent of the nation's commercial grain elevator storage space which would affect the orderly marketing of farm products, remove a regulatory protection to farm income which has been highly successful over many years, limit the federal efforts and influence in the research and development of basic standards of good warehousing practices, regulatory requirements and licensing, financial, bonding, and examination procedures.

They further believe the proposed fees in principle and amount are prohibitive and inhibiting to the general program as warehousemen now licensed may terminate such licenses rather than pay such fees and warehousemen not now licensed will not apply for licenses. The program has had a steady growth in licensees and warehouse capacity over the years.

B. CCC as a Beneficiary

A significant number of replies argued that Commodity Credit Corporation (CCC) was a prime beneficiary of the program and should bear a share of the cost.

Reasoning for this Position was that

(1) CCC interests in loan and owned grain are protected by the Federal examination.

(2) CCC pays AMS and a number of cooperating States (on a share basis) for examining non-federally licensed warehouses having a storage agreement with CCC, and

(3) Federally licensed warehouses who might consider terminating their license because of the user fee likely would continue their storage agreement and CCC would then pay for examinations at these same warehouses as non-federally licensed warehouses.

The reason for CCC not paying for the service up to now is that the program was funded by appropriation, hence no beneficiary paid directly, and so CCC had no reason to pay for the services and protection it received. Now that other beneficiaries (the warehousemen) are being billed for user fee costs it appears in order for CCC to share in these costs.

Further, the CCC was created for the purpose of stabilizing, supporting and protecting farm income and prices, of assisting in the maintenance of a balanced and an adequate supply of agricultural commodities, and of facilitating the orderly distribution of agricultural commodities. The existence of a broad network of public warehouses for the storage of CCC-owned and loan products is basic to the proper handling, storage, processing, servicing, and transportation of the agricultural commodities subject to its control. The supervision of the care of CCC-owned and loan commodities in such facilities is good business practice, minimizing fraud, waste and abuse.

C. Reduction in Fees for Financial Statement Audited by a Certified Public Accountant

Comments on this proposal ranged from (1) the proposal was discriminatory because it did not recognize independent public accountants as well as certified public accountants, and (2) a larger reduction was warranted because of the cost of such a statement and the administrative value in the uses of such a statement.

The Department has carefully considered each comment and has reached the following conclusions and decisions:

A. The Department is mandated by Congress to charge, assess and collect such fees and such fees must cover as nearly as practicable the costs of providing services and licenses including administrative and supervision costs. The program has been reviewed for present and future scopes. Reductions in fees have been made and these are reflected in the final regulations.

B. The Department recognizes the validity of the position that CCC is a direct identifiable beneficiary.

Therefore, the annual licensed warehouse fee has been adjusted to reflect payment by CCC for those warehouses holding storage agreements with CCC.

C. The reduction in fee granted for voluntarily providing an annual financial statement audited by a Certified Public Accountant has been removed: The Commodity Credit Corporation has proposed for comment a requirement making mandatory such a statement to approval under the Uniform Grain Storage Agreement. Of the 1,832 licensed grain warehouses, 1,755 hold such agreements and will need to comply to continue this agreement. A similar proposal has been published for warehouses licensed under the United States Warehouse Act. It seems in order to await the final rule in this matter.

Implementation of Fees

Fees for the original, amended and/or reinstated licenses, for the original inspection and/or reinspection examinations for modification of an existing license, for licenses to classify, inspect, grade, sample, and/or weigh shall be assessed and collected as the service is performed. The annual fee for each licensed warehouse shall be assessed and collected effective with the date of issuance of the original license or continuation thereof on the anniversary date. Each warehouseman holding an active license on October 1, 1981, shall be billed for a proportionate share of his annual fee which will extend coverage to the next anniversary date of his license. Those warehousemen whose license anniversary date occurs between October 1, 1981, and the first billing under these regulations shall be billed for the period October 1, 1981, to the anniversary date on a proportionate basis and for the annual fee which would have been due. Failure to pay fees shall be grounds for suspension of license.

Notice to this effect was given in the September 4, 1981, notice. This notice merely finalizes the exact amount of fees required and specifies the manner in which such fees will be collected. Fees must be assessed beginning October 1, 1981. Therefore, under the administrative provisions of 5 U.S.C. 553, good cause is shown for making the final rule effective with less than 30 days notice after publication.

Fee schedules are published for all commodities for which there are effective regulations as of October 1, 1981, except cotton. Pursuant to Section 156(d) of the Omnibus Budget Reconciliation Act (95 Stat. 374), the Secretary has determined that fees and charges to cotton warehouses licensed pursuant to the U.S. Warehouse Act should be waived for fiscal year 1982 to insure that the licensing and inspection procedures for cotton warehouses are preserved. An appropriation has been requested to accomplish this and now is under consideration by Congress. Therefore, the proposal to amend 7 CFR Part 101 is withdrawn. However, if Congress does not provide the requested funds, a fee schedule will be necessary and will be published.

Said parts and regulations, therefore, are amended or revised as described below:

PART 102—GRAIN WAREHOUSES

1. Sections 102.57, 102.58 and 102.59 are revised as follows:

Fees

§ 102.57 License fees.

There shall be charged and collected a fee of $50 for each original warehouse license, and a fee of $50 for each amended, modified, extended, reinstated or duplicate warehouseman's license applied for by a warehouseman, and a fee of $20 for each license or amendment thereto issued to any person to inspect, grade, or weigh agricultural products stored or to be stored under provisions of this Act.

§ 102.58 Warehouse inspection fees.

There shall be charged and collected—

(a) For each original examination or inspection, or reexamination or reinspection for modification of an existing license of a warehouse under the Act a fee at the rate of $10 for each 10,000 bushels of storage capacity or fraction thereof, determined in accordance with § 102.6(a), but in no case less than $100 nor more than $1,000; and

(b)(1) For each licensed warehouse an annual fee computed in accordance with the following table:

Licensed capacity (bushels)	Annual fee (dollars) with uniform grain storage agreement	Annual fee (dollars) without uniform grain storage agreement
Less than 150,000	$250	$500
151,000 to 250,000	350	700
251,000 to 500,000	450	900
501,000 to 750,000	550	1,100
751,000 to 1,000,000	650	1,300
1,001,000 to 1,200,000	750	1,500
1,201,000 to 1,500,000	850	1,700
1,501,000 to 2,000,000	950	1,900
2,001,000 to 2,500,000	1,050	2,100
2,501,000 to 5,000,000	1,150	2,300
5,001,000 and over	1,250	2,500

The licensed capacity shall be that stated in the current warehouse license as determined under § 102.6(a).

§ 102.59 Advance deposit.

Before any license is granted, or an original examination or inspection is made, or reexamination or reinspection for modification of an existing license is made, or when the annual fee for the licensed warehouse is assessed, pursuant to the regulation in this part, the applicant or licensee shall deposit with the Service the amount of the fee prescribed. Such deposit shall be made in the form of a check, certified if required by the Service, draft, or post office or express money order, payable to the order of "Agricultural Marketing Service, USDA."

* * * * *

PART 103—TOBACCO WAREHOUSES

2. Sections 103.48, 103.49 and 103.50 are revised as follows:

Fees

§ 103.48 License fees.

There shall be charged and collected a fee of $50 for each original warehouseman's license, and a fee of $50 for each amended, modified, extended, reinstated or duplicate warehouseman's license applied for by a warehouseman, and a fee of $20 for each license or amendment thereto issued to any person to inspect, grade, sample, or weigh agricultural products stored or to be stored under provisions of this Act.

§ 103.49 Warehouse inspection fees.

There shall be charged and collected—

(a) For each original examination or inspection, or reexamination or reinspection for modification of an existing license of a warehouse under the Act a fee at the rate of $10 for each 100,000 pounds of storage capacity, or fraction thereof, determined in accordance with § 103.12, but in no case less than $100 nor more than $500; and

(b)(1) For each licensed warehouse an annual fee at the rate of $10 for each 100,000 pounds of licensed capacity, or fraction thereof, but in no case shall the fee be less than $400 nor more than $2,000. The licensed capacity shall be that stated in the current warehouse license as determined under § 103.12.

(2) If Commodity Credit Corporation has a depository interest in any warehouse covered by this section and shares in the cost of the examination program at that warehouse, the fees stipulated in this section shall be reduced to that warehouseman by the

amount Commodity Credit Corporation pays.

§ 103.50 Advance deposit.

Before any license is granted, or an original examination or inspection is made, or reexamination or reinspection for modification of an existing license is made, or when the annual fee for the licensed warehouse is assessed, pursuant to the regulation in this part, the applicant or licensee shall deposit with the Service the amount of the fee prescribed. Such deposit shall be made in the form of a check, certified if required by the Service, draft, or post office or express money order, payable to the order of "Agricultural Marketing Service, USDA."

* * * * *

PART 104—WOOL WAREHOUSES

3. Sections 104.46, 104.47 and 104.48 are revised as follows:

Fees

§ 104.46 License fees.

There shall be charged and collected a fee of $50 for each original warehouseman's license, and a fee of $50 for each amended, modified, extended, reinstated, or duplicate warehouseman's license applied for by a warehouseman, and a fee of $20 for each license or amendment thereto issued to any person to grade or weigh agricultural products stored or to be stored under provisions of this Act.

§ 104.47 Warehouse inspection fees.

There shall be charged and collected—

(a) For each original examination or inspection, or reexamination or reinspection for modification of an existing license of a warehouse under the Act a fee at the rate of $10 for each 100,000 pounds of storage capacity or fraction thereof, determined in accordance with § 104.12(a), but in no case less than $100 nor more than $500; and

(b)(1) For each licensed warehouse an annual fee at the rate of $10 for each 100,000 pounds of license capacity, or fraction thereof, but in no case shall the fee be less than $400 nor more than $2,000. The licensed capacity shall be that stated in the current warehouse license as determined under § 104.12(a).

(2) If Commodity Credit Corporation has a depository interest in any warehouse covered by this section and shares in the cost of the examination program at that warehouse, the fees stipulated in this section shall be reduced to that warehouseman by the amount Commodity Credit Corporation pays.

§ 104.48 Advance deposit.

Before any license is granted, or an original examination or inspection is made, or reexamination or reinspection for modification of an existing license is made, or when the annual fee for the licensed warehouse is assessed, pursuant to the regulation in this part, the applicant or licensee shall deposit with the Service the amount of the fee prescribed. Such deposit shall be made in the form of a check, certified if required by the Service, draft, or post office or express money order, payable to the order of "Agricultural Marketing Service, USDA."

* * * * *

PART 106—DRY BEAN WAREHOUSES

4. Sections 106.55, 106.56, and 106.57 are revised as follows:

Fees

§ 106.55 License fees.

There shall be charged and collected a fee of $50 for each original warehouseman's license, and a fee of $50 for each amended, modified, extended, reinstated or duplicate warehouseman's license applied for by a warehouseman, and a fee of $20 for each license or amendment thereto issued to any person to inspect, grade, or weigh agricultural products stored or to be stored under provisions of this Act; except that no fee shall be charged for issuance of a license to an inspector who holds an unsuspended and unrevoked license under the Agricultural Marketing Act of 1946 and regulations thereunder to inspect and grade any beans and to certificate the grade thereof.

§ 106.56 Warehouse inspection fees.

There shall be charged and collected—

(a) For each original examination or inspection, or reexamination or reinspection for modification of an existing license of a warehouse under the Act a fee at the rate of $10 for each 1,000 hundredweight of storage capacity, or fraction thereof determined in accordance with § 106.12(a), but in no case less than $100 nor more than $500; and

(b)(1) For each licensed warehouse an annual fee computed in accordance with the following table:

Licensed capacity (hundredweight)	Annual fee (dollars)
Less than 90,000	$500
90,100 to 150,000	700
150,100 to 300,000	900
300,100 to 450,000	1,100
450,100 to 600,000	1,300
600,100 to 720,000	1,500
720,100 to 900,000	1,700
900,100 to 1,200,000	1,900
1,200,100 to 1,500,000	2,100
1,500,100 to 3,000,000	2,300
3,000,100 and over	2,500

The licensed capacity shall be that stated in the current warehouse license as determined under § 106.12(a).

(2) If Commodity Credit Corporation has a depository interest in any warehouse covered by this section and shares in the cost of the examination program at that warehouse, the fees stipulated in this section shall be reduced to that warehouseman by the amount Commodity Credit Corporation pays.

§ 106.57 Advance deposit.

Before any license is granted, or an original examination or inspection is made, or reexamination or reinspection for modification of an existing license is made, or when the annual fee for the licensed warehouse is assessed, pursuant to the regulation in this part, the applicant or licensee shall deposit with the Service the amount of the fee prescribed. Such deposit shall be made in the form of a check, certified if required by the Service, draft, or post office or express money order, payable to the order of "Agricultural Marketing Service, USDA."

* * * * *

PART 107—NUT WAREHOUSES

5. Sections 107.56, 107.57 and 107.58 are revised as follows:

Fees

§ 107.56 License fees.

There shall be charged and collected a fee of $50 for each original warehouseman's license, and a fee of $50 for each amended, modified, extended, reinstated or duplicate warehouseman's license applied for by a warehouseman, and a fee of $20 for each license or amendment thereto issued to any person to inspect, grade, or weigh agricultural products stored or to be stored under provisions of this Act.

§ 107.57 Warehouse inspection fees.

There shall be charged and collected—

(a) For each original examination or inspection, a reexamination or reinspection for modification of an

existing license of a warehouse under the Act a fee at the rate of $5 for each 100 tons, or fraction thereof, of peanuts, and $10 for each 1,000 hundredweight, or fraction thereof of other nuts of storage capacity determined in accordance with § 107.6, but in no case less than $100 nor more than $1,000; and

(b)(1) For each licensed warehouse an annual fee at the rate of 10¢ for each ton of licensed capacity, or fraction thereof, but in no case shall the fee be less than $400 nor more than $2,000. The licensed capacity shall be that stated in the current warehouse license as determined under § 107.6.

(2) If Commodity Credit Corporation has a depository interest in any warehouse covered by this section and shares in the cost of the examination program at that warehouse, the fees stipulated in this section shall be reduced to that warehouseman by the amount Commodity Credit Corporation pays.

§ 107.58 Advance deposit.

Before any license is granted, or an original examination or inspection is made, or reexamination or reinspection for modification of an existing license is made, or when the annual fee for the licensed warehouse is assessed, pursuant to the regulation in this part, the applicant or licensee shall deposit with the Service the amount of the fee prescribed. Such deposit shall be made in the form of a check, certified if required by the Service, draft, or post office or express money order, payable to the order of "Agricultural Marketing Service, USDA."

* * * * *

PART 108—SIRUP WAREHOUSES

6. Sections 108.48, 108.49 and 108.50 are revised as follows:

Fees

§ 108.48 License fees.

There shall be charged and collected a fee of $50 for each original warehouseman's license, and a fee of $50 for each amended, modified, extended, reinstated or duplicate warehouseman's license applied for by a warehouseman, and a fee of $20 for each license or amendment thereto issued to any person to inspect, grade, or weigh agricultural products stored or to be stored under provisions of this Act.

§ 108.49 Warehouse inspection fees.

There shall be charged and collected—

(a) For each original examination or inspection, or reexamination or reinspection for modification of an existing license of a warehouse under the Act a fee at the rate of $3 for each 5,000 gallons or fraction thereof of storage capacity determined in accordance with § 108.12(a), but in no case less than $100 nor more than $500; and

(b)(1) For each licensed warehouse an annual fee at the rate of $3 for each 5,000 gallons of licensed capacity, or fraction thereof, but in no case shall the fee be less than $400 nor more than $2,000. The licensed capacity shall be that stated in the current warehouse license as determined under § 108.12(a).

(2) If Commodity Credit Corporation has a depository interest in any warehouse covered by this section and shares in the cost of the examination program at that warehouse, the fees stipulated in this section shall be reduced to that warehouseman by the amount Commodity Credit Corporation pays.

§ 108.50 Advance deposit.

Before any license is granted, or an original examination or inspection is made, or reexamination or reinspection for modification of an existing license is made, or when the annual fee for the licensed warehouse is assessed, pursuant to the regulation in this part, the applicant or licensee shall deposit with the Service the amount of the fee prescribed. Such deposit shall be made in the form of a check, certified if required by the Service, draft, or post office or express money order, payable to the order of "Agricultural Marketing Service, USDA."

* * * * *

PART 111—COTTONSEED WAREHOUSES

7. Sections 111.58, 111.59 and 111.60 are revised as follows:

Fees

§ 111.58 License fees.

There shall be charged and collected a fee of $50 for each original warehouseman's license, and a fee of $50 for each amended, modified, extended, reinstated or duplicate warehouseman's license applied for by a warehouseman, and a fee of $20 for each license or amendment thereto issued to any person to inspect, grade, or weigh agricultural products stored or to be stored under provisions of this Act.

§ 111.59 Warehouse inspection fees.

There shall be charged and collected—

(a) For each original examination or inspection, or reexamination or reinspection for modification of an existing license of a warehouse under the Act a fee at the rate of $10 for each 1,000 tons of storage capacity, or fraction thereof determined in accordance with § 111.13, but in no case less than $100 nor more than $500; and

(b)(1) For each licensed warehouse an annual fee at the rate of $10 for each 1,000 tons of licensed capacity, or fraction thereof, but in no case shall the fee be less than $400 nor more than $2,000.

(2) If Commodity Credit Corporation has a depository interest in any warehouse covered by this section and shares in the cost of the examination program at that warehouse, the fees stipulated in this section shall be reduced to that warehouseman by the amount Commodity Credit Corporation pays.

§ 111.60 Advance deposit.

Before any license is granted, or an original examination or inspection is made, or reexamination or reinspection for modification of an existing license is made, or when the annual fee for the licensed warehouse is assessed, pursuant to the regulation in this part, the applicant or licensee shall deposit with the Service the amount of the fee prescribed. Such deposit shall be made in the form of a check, certified if required by the Service, draft, or post office or express money order, payable to the order of "Agricultural Marketing Service, USDA."

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited.

Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

REMINDERS

List of Public Laws

Last Listing December 29, 1981

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202–275–3030).

S. 1003 / Pub. L. 97–109 To amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to authorize appropriations for such title for fiscal years 1982 and 1983, and for other purposes. (Dec. 26, 1981; 95 Stat. 1512) Price: $1.50.

H.R. 4879 / Pub. L. 97–110 "International Banking Facility Deposit Insurance Act" (Dec. 26, 1981; 95 Stat. 1513) Price: $1.50.

S. 1948 / Pub. L. 97–111 To permit to become effective certain Farm Credit Administration regulations which expand the authority of financing institutions, other than farm credit system institutions, to borrow from and discount with Federal intermediate credit banks (Dec. 26, 1981; 95 Stat. 1517) Price: $1.50.

The "reminders" below identify documents that appeared in issues of the Federal Register 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

AGRICULTURE DEPARTMENT

Farmers Home Administration—

54949 11–5–81 / Appeal procedure; comments by 1–4–82

54751 11–4–81 / Insured farmer program borrower responsibilities; comments by 1–4–82

COMMERCE DEPARTMENT

Patent and Trademark Office—

49602 10–7–81 / Trademark application; filing dates; comments by 1–5–82

CONSUMER PRODUCT SAFETY COMMISSION

58702 12–3–81 / Withdrawal of proposed rule and reproposal of rule to regulate under the CPSA risk of injury that may be presented by certain stuffed toys; comments by 1–4–81

ENERGY DEPARTMENT

Federal Energy Regulatory Commission—

60214 12–9–81 / Form No. 423: Monthly report of cost and quality of fuels for electric plants; comments by 1–4–82

ENVIRONMENTAL PROTECTION AGENCY

60217 12–9–81 / Approval and promulgation of implementation, Indiana; comments by 1–6–82

55123 11–6–81 / Approval and promulgation of implementation plans; Iowa; comments by 1–5–82

55220 11–6–81 / Grants for construction of treatment works; comments by 1–8–82

55551 11–10–81 / Interstate pollution abatement; Announcement of receipt of petition from Maine; comments by 1–4–82

45383 9–11–81 / Interstate pollution abatement; Announcement of supplemented petition for New York and Pennsylvania; comments by 1–4–82

60217 12–9–81 / Phenmedipham; tolerance; comments by 1–8–82

FEDERAL COMMUNICATIONS COMMISSION

56836 11–9–81 / Elimination of requirement for type approval of aural modulation monitors; extension of time; reply comments by 1–5–82

[*See also* 46 FR 52398; 10–27–81]

52151 10–26–81 / FM broadcast station; Atlantic City, N.J.; changes in table of assignments; reply comments by 1–4–82

52145 10–26–81 / FM broadcast station; Celina, Clinton, Knoxville, LaFollette, and Sweetwater, Tennessee; Louisville, Oneida, Radcliff, Somerset, and Stanford, Kentucky; Madison and New Albany, Indiana; changes in Table of Assignments; comments by 1–4–82

56833 11–19–81 / FM broadcast station; changes in table of assignments; Freeport, Tex.; comments by 1–4–82

60221 12–9–81 / Frequency allocations and radio treaty matters general rules and regulation; reply comments by 1–6–82

57078 11–20–81 / Subscription television service; reply comments by 1–5–82

FEDERAL MARITIME COMMISSION

54390 11–2–81 / Tariffs filed by common carriers in foreign commerce of U.S.; time/ volume rate contracts; filing regulations; comments by 1–4–82

55271 11–9–81/Transfer of respiratory protection provisions from regulatory guide (now incorporated by reference) into Code of Federal Regulations; comments by 1–4–82

PERSONNEL MANAGEMENT OFFICE

55119 11–6–81/Pay administration (general); recovery of overpayments; comments by 1–5–82

SMALL BUSINESS ADMINISTRATION

58701 12–3–81/Business loans; export revolving line of credit loans; comments by 1–4–81

TRANSPORTATION DEPARTMENT

Coast Guard—

49914 10–8–81/Life floats and buoyant apparatus; requirements for painters with float-free links and other changes; comments by 1–6–82

Federal Aviation Administration—

54958 11–5–81/Advisory circular for airplane system design analysis; comments by 1–5–82

54957 11–5–81/Summary of petitions received and dispositions of petitions denied or withdrawn; comments by 1–5–82

TREASURY DEPARTMENT

Alcohol, Tobacco, and Firearms Bureau—

49597 10–7–81/Finger Lakes Viticultural Area; comments by 1–5–82

[Corrected at 46 FR 50568, 10–14–81]

Customs Service—

55273 11–9–81/Establishment of procedures for importation of certain antique articles; comments by 1–6–82

Fiscal Service—

54763 11–4–81/Extension of the Treasury's reclamation authority; comments by 1–6–82

Deadlines for Comments on Proposed Rules for the Week of January 10, 1982 through January 16, 1982

AGRICULTURE DEPARTMENT

Animal and Plant Health Inspection Service—

55918 11–13–81/Mediterranean fruit fly; removal of emergency regulations; comments by 1–12–82

Food and Nutrition Service—

62081 12–22–81/Summer food service program; comments extended to 1–11–82

[*See also* 46 FR 60592, 12–11–81]

COMMERCE DEPARTMENT

International Trade Administration—

56169 11–16–81 CCL Amendments: Centrifugal Balancing Machines; comments by 1–15–82

National Oceanic and Atmospheric Administration—

57707 11–25–81/Atlantic surf clam and ocean quahog fisheries; comments by 1–11–82

ENERGY DEPARTMENT

Conservation and Renewable Energy Office—

55628 11–10–81/Methane transportation research and development; comments by 1–11–82

55836 11–12–81/Residential Conservation Service Program; comments by 1–11–82

ENVIRONMENTAL PROTECTION AGENCY

61118 12–15–81/Approval and promulgation of air quality implementation plan; sulfur-in-fuel revision; Eastman Gelatine Corp.; Massachusetts; final rule; comments by 1–14–82

61126 12–15–81/Designation of area for air quality planning purposes; Wisconsin; final rule; comments by 1–14–82

FEDERAL COMMUNICATIONS COMMISSION

55124 12–6–81 / Digital Termination Systems; order extending time for filing comments and reply comments; comments by 1–14–82

[Original document published 46 FR 45635, 9–14–81]

50991 10–16–81/Effective radiated power limitations for amateur radio stations in repeated operation; comments by 1–15–82

56035 11–19–81/FM broadcast station; changes in table of assignments; Eagar, Ariz.; comments by 1–11–82

53460 10–29–81/FM broadcast stations in Belleville, Kansas, Hastings and Haldrege, Nebraska; changes in table of assignments; comments by 1–11–82

53471 10–29–81/FM broadcast stations in Montevideo, Olivia, and Ortonville, Minn.; changes in table of assignments; reply comments by 1–11–82

61305 12–10–81/Formulation of policies relating to the broadcast renewal applicant stemming from the comparative hearing process; comments by 1–15–82

50568 10–14–81/Radio Frequency Interference (RFI) to electronic equipment; reply comments by 1–15–82

60851 12–14–81/Transmission of Teletext by TV stations; proposed authorization; comments by 1–11–82

56831 11–19–81/TV broadcast station; changes in table of assignments; Greenwood, S.C.; reply comments by 1–15–82

56836 11–19–81/TV broadcast station; changes in tables of assignments; Ironton, Mo.; comments by 1–11–82

HEALTH AND HUMAN SERVICES DEPARTMENT

Food and Drug Administration—

61068 12–15–81/Antibiotic drugs for human use; moxalactam disodium for injection; final rule; comments by 1–14–82

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

63273 **Medicare** HHS/HCFA amends rules on determination of reasonable charges for services.

63385 HHS/HCFA requests comments on study of methods for improving coverage of registered dieticians' services and respiratory therapy services provided by home health agencies.

63385 HHS/HCFA requests comments on study of methods for improving foot care services coverage.

63389 HHS/HCFA announces monthly actuarial and premium rates for aged and disabled enrollees in the Supplementary Medical Insurance Program, and announces monthly hospital insurance premium for uninsured aged. (2 documents)

63255 **Securities** SEC establishes ceiling on debt security amounts that can be exempt from provisions of the Trust Indenture Act of 1939.

63254 SEC defers effective date of quarterly reporting requirements for smaller life insurance companies whose shares are not actively traded.

63252 SEC publishes bulletin on application of existing financial accounting standards to certain business combinations.

63447 **Treasury Notes—Series K-1985** Treasury announces interest rate of 14⅛ percent per annum.

63364 **Imports** Commerce/ITA issues preliminary determination of sales at less than fair value for high power microwave amplifiers and components from Japan.

63361 **Forests** USDA/FS requests comments on goals for the 1985 Resources Planning Act Program.

63272 **Procurement** EPA abolishes guidelines on cost sharing contracts.

63322 **Visas** ICA proposes to establish criteria for use of J–1 visa for exchange-visitor program.

63368 **Utilities** DOE/BPA changes effective-date for certain revised wholesale power rates.

Rules and Regulations

Federal Register
Vol. 46, No. 251
Thursday, December 31, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Chs. I and XXVIII

Food Safety and Inspection Service

9 CFR Ch. III

Transfer and Redesignation of Department of Agriculture Regulations

AGENCY: Agricultural Marketing Service and Food Safety and Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: On June 17, 1981, the Secretary of Agriculture announced a reorganization of the Department of Agriculture. As part of this reorganization, certain functions which pertain to grading, standardization and voluntary inspection of fruit, vegetable, meat, poultry, eggs, egg products, and dairy products formerly administered by the Food Safety and Quality Service were transferred to and are now administered by the Agricultural Marketing Service. The Food Safety and Quality Service was renamed the Food Safety and Inspection Service. This final rule amends Titles 7 and 9 of the Code of Federal Regulations by transferring and redesignating the pertinent regulations to reflect the changes in program administration made by the reorganization.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT:
Richard N. Hooper, Administrative Services Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202) 447–4906
S. Paul Ragan, Director, Regulations Office, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202) 447–3317

SUPPLEMENTARY INFORMATION: On June 17, 1981, Secretary Block of the Department of Agriculture issued Secretary's Memorandum 1000–1 announcing the reorganization of the Department. The reorganization and the corresponding delegations of authority were published in the **Federal Register** on September 30, 1981 (46 FR 47747–47757).

As part of this reorganization, it was determined that those functions then being administered by the Food Safety and Quality Service (FSQS) relating to grading and standardization activities and voluntary inspection of egg products and administration of the Egg Products Inspection Act were more logically associated with other marketing functions and, therefore, should be administered by the Agricultural Marketing Service (AMS).

Pursuant to this determination, the Secretary of Agriculture directed that the functions relating to grading and standardization activities and voluntary inspection of egg products, and administration of the Egg Products Inspection Act be transferred from FSQS to AMS. The Secretary further directed that FSQS be renamed the Food Safety and Inspection Service (FSIS).

The regulations involved currently appear in Chapter XXVIII of Title 7 under the Food Safety and Quality Service (now renamed the Food Safety and Inspection Service). The authority to administer those regulations was at that time delegated to the Administrator of the Food Safety and Inspection Service, pursuant to 7 CFR 2.92(a). The regulations currently administered by the Agricultural Marketing Service are found at Chapter I of Title 7 of the Code of Federal Regulations.

Pursuant to the Department reorganization and the transfer of the previously specified functions from FSQS to AMS, the Department is adopting this final rule which transfers and redesignates those regulations currently codified in Chapter XXVIII of Title 7 of the CFR under FSQS to Chapter I of Title 7 of the CFR under AMS. Furthermore, this rule transfers and redesignates Subchapter F of Chapter XXVIII of Title 7 to Subchapter D Chapter III of Title 9.

Title 7 of the Code of Federal Regulations is amended as follows:

PART 2850—RULES OF PRACTICE GOVERNING WITHDRAWAL OF INSPECTION AND GRADING SERVICES [REMOVED]

1. Part 2850 is removed.

2. Parts 2842, 2843, 2851, 2852, 2853, 2855, 2856, 2858, 2859, 2870, and 2880 of Chapter XXVIII are transferred to Chapter I and redesignated as follows:

CHAPTER I—AGRICULTURAL MARKETING SERVICE

Subchapter A—Commodity Standards and Standard Container Regulations

* * * * *

Old Part Ch. XXVIII and New Part, Ch. I

2842—42 Standards for Condition of Food Containers
2843—43 Standards for Sampling Plans

* * * * *

Subchapter C—Regulations and Standards Under the Agricultural Marketing Act of 1946

Old and New

2851—51 Fresh Fruits, Vegetables, and Other Products (Inspection, Certification, and Standards)
2852—52 Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products
2853—54 Meats, Prepared Meats, and Meat Products (Grading Certification, and Standards)
2855—55 Voluntary Inspection of Egg Products and Grading
2856—56 Grading of Shell Eggs and U.S. Standards, Grades, and Weight Classes for Shell Eggs
2858—58 Grading and Inspection, General Specifications for Approved Plants and Standards for Grades of Dairy Products
2859—59 Inspection of Eggs and Egg Products (Egg Products Inspection Act of 1970)
2870—70 Voluntary Grading of Poultry Products and Rabbit Products and U.S. Classes, Standards, and Grades

Subchapter D—Export and Domestic Consumption Programs

Old and New

2880—80 Fresh Irish Potatoes

3. Wherever the name "Food Safety and Quality Service" or "FSQS" appears within the new Parts 42 through 80 change it to read "Agricultural Marketing Service" or "AMS", respectively.

4. In Title 7 of the Code of Federal Regulations, Subchapter F and its Parts 2890–2899 are removed and redesignated as a new Subchapter D, Parts 390–399, of

Chapter III, Title 9, of the Code of Federal Regulations.

Part 2890 of Title 7 is redesignated as Part 390 of Title 9.

5. Chapter XXVIII of Title 7 is vacated.

Furthermore, Title 9 of the Code of Federal Regulations is amended as follows:

1. In the first sentence of the new § 390.2 (9 CFR 390.2), the words "Chapter XXVIII, Title 7 and" are removed.

2. Wherever the name "Food Safety and Quality Service" on "FSQS" appears within 9 CFR Chapter III, Parts 301–335, 350, 351, 355, 362, 381, and 390 (formerly Title 7, Part 2890), change it to read "Food Safety and Inspection Service" or "FSIS", respectively.

(This final rule is issued pursuant to 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953)

It has been determined that publication of this rule as a proposal for public comment is unnecessary since this final rule merely redesignates existing regulations.

Done at Washington, D.C. on: December 24, 1981.

C. W. McMillan,

Assistant Secretary for Marketing and Inspection Services.

7 CFR Part 907

[Navel Orange Reg. 534]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period January 1–January 7, 1982. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: January 1, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. This regulation is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendations and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1981–82. The marketing policy was recommended by the committee following discussion at a public meeting on October 6, 1981. The committee met again publicly on December 29, 1981 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navels deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is easier.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared policy of the act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this final rule have been or will be submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained.

1. Section 907.834 is added as follows:

§ 907.834 Navel orange regulation 534.

The quantities of navel oranges grown in Arizona and California which may be handled during the period January 1, 1982, through January 7, 1982, are established as follows:

(1) District 1: 650,000 cartons;

(2) District 2: 56,502 cartons;

(3) District 3: Unlimited cartons;

(4) District 4: Unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 30, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Part 910

[Lemon Reg. 340]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period January 3–9, 1982. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: January 3, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. This regulation is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1981–82. The marketing policy was recommended by the committee following discussion at a public meeting on July 7, 1981. The committee met again publicly on December 29, 1981, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this final rule have been submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained.

Section 910.640 is added as follows:

§ 910.640 Lemon regulation 340.

The quantity of lemons grown in California and Arizona which may be handled during the period January 3, 1982, through January 9, 1982, is established at 240,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 30, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

---

7 CFR Part 1106

[Milk Order No. 106]

Milk in the Oklahoma Metropolitan Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends certain provisions concerning the shipping requirements for supply plants and the limits on the amount of milk from individual producers that may be diverted directly to nonpool plants and still be priced under the order. For the month of December 1981, the suspension reduces the amount of milk that a supply plant must ship to pool distributing plants in order to qualify as a pool plant. Also, the amount of milk that may be moved directly from farms to nonpool plants for manufacturing is increased. The suspension was requested by a cooperative association because of increased milk production and decreased fluid milk sales due to school closings during the Christmas holidays. The suspension is needed to assure the efficient disposition of reserve milk supplies that are now available and to assure that dairy farmers who have regularly supplied the fluid milk needs of the market will continue to have their milk pooled and priced under the order.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–4824.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified "not significant" and, therefore, not a major action.

It also has been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the issuance of the suspension on the timely basis that is necessary to make the suspension effective for the month of December 1981. The initial request for the action was received on December 17, 1981.

It has been determined that this action would not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Oklahoma Metropolitan marketing area.

After consideration of all relevant information it is hereby found and determined that for the month of December 1981 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1106.7(b), that part of the provisions that reads "in an amount not less than 50 percent of milk received at the supply plant from dairy farmers who would be eligible as producers under §1106.12 if such plant qualifies pursuant to this paragraph and milk of such dairy farmers diverted from such plant by the plant operator".

2. In § 1106.13(e)(1), that part of the provisions that reads ", subject to the conditions of paragraph (e)(3) of this section, a total quantity of milk not in excess of total" and "received at all pool plants during the month. Diversions in excess of such quantity shall not be eligible under this section and the diverting cooperative shall specify the dairy farmers whose diverted milk is not so eligible. If the cooperative association fails to designate such person, status under this section shall be forefeited with respect to all milk diverted by such cooperative association".

3. In § 1106.13(e)(2), that part of the provisions that reads ", subject to the conditions of paragraph (e)(3) of this section," and ", in a total quantity not in excess of the milk of producers not members of such cooperative association received at such pool plant(s) during the month. Milk diverted in excess of such quantity shall not be eligible under this section and the diverting handler shall specify the dairy farmers whose diverted milk is not so eligible. If a handler fails to designate such persons, status under this section shall be forfeited with respect to all milk diverted by such handler".

4. In § 1106.13, paragraph (e)(3).

Statement of Consideration

This action reduces the amount of milk that supply plants must ship to pool distributing plants to attain pool plant status under the order. Under the suspension, a supply plant needs to make but one shipment to a pool distributing plant to qualify as a pool plant.

The action also increases the amount of milk that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. Without the suspension, diversions would be limited to producers who deliver not less than 15 percent of their producer milk to pool plants. In addition, diversions to nonpool plants by proprietary handlers and cooperatives could not exceed the quantity of milk received at pool plants.

This action was requested by a cooperative association that represents producers supplying the market. The cooperative indicated that the suspension is needed primarily because

of a decline in Class I sales to schools as the result of school closings for the Christmas holidays. In addition to reduced fluid milk sales, increased production by producers is contributing to the cooperative's problems in marketing the available supplies of milk. In the absence of any suspension action, the cooperative indicates that it would be necessary to make costly and inefficient movements of milk solely for the purpose of pooling the milk of dairy farmers who have regularly supplied the fluid milk needs of the market.

The suspension is supported by a second cooperative association, by the operator of a pool supply plant and by the operator of a pool distributing plant on the basis that the action would facilitate the orderly and efficient disposition of milk supplies that are in excess of the anticipated fluid milk requirements of distributing plants. In addition, other interested parties were notified by the proponent cooperative that it intended to request this suspension action. None of these parties expressed any opposition to the requested suspension.

In view of the circumstances, the aforesaid provisions should be suspended to ensure the orderly marketing of milk supplies that are in excess of fluid milk requirements. Without the suspension, some milk not needed for bottling use would be shipped to distributing plants from supply plants and then be shipped to manufacturing plants for surplus disposal. Also, the milk of certain dairy farmers that is in excess of fluid milk needs would be shipped to pool plants for reshipment to manufacturing plants rather than being shipped directly from the farm to manufacturing plants. Both of these actions would represent costly and inefficient movements of milk.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that the action will assist handlers in disposing of reserve milk supplies that are now available and will allow dairy farmers who have regularly supplied the fluid milk needs of the market to maintain producer status under the order; and

(b) This suspension eases restrictions and does not require of persons affected substantial or extensive preparation prior to the effective date.

Therefore, good cause exists for making this order effective December 31, 1981.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the month of December 1981.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: December 31, 1981.

Signed at Washington, D.C., on December 24, 1981.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 81-37351 Filed 12-30-81; 8:45 am]

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 52

Dourine in Horses and Asses

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document removes Part 52 from the regulations in Title 9, Code of Federal Regulations, governing appraisal of and compensation for animals destroyed because of dourine. This action removes regulations no longer deemed necessary because the regulations in 9 CFR Part 53 can be used to appraise animals and compensate the owners for destruction of the animals in order to prevent the spread of and to aid in the eradication of dourine.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. W. W. Buisch, USDA, APHIS, VS, Federal Building, Room 748, Hyattsville, MD 20782, 301–436–8073.

SUPPLEMENTARY INFORMATION: This action has been reviewed in conformance with Executive Order 12291 and has been classified as not a "major rule." The Department has determined that this rule will not have an annual effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and should have no adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action removes the regulations which provide a means by which owners of animals infected with dourine can receive compensation from the Department on account of the destruction of said animals. The United States has been free of dourine since 1946, and import requirements have proven adequate to prevent the introduction of the disease into the United States. Additionally, if an animal becomes infected with dourine, appraisal of and compensation to the owner for the discharge of all claims the owner may have against the Department on account of the destruction of the animals, can be made pursuant to 9 CFR Part 53.

On Tuesday, July 28, 1981, there was published in the **Federal Register** (46 FR 38524–38525), a proposed amendment to remove Part 52 from Title 9, Code of Federal Regulations. A 60-day comment period was provided for receipt of comments which expired on September 28, 1981. No comments were received.

The alternative to this final rule would be to not remove Part 52 from Title 9, Code of Federal Regulations. However, test procedures have proven adequate to prevent the entry of dourine and the United States has been free of dourine for 34 years. Additionally, Part 53, 9 CFR, can be used in appropriate circumstances to provide for appraisal of and compensation to the owners of animals infected with dourine that are destroyed pursuant to the regulations.

The factual situation which was set forth in the document of July 28, 1981, still provides a basis for the amendment, and therefore, the Department is amending the regulation as proposed.

PART 52—[RESERVED]

Accordingly, Title 9, Code of Federal Regulations, is amended by removing Part 52, and Part 52 is reserved.

(Sec. 3, 23 Stat. 32, as amended; sec. 2, 32 Stat. 792, as amended; sec. 11, 58 Stat. 734, as amended; (21 U.S.C. 111, 114, 114a); 37 FR 28464, 28477; 38 FR 19141)

Done at Washington, D.C., this 28th day of December 1981.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

---

9 CFR Part 94

[Docket No. 81-098]

Change in Disease Status of Great Britain (England, Scotland, Wales, and Isle of Man) Because of Foot-and-Mouth Disease

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document adds Great Britain (England, Scotland, Wales, and Isle of Man) to the list of countries declared to be free of rinderpest and foot-and-mouth disease. Data furnished to the Department establishes that foot-and-mouth disease has been eradicated from Great Britain (England, Scotland, Wales, and Isle of Man). This action is necessary to permit importation of cattle, sheep, or other ruminants, or swine, or fresh, chilled or frozen meats of such animals into the United States from Great Britain (England, Scotland, Wales, and Isle of Man).

DATES: Effective date: December 31, 1981. Comments on or before March 1, 1982.

ADDRESS: Written comments should be submitted to the Deputy Administrator, Veterinary Services, APHIS, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Dr. D. E. Herrick, USDA, APHIS, VS, Import/Export Animals and Products Staff, Room 821, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8530.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and Emergency Action

This emergency action has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this rule will not have an annual effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and should have no adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The emergency nature of this action makes it impracticable to follow the procedures of Executive Order 12291 with respect to this action.

Dr. E. C. Sharman, Assistant Deputy Administrator, Animal Health Programs, USDA, APHIS, VS, has determined that an emergency situation exists which warrants publication of this interim rule without opportunity for a public comment at this time. These amendments relieve restrictions on the importation of cattle, sheep, or other ruminants, or swine, or fresh, chilled, or frozen meats of such animals into the United States from Great Britain (England, Scotland, Wales, and Isle of Man) because it has been found to be free of foot-and-mouth disease. Therefore, these amendments should be made effective immediately, on an interim basis, in order to relieve restrictions presently imposed but no longer necessary to prevent the introduction and dissemination of the contagion of foot-and-mouth disease into the United States.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency action is impracticable, unnecessary and contrary to the public interest, and good cause is found for making this emergency action effective less than 30 days after publication of this document in the **Federal Register**. Comments have been solicited for 60 days after publication of this document, and a final document discussing comments received and any amendments required will be published in the **Federal Register** as soon as possible.

Certification Under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action will lift restrictions that were imposed on March 25, 1981, on the importation of cattle, sheep, or other ruminants, or swine, or fresh, chilled, or frozen meats and other products of such animals into the United States from Great Britain (England, Scotland, Wales, and Isle of Man). In recent years approximately 50–100 cattle, sheep, other ruminants and swine have been imported from Great Britain into the United States annually. Further, in recent years there has been no fresh, chilled, or frozen meat of such animals and a negligible quality of other animal products imported into the United States from Great Britain. Therefore, it does not appear that this action will have a significant economic impact on a substantial number of small entities.

Background

On March 21, 1981, the Isle of Wight (part of Great Britain), was determined to be infected with foot-and-mouth disease. This was based upon laboratory confirmation of the presence of the disease. Foot-and-mouth disease is a dangerous and destructive communicable disease of ruminants and swine. The morbidity rate within a herd approaches 100 percent. Consequently, it was necessary to remove Great Britain from the list of countries determined to be free of rinderpest and foot-and-mouth disease.

On Wednesday, April 1, 1981, there was published in the **Federal Register** (46 FR 19817) amendments to 9 CFR Part 94 which, among other things, removed Great Britain (England, Scotland, Wales, and Isle of Man) from the list of countries which are declared to be free of rinderpest and foot-and-mouth disease.

Veterinary Services has reviewed all the pertinent information and documents submitted by the authorities of Great Britain (England, Scotland, Wales, and Isle of Man) in support of its position that the country is free of foot-and-mouth disease, and has concluded that Great Britain (England, Scotland, Wales, and Isle of Man) qualifies for listing as a country declared to be free of rinderpest and foot-and-mouth disease in § 94.1(a)(2) of the regulations.

However, Great Britain (England, Scotland, Wales, and Isle of Man) supplements its national meat supply through importations of fresh, chilled, or frozen meat of ruminants and swine from countries designated in § 94.1(a) of the regulations to be infected with rinderpest or foot-and-mouth disease. It also imports ruminants and swine from countries designated as infected with rinderpest or foot-and-mouth disease under conditions less restrictive than would be acceptable for importation into the United States. Thus, even though this document designates Great Britain (England, Scotland, Wales, and the Isle of Man) as free of rinderpest and foot-and-mouth disease, the meat and other animal products produced in Great Britain (England, Scotland, Wales, and Isle of Man) may be commingled with the meat and other animal products produced from an infected country, resulting in an undue risk of introducing rinderpest or foot-and-mouth disease into the United States. Therefore, meat of ruminants or swine and other animal products from Great Britain (England, Scotland, Wales, and Isle of Man) should be imported into the United States only under the restrictions specified in § 94.11(a) of the regulations.

Two other alternatives to these amendments were considered.

1. Not to amend the list of countries declared to be free of rinderpest and foot-and-mouth disease. This alternative was not adopted because the pertinent information and documents reviewed by Veterinary Services indicates that Great Britain qualifies for listing as a country declared to be free of rinderpest and foot-and-mouth disease. In light of the qualification of Great Britain as a

country free of rinderpest and foot-and-mouth disease, the failure to place Great Britain on the list of countries declared to be free of rinderpest and foot-and-mouth disease would result in unnecessary and unjustified restrictions upon the entry into the United States of cattle, sheep, or other ruminants, or swine, or fresh, chilled or frozen meat of such animals from Great Britain.

2. Not to amend the list of countries declared to be free of rinderpest and foot-and-mouth disease until one year after receiving information that Great Britain qualified for listing as a country declared to be free of rinderpest and foot-and-mouth disease.

The outbreak of foot-and-mouth disease which resulted in the removal of Great Britain from the list of countries free from rinderpest and foot-and-mouth disease occurred on March 19, 1981, and the evidence indicates the disease has been eradicated. Further, the outbreak of foot-and-mouth disease occurred on the Isle of Wight, a small isolated island, which is part of Great Britain. These two factors, the evidence that the disease was eradicated quickly and the isolated nature of the area of Great Britain in which the outbreak occurred, constitutes the factual basis for the Departments' rejection of this second alternative.

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMONENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND REGISTERED IMPORTATIONS

Accordingly, Part 94, Title 9, Code of Federal Regulations, is hereby amended in the following respects:

§ 94.1 [Amended]

1. In § 94.1 paragraph (a)(2) is amended by inserting "Great Britain (England, Scotland, Wales, and Isle of Man)" between "Finland" and "Greenland."

§ 94.11 [Amended]

2. In § 94.11 paragraph (a) is amended by inserting "Great Britain (England, Scotland, Wales, and Isle of Man)" between "Finland" and "Japan."

(Sec. 2, 32 Stat. 792, as amended; sec. 306, 46 Stat. 689, as amended; secs. 4 and 11, 76 Stat. 130, 132; 19 U.S.C. 1306; 21 U.S.C. 111, 134c, 134f; 37 FR 28464, 28477; 38 FR 19141)

All written submissions made pursuant to this interim rule will be made available for public inspection at the Federal Building, Room 870, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27 (b)).

Comments submitted should bear a reference to the date and page number of this issue in the **Federal Register.**

Done at Washington, D.C., this 28th day of December, 1981.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Codes and Standards for Nuclear Power Plants; ASME Boiler and Pressure Vessel Code; Incorporation by Reference

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending its regulations to incorporate by reference new addenda of the ASME Boiler and Pressure Vessel Code. The sections of the ASME Code being incorporated provide rules for the construction of nuclear power plant components and specify requirements for inservice inspection of those components. Adoption of these amendments will permit the use of improved methods for construction and inservice inspection of nuclear power plants.

EFFECTIVE DATE: February 1, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. E. Baker, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone (301) 443-5892.

SUPPLEMENTARY INFORMATION: On July 27, 1981 the Nuclear Regulatory Commission published in the **Federal Register** (46 FR 38374) proposed amendments to its regulation, 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities." The proposed amendments revised § 50.55a to incorporate by reference the Winter 1979 Addenda, 1980 Edition, Summer 1980 Addenda, and the Winter 1980 Addenda of section III and the Winter 1979 Addenda, the 1980 Edition, and the Winter 1980 Addenda to section XI of the ASME Boiler and Pressure Vessel Code.

The incorporation of the new edition and addenda does not change any of the previous supplementary requirements included in the regulation. Until the ASME Code adds current requirements for inspecting the residual heat removal and emergency core cooling systems, the regulation will continue to require that these systems be inspected to the provisions cited in § 50.55a(b)(2)(iv).

One comment was received on the proposed rule. It recommended that § 50.55a(b)(2)(i) be revised to reflect the updated incorporation by reference of the ASME Boiler and Pressure Vessel Code, as stated in § 50.55a(b)(2). The reason given for recommending the revision was that § 50.55a(b)(2)(i) was being interpreted as prohibiting the use of addenda that were published and incorporated subsequent to the Summer 1978 Addenda to the 1977 Edition of the code.

As a result of the comment the title and the body of § 50.55a(b)(2)(i) were editorally revised to clarify them.

Some of the changes effected in the addenda which are incorporated through the adoption of the amendments are:

1. Section XI requires that a system hydrostatic test be performed after all inservice repairs and replacements to Class 1 systems and components.

2. Section III requires that there be some method of remotely monitoring the position of pressure relief devices.

3. Both sections III and XI allow the practical exam, required for Nondestructive Examination (NDE) qualification, to be given by the American Society for Nondestructive Testing (ASNT) rather than the employer.

4. Section III requires that licensees meet the requirements of the national standard, ANSI/ASME N626.3-1979 "Qualification and Duties of Personnel Engaged in ASME Boiler and Pressure Vessel Code, Section III, Divisions 1 and 2, Certifying Activities."

Interested person were invited to submit written comments for consideration in connection with the proposed amendment by September 10, 1981. One editorial comment was received and the paragraphs addressing the effective edition and addenda of the ASME Code were added to the preamble in response to the comment. The Commission has adopted the proposed amendment with a minor editorial revision to accommodate the incorporation by reference of the ASME Code.

Paperwork Reduction Act Statement

The recordkeeping requirements contained in this Regulation have been approved by the Office of Management and Budget; OMB approval No. 3150-0011.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule affects only the licensing and operation of nuclear power plants. The companies that own these plants do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act or the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR Part 121. Since these companies are dominant in their service areas, this rule does not fall within the purview of the Act.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendments to Title 10, Chapter 1, Code of Federal Regulations, Part 50 are published as a document subject to codification.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 reads as follows:

Authority: Secs. 103, 104, 161, 182, 183, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2239); secs. 201, 202, 206, 88 Stat. 1243, 1244, 1246 (42 U.S.C. 5841, 5842, 5846), unless otherwise noted. Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended; (42 U.S.C. 2234). Sections 50.100–50.102 issued under sec. 186, 68 Stat. 955; (42 U.S.C. 2236). For the purposes of sec. 223, 68 Stat. 958, as amended; (42 U.S.C. 2273), § 50.54(i) issued under sec. 161i, 68 Stat. 949; (42 U.S.C. 2201(i)), §§ 50.70, 50.71 and 50.78 issued under sec. 161i, 68 Stat. 950, as amended; (42 U.S.C. 2201(o)) and the laws referred to in Appendices.

2. In § 50.55a, paragraph (b)(1) is revised, the introductory text of paragraph (b)(2) is revised, and paragraph (b)(2)(i) is revised to read as follows:

§ 50.55a Codes and standards.

* * * * *

(b) * * *

(1) As used in this section, references to section III of the ASME Boiler and Pressure Vessel Code refer to section III, Division 1, and include editions through the 1980 Edition and addenda through the Winter 1980 Addenda.

(2) As used in this section, references to section XI of the ASME Boiler and Pressure Vessel Code refer to section XI, Division 1 and include editions through the 1980 Edition and addenda through the Winter 1980 Addenda, subject to the following limitations and modifications:

(i) "Limitations on specific editions and addenda." When applying the 1974 Edition, only the addenda through the Summer 1975 Addenda may be used. When applying the 1977 Edition, all of the addenda through the Summer 1978 Addenda must also be used. Addenda and editions subsequent to the Summer 1978 Addenda, that are incorporated by reference in paragraph (b)(2) of this section are not affected by these limitations.

Dated at Bethesda, MD this 8th day of December 1981.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

[FR Doc. 81-37202 Filed 12-30-81; 8:45 am]

BILLING CODE 7590-01-M

DEPARTMENT OF ENERGY

10 CFR Chs. II and III

OMB Control Numbers; Reporting or Recordkeeping Requirements

AGENCY: Department of Energy.

ACTION: Technical amendments.

SUMMARY: This document amends Department of Energy regulations to include OMB control numbers at the places in the regulations where current reporting or recordkeeping requirements are described. It also removes obsolete references to previous GAO or OMB approvals of information collection requirements.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Laurie R. Garnand Ford, Office of General Counsel, Department of Energy, 1000 Independence Avenue, S.W., Room 6A–230, Washington, D.C. 20585, (202) 252–8618.

SUPPLEMENTARY INFORMATION:

A. Paperwork Reduction Act.

The Paperwork Reduction Act (44 U.S.C. 3501 et seq.) requires that all agencies obtain approval of the Director of the Office of Management and Budget (OMB) prior to making an information collection request or imposing a recordkeeping requirement. Section 3504(c)(3)(A) requires the Director to ensure that all information collection requests and recordkeeping requirements display a control number. Section 3507(f) declares that an agency shall not engage in a collection of information without obtaining from the Director a control number to be displayed on the information request. Approval numbers which have been obtained are listed below.

B. Text of the Amendments.

For the reasons set forth in the preamble, the following regulations in Title 10 of the Code of Federal Regulations are hereby amended as follows: After the text of each regulation cited in the first column of the table, add parenthetically the corresponding OMB number listed in the second column.

BILLING CODE 6450-01-M

---

10 CFR Parts 202 and 709

Production and Disclosure and Public Records; Removal

AGENCY: Department of Energy.

ACTION: Removal of certain regulations.

SUMMARY: This Notice removes 10 CFR Part 202, Subpart A, entitled "Production and Disclosure Under 5 U.S.C. 552", and 10 CFR Part 709, entitled "Public Records", of the Department of Energy regulations. The regulations contained in Part 202, Subpart A, and Part 709 were superseded by 10 CFR Part 1004, Freedom of Information, and are, therefore, unnecessary.

EFFECTIVE DATE: February 4, 1982.

FOR FURTHER INFORMATION CONTACT: Milton Jordan, Director, Division of FOI and Privacy Acts Activities, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-5955.

SUPPLEMENTARY INFORMATION: These regulations are being removed from the Code of Federal Regulations since they have been superseded by 10 CFR Part 1004 which was published in the **Federal Register** on January 8, 1979, 44 FR 1909.

The National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, requires Federal agencies to prepare detailed statements on proposals for major Federal actions significantly affecting the quality of the human environment. The issuance of this rule by the Department of Energy clearly will not have a significant environmental effect since it merely removes regulations that were superseded by 10 CFR Part 1004. Thus, the preparation of an Environmental Impact Statement is not required.

Pursuant to section 501(c) of the Department of Energy Organization Act (DOE Act), I have determined that no substantial issue of fact or law exists and that this action will not have a substantial impact on the Nation's economy or large numbers of individuals or businesses because it will merely remove from the Code of Federal Regulations those provisions that have been made unnecessary by the promulgation of 10 CFR Part 1004. Accordingly, the Department of Energy is not bound by the prior notice and hearing requirements of section 501 (b), (c), and (d) of the DOE Act, and may promulgate this rule in accordance with the rulemaking procedure outlined in 5 U.S.C. 553.

Subsection (b) of 5 U.S.C. 553 requires that a notice of proposed rulemaking be published in the **Federal Register**, except when the agency for good cause finds that notice and public procedures thereon are impracticable, unnecessary, or contrary to the public interest. I have determined that the notice and comment procedures of section 553 are unnecessary, since the purpose and effect of this rule is merely to remove regulations that were superseded by 10 CFR Part 1004.

This action has been reviewed in accordance with Executive Order No. 12291, 46 FR 13193, February 19, 1981, and it has been determined that it does not constitute a major rule within the meaning of the Executive Order.

Because no notice of proposed rulemaking is required for this rule under 5 U.S.C. 553(b), the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, pertaining to regulatory flexibility analyses, do not apply to this rule.

In consideration of the foregoing, Part 202, Subpart A, and Part 709 of Title 10 of the Code of Federal Regulations are hereby removed.

Issued at Washington, D.C., December 23, 1981.

William S. Heffelfinger,

Assistant Secretary, Management and Administration.

PART 202—PRODUCTION OR DISCLOSURE OF MATERIAL OR INFORMATION

§§ 202.1-202.10 (Subpart A) [Removed]

PART 709—PUBLIC RECORDS [Removed]

For the reasons set out in the preamble, Part 202, Subpart A, and Part 709, of Title 10 of the Code of Federal Regulations are hereby removed.

(Sec. 644, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254))

[FR Doc. 81-37348 Filed 12-30-81; 8:45 am]

BILLING CODE 6450-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 81-CE-18-AD; Amdt. 39-4289]

Beech Models 65, A65, A65-8200, 65-A80, 65-A80-8800, 65-B80, 65-88, 65-A88, 65-90, 65-A90, 70, B90, C90, E90, 99, 99A, B99, 100, A100, B100, L23F, 65-A90-1, 65-A90-2, 65-A90-3, 65-A90-4, and NU-8F Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises Emergency Airworthiness Directive (EAD) 81-23-01 which was made applicable to Beech Models 65, A65, A65-8200, 65-A80, 65-A80-8800, 65-B80, 65-88, 65-A88, 65-90, 65-A90, 70, B90, C90, E90, 99, 99A, B99, 100, A100, B100, L23F, 65-A90-1, 65-A90-2, 65-A90-3, 65-A90-4, and NU-8F airplanes by letter dated October 31, 1981, and codifies the revised EAD into the **Federal Register**. In order to prevent inflight separation of an outer wing panel from the airplane, the EAD requires inspection and application of corrosion inhibitor to components of the lower forward wing attachments, and appropriate repair or replacement of components found defective. Need for the above action stems from an accident that was caused by inflight failure of a bolt in a lower forward wing attachment.

EFFECTIVE DATE: January 4, 1982, to all persons except those to whom it has already been made effective by airmail letter from the FAA dated October 31, 1981.

COMPLIANCE SCHEDULE: As prescribed in the body of the AD.

ADDRESSES: Commonly available Beech

Aircraft Corporation Maintenance and Shop Manuals applicable to airplanes specified within this AD may be obtained from local Beechcraft Aviation and Aero Centers or Beech Aircraft Corporation, Commercial Service Department, 9709 East Central, Wichita, Kansas 67201. Copies of the above Service Material are located at the location specified in the "FOR FURTHER INFORMATION CONTACT" section, below.

FOR FURTHER INFORMATION CONTACT:
Ross R. Spencer, Aerospace Engineer, Aircraft Certification Program, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 269–7005.

SUPPLEMENTARY INFORMATION: An accident with a Beech Model E90 airplane was caused by a stress corrosion crack and consequent fracture of a bolt in the lower forward attachment of the left outer wing panel. The FAA determined that this accident occasioned a serious safety hazard, that an emergency condition existed, that immediate corrective action was required and that notice and public procedure thereon was impractical and contrary to the public interest. Therefore, Emergency Airworthiness Directive (EAD) was issued by airmail letter dated October 31, 1981, identified as AD 81–23–01 and became effective to registered owners upon receipt of the airmail letter. For the left and right lower forward wing attachments, the EAD requires baking of the nut and bolt as well as inspection of and application of corrosion inhibitor to fittings, nuts, bolts, and washers. The EAD also requires repair or replacement of components in these attachments which are classified as defective during required inspections.

The EAD cites 2,629 airplanes, but some are exempted because susceptibility to stress corrosion cracking is not so great as to warrant emergency AD action. The exempted airplanes have better protection against corrosion, or less adverse bolt stress, or a bolt material which is less susceptible to stress corrosion. When the exemptions are considered, the EAD actually applies only to approximately 2,400 airplanes. During compliance with the EAD, the need for a revision was recognized, and the revised version is now codified into the **Federal Register**. Differences between the original and revised versions are described below.

The 65–A88 model designation was misprinted as 65,A88. The applicability statement and language in the body of the EAD overstated intended applicability. Eligible alternate nut part numbers and an alternate corrosion inhibitor were not mentioned. Some unnecessary use of Alodine was required. Procedure for reinstallation of used preload indicating washers was not fully explained. The revised version relaxes and clarifies the original version in the above and other minor respects.

Since the unsafe condition described herein may still exist on other Beech model airplanes described herein, the AD is being published in the **Federal Register** as an amendment to Part 39 of the Federal Aviation Regulations (14 CFR Part 39) to make it effective to all persons who did not receive the letter notification.

Since the FAA has determined that there is an immediate need for this regulation to correct an unsafe condition and assure safe operation of the affected airplanes, the regulation is within the exemption provisions of section 8(a)(1) of Executive Order 12291. In addition, notice and public procedure under 5 U.S.C. 553(b) were considered impractical and contrary to the public interest, and good cause exists for making the amendment effective in less than thirty (30) days after the publication in the **Federal Register**.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive.

Beech: Applies to the following model airplanes regardless of the category or categories of airworthiness certification:

Models	Serial No. (S/N) [1]
65, A65 & A65-8200	LC-181 through LC-335.
70	LB-1 through LB-35.
65-A80, 65-A80-8800 & 65-B80.	LD-151 through LD-511 and LD-34, LD-46, LD-119.
65-A88, 65-88	LP-1 through LP-54.
65-90, 65-A90, B90 & C90	LJ-1 through LJ-929.
E90	LW-1 through LW-342.
99, 99A, B99	U-1 through U-164.
100 & A100	B-1 through B-247.
B100	BE-1 through BE-102, and BE-104.
Military	
L23F [2]	LF-7 [2] through LF-78 [2].
65-A90-1	LM-1 through LM-144.
65-A90-2	LS-1, -2, -3.
65-A90-3	LT-1, -2.
65-A90-4	LU-1 through LU-16.
NU-8F	LG-1.

[1] Except that airplanes which have installed BEECHCRAFT Kit No. 90-4077-1 S, BEECHCRAFT Kit No. 99-4023-1 S, or Aviadesign Supplemental Type Certificate SA1178CE or SA1583CE are not affected by this AD.

[2] Except that Model L23F airplanes which do not have a preload indicating washer assembly (i.e., one with radial holes in a center ring) are not affected by this AD.

Compliance: Required as indicated, unless already accomplished.

In order to assure integrity of bolts and nuts at the lower forward attachments of outer wing panels to the wing center section, accomplish the following:

(A) Prior to next flight, accomplish all of the following:

1. Remove all bolts, washers, and nuts from each lower forward wing attachment and thoroughly clean removed part. Throughout all action required by this AD:

a. Use procedures in the applicable Beech Maintenance Manual except where other procedures are specified by this AD,

b. Unless different instructions from Beech Aircraft Corporation is obtained and followed, reposition wing, as necessary, to remove or reinstall bolt by hand without using any tool,

c. Keep parts of each preload indicating washer assembly together so that parts of one assembly cannot be intermingled with parts of another assembly,

d. Clean each removed part with naptha or methyl ethyl ketone (MEK) using a bristle brush, and repeat this cleaning as necessary prior to each subsequently specified action until lubricant is applied, and

e. Accomplish all of the specified actions on both (i.e., left and right) sides of the airplane.

2. Visually inspect each bolt and nut for reddish rust. Do not classify copper residue over cadmium plating as rust. For a bolt, rust is acceptable only on the end (including not more than one thread) farthest from the head and within the counterbored recess between wrench serrations of the bolt head. For compliance with Paragraph (A)6 and (C), below, classify a bolt as rusted if rust is found elsewhere. Classify a nut as rusted if rust is found anywhere.

3. Visually inspect each bolt and nut for a pit or crack in steel (not cadmium or copper plating) material. Use 10X or stronger magnifying glass. For each bolt, pay particular attention to the fillet and shank, including threads. For each nut, pay particular attention to the chamfer (that faces the bolt head when installed) and perceptible threads adjacent to this chamfer. (Refer to Paragraphs (A)(6) and (C) below.)

4. Bake each bolt and nut continously for 23 hours at 350 degrees to 400 degrees Fahrenheit and cool in still air.

5. After accomplishment of Paragraph (A)4. above, use a magnetic particle method of Advisory Circular AC43.13–1A to inspect each bolt and nut for a crack, paying particular attention to locations specified in Paragraph (A)3, above. For each bolt, use a fluorescent particle method with 5250 to 6750 ampereturns in a coil to produce longitudinal magnetization in each bolt. (6,000 ampereturns means 2,000 amperes in a 3-turn coil or 1,000 amperes in a 6-turn coil, etc.) For each nut, use any magnetic particle method with 500 to 700 amperes through a central conductor of at least 0.6-inch diameter through two nuts to produce circular magnetization. Demagnetize each bolt and nut after the above inspection.

6. Replace each rusted, pitted, and/or cracked nut and bolt with a new Part Number (P/N) as follows:

a. If a new preload indicating (PLI) washer assembly is to be used in accordance with Paragraph (A)9, below, nut P/N is 72789–1414, 72789M–1414, FN22–1414, or FN22M–1414. ("M" in P/N denotes black coating. All eligible nuts have a locking feature which necessitates use of a wrench for full engagement with bolt.)

b. If a used PLI washer assembly is reinstalled in accordance with Paragraph (A)9, below, nut P/N is 72789–1414 or FN22–1414.

c. Bolt is P/N LWB 22–14–XX or VEP 220121–14–XX where XX is 31 for airplanes with S/N LD–34, LD–46, LD–119, and LJ–1 through LJ–67, and XX is 32 for all other airplanes affected by this AD.

Replace preload indicating washer with new P/N 61475–14–43.5 assembly (not any other P/N) if this assembly is available. Obtain new parts only from Beech Service Centers or Beech Aircraft Corporation. (Neither baking nor field inspection of new parts is necessary.) Do not replate any part.

7. Clean the bore and recessed washer seat area of the outboard and inboard wing fittings with naptha or methyl ethyl ketone (MEK). Visually inspect these areas for corrosion, burrs, gouges and coining. If any defect is found, contact Beech Aircraft Service Department, 9709 East Central, Wichita, Kansas 76201; Telephone (316) 681–7261, 7278, or 7352, for rework disposition. Also, if any defect is found, treat the bore and recessed washer seat areas of the inboard and outboard wing fittings with Alodine 1200, 1200S, or 1201. Allow the alodine coating to dry for 5 minutes. Wash the coating with water and blow dry with air without wiping. Paint treated washer seat areas with zinc chromate primer (obtain locally) and allow primer to dry.

8. Coat the inspected areas of the wing fittings, all of each bolt, all of each nut, and all of each preload indicating washer assembly with either clean MIL–C–16173, Grade 2 corrosion preventative compound or clean General Electric G322L Versilube Silicone Lubricant.

9. Install removed or new parts using standard procedures except as follows:

a. Preload indicating (PLI) washer assembly may be reused with P/N 72789–1414 and/or P/N FN22–1414 nuts, only.

b. Ascertain that a radius of the adjacent washer is next to the fillet under the bolt head and next to the outer edge of the recess in each wing fitting. Position wing as necessary to allow bolt to slide into fitting without use of any tool.

c. Tighten the joint by rotating the nut (do not turn the bolt). Use standard procedure if new PLI washer assembly is installed. If used PLI washer assembly is reinstalled, make necessary correction for any torque wrench adapter and apply 3250 to 3400 inch-pounds torque, but install new PLI washer assembly if center ring of the used assembly turns after 3400 inch-pounds torque is applied. Do not allow wrench to bear against fitting.

d. Coat entire portion of bolt that projects beyond nut, using a material that is specified in Paragraph (A)8, above.

e. Make aircraft maintenance record entry showing work accomplished, especially procedure used for tightening nut, and whether new or used PLI washer was installed.

(B) Between 90 and 110 hours time-in-service after accomplishment of action specified by Paragraph (A) of this AD, check nut tightness, using the same procedure that was used for accomplishment of Paragraph (A)9c, above.

(C) Within 3 days after replacing a part in accordance with Paragraph (A)6, above, or noting a defect when complying with this AD, submit a written report to the Federal Aviation Administration via an FAA M or D Report (FAA Form 8330–2) or a letter to the office specified in Paragraph (E), below and send the replaced part(s) to Beech Aircraft Corporation. In the submitted report, please advise date of last previous bolt removal.

(D) A special flight permit in accordance with Federal Aviation Regulation 21.197 for flight to the nearest base is permitted in order to accomplish Paragraph (A) of this AD. The nearest FAA Flight Standards District Office may be contacted to obtain a telegraphic special flight permit.

(E) Any equivalent method of compliance with this AD must be approved by the Chief, Aircraft Certification Program, Federal Aviation Administration, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209; Telephone (316) 269–7000, 7001, or 7002.

This amendment becomes effective on January 4, 1982, to all persons except those to whom it has already been made effective by an airmail letter from the FAA dated October 31, 1981.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.89 of the Federal Aviation Regulations (14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation under the President's memorandum of January 29, 1981, and an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in the aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, if prepared and when filed, may be obtained by contacting the Office of the Regional Counsel, FAA, Room 1558, Federal Aviation Administration, Central Region, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374–5446.

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review by the courts of appeals of the United States, or the United States Court of Appeals of the District of Columbia.

Issued in Kansas City, Missouri, on December 17, 1981.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 81–36972 Filed 12–30–81; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 81–NW–68–AD; Amdt. 39–4288]

Airworthiness Directives: Canadair Model CL–600 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (AD) which requires a one-time inspection of the fittings on the left and right push/pull wing flight spoiler cables on Canadair CL–600 (Challenger) airplanes, S/N 1002 to 1050 inclusive. This inspection is necessary to ensure that these cables are properly adjusted. Improper adjustment may result in disengagement of a spoiler from its control system, which, in turn, could result in a partial loss of lateral control of the aircraft.

DATES: Effective date: January 6, 1982.

ADDRESSES: The service bulletin specified in this Airworthiness Directive may be obtained upon request to Canadair Ltd, Commercial Aircraft Technical Services, Box 6087, Station A, Montreal, Canada, PQ H3C3G9, or may be examined at the FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Harold N. Wantiez, Foreign Aircraft Certification Branch, ANM–150S, Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington 98108; telephone (206) 767–2530.

SUPPLEMENTARY INFORMATION: The Canadian MOT (Ministry of Transport) has issued an airworthiness directive which requires a one-time inspection to ensure that wing spoiler cables are properly adjusted on Canadair CL–600 (Challenger) airplanes, S/N 1002 to 1050 inclusive.

Ground inspection reports revealed that the left and right push/pull wing flight spoiler cables may be improperly adjusted on certain airplanes. If improperly adjusted, a spoiler may become disengaged from its control system, resulting in asymmetrical deployment and, therefore, a partial loss of lateral control. If more than six threads are visible on the end fittings,

the spoiler cables are not properly adjusted and may become disconnected from the control system, resulting in a partial loss of lateral control. In order to prevent this from occurring, the MOT, which is the Civil Air Authority of Canada, is requiring the left and right push/pull flight spoiler cable fittings to be inspected in accordance with Canadair Alert Service Bulletin A600–0024, Revision 1, dated November 6, 1981.

This airplane model is manufactured in Canada and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, an AD is being issued which requires a one-time inspection of the flight spoiler cable fittings on certain Canadair CL–600 airplanes.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Canadair: Applies to Model CL–600 airplanes with serial number 1002 to 1050 inclusive. To prevent asymmetric spoiler deployment, accomplish the following within ten days after the effective date of this AD, unless already accomplished:

1. Visually inspect and adjust, if necessary, the left and right controlex cables (parts numbers 600–91305–5 and 600–91305–7) for compliance with the revised rigging procedure specified in Canadair Alert Service Bulletin A600–0024, Revision 1, dated November 6, 1981, or in a manner approved by the Chief, Seattle Area Aircraft Certification Office, FAA Northwest Mountain Region.

2. Airplanes may be flown in accordance with FAR 21.197 to a maintenance base for accomplishment of the inspection required by this AD.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to the addresses listed above. These documents may also be examined at FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington 98108.

This amendment becomes effective January 4, 1982.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note: The FAA has determined that this regulation is an emergency regulation that is not major under Executive Order 12291. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT."

This rule is a final order of the Administrator. Under Section 1006(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486(a)), it is subject to review by the courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Seattle, Washington, on December 17, 1981.

Robert O. Brown,

Acting Director, Northwest Mountain Region.

[FR Doc. 81–36631 Filed 12–30–81; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Airworthiness Docket No. 81–ASW–63; Amdt. 39–4288]

Swearingen Model SA–26T and SA–26AT Airplanes; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes airworthiness directive (AD) 72–7–5 and adopts a new AD for Swearingen Model SA–26T and SA–26AT airplanes. At the lower forward wing station 99 attach joint, this AD requires inspection of the fittings and bolt for deterioration and cracks, replacement of any damaged fittings, and replacement of any damaged or improperly identified bolts. This AD is needed to correct an unsafe condition that could result in the loss of a wing and subsequent loss of the airplane.

DATE: Effective December 30, 1981. Compliance required as prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from the Director of Product Support, Fairchild Swearingen Corporation, P.O. Box 32486, San Antonio, Texas 78284.

These documents may be examined at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas, or at the Rules Docket in Room 916, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: William A. Simmons, Airframe Branch, Aircraft Certification Division, ASW–120, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone number (817) 624–4911, extension 516.

SUPPLEMENTARY INFORMATION: There has been a failure at a wing attach joint similar to the wing attach joint used on the Swearingen SA–26 series airplanes. Also there have been several reports of cracked fittings and installation of incorrect part number bolts at the lower forward wing station 99 attach joint on the Swearingen airplanes. The FAA has determined that this is an unsafe condition that is likely to exist or develop on other airplanes with the same attach joint design and could result in the loss of a wing. This amendment supersedes Amendment 39–1412 (37 FR 6183) AD 72–7–5 and adopts a new airworthiness directive for Swearingen Model SA–26T and SA–26AT airplanes. At the lower forward wing station 99 attach joint, the AD requires inspection of the fittings and bolt for deterioration and cracks, replacement of any damaged fittings with new parts of the same part numbers, and replacement of any damaged or improperly identified bolt with a new MS20014–29 part number bolt.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Swearingen: Applies to Swearingen Model SA–26T, S/N T26–2 through T26–99; SA–26AT, S/N T26–100 through T26–999 airplanes certified in all categories.

Compliance required within the next 25 hours' time in service after the effective date of this AD, and thereafter at intervals of 200 hours' time in service since last compliance (Airworthiness Docket No. 81-ASW-63).

To prevent a failure at the lower forward wing station 99 attach joint, accomplish the following:

1. Remove the lower forward wing station 99 attach joint cover plate and wing attach bolt.

2. Inspect the lower forward wing station 99 attach fittings for deterioration and cracks and replace damaged parts with new parts of the same part numbers.

3. Inspect the lower forward wing station 99 attach bolt for identifying part number, deterioration and cracks and replace any damaged bolt or bolt not identified as P/N MS20014-29 bolt with a new P/N MS20014-29 bolt.

Accomplish paragraphs 1., 2., and 3. in accordance with Fairchild Swearingen Service Bulletin SB 57-40-015 revised December 4, 1981, or an equivalent means approved by the Chief, Aircraft Certification Division, FAA Southwest Region.

A special flight permit may be issued in accordance with FAR 21.197 to allow flight of the aircraft to a location where this AD can be accomplished.

This AD supersedes Amendment 39-1412, AD 72-7-5.

This amendment becomes effective December 30, 1981.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the various courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Fort Worth, Texas, on December 15, 1981.

C. R. Melugin, Jr.,

Director, Southwest Region.

14 CFR Part 71

[Airspace Docket No. 81-EA-34]

Alteration of Control Zone and Transition Area: Hagerstown, Md.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Hagerstown, Maryland, Control Zone and Transition Area by changing the description to delete "Hagerstown Regional Airport" and insert "Washington County Regional Airport". This results from a change of name of the airport by the Board of County Commissioners.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Al Reale, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The rule is clerical in nature and does not impose any additional burden on any person. In view of the foregoing, notice and public procedure hereon are unnecessary, and the rule may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) are amended, effective December 31, 1981, as follows:

1. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the text of the description of the Hagerstown, Maryland, Control Zone by deleting, "Hagerstown Regional Airport" and by substituting, "Washington County Regional Airport" therefor.

2. Amend § 71.181 of Part 71, Federal Aviation Regulations by altering the text of the description of the Hagerstown, Maryland, 700-foot floor transition area by deleting, "Hagerstown Regional Airport" and by substituting, "Washington County Regional Airport" therefor.

(Sec. 307(a), and 313(a), Federal Aviation Act of 1958 [49 U.S.C. 1348(a) and 1354(c)]; Sec. 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)]; and 14 CFR 11.69)

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York on December 1, 1981.

Timothy L. Hartnett,

Acting Director, Eastern Region.

---

14 CFR Part 71

[Airspace Docket No. 81-EA-55]

Alteration of Transition Area: Ocean City, Maryland

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Ocean City, Maryland, Transition Area by changing the description of the area by deleting the reference to the Snow Hill, Maryland, VORTAC and the airspace based thereon and substituting the Salisbury, Maryland, VORTAC and airspace thereon. This results on the implementation of a new instrument procedure.

EFFECTIVE DATE: 0901 GMT December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Al Reale, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The rule deletes an extension to the area to the southwest and substitutes an extension to the west. The overall result is a decrease in the amount of controlled airspace. The new extension is approximately 1 mile by 2 miles, not a substantial amount in the context of the reduction and the amount of controlled airspace remaining. Thus it is minor in nature and does not impose any additional burden on any person. In view of the foregoing, notice and public

procedure hereon are unnecessary, and the rule may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective December 24, 1981, by adopting the rule as follows:

1. Amend § 1.181 of Part 71, Federal Aviation Regulations by altering the description of the Ocean City, Maryland 700-foot floor transition area by deleting, "within 2.5 miles each side of the Snow Hill, Md., VORTAC 047° radial, extending from the 5-mile radius area to 18.5 miles northeast of the VORTAC" and by substituting, "within 2-miles each side of the Salisbury, Md., 096° radial extending from the 5-mile radius area to 14 miles east of the VORTAC" therefor.

(Sec. 307(a), and 313(a), Federal Aviation Act of 1958 [49 U.S.C. 1348(a) and 1354(c)]; Sec. 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)]; and 14 CFR 11.69.)

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York on December 1, 1981.

Timothy L. Hartnett,

Acting Director, Eastern Region.

14 CFR Part 71

[Airspace Docket No. 81-EA-46]

Alteration of Control Zone and Transition Area; Jamestown, N.Y.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Jamestown, New York, Control Zone and Transition Area. The alteration will delete airspace extensions based upon the NDB, VOR and ILS, as these are no longer needed. It will also add a small area of controlled airspace due to the authorization of two new RNAV procedures. The foregoing results from a review of the airspace needs at Jamestown, New York.

EFFECTIVE DATE: 0901 GMT, January 21, 1982.

FOR FURTHER INFORMATION CONTACT: Al Reale, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The rule is minor in nature since the added airspace is only two 1-mile by 4-miles extensions, and does not impose any additional burden on any person. In view of the foregoing, notice and public procedure hereon are unnecessary, and the rule may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) are amended, effective January 21, 1982, by adopting the rule as follows:

1. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the description of the Jamestown, New York, Control Zone by deleting, "; within 2 miles each side of the Jamestown, N.Y., VOR 071° and 251° radials extending from the 5-mile radius zone to the VOR and within 2 miles each side of a 053° bearing from the Jamestown, N.Y., RBN (42°11'02"N., 79°11'15"W.) extending from the 5-mile radius zone to 7 miles northeast of the RBN."

2. Amend § 71.181 of Part 71, Federal Aviation Regulations, by altering the description of the Jamestown, New York, 700-foot floor transition area by deleting, "within 2 miles each side of the Jamestown VOR 071° and 251° radials, extending from the 7-mile radius area to 8 miles northeast of the VOR; and within 2 miles each side of a 053° bearing from the Jamestown, N.Y., RBN (42°11'02"N., 79°11'15"W.) extending from the 7-mile radius area to 8 miles northeast of the RBN; within 2 miles each side of the Jamestown, N.Y., ILS localizer northeast course extending from the 7-mile radius area to 8 miles northeast of the ILS OM." and substitute, "within 2.5 miles each side of the Runway 31 extended runway centerline extending from the 7-mile radius area to 8 miles northwest of the runway; and within 2.5 miles each side of the Runway 13 extended runway centerline extending from the 7-mile radius area to 9 miles southeast of the runway."

(Sec. 307(a), and 313(a), Federal Aviation Act of 1958 [49 U.S.C. 1348(a) and 1354(c)]; Sec. 6(c) of the Department of Transportation Act [49 U.S.C 1655(c)]; and 14 CFR 11.69)

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York on December 8, 1981.

14 CFR Part 71

[Airspace Docket No. 81-EA-31]

Alteration of Control Zone and Transition Areas; Newburgh, New York and Wurtsboro, New York

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Newburgh, New York, Control Zone, and Transition Area and the Wurtsboro, New York, Transition Area, by deleting in the descriptions reference to the Stewart VOR and airspace based thereon. This results from a cancellation of the instrument procedures based on the VOR.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Al Reale, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The rule is relaxatory in nature since it releases controlled airspace and does not impose

any additional burden on any person. In view of the foregoing, notice and public procedure hereon are unnecessary, and the rule may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) are amended, effective upon December 31, 1981, as follows:

1. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the description of the Newburgh, New York, Control Zone by deleting, "066° bearing from the airport; within 3 miles each side of the Stewart VOR (41°30'30" N., 74°05'51" W.) 325° radial, extending from the VOR to 15 miles northwest of the VOR and 4.5 miles each side of the Stewart VOR 085° radial, extending from the VOR to 11.5 miles east of the VOR, excluding the portion that coincides with the Poughkeepsie, New York, Control Zone," and substitute therefor, "066° bearing from the airport."

2. Amend § 71.181 of Part 71, Federal Aviation Regulations, by altering the description of the Newburgh, New York, 700-foot floor Transition Area by deleting, "within 3.5 miles each side of the Stewart VOR (41°30'30" N., 74°05'51" W.) 325° radial, extending from the Stewart VOR to 18.5 miles northwest of the Stewart VOR; within 5 miles each side of the Stewart VOR 085° radial, extending from the Stewart VOR to 13 miles east of the Stewart VOR;"

3. Amend § 71.181 of Part 71, Federal Aviation Regulations, by altering the description of the Wurtsboro, New York, 700-foot floor Transition Area by deleting, "within 4.5 miles north and 6.5 miles south of the Stewart VOR (41°30'30" N., 74°05'51" W.) 288° radial extending from 2.5 miles west to 19.5 miles west of the Stewart VOR;".

(Sec. 307(a), and 313(a), Federal Aviation Act of 1958 [49 U.S.C. 1348(a) and 1354(c)]; Sec. 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)]; and 14 CFR 11.69)

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York on December 1, 1981.

[Airspace Docket No. 81-ASW-45]

Designation of Transition Area; Freeport, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will designate a transition area at Freeport, TX. The intended effect of the amendment is to provide adequate controlled airspace for helicopters executing a new instrument approach procedure to the Petroleum Helicopters, Inc. (PHI), landing area, Freeport, TX. This amendment is necessary to provide controlled airspace for helicopters executing an instrument approach procedure to a point in space east of the PHI landing area.

EFFECTIVE DATE: March 18, 1982.

FOR FURTHER INFORMATION CONTACT: James L. Owens, Airspace and Procedures Branch (ASW-536), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 624-4911, extension 302.

SUPPLEMENTARY INFORMATION: On October 26, 1981, a notice of proposed rulemaking was published in the **Federal Register** (46 FR 52124) stating that the Federal Aviation Administration proposed to designate the Freeport, TX, transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, by the Administrator, § 71.181 of Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (46 FR 540) is amended, effective 0901 GMT, March 18, 1982, as follows:

Freeport, Texas

That airspace extending upward from 700 feet above the surface within 2.5 miles each side of the Scholes VORTAC 220° radial at point beginning 19.5 miles southwest of the VORTAC and extending to 26.5 miles southwest.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 1103; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal.

Issued in Fort Worth, TX, on December 17, 1981.

F. E. Whitfield,

Acting Director, Southwest Region.

[FR Doc. 81-38873 Filed 12-30-81; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 81-EA-52]

Alteration of Control Zones; Allentown, Pa., Charlottesville, Va., Caldwell, N.J., Lynchburg, Va., Middletown, Pa., Morristown, N.J., Niagara Falls, N.Y., Reading, Pa., Syracuse, N.Y., Trenton, N.J., Wheeling, W. Va., White Plains, N.Y.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the subject Control Zones by changing the hours of effectivity to less than 24 hours of operation. It also permits changing future hours of effectivity by reference to the Notices to Airmen. This all results from a temporary reduction in staffing.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Al Reale, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: The rule is relaxatory in nature in that it reduces the time of effective controlled airspace and does not impose any additional burden on any person. In view of the foregoing, notice and public procedure hereon are unnecessary, and the rule

may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of the Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective upon December 31, 1981, as follows:

1. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Allentown, Pennsylvania, Control Zone description by adding, "This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." therefor.

2. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Caldwell, New Jersey, Control Zone description by deleting, "This control zone is effective from 0800 to 2200 hours, local time, daily." and by substituting, "This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." thereto.

3. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the description of the Charlottesville, Virginia, Control Zone by adding, "This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published in the Airport/Facility Directory." thereto.

4. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Lynchburg, Virginia, Control Zone description by deleting, "This control zone is effective from 0700 to 2300 hours, local time, daily." and by substituting, "This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." therefor.

5. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Middletown, Pennsylvania, Control Zone description by adding, "This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." thereto.

6. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Morristown, New Jersey, Control Zone description by deleting, "This control zone is effective from 0630 to 2230 hours, local time, daily." and by substituting "This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." therefor.

7. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Niagara Falls, New York, Control Zone description by adding, "This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." thereto.

8. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Reading, Pennsylvania, Control Zone description by adding, "This control zone is effective during specific dates and time established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." thereto.

9. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Syracuse, New York, Control Zone description by adding, "This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." therefor.

10. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Trenton, New Jersey, Control Zone description by adding, "This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." thereto.

11. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the Wheeling, West Virginia, Control Zone description by adding, "This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." thereto.

12. Amend § 71.171 of Part 71, Federal Aviation Regulations, by altering the White Plains, New York, Control Zone description by adding, "This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be published continuously in the Airport/Facility Directory." thereto.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, N.Y., on December 8, 1981.

SUMMARY: This rule revokes the Hopewell, Virginia, Transition Area. This results from cancellation of the instrument approach procedure for Hopewell Airport.

EFFECTIVE DATE: 0901 GMT, December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Al Reale, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: This rule is relaxatory in nature and does not impose any additional burden on any person. In view of the foregoing, notice and public procedure hereon are unnecessary, and the rule may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective December 24, 1981, by adopting the rule as follows:

1. Amend § 71.181 of Part 71, Federal Aviation Regulations by deleting the Hopewell, Virginia 700-foot floor transition area in its entirety.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, N.Y. on December 1, 1981.

Timothy L. Hartnett,

Acting Director, Eastern Region.

BILLING CODE 4910-13-M

CIVIL AERONAUTICS BOARD

14 CFR Part 204

[Regulation ER-1273; Amend. 3]

Data To Support Fitness Determinations; Approval by the Office of Management and Budget

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The note at the end of this Part 204 concerning clearance of the requirement for the filing of data to support various air carrier fitness determinations is revised to indicate approval of the reporting requirements by the Office of Management and Budget (OMB). This action is required because the responsibility for approval of the CAB's reporting requirements was transferred from the General Accounting Office to OMB by the Paperwork Reduction Act of 1980.

DATES: Adopted: December 24, 1981. Effective: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Clifford M. Rand, Chief, Data Requirements Division, Office of Comptroller, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D. C. 20428, (202) 673-6042.

PART 204—DATA TO SUPPORT FITNESS DETERMINATIONS

Accordingly, the Civil Aeronautics Board amends Part 204 of its Economic Regulations (14 CFR Part 204) by revising the note at the end of Part 204 to read:

Note.—The application requirements contained in §§ 204.4, 204.5, 204.6 and 204.7 have been approved by the Office of Management and Budget under number 3024-0041.

This amendment is issued by the undersigned pursuant to delegation of authority from the Board to the Secretary in 14 CFR 385.24(b).

(Sec. 204, of the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324))

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary

14 CFR Part 221

[Regulation ER-1271; Amdt. 59]

Tariffs; Approval by the Office of Management and Budget

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The note at the end of this Part 221 concerning the clearance of the requirement for the filing of tariffs by air carriers and foreign air carriers is revised to indicate approval of the reporting requirements by the Office of Management and Budget (OMB). This action is required because the responsibility for approval of the CAB's reporting requirements was trasnferred from the General Accounting Office to OMB by the Paperwork Reduction Act of 1980.

DATES: Adopted: December 24, 1981. Effective: December 24, 1981.

FOR FURTHER INFORMATION CONTACT: Clifford M. Rand, Chief, Data Requirements Division, Office of Comptroller, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673-6042.

Part 221—TARIFFS

Accordingly, the Civil Aeronautics Board amends Part 221 of its Economic Regulations (14 CFR Part 221) by revising the note at the end of Part 221 to read:

Note.—The filing requirements contained in this part have been approved by the Office of Management and Budget under number 3024–0030.

This amendment is issued by the undersigned pursuant to delegation of authority from the Board to the Secretary in 14 CFR 385.24(b).

(Sec. 204, the Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324))

By the Civil Aeronautics Board.

[Regulation ER–1267; Amdt. 12]

Free and Reduced-Rate Transportation; Approval by the Office of Management and Budget

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The note at the end of this Part 223 concerning the clearance of reporting requirements associated with the furnishing of free and reduced-rate transportation by air carriers is revised to indicate approval of the reporting requirements by the Office of Management and Budget (OMB). This action is required because the responsibility for approval of the CAB's reporting requirements was transferred from the General Accounting Office to OMB by the Paperwork Reduction Act of 1980.

DATES: Adopted: December 24, 1981. Effective: December 24, 1981.

FOR FURTHER INFORMATION CONTACT:

Clifford M. Rand, Chief, Data Requirements Division, Office of Comptroller, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673–6042.

PART 223—FREE AND REDUCED-RATE TRANSPORTATION

Accordingly, the Civil Aeronautics Board amends Part 223 of its Economic Regulations (14 CFR Part 223) by revising the note at the end of Part 223 to read:

Note.—The reporting requirements contained in §§ 223.2(c), 223.6, 223.7 and the application requirement contained in § 223.8 have been approved by the Office of Management and Budget under number 3024–0002.

This amendment is issued by the undersigned pursuant to delegation of authority from the Board to the Secretary in 14 CFR 385.24(b).

(Sec. 204, Federal Aviation Act of 1958, as amended, 72 Stat. 743 (49 U.S.C. 1324))

BILLING CODE 6320-01-M

14 CFR Part 302

[Reg. PR-233; Amdt. No. 64 to Part 302]

Removal of Subpart K Costing Methodology

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The CAB amends its procedural rules to remove an obsolete scheme for preparing cost estimates in certain route cases.

DATES: Adopted: December 16, 1981. Efective: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Mark Schwimmer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202-673-5442.

SUPPLEMENTARY INFORMATION: The Board is amending its procedural rules (14 CFR Part 302) to eliminate Subpart K, *Standardized Method for Costing Proposed Changes in the Authorized Operations of Local Service Carriers.* This costing methodology has largely fallen into disuse. The local service carriers no longer exist as a separate classification of air carriers. The cost of operating a given route segment has not been at issue in domestic route proceedings for several years, and will be legally irrelevant after December 31, 1981, when the Board loses the authority to name terminal and intermediate points in certificates for interstate and overseas passenger air transportation. And while costs can still be relevant in international route proceedings, the Subpart K method has not been used there for several years either.

Since this action is procedural in nature and merely removes an obsolete provision, the Board finds that notice and public procedure are unnecessary and that the amendment may become effective less than 30 days after publication in the **Federal Register.**

Accordingly, the Civil Aeronautics Board amends 14 CFR Part 302, Rules of Practice in Board Proceedings, as follows:

PART 302—RULES OF PRACTICE IN BOARD PROCEEDINGS

1. The authority for Part 302 is:

Authority: Secs. 101, 203, 204, 401, 402, 403, 404, 406, 412, 901, 1001, 1002, 1005, Pub. L. 85-726, as amended, 72 Stat. 737, 742, 743, 754, 757, 758, 760, 763, 770, 783, 788, 794; (49 U.S.C. 1301, 1323, 1324, 1371, 1372, 1373, 1374, 1376, 1382, 1471, 1481, 1482, 1485); Reorganization Plan No. 3, 75 Stat. 837, 26 FR 5989; E.O. 11514, Pub. L. 91-90, (42 U.S.C. 4321; 84 Stat. 772, 39 U.S.C. 5402)

2. The Table of Contents is amended by removing Subpart K.

§§ 302.1101-302.1109 (Subpart K) [Reserved]

3. Subpart K, §§ 302.1101-302.1109, *Standardized Method for Costing Proposed Changes in the Authorized Operations of Local Service Carriers,* is removed and reserved.

By the Civil Aeronautics Board.

[Docket No. 19497; Amdt. No. 93-45]

Special Airport Traffic Areas and Air Traffic Rules for Abbotsford, BC, and Sault Ste. Marie, ON, Canada

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This action corrects Amendment 45 to Part 93 of the Federal Aviation Regulations published on December 10, 1981 (46 FR 60420). The section numbers assigned to the new Subpart Q created by the Amendment had previously been assigned to Subpart P. The effect of this correction is to renumber those sections. Additionally, this action corrects a minor discrepancy in the description of the Abbotsford, BC, Special Airport Traffic Area.

EFFECTIVE DATE: December 21, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. William C. Davis, Air Traffic Rules Branch (AAT-220), Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–3128.

SUPPLEMENTARY INFORMATION: Since this action is necessary to prescribe the originally intended regulatory amendments under Amendment 93–45 and since this action is corrective in nature, I find that notice and public procedure regarding the action are impractical and unnecessary. Further, since it would not be in the public interest or consistent with sound regulatory practice to delay making necessary corrections to the Amendment, good cause exists for making it effective in less than 30 days after publication.

PART 93—SPECIAL AIR TRAFFIC RULES AND AIRPORT TRAFFIC PATTERNS

Adoption of the Amendment

The following corrections are made in FR Docket No. 81–35289, appearing on page 60420, in the Federal Register issue of December 10, 1981:

1. On page 60421, in column 1, "§ 93.181" is corrected to read "§ 93.195."

2. On page 60421, in column 1, "§ 93.183" is corrected to read "§ 93.197."

3. On page 60421, in column 2, "§ 93.185" is corrected to read "§ 93.199."

4. On page 60421, in column 1, the description of the Abbotsford, BC, Special Airport Traffic Area is corrected to include the words "east to and" after the words "a line beginning 49°59'00" N; 122°21'45" W, thence."

(Secs. 307 and 313(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348, and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)), and 14 CFR 11.45)

Note.—The FAA has determined that this document involves a correction to a regulation which is—(1) Not major under Executive Order 12291; and (2) not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this correction does not substantively affect the Amendment, the FAA certifies that it will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, DC, on December 21, 1981.

J. Lynn Helms,

Administrator.

[FR Doc. 81-37140 Filed 12-30-81; 8:45 am]

BILLING CODE 4910-13-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1260

Regulatory Coverage for Grants and Cooperative Agreements With Educational Institutions and Other Nonprofit Organizations

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rule.

SUMMARY: This document contains the 1981 revision and Change 1 of the NASA Grant and Cooperative Agreement Regulation (14 CFR Part 1260). This document implements the Federal Grant and Cooperative Agreement Act of 1977 and it provides educational institutions and other nonprofit organizations information of mutual interest designed to further a close cooperative working relationship with NASA in achieving national goals.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: James H. Wilson, Policy Division (Code HP–1), Office of Procurement, NASA Headquarters, Washington, DC 20546, Telephone: 202–755–2237.

SUPPLEMENTARY INFORMATION: This document implements the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. 95–224 (41 U.S.C. 501 et seq.) and establishes uniform policies and procedures relating to the negotiation, award, and administration of research grants and cooperative agreements with educational institutions and other nonprofit organizations.

a. Section 1260.203 provides guidance on the appropriate choice of award instruments consistent with the Act and Office of Management and Budget (OMB) implementation of that Act.

b. Section 1260.303 provides guidance in determining the allowability of costs chargeable to research supported by NASA under grants and cooperative agreements.

c. Section 1260.304 reflects a revision in cost sharing policy for educational institutions.

Stuart J. Evans,

Director of Procurement.

Accordingly, 14 CFR Part 1260 is revised to read as follows:

PART 1260—GRANTS AND COOPERATIVE AGREEMENTS

Subpart 1—General

Sec.
1260.100 Purpose.
1260.101 Applicability.
1260.102 Arrangement of part.
1260.103 Contents.
1260.104 Amendment.
1260.105 Dissemination and effective date of the part and amendments.
1260.106 Applicability.
1260.107 Definitions.

Subpart 2—Basic Policies

1260.200 Authority.
1260.201 Policy.
1260.202 Proposals.
1260.203 Criteria for selection of award instrument.
1260.204 Processing the instruments.
1260.205 Civil Rights Act of 1964—Nondiscrimination in certain Federally funded programs.
1260.206 Printing, binding, and duplicating.
1260.207 Procurement of helium.
1260.208 Clean Air and Federal Water Pollution Control Acts.
1260.209 Patent rights in inventions.

Subpart 3—Award of Grants and Cooperative Agreements

1260.301 Instruments.
1260.302 Format.
1260.303 Allowable costs.
1260.304 Cost sharing.
1260.305 Long-term stability.
1260.306 Numbering of instruments.
1260.308 Retention of documents for on-site audit.

Subpart 4—Research Grant and Cooperative Agreement Provisions

1260.400 General.
1260.401 Technical reports and publications.
1260.402 Extensions.
1260.403 Revocation.
1260.404 Travel.
1260.405 Allowable Costs.
1260.406 Accounting records.
1260.407 Payment.
1260.408 Equipment and other property.
1260.409 Patent rights (small business firm or nonprofit organization).
1260.410 Rights in data.
1260.411 Security.
1260.412 Civil rights.
1260.413 Safety.
1260.414 Subcontracts.
1260.415 Changes in principal investigator or technical objectives.
1260.416 Communications.
1260.417 Financial management system.
1260.418 Procurement standards.
1260.419 Additional provision for cooperative agreements.
1260.420 Special conditions.

Subpart 5—Administration of Research Grants and Cooperative Agreements

1260.501 General.
1260.502 Instrument.
1260.503 Instrument period.
1260.504 Adherence to original budget estimates.
1260.505 Use, disposition and vesting of title to research equipment.
1260.506 Revocation.
1260.507 Transfer of grants or cooperative agreements to other institutions.
1260.508 Accounting procedures
1260.509 Property management standards.
1260.510 Screening of requests for Government-furnished equipment.
1260.511 Standards for grantee's financial management systems.
1260.512 Procurement standards.
1260.513 Suspension and termination procedures.
1260.514 Closeout procedures.
1260.515 Novation and change of name agreements.

Subpart 6—Reports

1260.600 General.
1260.601 Individual Procurement Action Report (NASA Form 507).
1260.602 Committee on Academic Science and Engineering (CASE) Reports.
1260.603 Federal Cash Transactions Report (SF 272).
1260.604 Annual Inventory Listing of Government-Owned Property.
1260.605 Status and final reports.
Appendix—Listing of Exhibits and Attachments.
Exhibit G—Patent Rights (Small Business Firm or Nonprofit Organization).

Authority: Pub. L. 95–224, 92 Stat. 3 (41 U.S.C. 501 et seq).

Subpart 1—General

§ 1260.100 Purpose.

This part 1260, issued by the Director of Procurement under authority delegated by the Administrator, establishes for the National Aeronautics and Space Administration (NASA) uniform policies and procedures relating to the negotiation, award and administration of research grants and cooperative agreements with educational institutions and other nonprofit organizations, under the authority of Pub. L. 95–224 (41 U.S.C. 501 et seq.).

§ 1260.101 Applicability.

This part applies to all research grants and cooperative agreements made by NASA with educational institutions and other nonprofit organizations.

§ 1260.102 Arrangement of part.

(a) *General plan.* This part is divided into subparts. Each one deals with a separate aspect of research grants and cooperative agreements, and is further subdivided into sections.

(b) *Numbering.* The numbering of individual sections and pages is not necessarily consecutive, and is designed to permit subsequent insertion of additional sections and pages within the appropriate subpart. The first digit of a section number indicates the subpart, and the second two digits indicate the section sequence in that subpart in which the particular section is set forth. Thus, § 1260.203 indicates the third section in Subpart 2 of this part.

§ 1260.103 Contents.

This part 1260 is published to achieve maximum uniformity throughout NASA and will be amended from time to time. Personnel involved with grants and cooperative agreements are encouraged to submit suggestions for improving the procedures set forth in this part. Such suggestions should be submitted to the Office of Procurement, NASA Headquarters (Code HP–1).

§ 1260.104 Amendment.

(a) *Changes.* This part will be amended by issuance of printed loose-leaf "Changes" containing revised or additional pages, sections, or subparts. Each revised or new page of a change will bear, at the top, the date of the change and the change number. Changes to this part will be published in the Federal Register.

(b) *NASA Grant and Cooperative Agreement Handbook Instruction.* The Handbook may be amended by means of a NASA Grant and Cooperative Agreement Handbook Instruction when (1) it is necessary to provide rapid dissemination of new or revised grant and cooperative agreement policies or procedures pending their incorporation into the next published change to the Handbook; or (2) the policy or procedure is expected to be effective for 1 year or less. The NASA Grant and Cooperative Agreement Handbook Instructions will be numbered consecutively.

§ 1260.105 Dissemination and effective date of the part and amendments.

(a) The NASA grant and cooperative agreement handbook, Changes and Instructions will be distributed directly to NASA installations. The number of copies of the Handbook, Changes, and Instructions will be distributed on the basis of the requirements furnished by each Headquarters Staff Office, Headquarters Program Office, and NASA installation to the Office of Procurement, NASA Headquarters, Procurement Policy Division (Code HP–1).

(b) Directors of Installations and the Procurement Policy Division at Headquarters will ensure that copies of the NASA Grant and Cooperative Agreement Handbook are distributed to all interested activities and individuals within their installation.

(c) Copies of the NASA Grant and Cooperative Agreement Handbook, Changes and Instructions may be purchased by private concerns, universities and individuals from the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402.

(d) Compliance with an amendment to the NASA Grant and Cooperative Agreement Handbook shall be optional effective with the date of issuance thereof, and shall be mandatory effective 60 days thereafter, except as may be otherwise prescribed in a Change or Instruction.

§ 1260.106 Deviations.

(a) *Applicability.* A deviation shall be considered to be any of the following:

(1) When a prescribed grant or cooperative agreement clause is set forth verbatim in this part, use of a clause covering the same subject matter which varies from, or has the effect of altering, the prescribed clause, or changing its application;

(2) When a grant or cooperative agreement clause is set forth in this part but not for use verbatim, use of a clause covering the same subject matter which is inconsistent with the intent, principle and substance of the part clause or related coverage of the subject matter;

(3) Omission of any mandatory grant or cooperative agreement clause;

(4) When a NASA or other form is prescribed by this part, use of any other form for the same purpose;

(5) Alteration of a NASA or other form prescribed in this part except as authorized herein;

(6) When limitations are imposed by this part upon the use of a grant or cooperative agreement clause, form, procedure, or any other grant or cooperative agreement action, the imposition of lesser or greater limitations; or

(7) When a policy, procedure, method, or practice of conducting grant actions is prescribed in this part, any policy, procedure, method, or practice inconsistent therewith.

(b) *Approval of deviations.* Deviations from this part 1260 will be authorized only when essential to effect necessary grant or cooperative agreement actions or where special circumstances make such deviations clearly in the best interests of the Government. Such deviations will be approved only by the Director of Procurement or a duly authorized representative.

(c) *Request for deviations.* Requests for authority to deviate from this part 1260 shall be submitted to the Director of Procurement, NASA Headquarters (Code HS–1). Such requests shall be signed by the Procurement Officer of a field installation (or the Director of the Division in the case of the Headquarters Contracts and Grants Division) and shall be submitted as far in advance as exigencies of the situation will permit.

(d) Each request for a deviation shall contain as a minimum:

(1) Identification of the part requirement from which a deviation is sought;

(2) A full description of the deviation and the circumstances in which it will be used;

(3) A description of the intended effect of the deviation;

(4) A statement as to whether the deviation has been requested previously, and, if so, circumstances of the previous request;

(5) The name of the grantee or party to a cooperative agreement and identification of the grant or cooperative agreement affected, including the dollar value; and

(6) Detailed rationale for the request, including any pertinent background information, that will contribute to a fuller understanding of the deviation sought.

§ 1260.107 Definitions.

As used throughout this Part 1260, the words and terms defined in this section shall have the meanings set forth below, unless the context in which they are used clearly requires a different meaning, or a different definition is prescribed for a particular subpart or portion thereof. In particular, the term "grant" applies to "grant" and "cooperative agreement" unless otherwise indicated.

(a) *Administrator.* The Administrator or Deputy Administrator of NASA.

(b) *Director of Procurement.* The Director of Procurement, Office of Procurement, NASA Headquarters (Code H).

(c) *Basic research.* Systematic, intensive study directed toward greater knowlege or understanding of the subject studied.

(d) *Educational institution.* Any institution which (1) has a faculty, (2) offers courses of instruction and (3) is authorized to award a degree upon completion of a specific course of study.

(e) *Equipment.* As used in this part, "equipment" is another term for nonexpendable personal property.

(i) *Government furnished equipment.* Equipment in the possession of, or acquired directly by, the Government and subsequently delivered or otherwise made available to a grantee.

(ii) *Acquired equipment.* Equipment purchased or fabricated with grant or cooperative agreement funds by a recipient, for the performance of research under its grant or cooperative agreement.

(f) *Grants officer.* A contracting officer who has been delegated authority to award and administer grants and cooperative agreements.

(g) *Grant specialist.* Any employee of NASA who is assigned the responsibility of negotiating with potential grantees the terms and conditions of specific grants and cooperative agreements, and the administration of such grants or cooperative agreements.

(h) *NASA.* The National Aeronautics and Space Administration.

(i) *Subcontract.* A written agreement between a grantee and a third party for the furnishing of services or supplies necessary to carry out the research under a grant or cooperative agreement.

(j) *Support.* Funding of a research project meeting NASA mission objectives.

(k) *Technical officer.* The official of the cognizant NASA program office who is responsible for monitoring the technical aspects of the work under a grant or cooperative agreement.

Subpart 2—Basic Policies

§ 1260.200 Authority.

Under the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. 95–224 (41 U.S.C. 501 et. seq.), NASA is authorized to award grants and cooperative agreements. Pub. L. 95–224 includes (as Section 7(b)) the substance of the repealed "Grants Act" (42 U.S.C. 1891, 1892) pertaining to the vesting of title to equipment purchased with Federal funds in a nonprofit organization. It expands this authority to other tangible personal property and applies to cooperative agreements and contracts as well as grants.

§ 1260.201 Policy.

(a) NASA policy is to use the grant instrument to sponsor required basic research at nonprofit institutions or organizations when it is desired (1) to accomplish a public purpose of support or stimulation in the area of basic research, (2) when no substantial NASA involvement in the technical performance is anticipated, (3) to provide latitude to investigators that will encourage maximum creativity, and (4) to have the minimum administration consistent with the public interest.

(b) NASA policy is to use the cooperative agreement for the same purpose as grants, except that substantial Federal involvement in significant aspects of the effort are necessary for its accomplishment.

(c) In addition, it is NASA policy to provide appropriate continuity of support in research sponsored under grants.

§ 1260.202 Proposals.

(a) *General.* An activity leading to a grant or cooperative agreement must be supported by a valid proposal from the prospective recipient organization. Proposals are not categorized as "grant proposal" or "contract proposal." In many cases the proposals received will be unsolicited. However, instrument selection under the Federal Grant and Cooperative Agreement Act, Pub. L. 95–224, is independent of proposal type; therefore, some grants and cooperative agreements will be based on solicitations. This Subpart 2 provides information for the grants officer in processing actions based on either type of proposal.

(b) *Unsolicited proposals*—(1) *Refrerences.* 41 CFR Ch. 18, 4.9 contains basic agency guidance on unsolicited proposals applicable to all classes of performers. NASA Management Instruction 8330.1, "Unsolicited Proposals From Universities," provides additional guidance for educational institutions only. Proposal submission information for educational institutions is covered in "The NASA-University Program: A Guide to Policies and Procedures," which should be provided to academic researchers in response to requests.

(2) *Policy.* It is NASA policy to foster and encourage the submission of unsolicited proposals and, in particular, to develop policies and procedures which not only encourage their submission, but which avoid, to the extent possible, those factors which tend to discourage the generation and acceptance of innovative ideas by the unsolicited proposal mechanism (see 41 CFR Ch. 18, 4.903).

(3) An unsolicited proposal, by definition, is a written offer to perform a proposed task or effort, initiated and submitted to NASA by an institution without a solicitation by NASA. It is important to note that contact with agency technical personnel prior to proposal submission is permissible and is encouraged to determine if preparation of a formal submission is warranted. Such discussions, confined to the limited objectives of conveying to the potential offeror an understanding of the agency mission and needs relative to the type of effort contemplated, do not jeopardize the unsolicited status of any subsequently submitted proposal. (See 41 CFR, Ch. 18, 4.904 and 4.905.)

(4) *Proposal validity.* The validity of a proposal received with a procurement package should be verified. In particular, it must have been approved by a responsible official or authorized representative of the organization submitting the proposal, or a person authorized to contractually obligate the organization. (See 41 CFR, Ch. 18, 4.909.) Incomplete or sketchy "informal" or "preliminary" proposals or technical correspondence, as defined by 41 CFR, Ch. 18, 4.904 and 4.908(d), do not qualify as unsolicited proposals.

(5) If any such invalid proposals are received for procurement action, the grants officer should give the institution an opportunity to provide the missing information. (See 41 CFR, Ch. 18, 4.909.) In the event excessive delay or possible cancellation of the procurement is contemplated, the procurement request initiator should be notified.

(6) *Proposals from other agencies.* NASA will not accept for formal evaluation unsolicited proposals initially submitted to another agency or the Jet Propulsion Laboratory, Pasadena, CA without the express consent of the offeror. (See 41 CFR Ch. 18, 4.912(a).) In the event such a proposal is received as the basis for a procurement action and the required consent is lacking, the grants officer should contact the institution to determine if conversion to a formal submission to NASA is desired. The institution may at that time submit any desired revisions or other material necessary. The procurement initiator should be notified of any substantive changes.

(7) *Use of data.* Some proposals may have a notice on the cover intended to maintain trade secret rights. The notice set forth in 41 CFR, Ch. 18, 1.304–2 is:

> Data on pages ——— of this proposal constitute a trade secret. It is furnished to the Government in confidence with the understanding that it will not, without permission of the offeror, be used or disclosed other than for evaluation purposes: *Provided, however,* In the event a contract is awarded on this proposal, the Government may obtain in the contract additional rights to use and disclose this data.

If the grants officer receives an unsolicited proposal containing a notice and the terms are more restrictive than those provided in the notice above, the grants officer shall inquire whether the offeror is willing to accept the conditions of the notice set forth in 41 CFR, Ch. 18, 1.304–2. Should the offeror not agree, local counsel should be consulted concernng the legal effect of the more restrictive conditions imposed by the offeror. (See 41 CFR, Ch. 18, 4.913.) This situation should rarely occur in actions with universities.

(8) *Prohibitions.* NASA shall not permit all or any part of an unsolicited proposal to be used as the basis, or portion of, a solicitation, or in negotiation with other organizations

unless the offeror is notified of and agrees to the intended use. However, nothing herein precludes the Government from using any data, concept or idea which it could have used had the unsolicited proposal not been submitted. (See 41 CFR, Ch. 18, 4.911.)

(9) *Foreign proposals.* Proposals from foreign sources are additionally subject to the provisions of NASA Procurement Directive 1362.1, "Initiation and Development of International Participation and Cooperation in Aeronautical and Space Program." Field installations will forward purchase requests for foreign proposals to the Headquarters Contracts and Grants Division, Code HW–2, through the International Affairs Division, Code LI, for procurement action. (See 41 CFR, Ch. 18, 4.914.)

(10) *Justification for acceptance.* (i) A negotiated, noncompetitive grant or cooperative agreement is permissible and will be used when an unsolicited proposal has received a favorable technical evaluation, except as noted in paragraph (b)(4) of this section. The technical office sponsoring the procurement shall support its recommendation with a "Justification for Acceptance of Unsolicited Proposal." The "Justification" shall be based on a comprehensive evaluation of the proposal. The "Justification" shall include the facts and circumstances that operate to preclude competition and that support the recommended noncompetitive action. Consideration shall include the following evaluation factors (see 41 CFR, Ch. 18, 4.910(b)):

(A) Unique, innovative, or meritorious methods, approaches, or ideas which have originated with or have been assembled together by the offeror that are contained in the proposed effort or activity;

(B) Overall scientific, technical, or socio-economic merits of the proposed effort or activity;

(C) Potential contribution which the proposed effort is expected to make to the agency's specific mission, if pursued at this time;

(D) Capabilities, related experience, facilities, or techniques, or unique combinations thereof which the offeror possesses and offers, and which are considered to be integral factors for achieving the scientific, technical, or socio-economic objective(s) of the proposal; and

(E) Qualifications capabilities and experience of the proposed principal investigator, team leader, or key personnel who are considered to be critical in achieving the objectives of the proposal (see 41 CFR, Ch. 18, 4.909(d)).

(ii) In reviewing the "Justification" the grants officer should bear in mind that paragraph (b)(10)(i) is generally descriptive of research as performed by academic institutions and of research typically suitable for support by a grant or cooperative agreement. Since research proposals of this type are intellectual products, it is inappropriate and unrealistic to attempt to establish that no one else can perform similar research. It is only necessary to establish that the proposal is the only one available for the type of effort contemplated or has better promise than related or overlapping ones available for evaluation at the same time.

(iii) In isolated instances, a favorable comprehensive evaluation of a university unsolicited proposal is not, in itself, sufficient justification for negotiating on a noncompetitive basis with the offeror. When a document qualifies as an unsolicited proposal but the substance (A) is available to the Government without restriction from another source or (B) closely resembles that of a pending competitive solicitation, or (C) is otherwise not sufficiently unique to justify acceptance, the unsolicited proposal shall not be acceptable. When procurement is intended and competition is feasible, the proposal shall be returned to the offeror together with the reasons for the return. The procurement request initiator shall be notified before such action is taken. (See 41 CFR, Ch. 18, 4.910(a).)

(iv) When it is determined that the subject matter of an unsolicited proposal is acceptable for award on a noncompetitive basis, the unsolicited proposal will serve as the basis for negotiation. (See 41 CFR Ch. 18, 4.910(c).) A Request for Proposal (RFP) or a Request for Quotation (RFQ) will not be used to obtain any additional information or revisions. In this connection, note that the manner and extent of the evaluation of the scientific/technical and the price/cost portions of unsolicited proposals is the responsibility of officers having substantive responsibilities for these areas. (See 41 CFR, Ch. 18, 4.909(e).)

(v) Proposals for renewal of on-going projects are generally simpler as less detailed information or justification is required. However, they should cover the basic information required for procurement action, with particular emphasis on changes since the original award was made. (See 41 CFR Ch. 18, 4.906(d).) Simplified procedures should be used wherever possible to expedite renewals, particularly when continuing or step funded awards are involved.

(vi) Justifications will normally be prepared by the procurement request initiator on an individual proposal basis. However, where a number of similar proposals are peer reviewed in a group or as the result of a Space Science Announcement, Applications Announcement or similar announcement, a simplified procedure may be used. This is particularly applicable where the evaluation is conducted by Headquarters and the proposals subsequently transferred to a field center for all further processing and award.

(vii) Accordingly, in instances where unsolicited proposals are received as a result of an open notice issued in accordance with 41 CFR, Ch. 18, 4.908(b)(i), the following justification format, to be executed by the technical office which issued the open notice, may be used to satisfy the requirements of 41 CFR, Ch. 18, 4.910(b).

(Format)—Justification for Acceptance of Unsolicited Proposal

I recommend that NASA negotiate only with *(Organization and location)* for a technical study/investigation entitled: *(proposal title)*, which is related to the (Name of) discipline field of the (Name of) Program. This recommendation is made on the basis of a favorable comprehensive evaluation in accordance with applicable provisions of NASA Procurement Regulation (NPR) 4.909, and is submitted in accordance with applicable provisions of NPR 4.910. This recommendation is made for the following reason(s): *(insert one or more, but not necessarily all)*

(i) The proposed effort contains unique, innovative (or meritorious) methods (approaches or ideas) which have orginated with (and/or been assembled together by) the offeror;

(ii) A significant degree of scientific/technical merit inheresin the proposed effort;

(iii) The proposed effort is expected to make a noticeable, positive contribution to the (Name of) Program, if supported at this time;

(iv) The proposed effort has value to the (Name of) Program, not previously recognized by NASA;

(v) The qualifications, capabilities and experience of the proposed principal investigator (team leader and/or key personnel) are considered to be critical in achieving the objectives of the proposal;

(vi) The offeror possesses and offers capabilities, related experience and facilities (or techniques, or unique combinations thereof) which are considered to be integral factors for achieving the objectives of the proposal. It further appears that the substance of the proposal is not readily available to the Government without restriction from another source, does not closely resemble that of a pending competitive solicitation, and is sufficiently unique to justify acceptance. Based upon a comprehensive evaluation and the foregoing reason(s), I accept this proposal submitted by the anticipated principal investigator, (Full

Name), for implementation as a (Name of Program) Project. I am assigning this project to (Installation) for implementation and request that an appropriate instrument be executed with the institution.

(c) *Solicited proposals.* As a result of the instrument selection criteria specified by Pub. L. 95–224, and NASA's implementation in § 1260.301, the award of a grant or cooperative agreement based on a solicited proposal may be appropriate.

(d) Grants and cooperative agreements based on solicited proposals are most likely to result from proposals submitted in response to "Announcements of Opportunity." This type of solicitation is governed by the terms of NASA Handbook 8030.6, "Guidelines for Acquisition of Investigations."

§ 1260.203 Criteria for selection of award instrument.

(a) *General.* (1) This § 1260.203 provides guidance on the appropriate choice of award instruments consistent with the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. 95–224 and Office of Management and Budget (OMB) implementation of that Act. This § 1260.203 applies to all program and individual transactions where the choice of award isntruments is within the administrative discretion of NASA and is not otherwise prescribed or limited by law. A variety of award instruments is available as the means for defining the terms and conditions, and the nature of the relationship between NASA and eligible recipients. The award instruments are intended to be different in purpose, application, content and nature. When properly employed, they create different relationships betwen the parties. Because of these differences, the decision to use a particular instrument to implement a particular purpose must be made deliberately.

(2) *Procurement contracts.* A procurement contract shall be used as the legal instrument to reflect a relationship between the Federal Government and a recipient whenever (i) the principal purpose of the instrument is the acquisition by purchase, lease or barter, of property, or services for the direct benefit or use of the Federal Government; or (ii) whenever NASA determines in a specific instance that the use of a type of procurement contract is appropriate.

(3) *Grants.* A grant agreement shall be used as the legal instrument to reflect a relationship between the Federal Government and a recipient whenever the principal purpose of the relationship is transfer of money, property, services, or anything of value to the recipient in order to accomplish a public purpose of support or stimulation authorized by Federal statute, rather than by acquisition, purchase, lease, or barter of property or services for the direct benefit or use of the Federal Government; and no substantial involvement is anticipated between NASA acting for the Federal Government and the recipient during performance of the contemplated activity.

(4) *Cooperative agreements.* A cooperative agreement shall be used as the legal instrument to reflect a relationship between the Federal Government and a recipient whenever the principal purpose of the relationship is the transfer of money, property, services, or anything of value to the recipient to accomplish a public purpose of support or stimulation authorized by Federal statute, rather than acquisition by purchase, lease, or barter, of property, or services for the direct benefit or use of the Federal Government; and substantial involvement is anticipated between NASA, acting for the Federal Government, and the recipient during performance of the contemplated activity.

(b) *Factors to consider in the selection of award instrument.* The cognizant technical officer shall recommend to the contracting officer of the funding installation the selection of the research support instrument (grant, cooperative agreement or contract), regardless of the type of proposal involved, taking into account statutory requirements, NASA policies for dealing with universities, the nature of the proposed research, the manner in which it will be performed, and the nature and extent of interaction between NASA and the performer. Research grants and cooperative agreements with nonprofit institutions of higher education or at nonprofit organizations whose primary purpose is the conduct of scientific research may be made only to support basic scientific research. Any exceptions must have the prior approval of the Director of Procurement. As a matter of policy NASA does not generally award grants for donative assistance purposes, but only to meet program objectives; hence, consideration of any potential benefit accruing to the recipient is extraneous to determination of the support instrument. Since prime responsibility for the pursuit of most basic studies is with the university researcher, it is anticipated that the use of cooperative agreements will be limited to those situations where the project would not be possible without extensive NASA-university collaboration. Thus, cooperative agreements would be appropriate, for instance, where a university investigator works for a substantial amount of time at a NASA center (or a NASA investigator works at the university), or when the NASA-university scientific collaboration is such that a jointly authored report is appropriate. Under no circumstances are cooperative agreements to be used solely to obtain the stricter control requirements typical of a contract. Subject to the statutory requirements set forth in § 1260.203(a) of this part, the characteristics generally inherent in grants, cooperative agreements and contracts are as follows:

(1) Characteristics of a grant instrument:

(i) The principal purpose is to accomplish a NASA objective through stimulating or supporting the acquisition of knowledge or understanding of the subject or phenomena under study;

(ii) The exact course of the work and its outcome cannot be defined precisely and specific points in time for achievement of significant results cannot be realistically specified;

(iii) NASA desires, or the nature of the proposed investigation is such, that the grantee will bear prime responsibility for the conduct of the research, and exercises judgment and original thought toward attaining the scientific goals within broad parameters of the research areas proposed and the related resources provided;

(iv) The research problem is such that long term support (i.e., in excess of 1 year) is required for the study to mature to maximum scientific effectiveness (however, this does not preclude shorter-term grants in special cases);

(v) Meaningful technical reports (as distinguished from the Semiannual Status Reports) can be prepared only as new findings are made, rather than on a predetermined time schedule;

(vi) Simplicity and economy in execution and administration are mutually desirable; and

(2) Characteristics inherent in a cooperative agreement include the characteristics of a grant plus the following:

(i) Substantial NASA involvement in and contribution to the technical aspects of the effort are necessary for its accomplishment;

(ii) The project, conducted as proposed, would not be possible without extensive NASA-university technical collaboration; and

(iii) The nature of the collaboration can be clearly defined and specified in advance.

(3) Characteristics inherent in a contract are as follows:

(i) The principal purpose is the purchase for the direct use or benefit of NASA's well-defined, specific effort clearly required for the advancement of a programmed NASA mission or project;

(ii) The work to be conducted is directed closely toward the solution of a specific problem;

(iii) A specific service, piece of hardware, or improved performance of a specific device is the end product;

(iv) NASA considers it necessary, and it is reasonable in consideration of the nature of the project, to exercise control over the objectives, direction, specifications, costs or methods of the research, and schedule control is desirable and feasible;

(v) The work to be conducted is classified (however, access to security classified information may be given grantees where a demonstrated need exists);

(vi) The end result is clearly defined and/or parameters and specifications are prepared in advance of the work; and

(vii) A significant portion of the total effort will be performed by an organization other than the one submitting the proposal, and such portion will involve the development, fabrication or acquisition of instruments or hardware.

(d) Other instruments authorized by statute shall be used only after it has been determined, with the advise of general counsel, that the action cannot be accomplished under a grant, cooperative agreement, or contract, as described in this section. Use of purchase orders (NASA Form 1379) for research is subject to the limitations of 41 CFR, Ch. 18, 3.603(a) and 3.608–2(b)(1).

§ 1260.204 Processing the instruments.

(a) If a grant or cooperative agreement is selected as the research support instrument, negotiation will be by the funding installation, except for grants to foreign institutions subject to NASA Procurement Directive 1362.1.

(b) Grants officers at field installations will furnish to the University Affairs Office copies of the technical evaluation and procurement request, identified by the proposal control number assigned by the University Affairs Office, at the time the negotiation is started. This requirement does not apply to (1) proposals for which a proposal control number is not assigned by the University Affairs Office, or (2) when a proposal evaluation (NASA Form 884 or an equivalent memorandum) and a copy of the procurement request have been forwarded to the University Affairs Office prior to the time the procurement package is received by the grants officer.

(c) Grants officers at field installations and the Headquarters Contracts and Grants Division will furnish to the University Affairs Office completed NASA Forms 1356, "C.A.S.E. Report on College and University Projects," after all awards, regardless of any exceptions in paragraphs (a) and (b) of this section (see § 1260.602).

§ 1260.205 Civil Rights Act of 1964—Nondiscrimination in certain federally funded programs.

(a) Section 602 of the Civil Rights Act of 1964 (Pub. L. 88–352; 42 U.S.C. 200d–1), provides that no person in the United States shall, on the ground of race, color or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance, and requires that each Government agency which is empowered to extend such financial assistance shall issue rules or regulations effectuating Title VI (Sections 601–605) of the Act with respect to such programs or activities administered by the agency. NASA's Civil Rights regulation was published as 14 CFR Part 1250 and incorporated into NASA's directives system as NASA Management Instruction 2090.1, "Civil Rights Act—Nondiscrimination in Federally-Assisted Programs of NASA." Section 602 of the Act applies nondiscrimination requirements to certain types of awards not covered by Executive Order 11246, as amended, which pertains primarily to contracts.

(b) For Civil Rights purposes, NASA has determined that research grants and cooperative agreements made under the authority of Pub. L. 95–224, are within the purview of Title VI of the Act, rather than within the purview of Executive Order 1246 and its predecessors.

(c) Section 504 of the Rehabilitation Act of 1973, as amended, provides that no otherwise qualified handicapped individual in the United States shall, solely by reason of the handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

(d) Further implementation, setting forth procedures and guidance, and assigning responsibility to NASA officials, is contained in NASA Management Instruction 2090.1.

(e)(1) No grant shall be made unless and until an Assurance of Compliance With the National Aeronautics and Space Administration Regulation Under Title VI of the Civil Rights Act of 1964, NASA Form 1206 (Exhibit A of this part), has been obtained in accordance with the requirements of NASA Management Instruction 2090.1, or until proceedings pursuant to § 1250.107(c) of the NASA Civil Rights regulation have been conducted and terminated in favor of the prospective grantee. NASA shall not be obligated to provide support in such a case during the pendency of any administrative proceedings under the NASA Civil Rights regulation.

(2) If a proposal relating to a covered program does not contain or refer to a prescribed assurance and it does not appear that the offeror is aware of the requirement for the assurance, prior to making any grant, the offeror shall be furnished a copy of the desired form of assurance and shall be informed of the requirements of the NASA Civil Rights regulation and this § 1260.205.

§ 1260.206 Printing, binding, and duplicating.

Printing, binding and duplicating required by NASA shall be obtained in accordance with (a) the Government Printing and Binding Regulations published by the Joint Committee on Printing, Congress of the United States, and (b) NASA Management Instruction 1490.2, "Responsibilities, Procedures, and Standards for NASA Printing, Duplicating, and Binding." Technical proposals should be carefully reviewed to assure that unauthorized printing, binding, or volume duplicating constituting printing are not included in grants. When a proposed grant may involve printing, binding, or duplicating, close coordination will be effected with the Installation Central Printing Management Officer in the review process to ensure compliance with these regulations.

1260.207 Procurement of helium.

(a) NASA is required under the provisions of Pub. L. 86–777 (50 U.S.C. 167a et. seq.) to obtain its major requirements for helium from the Secretary of the Interior.

(b) When it is known that the performance of a grant or cooperative agreement will necessitate the purchase of helium by the grantee, the following clause shall be included in the grant:

Procurement of Helium (January 1981)

(a) The Grantee shall obtain its requirements for helium under this grant from the Department of the Interior (Bureau of Mines) or from a commercial supplier

qualified by the Bureau of Mines and included in the Bureau of Mines publication, "List by Shipping Points of Private Distributors Eligible to Sell Helium to Federal Agencies." Copies of this publication may be obtained from the Bureau of Mines, Helium Operations, P.O. Box H4372, Herring Plaza, Amarillo, Texas 79101.

(b) The Grantee's procurement documents for the commercial procurement of helium shall be annotated. Pursuant to 30 CFR Parts 1 and 2, helium furnished under this contract (purchase order) shall be Bureau of Mines helium, or shall be replaced by the supplier with an equivalent volume of helium purchased from the Bureau of Mines.

(c) A copy of each contract or purchase order for the supply of helium from commercial sources shall be forwarded to the Bureau of Mines, Helium Operations, Box H4372, Herring Plaza, Amarillo, Texas, 79101. These copies shall be further identified by the applicable NASA grant number.

§ 1260.208 Clean Air and Federal Water Pollution Control Acts.

(a) Pursuant to regulations issued by authority of E.O. 11728 by the Environmental Protection Agency (EPA) and published in 40 CFR Part 15, no grant or subgrant or subcontract thereunder in excess of $100,000 shall be awarded, renewed, or extended, except as provided in paragraph (c) of this section, if any facility to be utilized thereunder or in the performance thereof is listed on the EPA "List of Violating Facilities," published pursuant to 40 CFR 15.20, the Clean Air Act, as amended, (42 U.S.C. 1857 et seq., as amended by Pub. L. 91–604), and the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq., as amended by Pub. L. 92–500). This list will be distributed periodically by EPA to all Federal agencies and published in the **Federal Register**.

(b) Special condition, § 1260.420(b)(7), shall be used with each grant or grant extension in excess of $100,000.

(c) When the Administrator determines that the paramount interest of the United States so requires, the Administrator may exempt for a period not to exceed 1 year any individual grant, or any subgrant or subcontract thereunder, from the requirements of this § 1260.208, and, by rule or regulation following consultation with the Administrator of the EPA, any class of grants or subgrants or subcontracts thereunder. The Administrator shall promptly notify the Administrator of the EPA of any of the exemptions authorized by the foregoing, and the justification therefor, which shall fully describe the purpose of the grant, subgrant, or subcontract and indicate the manner in which the paramount interest of the United States requires that the exemption be made.

(d) Requests for exemptions or renewals thereof shall be made to the Director of Procurement (Code HP–1), NASA Headquarters. Requests for individual exemptions shall list the recipient and the amount of the proposed grant, subgrant or subcontract and the title and name of the principal investigator (where applicable). All requests, whether for individual or class exemptions, shall provide a complete justification as required in paragraph (c) of this section.

§ 1260.209 Patent rights in inventions.

(a) Pub. L. 96–517 (35 U.S.C. 200 et seq.) governs the disposition of rights in inventions made by small business firms and nonprofit organizations under contracts, grants and cooperative agreements for the performance of experimental, developmental, or research work funded in whole or in part by Federal agencies. This Act takes precedence over any other Acts, including section 305 of the National Aeronautics and Space Act of 1958, regarding the disposition of rights to such inventions. It takes effect on July 1, 1981, and is applicable to all contracts, grants and cooperative agreements (including subcontracts) with small business firms and nonprofit organizations executed on or after that date. As to inventions "made" on or after July 1, 1981, in the performance of work under any such contracts, grants or cooperative agreements (including subcontracts) executed prior to July 1, 1981, § 1245.118 of the NASA Patent Waiver Regulation of July 1, 1981 (14 CFR 1245.1) may be applied.

(b) The implementation of Pub. L. 96–517 in the NASA Procurement Regulation, 41 CFR, Ch. 18, 9.1), shall apply equally to all grants and cooperative agreements (including subcontracts thereunder) with a small business firm or nonprofit institution for experimental, developmental or research work to be performed in the United States, awarded and administered under the Grant and Cooperative Agreement Handbook, unless a deviation from such use is approved pursuant to § 1260.106. The clause implementing Pub. L. 96–517 for grants and cooperative agreements is set forth in Exhibit G of this part. Where a deviation is approved or where experimental, developmental or research work is to be performed outside the United States, patent counsel should be consulted for the appropriate provisions to be included in the grant or cooperative agreement.

(c) Reports required pursuant to § 1260.409(b) shall be submitted upon receipt by the grants officer to the local patent counsel.

Subpart 3—Award of Grants and Cooperative Agreements

§ 1260.301 Instruments.

(a) The grant or cooperative agreement instrument shall be brief in format, containing only those provisions necessary to protect the fundamental interests of the Government. To ease compliance problems within universities and nonprofit institutions, grants issued by all NASA installations are identical in format and printed content, and changes in grant requirements are made as infrequently as possible.

(b) In order to maintain the distinction between transactions entered into pursuant to section 203(c)(5) and other provisions of the Space Act of 1958 (such as patent licenses, out-bailments, reimbursable launch agreements, and international agreements) and cooperative agreements entered into pursuant to Pub. L. 95–224, (effective February 3, 1979), the term "cooperative agreement" shall not be used to designate those agreements entered into under the Space Act but shall be used only to designate those cooperative agreements entered into pursuant to Pub. L. 95–224. Loans of Government personal property not associated with a contract, grant, or cooperative agreement under Pub. L. 95–224, and made under the Space Act of 1958, should be consummated as loan agreements under paragraph 1.211 and Part 3.400 of NASA Handbook 4200.1, "Equipment Management Manual."

(c) An initial determination shall be made by the technical office sponsoring the requirement whether the principal purpose involved is the acquisition of property or services for the direct benefit or use of the Federal Government. If the determination is affirmative, it shall be set forth in the "Justification for Acceptance of Unsolicited Proposal" (41 CFR, Ch. 18, 910(b)) or the procurement request and, upon concurrence of the contracting officer, a contract shall be used pursuant to the NASA Procurement Regulation.

(d) If it is determined that the principal purpose of a research task is not the acquisition of property or services for the direct benefit or use of the Federal Government, but rather is to accomplish a public purpose of support or stimulation by increasing basic knowledge and understanding in aeronautics or space, a grant (where no substantial Federal involvement is

anticipated) or a cooperative agreement (where substantial Federal involvement is anticipated) shall be used. (See § 1260.203 for guidance.)

(e) Where the technical office sponsoring the research recommends that a grant or cooperative agreement be used as the research instrument supporting an unsolicited proposal, the "Recommendation for Acceptance of Unsolicited Proposal" shall contain justification for such recommendation under the guidance set forth in § 1260.301(d). The required justification shall be in reasonable detail, shall adequately support the recommendation to award either a grant or cooperative agreement, and shall be approved by a responsible official designated for this purpose by the head of the program office concerned at Headquarters or field installation. In those instances where the transaction does not arise from an unsolicited proposal, the technical office involved shall, in the procurement request, justify any recommendation to the grants officer for award of a grant or cooperative agreement, subject to the approval required above.

(f) The grants officer shall review the recommendations of the cognizant technical office and, upon concurrence therein, shall prepare and sign a statement prior to the award of each grant or cooperative agreement, which justifies the use of such instrument under Pub. L. 95–224. The statement shall be placed in the offical file maintained for the transaction. General counsel should be consulted on questions of unique requirements and where additional assistance is otherwise determined to be necessary.

(g) Grants and cooperative agreements subject to Pub. L. 95–224, shall cite sections 5 or 6, as applicable, of the Federal Grant and Cooperative Agreement Act of 1977 (Pub. L. 95–224) as the authority for their placement. Contracts shall cite the applicable authority contained in 41 CFR, Ch. 18, 3.2.

(h) *Exception and deviations.* (1) Subsection 4(2) of Pub. L. 95–224 allows the use of contracts "whenever an executive agency determines in a specific instance that the use of a type of procurement contract is appropriate." This provision accommodates situations in which an agency determines that specific public needs can be satisfied best using the procurement process. However, because the provision, if misused, could allow agencies to circumvent the criteria for use of procurement or assistance instruments, use of this authority is restricted to extraordinary circumstances, and only with prior approval of the Director of Procurement. (Deviations from policies and procedures shall be processed under 41 CFR, Ch. 18, 1.109 or § 1260.100, as appropriate.)

(2) It is NASA's policy that non-monetary (zero dollar) grants or cooperative agreements shall not be used (except for no-cost time extensions).

§ 1260.302 Format.

NASA Form 1463, "Research Grant Award" Exhibit B, NASA Form 1562, "Cooperative Agreement" Exhibit C, and NASA Form 1463A, "Provisions for Research Grants and Cooperative Agreements" Exhibit D, shall be used for the award of all NASA research grants and cooperative agreements pursuant to the Federal Grant and Cooperative Agreement Act of 1977 (Pub. L. 95–224).

§ 1260.303 Allowable costs.

(a) Regulations governing procurement contracts generally are not appropriate for application to grants and cooperative agreements. However, in general, Office of Management and Budget (OMB) Circular A–21, "Cost Principles for Educational Institutions," OMB Circular A–122, "Cost Principles for Nonprofit Organizations," OMB Circular A–110, "Grants and Agreements with Institutions of Higher Education, Hospitals, and other Nonprofit Organizations," and 41 CFR, Ch. 18.3 are the basic guidance documents in determining the allowability of costs chargeable to research supported by NASA under grants and cooperative agreements.

(b) NASA normally allows full recovery of indirect expenses but in no case shall an overhead rate used for determining grant or cooperative agreement amounts exceed, in equivalence, the most recent overhead rate at the recipient institution for comparable research contracts of the Government.

(c) Grant amounts determined at the time of the award shall not be reduced other than in case of revocation or in the event grant funds are not committed by the grantee prior to completion of the research involved.

(d) It is the responsibility of the recipient to manage the granted funds in such a manner that they cover the full period of the grant or cooperative agreement. NASA is not obligated to reimburse over-expenditures. However, this stricture does not preclude acceptance of a proposal requesting supplemental funding to extend the research.

§ 1260.304 Cost sharing.

(a)(1) *General.* In implementing the statutory requirement appearing in various NASA Appropriations Acts, for cost sharing of research resulting from unsolicited proposals, NASA has, in the past, generally required that educational institutions share in the cost of such research. This requirement was derived from the understanding that there was generally extant a "mutuality of interest" (as that phrase appears in the statutes) in such relationships thereby bringing into play the cost-sharing requirement.

(2) Subsequent to Congressional concern on overly strict application of the cost sharing requirement, a NASA reevaluation resulted in a determination that the activities of educational institutions under NASA research grants, cooperative agreements and contracts do not generally produce benefits that can be measured as having significance apart from the benefit intrinsic in the conducting of research for NASA. Therefore, in such instances, these agreements should not be subject to the cost-sharing requirement.

(3) No individual documentation or justification is required to establish agreements with educational and non-profit institutions not subject to a cost sharing requirement. Documentation, however, is necessary in those instances where cost sharing is appropriate.

(4) If in an individual case, cost-sharing is determined to be applicable pursuant to the NASA policy set forth in 41 CFR, Ch. 18, 1.362, the procedures in 41 CFR, Ch. 18, § 1.362 shall be followed and the special condition clause for cost sharing set forth in paragraph (b) of this section shall be used.

(b) *Clause.* In grants and cooperative agreements to which cost sharing is applicable, the following clause shall be used.

Cost Sharing (January 1981)

The Grantee agrees to share in the cost of the research by charging to the Government not more than percent of the costs of performance determined to be allowable in accordance with paragraph 405 of the NASA Grant and Cooperative Agreement Handbook. The remaining percent, or more, of the allowable costs of performance so determined will constitute the Grantee's share and will not be charged to the Government under this grant or under any other grant or contract (including allocation to other grants or contracts as part of an independent research and development program). The Grantee will maintain records of all grant costs claimed by the Grantee as constituting part of its share and such records shall be subject to audit by the Government.

§ 1260.305 Long term stability.

(a) *General.* Research performed for NASA by universities tends to be long term. Encouraging stability permits confidence in advance planning for the most effective use of resources. Two methods for achieving long term stability, i.e., continuing awards and step funding, are set forth in §§ 1260.305–2 and 1260.305–3.

(b) *Continuing awards*—(1) *Definition.* A continuing award is a grant or cooperative agreement for which NASA obligates funds to support an effort for a 1-year period, and states an intention to support approximate levels of effort for an additional period of time provided funds are available and the results achieved warrant further support within the context of agency programs.

(2) *Duration and funding.* Continuing awards will normally be approved by the relevant Headquarters program office or center for periods not in excess of 3 years. Legal, along with concomitant fiscal obligations, however, will be entered into for periods of 1 year. The award instrument will contain the following special condition which provides an estimate of an approximate level of funding for each of the following years:

> This is a continuing award. Contingent on the availability of funds, scientific progress of the project, and continued relevance to NASA programs, NASA anticipates continuing support at approximately the following levels:
>
> Second year $—— Third year $——
>
> It is the responsibility of the awardee to request such continued support by submitting a brief proposal, according to NASA procedures for unsolicited proposals.

The phrase "Third year" will be omitted if inapplicable.) The above special condition is not to be used in multiple-year, including step-funded, awards.

(3) *Proposals and review.* The original proposal and its scientific evaluation is applicable to the entire period. Thus, neither an extensive new proposal nor new reviews is required for subsequent funding in the approved period, unless a special need for new reviews is indicated by monitoring of the project and of its reports, by major changes in the project or senior investigators, by the introduction of work outside the scope of the approved proposal, or by the need for substantial additional funding than that initially anticipated.

(4) *Requests for continued support.* Five copies of a brief renewal proposal are required, as described in the special conditions of the award instrument for additional funding. Investigators shall be encouraged to contact the NASA technical officer for the project prior to proposal preparation to determine the amount of information required. An additional extended period may be proposed, upon the expiration of the approved period. A complete, new proposal, subject to full review, must be submitted for this purpose. If otherwise acceptable, NASA, at its option, may fund the proposal through a further continuing award or by a standard year-to-year agreement, if long-term effort is no longer anticipated.

(5) *Levels of continued support.* Normally, each year of a continuing award will be funded at the approximate level indicated in the original award instrument, subject to satisfactory scientific progress, availability of funds, and continued relevance to NASA programs. This is not, however, a binding commitment as changing NASA program constraints and developments within the project itself may dictate adjustments in the originally anticipated level.

(6) *Programmatic procedures.* Procurement request initiators who desire to use the continuing award technique should include in their procurement justification packages a brief statement requesting the use of the continuing award, including the expected levels for future periods.

(7) *Other conditions.* Except as noted in this part, all regulations, terms and guidelines applicable to regular grants and cooperative agreements apply to continuing awards.

(c) Step funding.

(1) *Description of step funding.* A step funded research project is one for which funds are obligated over a 3-year period. In addition to full support for the first year's effort, funds are also obligated for a second year's operation at approximately two-thirds of the first year level, and for third year's effort at approximately one-third of the first year level. The typical funding schedule anticipates a continuation of the initially established levels in subsequent years, but this is not always the case—planned increases or decreases in level may be projected in advance. In any event, the full amount required to establish the desired steps must be obligated. (See Step Funding Illustration—Exhibit E.)

(2) *Procedures.* The documentation will clearly indicate that the step funding is appropriate and provide a suggested step schedule accommodating both the previously obligated and the new funding. Annual levels should be rounded to the nearest $1,000, where feasible. Annual continuation proposals should project the contemplated effort for 3 years in advance. Wherever possible, renewal or notification to the grantee that further support will not be forthcoming will be issued before the authorized level drops to the next lower step. Normally, step funded grants should not be allowed to expire if the total period of performance is less than 5 years. Except in cases of revocation, funds should not be de-obligated from the steps. Do not make "No Cost-time Extensions" to step-funded awards, except when they are in the last year and no additional obligations are planned. Annual funding dates may be changed, if necessary, by appropriately rescheduling the steps. The award instrument shall contain the special condition for step funding (see § 1260.420 (b)(5)).

§ 1260.306 Numbering of instruments.

(a) *Grants.* (1) The identification numbering system for all research grants shall conform to 41 CFR, Ch. 18, 20.203–3, except that an NAG prefix shall be used in lieu of the NAS prefix.

(2) The prefix designation shall include the Center Identification Number; e.g., NAGW would be the Headquarters prefix designation and NAG5 would be the Goddard prefix designation. Grants will be sequentially numbered beginning with "1."

(3) This numbering system applies to all new research grants awarded beginning in Fiscal Year 1980. Existing grants identified with prefixes NGT and NGF will not be changed. Sequential numbers are controlled by the NASA University Affairs Office.

(b) *Cooperative agreements.* The numbering system for cooperative agreements shall be the same as for paragraphs (a) and (b) of § 1260.306–1, except that NCC (for centers) and NCCW (for Headquarters) prefixes shall be used in lieu of the NAG and NAGW prefixes.

§ 1260.307 Distribution of grants, cooperative agreements, and grant supplements.

(a) Distribution of grants, cooperative agreements and grant supplements shall be made by the initiating office in accordance with its requirements, except that in all cases:

(b) At least one copy will be furnished to paying offices in order to support the payment file and shall be retained for audit purposes in accordance with § 1260.308.

(c) One copy, plus a copy of the grantee's proposal, will be furnished to the Scientific and Technical Information Office, Code NST–10, NASA Headquarters.

§ 1260.308 Retention of documents for on-site audit.

NASA's grants, cooperative agreements and grant supplements

designated in § 1260.307 are subject to on-site audit by the General Accounting Office. The original or a signed copy of each document, with supporting data, shall be retained by the installation to be available to the General Accounting Office for audit purposes. Records shall be retained for 3 years after completion.

Subpart 4—Research Grant and Cooperative Agreement Provisions

§ 1260.400 General.

The provisions set forth in this subpart shall be inserted in and made a part of all NASA grants and cooperative agreements subject to this part. Whenever the words "grant" or "grantee" appear in these provisions, they shall be deemed to include, as appropriate, the words "cooperative agreement" and "recipient of cooperative agreement" respectively.

§ 1260.401 Technical reports and publications.

Technical Reports and Publications (January 1981)

(a) All measurement values employed in technical reports prepared under this Grant shall be expressed in the International System of Units (SI). Expression in both SI units and customary units is acceptable where the use of SI units alone would obviously impair communications or reduce the usefulness of the report to the primary recipients. When both systems of units are used, SI units are to be stated first and customary units afterwards in parentheses. In each such case, the report shall state which system of units was used for the principal measurements and calculations.

(b) Publication to accomplish widest practicable and appropriate dissemination of research results is encouraged at any time during the course of the investigation. Examples of appropriate media for such dissemination are the learned journals, the proceedings of professional groups, conference presentations, and NASA scientific and technical publications. NASA Grantees may submit the results of their work for publication by whichever media they feel most appropriate. Publications and reports prepared under a Grant shall contain a statement which acknowledges NASA's support and identifies the grant by number. Submissions for NASA scientific and technical publications shall be accompained by manuscripts provided initially in draft. Upon agency review and approval, a reproducible copy shall be submitted in the style and format specified by NASA.

(c) Copies of preprints or manuscripts of each publication shall be provided to NASA for information at the time of submission for publication. Prior approval for publication is not required unless security classification is involved or the Grant contains special conditions pertinent to publication of results. Should the preprint or manuscript contain a description of a "subject invention," such invention is to be disclosed to NASA as required by the "Patent Rights (Small Business Firm or Nonprofit Organization)" clause set forth as Exhibit G of the NASA Grant and Cooperative Agreement Handbook.

(d) Brief, informal Semiannual Status Reports, which shall include concise statements of the research accomplished during the report period, including full bibliographic references to, or abstracts of, publications, shall be submitted. This is a minimum reporting requirement and Grantees are urged to submit interim reports, to publish in the open literature, or to present conference papers whenever the research has reached a point where it is logical to summarize the results, a research phase has been completed, or significant new findings are made.

(e) A final technical report will be submitted upon termination of support under a specific Grant, whether or not support is continued under another Grant number. The final report may be a comprehensive report of all research findings, suitable for printing as a permanent contribution to knowledge, or it may be a brief summary of the entire project. In either case, cumulated bibliographic references to, or abstracts of, all publications issued during the course of the research shall be included.

(f) Status and final technical reports shall have a title page that displays the title of the Grant, the type of report, the name of the Principal Investigator, the period covered by the report, the name and address of the Grantee's institution, and the Grant number.

(g) Five copies of all preprints, reprints, manuscripts, status and interim reports, and the final technical report shall be submitted to NASA. Three of these copies shall be sent to the NASA Technical Office designated on the cover page of the Grant. The remaining two copies, one of which shall be of a quality suitable for microreproduction, shall be sent to:

NASA Scientific & Technical Information Facility, P.O. Box 8757, Baltimore/Washington International Airport, Maryland 21240

§ 1260.402 Extensions.

Extensions (January 1981)

(a) It is NASA policy to provide maximum possible continuity in funding grant-supported research, and Grants may be extended for additional periods of time. Any extension requiring additional funding must be supported by an unsolicited proposal submitted at least 4 months in advance of the expiration date of the Grant. The period of performance shown in the Grant documents is approximate, but extension for more than 30 days must be requested by application to the Grants Officer and approved in writing.

(b) When a Grant is a continuing award or step funded, NASA will, if circumstances permit, make available additional funding to extend the period. The step funding is based on unsolicited proposals received prior to the completion of each year of full support. NASA shall be the sole judge of whether circumstances will permit this increase. This statement of policy should not be taken as a commitment by NASA.

§ 1260.403 Revocation.

Revocation (January 1981)

It is a condition of each Grant that it may be revoked in whole or in part by NASA after consultation with the Grantee. In the event of revocation, the Grantee shall refund to NASA any unexpended funds that it has received under the Grant, except such portion thereof as may be required by the Grantee to meet commitments which had in the judgment of NASA become firm prior to the effective date of revocation and are otherwise appropriate.

§ 1260.404 Travel.

Travel (March 1981)

(a) Domestic travel is an appropriate charge to research Grants and NASA authorization for specific trips is not required. Expenditures for domestic travel shall not exceed $500 or 125% of the amount allotted for such travel in the approved proposal budget, whichever is greater, without the prior authorization of the NASA Grants Officer.

(b) Foreign Travel (all travel outside the 50 United States, the District of Columbia, Puerto Rico, Possessions of the United States and the areas in the Republic of Panama made available to the United States and Canada) must be clearly essential to the research effort and must, to be charged to a Grant, have the prior approval of the NASA Grants Officer regardless of its inclusion in the approved proposal budget. NMI 9720.5, "Foreign Travel Costs Charged to Grants, Contracts, and Other Agreements with Colleges and Universities," sets forth policy and responsibilities governing NASA approval of foreign travel by university personnel when the costs of such travel are chargeable to NASA Contracts, Grants or Cooperative Agreements. In addition, approval of international travel including Canada is dependent upon adherence to the guidelines in Section 5 of the International Air Transportation Act of 1974, which requires use of certificated air carriers if such service is available.

§ 1260.405 Allowable costs.

(a) *General Guidance.*

General Guidance (January 1981)

OMB Circular A–21, "Cost Principles for Educational Institutions," and OMB Circular A–122, "Cost Principles for Nonprofit Organizations," OMB Circular A–110, "Grants and Agreements with Institutions of Higher Education, Hospital and other Nonprofit Organizations," and NASA Procurement Regulation (NPR) Part 15, Subpart 3, (41 CFR Ch. 10), are the general guidance documents in determining the allowability of costs chargeable to research sponsored by NASA under Grants and Cooperative Agreements.

(b) *Consultant services.*

Consultant Services (January 1981)

Payments to individuals for consultant services under a NASA Grant or Cooperative Agreement shall not exceed the daily equivalent of the maximum rate paid to a

GS–16 Federal employee (exclusive of indirect cost, travel, per diem, clerical services, vacation, fringe benefits, and supplies).

§ 1260.406 Accounting records.

Accounting Records (January 1981)

(a) The Grantee shall maintain books and accounting records, in accordance with the principles set forth in the documents listed in paragraph 405 of the NASA Grant and Cooperative Agreement Handbook in a manner sufficient to reflect properly all direct and indirect costs incurred or anticipated as a result of commitments made during the period of the grant. Microfilm records are acceptable.

(b) Financial records, supporting documents, statistical records, and all other records pertinent to this Grant shall be retained for a period of 3 years, except that:

(1) If any litigation, claim or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims, or audit findings involving the records have been resolved, and

(2) Records for nonexpendable property acquired with Grant funds shall be retained for 3 years after its final disposition.

(c) The retention period starts from the date of the submission of the final Federal Cash Transactions Report (SF 272).

(d) The Administrator of NASA and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any pertinent books, documents, papers and records of the Grantee and to subrecipients to make audits, examinations, excerpts and transcripts.

(e) All of the foregoing provisions shall apply to any subrecipient performing substantive work under this Grant.

§ 1260.407 Payment.

Payment (January 1981)

Advance payments by the Letter-of-Credit or Direct Treasury Check method will be made in accordance with procedures set forth in Exhibit F of the NASA Grant and Cooperative Agreement Handbook.

§ 1260.408 Equipment and other property.

Equipment and Other Property (March 1981)

(a) NASA research grants permit acquisition of technical property required for the conduct of research. Acquisition of property costing in excess of $1,000 and not included in the approved proposal budget requires the prior approval of the NASA Grants Officer unless the item is merely a different model of an item shown in the approved proposal budget.

(b) NASA Grant funds shall not be used to purchase items such as furniture, furnishings, office equipment or other items of a nontechnical nature; exceptions to this require approval of the NASA Grants Officer and must be fully justified as essential to the research under the Grant. Under no circumstances shall Grant funds be used to acquire land or any interest therein, to acquire or construct facilities or to procure passenger carrying vehicles.

(c) Title to equipment purchased with Grant funds shall vest in the Grantee unless otherwise provided. The Government reserves the right to require transfer to itself title to items purchased at a cost of $1,000 or more. Such reservation is subject to the conditions of paragraph 505 of the NASA Grant and Cooperative Agreement Handbook.

(d) Title to Government-furnished property (including equipment, title to which has been transferred to the Government pursuant to paragraph (c) of this section prior to completion of the work) will remain with the Government.

(e) Title to expendable property shall vest in the recipient upon acquisition. If there is a residual inventory of such property exceeding $1,000 in total aggregate fair market value, upon termination or completion of the Grant or other agreement, and the property is not needed for any other Federally sponsored project or program, the recipient shall retain the property for use on non-Federally sponsored activities, or sell it, but must in either case, compensate the Federal Government for its share. The amount of compensation shall be computed in accordance with subparagraph 6c, Attachment N to OMB Circular A–110.

(f) The Grantee shall maintain property records and otherwise manage nonexpendable personal property utilized in the performance of this Grant in accordance with the provisions of Paragraph 509 of the NASA Grant and Cooperative Agreement Handbook. Grantees will submit annually an inventory listing of Government owned property in their custody to the Grants Officer. Such listings will be as of June 30, will be submitted by July 31, and will reflect the record elements required in Paragraph 509(b)(1) and beginning and ending dollar value totals for the period. Upon completion of the agreement or when the property is no longer needed, the recipient shall notify the Grants Officer, who will provide disposition instructions. The Grants Officer will provide a copy of each annual inventory listing to the NASA installation Financial Management Office upon receipt.

§ 1260.409 Patent rights (small business firm or nonprofit organization).

Patent Rights (Small Business Firm or Nonprofit Organization) (July 1981)

(a) The disposition of rights to inventions made in the performance of work under this Grant will be made in accordance with the Pub. L. 96–517 (94 Stat. 3019, 35 U.S.C. 200 et seq.) and NASA's implementing regulations as set forth in the NASA Procurement Regulation, Part 9, Subpart 1, paragraphs 9.108 and 9.109 (41 CFR Ch. 18). The provision (clause) required by NASA PR 9.108–5, entitled "Patent Rights (Small Business Firm or Nonprofit Organization)" is set forth as Exhibit G of the NASA Grant and Cooperative Agreement Handbook, and is hereby made applicable to this Grant. The Grantee shall include an appropriate patent rights provision in accordance with paragraph (g) of Exhibit G in all subcontracts.

(b) All disclosures of Subject Inventions, election of rights utilization reports, and other reports required by the aforementioned "Patent Rights (Small Business Firm or Nonprofit Organization)" clause shall be submitted to the Grants Officer.

§ 1260.410 Rights in data.

Rights in Data (January 1981)

The Grantee grants to the Government, for Governmental purposes, the right to publish, translate, reproduce, deliver, use and dispose of, and to authorize others to do so, all data, including reports, drawings, blueprints, and technical information resulting from the performance of work under this Grant.

§ 1260.411 Security.

Security (January 1981)

Normally, NASA research Grants do not involve classified defense information. However, if information is sought or developed by the Grantee that should be classified in the interests of national security, the NASA Grants Officer that issued the Grant shall be notified immediately.

§ 1260.412 Civil rights.

Civil Rights (January 1981)

Work on NASA Grants is subject to the provisions of the Civil Rights Act of 1964, and the NASA implementing regulations (14 CFR Part 1250).

§ 1260.413 Safety.

Safety (January 1981)

(a) The Grantee shall act responsibly in matters of safety and shall take all reasonable safety measures in performing under this Grant. The grantee shall comply with all applicable Federal, State, and local laws relating to safety. The Grantee shall maintain a record of, and will notify the NASA Grants Officer of any accident involving death, disabling injury or substantial loss of property. The Grantee will advise NASA of hazards that come to its attention as a result of the work under the Grant through routine status reports furnished in compliance with the Grant.

(b) Where the work under this Grant involves flight hardware, the hazardous aspects, if any, of such hardware will be identified, in writing, by the Grantee. Compliance with the provisions of this clause by subcontractors shall be the responsibility of the Grantee.

§ 1260.414 Subcontracts.

Subcontracts (January 1981)

Approval of subcontracts for the purchase of property or equipment under this grant shall be obtained in accordance with the provision herein entitled "Equipment and Other Property." All other subcontracts not provided for in the approved proposal budget require the prior consent of the Grants Officer.

§ 1260.415 Changes in principal investigator or technical objectives.

Changes in Principal Investigator or Technical Objectives (January 1981)

(a) The Grantee shall be permitted to change the methods and procedures

employed in performing the research without the need to make special reports on proposed actions or obtain NASA approval. Significant changes in methods or procedures shall be reported to NASA in status reports and final technical reports. However, in the event the methodology or experiment is proposed as a specific stated objective of the research work, this shall be reflected in the Grant title.

(b) The stated objectives of the research effort shall not be changed, except with the approval of the NASA Grants Officer.

(c) The phenomenon or phenomena under study, i.e., the broad category of research, shall not be changed except with the prior approval of the NASA Grant Officer.

(d) The Grantee shall obtain the approval of the NASA Grants Officer to change the principal investigator; or to continue the research work during a continuous period in excess of 3 months without the participation of an approved principal investigator.

(e) The Grantee shall consult with the NASA Grants Officer if the Principal Investigator becomes aware that he or she will devote substantially less effort to the work than anticipated in the approved proposal. If NASA determines that the reduction of effort would be so substantial as to impair the successful prosecution of the research, it may request a change of Principal Investigator or other appropriate modification of the Grant, or may revoke the Grant as provided herein.

(f) In projects which involve co-principal investigators or otherwise include more than one key person who may be considered essential to the conduct of the proposed research project, the foregoing provisions similarly apply to each key person. In such event, the Grant instrument shall identify the individual(s) to whom the provisions apply.

(g) In accordance with the Small Business Act Amendments, Pub. L. 95–507, small and disadvantaged firms shall be utilized as subcontractors to Grantees to the maximum extent.

§ 1260.416 Communications.

Communications (January 1981)

The Principal Investigator may expect to be contacted by the NASA Technical Officer named on the cover page of the Grant in connection with the research aspects of the work under the Grant. Inquiries regarding the research aspects of the Grant should be directed to the NASA Technical Officer. However, written or oral communications of an administrative nature, such as approval of foreign travel, property matters, extension of the term of the Grant, etc., shall be channeled through the Grantee's business office to the Grants Officer.

§ 1260.417 Financial management system.

Financial Management System (January 1981)

The Grantee's financial management system shall meet the standards set forth in paragraph 511 of the NASA Grant and Cooperative Agreement Handbook.

§ 1260.418 Procurement standards.

Procurement Standards (January 1981)

The Grantee's procurement practices shall meet the standards set forth in paragraph 512 of the NASA Grant and Cooperative Agreement Handbook.

§ 1260.419 Additional provision for cooperative agreements.

With respect to cooperative agreements under Pub. L. 95–224, it has been determined that the NASA guidelines and regulations applicable to grants will apply to cooperative agreements. The Cooperative Agreements, NASA Form 1562 (see Exhibit C), shall contain a special provision stating the nature of the recipient/NASA interaction in accordance with Pub. L. 95–224. That special provision is as follows:

Cooperative Agreement Special Provision (January 1981)

(a) This award is a Cooperative Agreement as it is anticipated that there will be substantial NASA involvement during performance of the effort. That is, the recipient can expect NASA collaboration or participation in the management of the project.

(b) NASA and the recipient mutually agree to the following statement of anticipated cooperative interactions which may occur during the performance of this effort. (Briefly state the nature of the cooperative interactions).

§ 1260.420 Special conditions.

(a) In addition to the general provisions set forth in this Chapter, NASA grants and cooperative agreements are subject to various conditions which either are not applicable to all awards or are temporary in nature. Such conditions are not printed in NASA Form 1463A, "NASA Provisions for Research Grants and Cooperative Agreements" (Exhibit D), but are contained in a form, "Special Conditions," which is reproduced locally at individual NASA installations. In using the "Special Conditions" form, the grants officer indicates by check mark the specific clauses which are applicable to individual grants and fills in the blank sections of incomplete clauses as appropriate.

(b) All "Special Conditions" forms shall contain the following heading and number clauses:

Special Conditions

Grant No. .....

The special conditions checked below are applicable to this Award:

(1) *Federal Cash Transactions Report.* Pursuant to the clause, "Payment," of the NASA Provisions for Research Grants and Cooperative Agreements, the "Federal Cash Transactions Report," Standard Form 272, shall be submitted quarterly to:

(Installation)
(Address)
(City, State, Zip Code)
(Attn: .....)

(2) *Cash Payments.* An initial cash payment will be made in the amount of $..... Subsequent payments will be made in accordance with Exhibit F of the NASA Grant and Cooperative Agreement Handbook and the Grantee's requirements as reported on Standard Form 272.

(3) *Financing by Letter of Credit.* This grant does not provide for initial cash payment. Funds will be obtained by the Letter of Credit method of obtaining cash. No part of such funds shall be paid in advance to any secondary recipient without the express written approval of the Grants Officer. Cash drawdowns shall be initiated by the Grantee only when actually needed for the disbursements of the Grantee or of approved secondary recipients. Standard Form 272, "Federal Cash Transactions Report," covering cash disbursements and balances of the Grantee and any approved secondary recipients, shall be submitted by the Grantee in a timely manner as provided in the clause "Payment" of the NASA Provisions for Research Grants. The Grantee's financial management system shall provide for effective control over and accountability for all Federal funds. Continued financing by the Letter of Credit method is conditional upon all of the foregoing, and failure to comply with any of these requirements may cause the unobligated portion of the Letter of Credit to be revoked by NASA or the Department of the Treasury.

(4) *Stipulated Salary Support.* Pursuant to NPR Part 15, Subpart 3, salaries of professional staff and other professionals engaged in the work are stipulated as provided in the approved proposal budget. The Grantee agrees that stipulated amounts for any individual hereunder will not per se result in increasing his or her official salary from the Grantee institution.

(5) *Step Funding.* This is a step funded Grant. If the total amount allowed by the Schedule on the face of the Grant is not expended during the applicable period, the residual funds may be expended during the succeeding period. This carryover shall be brought to the attention of the Grants Officer when the Grantee submits its budget for the subsequent period.

(6) *Procurement of Helium.* (Insert the clause in Paragraph 207.)

(7) *Clean Air and Federal Water Pollution Control Acts.* The Grantee agrees to notify the Grants Officer promptly of the receipt, whether prior or subsequent to the Grantee's acceptance of this grant, of any communication from the Director, Office of Federal Activities, Environmental Protection Agency (EPA), indicating that a facility to be utilized under or in the performance of this Grant or any subgrant or subcontract thereunder is under consideration to be listed on the EPA "List of Violating Facilities" published pursuant to 40 CFR 15.20. By acceptance of this Grant, the Grantee: (i) Stipulates that any facility to be utilized thereunder is not listed on the EPA "List of Violating Facilities" as of the date of acceptance; (ii) agrees to comply with all requirements of section 114 of the Clean Air Act, as amended (42 U.S.C. 1857 et seq, as amended by Pub. L. 91–604) and Section 308 of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq. as amended by Pub. L. 92–500) relating to inspection, monitoring, entry, reports and information, and all other requirements specified in the aforementioned Sections, as well as all regulations and guidelines issued

thereunder after award of and applicable to the grant; and (iii) agrees to include the criteria and requirements of this clause in every subgrant or subcontract hereunder in excess of $100,000, and to take such action as the Grants Officer may direct to enforce such criteria and requirements.

(8) *Continuing Award.* Insert the clause shown in paragraph 305.2(2) of the NASA Grant and Cooperative Agreement Handbook.

(c) All clauses inserted in "Special Conditions" forms shall be written out in full. Clauses shall not be incorporated by reference.

(d) Special conditions clauses which are not included in, or which differ in language from, the clauses in § 1260.420 shall be considered as deviations and processed in accordance with § 1260.106.

Subpart 5—Administration of Research Grants and Cooperative Agreements

§ 1260.501 General.

(a) NASA assumes that, once a grant or cooperative agreement is made, the principal investigator, operating within the policies of the grantee institution, is in the best position to determine the means by which the research may be conducted most effectively. The term "grantee" refers to recipients of both grants and cooperative agreements. NASA wishes to avoid any action that might diminish the responsibility of the grantee and the investigator for making sound scientific and administrative judgments. Grantees and investigators are encouraged to seek the advice and opinions of NASA on problems that may arise. Unless otherwise stated, the giving of such advice should not imply that the responsibility for final decisions has shifted to NASA. The primary concern of NASA is that granted funds be used in a manner that will make a maximum contribution to the scientific area under investigation. It is expected that grantees and investigators will also direct their efforts to this end.

(b) The grantee shall be permitted to change the methods and procedures employed in performing the research without the need to make special reports on proposed actions or obtain NASA approval. Significant changes in methods or procedures shall be reported to NASA in status reports and final technical reports. In the event the methodology or experiment is proposed as a specific stated objective of the research work, this shall be reflected in the grant title.

(c) The stated objectives of the research effort shall not be changed except with the approval of the NASA grants officer.

(d) The phenomenon or phenomena under study, i.e., the broad category of research, shall not be changed except with the prior aproval of the NASA grants officer.

(e) The grantee shall obtain the approval of the NASA grants officer to change the principal investigator, or to continue the research work during a continuous period in excess of 3 months without the participation of an approved principal investigator.

(f) The grantee shall consult with the NASA grants officer if the principal investigator plans to, or becomes aware that he/she will, devote substantially less effort to the work than anticipated in the approved proposal. If NASA determines that the reduction of effort would be so substantial as to impair the successful prosecution of the research, it may request a change of principal investigator or other appropriate modification of the grant, or may revoke the grant as provided in § 1260.506.

(g) In projects which involve co-principal investigators or otherwise include more than one key person who may be considered essential to the conduct of the proposed research project, the provisions of paragraphs (e) and (f) of this section similarly apply to each such key person. In such event, the grant instrument shall identify the individual(s) to whom the provisions apply.

(h) It is NASA policy to make optimum use of the administration functions available from the Department of Defense (DOD) and other Government agencies. Property administration and plant clearance for grants and cooperative agreements will be delegated to the cognizant administering activity.

§ 1260.502 Instrument.

A NASA grant or cooperative agreement is consummated by an instrument signed by the NASA Administrator, or duly authorized representative and contains the provisions set forth in Subpart 1260.4 of this part.

§ 1260.503 Instrument period.

(a) Normally, NASA grants and cooperative agreements are made for periods up to 3 years. As stated in the instrument, the period is approximate; the beginning and ending dates are not specified with precision. The instrument period begins approximately on the date thereof and extends for approximately the length of time specified. However, when progress of research under the grant or cooperative agreement is delayed and circumstances make it necessary to request an extension of the period without additional funds, the policy of NASA is to permit extensions in time, upon written request.

(b) When it appears that the research contemplated will be completed within 30 days after the approximate ending date, a request for extension of the instrument period will be unnecessary. If it appears, however, that the additional time required for completion of the research will exceed 30 days, a request for extension must be made by the grantee. Any extension requiring additional funding must be supported by an unsolicited proposal and submitted at least 4 months in advance of the expiration date of the grant or cooperative agreement.

§ 1260.504 Adherence to original budget estimate.

(a) NASA believes that the principal investigator, operating within the established policies of the grantee, is the individual best qualified to determine the manner in which the grant or cooperative agreement funds may be used most effectively to accomplish the proposed research. Although NASA assumes no responsibility for overspent budgets, the investigator and the grantee institution are free to spend grant or cooperative agreements funds for the proposed research without strict adherence to individual allocations within total budgets, except as provided in §§ 1260.404 and 1260.408. Under no circumstances, however, may grant or cooperative agreements funds be used to acquire land or any interest therein, to acquire or construct facilities or to procure passenger carrying vehicles. Purchase of furniture, furnishings, office equipment or other items of a nontechnical natue require the prior approval of the NASA grants officer as provided in § 1260.408.

(b) Controls and limitations on expenditures for specific items under NASA grants or cooperative agreements shall be in accordance with the provisions of § 1260.405.

(c) If any of the actions requiring approval in accordance with § 1260.405 have received specific NASA approval during the proposal and award process, a further approval shall not be required. Whenever practical, the approvals shall be given at the time of the project award or extension to avoid any delays during the course of the project.

(d) Approval requirements relating to expenditures under grants and cooperative agreements, in addition to those provided for in § 1260.405 shall not be imposed except in accordance with the deviation procedure of § 1260.106 or as specifically required by statute.

§ 1260.505 Use, disposition and vesting of title to research equipment.

(a) *Background.* (1) Support of research in educational institutions provides substantial long-term and indirect benefits as well as the immediate research results. In addition to the obvious academic advantages of such support, individual and institutional capabilities to perform relevant research are enhanced, and the number of scientists and graduates with research interests in areas of concern to the nation generally, and to NASA in particular, is increased. Adequate modern research equipment in universities serves to maximize these direct and supplemental benefits.

(2) NASA funds research in academic areas in which the university has, and expects to maintain, a capacity for research and education. The research equipment that it acquires has, therefore, an especially high potential for continuing effective use at the acquiring institution. The legitimate interests of both NASA and the university, as well as the long-term national interest, require that any decision by the agency to take title for the purpose of transferring grantee equipment to another location reflect careful consideration of all relevant factors. This should include comparison of the expected beneficial use at the present location which that expected at the new location, possible deleterious effects of removal, and the administrative and relocation costs involved.

(b) *Policy.* The following policies will be reflected, as appropriate, in the negotiation and the documentation of NASA research grants, cooperative agreements and supplements thereto and in related correspondence:

(1) Title to equipment purchased with grant and cooperative agreement funds vests in the grantee institution, and the equipment does not automatically follow the principal investigator when he or she leaves the institution. Title to Government-furnished equipment remains with the Government. When Government-furnished equipment is reported excess by a grantee, the grants officer will report the equipment to the installation property disposal officer for further NASA use. If NASA has no further need for the property, it shall be declared excess and reported to the General Services Administration. Appropriate disposition instructions will be issued to the recipient after completion of the Federal agency review.

(2) NASA may require transfer to it of title to individual items or coherent systems (paragraph (b)(8) of this section) of major grantee acquired equipment purchased at a cost of more than $1,000 subject to the following conditions:

(i) The equipment shall be appropriately identified to the recipient in writing.

(ii) NASA shall issue disposition instructions within 120 calendar days after the end of the Federal support of the project for which it was acquired. If NASA fails to issue disposition instructions within the 120 calendar day period, the grantee shall apply the standards of subparagraphs 6b and 6c, Attachment N to OMB Circular A–110 as appropriate.

(iii) When NASA exercises its right to take title, the equipment shall be subject to the provisions for Federally-owned nonexpendable property discussed in § 1260.408(f).

(iv) When title is transferred to the Federal Government, the provisions of subparagraph 6c(2)(b), Attachment N to OMB Circular A–110 shall be followed.

(3) Title to minor equipment items (costing individually $1,000 or less) is not subject to transfer to the agency, except under the conditions of paragraph (b)(8) of this section.

(4) NASA procedure does not require a grantee to transfer title to grant or cooperative agreement-acquired equipment directly to another actual or potential grantee or contractor. Such transfers are accomplished by the Government taking title and issuing the equipment to the second institution as Government-furnished equipment.

(5) NASA normally will not recover equipment that a grantee desires to retain, for reissuance to another institution or to a NASA installation, unless it is specifically required for NASA work at the new location. Exceptions will be made only in highly unusual situations where title transfer is clearly in the best interest of the Government.

(6) Cost sharing by NASA and a grantee in the acquisition of individual items or coherent systems (paragraph (b)(8) of this section) of equipment, in response to a statutory requirement for cost-sharing of in any way that could result in joint ownership, shall normally be avoided.

(7) When cost sharing by NASA and a grantee in the acquisition of major equipment items or coherent systems cannot be avoided, and the NASA contribution will exceed $1,000, agreement regarding NASA retention of its option to take title and the conditions under which the option (if retained) will be exercised, shall be reached and documented prior to purchase. NASA shall have no option to take title if its contribution is $1,000 or less.

(8) When two or more components are fabricated into a single coherent system in such a way that the components lose their separate identities and their separation would render the system useless for its original purpose, the components will be considered as integral parts of a single system. If such a system includes grantee-owned components (for cost sharing or other purposes), paragraph (b)(7) of this section applies. The requirement that NASA seek agreement to retain its option to take title shall further apply where it is expected that one or more grant-acquired components costing $1,000 or less will be fabricated into a single coherent system costing in excess of $1,000. However, an item that is used ancillary to a system, without loss of its separate identity and usefulness, will be considered as a separate item and not as an integral component of the system.

(c) *Procedures.* (1) When a decision is made to revoke or discontinue support of a grant or cooperative agreement, the grants officer shall notify the grantee in writing of the requirement under the instrument for submission of a final inventory report of Government-furnished equipment.

(2) When the cognizant NASA technical officer or program manager desires that NASA take title to a major item of grantee purchased equipment, the technical officer shall request the grants officer to obtain information regarding the grantee's desire to retain the equipment, the use to which it would be put in the absence of further NASA support of the grant or cooperative agreement, and any substantial deleterious effects of removal of the equipment.

(3) The grants officer shall obtain the information and provide copies to the technical officer and the University Affairs Office for their coordinated review and recommendation regarding acquisition of title. The technical officer shall inform the grants officer of the recommendation by means of a memorandum concurred in by the University Affairs Office.

(4) When NASA acquires title to major items of grantee purchased equipment, the grants officer shall notify both the cognizant NASA installation financial management officer and supply and equipment management officer so that proper entries can be made in financial and property accounting records.

§ 1260.506 Revocation.

(a) NASA grants and cooperative agreements may be revoked in whole or in part by NASA after consultation with the grantee, except that a revocation shall not affect any financial commitment which in the judgment of NASA had become firm prior to the effective date of the revocation and is otherwise appropriate. Upon revocation, the grantee shall reduce, insofar as possible, the amount of outstanding commitments and repay by check made payable to the National Aeronautics and Space Administration, the uncommitted balance of all funds that have been paid to the grantee by NASA under the terms of the particular grant or cooperative agreement.

(b) The grantee shall communicate with NASA whenever it has reason to believe that circumstances may necessitate revocation of the grant or cooperative agreement. The most common cause for revocation would be the inability of the grantee to carry out the research for which the grant or cooperative agreement was made or to adhere to the other conditions set forth in the instrument. As a general rule, and availability of the services of the principal investigator named in the instrument is a decisive factor in NASA's decision to award the grant or cooperative agreement. Consequently, NASA should be informed immediately whenever it appears that the principal investigator will find it impossible to continue to direct the research.

§ 1260.507 Transfer of grants or cooperative agreements to other institutions.

Awards cannot be transferred from one institution to another. However, when the principal investigator changes his or her organizational affiliation and desires support for the research at a new location, he or she must submit a new proposal via the appropriate officials of the new institution. Although such a proposal will be reviewed in the normal manner, every effort will be made to expedite a decision. Regardless of the action taken on the new proposal, final reports on the original grant or cooperative agreement, describing the scientific progress and expenditure to date, will be required if that instrument is revoked

§ 1260.508 Accounting procedures.

While no particular classification of accounts is required, it is expected that grantees will maintain records for each grant or cooperative agreement, in accordance with the principles enunciated in § 1260.405, which will permit preparation of the required fiscal report and make possible the determination that grant or cooperative agreement funds were used for the general purpose for which the award was made.

§ 1260.509 Property management standards.

(a) *Definitions.* The following definitions apply for the purpose of this section.

(1) *Real property.* Real property means land, including land improvements, structures and appurtenances thereto, but excluding movable machinery and equipment.

(2) *Personal property.* Personal property means property of any kind except real property. It may be tangible, having physical existence; or intangible, having no physical existence, such as patents, inventions and copyrights.

(3) *Nonexpendable personal property.* Nonexpendable personal property means tangible personal personal property having a useful life of more than 2 years and an acquisition cost of $500 or more per unit. A recipient may use its own definition of nonexpendable personal property provided the definition would at least include all tangible personal property as defined in paragraph (a)(2) of this section. "Equipment" as used in this subpart, is another term for nonexpendable personal property.

(4) *Expendable personal property.* Expendable personal property refers to all tangible personal property other than nonexpendable personal property.

(5) *Excess personal property.* Excess personal property means any personal property under the control of any Federal agency which is not required for its needs and the discharge of its responsibilities, as determined by the Head thereof.

(6) *Acquisition cost of purchased nonexpendable personal property.* Acquisition cost of an item of purchased nonexpendable personal property means the net invoice unit price of the property including the cost of modifications, attachments, accessories or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges such as the cost of installation, transportation, taxes, duty or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the recipient's regular accounting practices.

(7) *Exempt property.* Exempt property means that tangible personal property acquired in whole or in part with Federal funds, and title to which is vested in the recipient without further obligation to the Federal Government except as provided in § 1260.505(b)(2).

(b) *Property management standards for nonexpendable personal property.* The recipient's property management standards for nonexpendable personal property shall include the following procedural requirements:

(1) Property records shall be maintained accurately and shall include:

(i) A description of the property.

(ii) Manufacturer's serial number, model number, national stock number, or other identification number.

(iv) Whether title vests in the recipient or the Federal Government.

(v) Acquisition date (or date received, if the property was furnished by the Federal Government) and cost.

(vi) Percentage (at the end of the budget year) of Federal participation in the cost of the project or program for which the property was acquired. (Not applicable to property furnished by the Federal Government.)

(vii) Location, use and condition of the property and the date the information was reported.

(viii) Unit acquisition cost.

(ix) Ultimate disposition data, including date of disposal and sales price or the method used to determine current fair market value where a recipient compensates the Federal sponsoring agency for its share.

(2) Property owned by the Federal Government must be marked to indicate Federal ownership.

(3) A physical inventory of property shall be taken and the results reconciled with the property records at least once every 2 years. Any differences between quantities determined by the physical inspection and those shown in the accounting records shall be investigated to determine the causes of the difference. The recipient shall, in connection with the inventory, verify the existence, current utilization, and continued need for the property.

(4) A control system shall be in effect to ensure adequate safeguards to prevent loss, damage, or theft of the property. Any loss, damage, or theft of nonexpendable property shall be investigated and fully documented; if the property was owned by the Federal Government, the recipient shall promptly notify the grants officer.

(5) Adequate maintenance procedures shall be implemented to keep the property in good condition.

(6) Where the recipient is authorized or required to sell the property, proper sales procedures shall be established which would provide for competition to the extent practicable and result in the highest possible return.

(c) *Exempt property.* Title to nonexpendable personal property acquired with project funds, shall be vested in the recipient upon acquisition unless it is determined that to do so is not in furtherance of the objectives of the Federal sponsoring agency. When title is vested in the recipient, the recipient shall have no other obligation or accountability to the Federal Government for its use or disposition except as provided in § 1260.505(b)(2).

§ 1260.510 Screening of requests for Government-furnished equipment.

(a) Pursuant to NASA Management Instruction 4000.2, "NASA Equipment Utilization," an agencywide Equipment Visibility System (EVS) has been established to identify and effect optimum use and reuse of Government-owned equipment items of high value and reuse potential. The EVS and this section apply only to grantee requests for Government-furnished equipment. Requests for grantee acquired equipment are neither required nor encouraged to be screened through the EVS.

(b) When a grantee requests Government-furnished equipment of $1,000 or more, the grants officer shall screen the item through the installation's EVS coordinator. Screening requests shall list the manufacturer, model number, description, national stock number, power requirements, estimated cost, and any other information deemed necessary by the EVS coordinator to properly identify the item. Urgent requests may be screened by telephone.

(c) When suitable equipment is located through the foregoing procedures, the holding installation will place a "freeze" on the item for 10 working days pending shipping instructions. Extension of the freeze period must be requested through the EVS coordinator if shipping instructions cannot be furnished within the required period. (See paragraph 5.307, NASA Equipment Management Manual, NASA Handbook 4200.1.)

§ 1260.511 Standards for grantee's financial management systems.

As prescribed by Office of Management and Budget (OMB) Circular A–110, "Grants and Agreements with Institutions of Higher Education, Hospitals and Other Nonprofit Organization," the grantee's financial management system shall provide for:

(a) Accurate, current and complete disclosure of the financial results of the project.

(b) Records that identify adequately the source and application of funds for the grant or cooperative agreement. These records shall contain information pertaining to the award, authorizations, obligations, unobligated balances, assets, outlays, and income.

(c) Effective control over and accountability for all funds, property and other assets. The grantee shall adequately safeguard all such assets and shall assure that they are used solely for authorized purposes.

(d) Comparison of actual outlays with obligated amounts for the grant or cooperative agreement.

(e) Procedures to minimize the time elapsing between the transfer of funds from the U.S. Treasury and the disbursement by the grantee. When advances are made by a letter-of-credit method, the grantee shall make drawdowns as close as possible to the time of making disbursements. See Exhibit F of this Handbook.

(f) Procedures for determining the reasonableness, allowability and allocability of costs in accordance with the provisions of § 1260.405 and the terms of the grant or cooperative agreement.

(g) Accounting records that are supported by source documentation.

(h) Examinations in the form of audits or internal audits. Such audits shall be made by qualified individuals who are sufficiently independent of those authorizing the expenditure of NASA funds to produce unbiased opinions, conclusions or judgments. They shall meet the independence criteria along the lines of Chapter 3, Part 3 of the U.S. General Accounting Office publication, "Standards for Audit of Government Organizations, Programs, Activities and Functions." These examinations are intended to ascertain the effectiveness of the financial management systems and internal procedures that have been established to meet the terms and conditions of the agreements. It is not intended that each agreement awarded to the grantee be examined. Generally, examinations should be conducted on an organization-wide basis to test the fiscal integrity of financial transactions, as well as compliance with the terms and conditions of the NASA grants and other agreements. Such tests would include an appropriate sampling of NASA agreements. Examinations will be conducted with reasonable frequency, on a continuing basis or at scheduled intervals, usually annually, but not less frequently than every 2 years. The frequency of these examinations shall depend upon the nature, size and the complexity of the activity. These examinations do not relieve the cognizant Federal audit agency of its audit responsibilities, but may affect the frequency and scope of such audits.

(i) A systematic method to assure timely and appropriate resolution of audit findings and recommendations.

§ 1260.512 Procurement standards.

As prescribed by Office of Management and Budget Circular A–110, the grantee's procurement practices shall be subject to the following standards:

(a) The grantee shall maintain a code of standards of conduct that shall govern the performance of its officers, employees or agents engaged in the awarding and administration of contracts using NASA funds. No employee, officer or agent shall participate in the selection, award or administration of a contract in which NASA funds are used, where, to his or her knowledge, there exists a financial interest on the part of (1) that person, (2) that person's immediate family or partners, or (3) any organization in which that person or an immediate family member or partner has a financial interest or with whom he or she is negotiating or has any arrangement concerning prospective employment. The grantee's officers, employees or agents shall neither solicit nor accept gratuities, favors or anything of monetary value from contractors or potential contractors. Such standards shall provide for disciplinary actions to be applied for violation of such standards by the recipients' officers, employees or agents.

(b) All procurement transactions shall be conducted in a manner to provide, to the maximum extent practical, open and free competition. The grantee should be alert to organizational conflicts of interest or noncompetitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, invitations for bids or requests for proposals should be excluded from competing for such procurements except when the grantor agency gives approval to a grantee's request to waive this requirement for a particular procurement. Awards shall be made to the bidder/offeror whose bid/offer is responsive to the solicitation and is most advantageous to the grantee, price and other factors considered. Solicitations shall clearly set forth all requirements that the bidder/offeror must fulfill in order for the bid/offer to be evaluated by the grantee. Any and all

bids/offers may be rejected when it is in the grantee's interest to do so.

(c) The grantee shall establish procurement procedures that provide for, at a minimum, the following procedural requirements:

(1) Proposed procurement actions shall follow a procedure to assure the avoidance of purchasing unnecessary or duplicative items. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(2) Solicitations for goods and services shall be based upon a clear and accurate description of the technical requirements for the material, product or service to be procured. Such a description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" descriptions may be used as a means to define the performance or other salient requirements of a procurement, and when so used the specific features of the named brand which must be met by bidders/offerors shall be clearly specified.

(3) Positive efforts shall be made by the grantee to utilize small and disadvantaged business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts utilizing NASA funds.

(4) The types of procuring instruments used, e.g., fixed-price contracts, cost reimbursable contracts, purchase orders, incentive contracts, shall be determined by the grantee but must be appropriate for the particular procurement and for promoting the best interest of the program involved. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(5) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources and accessibility to other necessary resources.

(6) Some form of price or cost analysis should be made in connection with every procurement action. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost to determine reasonableness, allocability and allowability.

(7) Procurement records and files for purchases in excess of $10,000 shall include the following:

(i) Basis for contractor selection;

(ii) Justification for lack of competition when competitive bids or offers are not obtained; and

(iii) Basis for award, cost or price.

(8) A system for contract administration shall be maintained to ensure contractor conformance with terms, conditions and specifications of the contract, and to ensure adequate and timely follow-up of all purchases.

(d) The grantee shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts. These provisions shall also be applied to subcontracts.

(1) Contracts in excess of $10,000 shall contain contractual provisions or conditions that will allow for administrative, contractual or legal remedies in instances in which contractors violate or breach contract terms, and provide for such remedial actions as may be appropriate.

(2) All contracts in excess of $10,000 shall contain suitable provisions for termination by the grantee including the manner by which termination will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(3) All contracts awarded by grantees and their contractors or subgrantees having a value of more than $10,000 shall contain a provision requiring compliance with Executive Order 11246 entitled "Equal Employment Opportunity," as amended by Executive Order 11375 and as supplemented in Department of Labor regulations (41 CFR Part 60).

(4) All negotiated contracts (except those of $10,000 or less) awarded by grantees shall include a provision to the effect that the grantee, NASA, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers and records of the contractor which are directly pertinent to the specific project, for the purpose of making audits, examinations, excerpts and transcriptions.

§ 1260.513 Suspension and termination procedures.

(a) *Policy.* When a university grant or cooperative agreement is terminated at other than its planned end date, the result can be a significant disruption in the university educational activities. NASA has established excellent relationships with hundreds of universities, including a credibility for responsibly understanding and handling the problems experienced by educational institutions. This has resulted in the retention of highly qualified investigators on NASA work and participation of the most able graduate students. To maintain that credibility, suspension and termination of grants or cooperative agreements prior to the planned completion date must be reserved for those few exceptional situations which cannot be handled any other way.

(b) *Suspension.* When a grantee has failed to comply with the terms of a grant or cooperative agreement, NASA may, on reasonable notice to the grantee, temporarily suspend the grant or cooperative agreement, withhold further payments, and prohibit the grantee from incurring additional obligations of funds, pending corrective action by the grantee or a decision by NASA to terminate in accordance with paragraph (c) or (d) of this section. NASA will allow all necessary and proper costs that the grantee could not reasonably avoid during the period of suspension provided that they meet the provisions of the cost principles set forth in § 1260.405.

(c) *Termination for cause.* NASA reserves the right to terminate any grant or cooperative agreements in whole or in part at any time before the date of completion, whenever it is determined that the grantee has failed to comply with the conditions of the instrument. NASA shall promptly notify the grantee in writing of the determination, the reasons for the termination, and the effective date. Payments made to the grantee or recoveries by NASA under grants or cooperative agreements terminated for cause shall be in accordance with the legal rights and liabilities of the parties.

(d) *Termination for convenience.* NASA or the grantee may terminate grants or cooperative agreements in whole or in part when both parties agree that the continuation of the project would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in the case of partial terminations, the portion to be terminated. The grantee shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations as possible. NASA shall allow full credit to the

grantee for NASA's share of the noncancellable obligations, properly incurred by the grantee prior to termination.

(e) *University grants and cooperative agreements.* Before suspending or terminating any grant or cooperative agreement with a university as set forth in paragraphs (b) through (d) of this section, the matter shall be coordinated within NASA as prescribed in NMI 8340.1, "Actions Leading to Decisions to Terminate University Grants and Contracts for the Convenience of the Government"

§ 1260.514 Closeout procedures.

The closeout of a grant or cooperative agreement is the process by which NASA determines that all applicable administrative actions and all required work under the instrument has been completed by the grantee and NASA. Closeout procedures include the following:

(a) Upon request, NASA shall make prompt payments to a grantee for allowable reimbursable costs under the grant or cooperative agreement being closed out.

(b) The grantee shall immediately refund any balance of unobligated (unencumbered) cash that NASA has advanced or paid.

(c) NASA shall obtain from the grantee within 90 calendar days after the date of completion of the grant or cooperative agreement, all financial, performance, and other reports required as the condition of the instrument. NASA may authorize additional time for this purpose when requested by the grantee.

(d) The grantee shall account for any property acquired with Federal funds, or received from the Government in accordance with the provisions of § 1260.408.

(e) In the event a final audit has not been performed prior to the closeout of the grant or cooperative agreement, NASA shall retain the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

§ 1260.515 Novation and change of name agreements.

All novation agreements and change of name agreements of the grantee, prior to execution, shall be reviewed by general counsel for legal sufficiency. 41 CFR, Ch. 18, 28.400 shall be followed for general guidance. Where possible, novation is preferable to termination followed by a new award or any other procedure which causes unnecessary paperwork or disrupts ongoing research efforts.

Subpart 6—Reports

§ 1260.600 General.

This subpart prescribes reports designed to provide records and statistics for management purposes and to comply with statutory requirements.

§ 1260.601 Individual procurement action report (NASA Form 507).

The Individual Procurement Action Report (NASA Form 507) is designed to provide essential procurement records and statistics through a single, uniform reporting program as a basis for required recurring and special reports to the President, the Congress, the Department of Labor, the Office of Emergency Preparedness, the General Accounting Office, the Small Business Administration, and other Federal agencies. The preparation and utilization of NASA Form 507 has been made an integral part of the agencywide system for the recording and reporting of financial and contractual status (FACS). Complete instructions covering the operation of this system are contained in the NASA Financial Management Manual.

§ 1260.602 Committee on academic science and engineering (CASE) reports.

NASA Form 1356, "Committee on Academic Science and Engineering (C.A.S.E.) Report on College and University Projects" is either submitted with funded procurement requests pursuant to NASA Management Instruction 5101.12, "Policy and Procedures Concerning Procurement," or in the case of certain non-funded actions, initiated by the procuring office. All NASA Forms 1356 will be completed, checked and promptly forwarded to the University Affairs Office, NASA Headquarters (Code LU-16), in accordance with the instructions on the form.

§ 1260.603 Federal cash transactions report (SF 272).

Federal Cash Transactions Reports (SF 272) will be submitted quarterly as a condition of receiving advance payments, in accordance with Exhibit F of this part.

§ 1260.604 Annual inventory listing of Government-owned property.

As provided in § 1260.408(f), an annual inventory listing of Government-owned property will be submitted by July 31 of each year, including the information specified in § 1260.509 and beginning and ending dollar value totals for the reporting period.

§ 1260.605 Status and final reports.

(a) Five copies of a brief, informal, Semiannual Status Report including a concise statement of the research accomplished during the report period shall be submitted.

(b) Upon completion of the research, the grantee shall submit five copies of a final technical report which summarizes the results of the entire project. Citation of publications resulting from the research, or abstracts thereof, may serve as all or part of this final report. Research results not intended for publication in technical journals must be in the format prescribed for NASA Technical Notes. In addition, the grantee will report to NASA whether or not any inventions required to be reported under the grant or cooperative agreement have been made in the performance of work thereunder.

(c) A properly certified final fiscal report is required for each grant and cooperative agreement. Report forms for this purpose are forwarded to the business office of the grantee institution, together with the copy of the instrument; additional forms may be requested. Two copies of the final fiscal report should be forwarded to NASA after work under the grant or cooperative agreement has been completed.

Note.—This appendix will appear in the CFR.

Appendix—Listing Exhibits and Attachments

Exhibit A—Assurance of Compliance—Civil Rights Act (NASA Form 1206).
Exhibit B—Research Grant Award (NASA Form 1463).
Exhibit C—Cooperative Agreement (NASA Form 1562).
Exhibit D—NASA Provisions for Research Grants and Cooperative Agreements (NASA Form 1463A).
Exhibit E—Step Funding Illustration.
Exhibit F—Instructions to Recipient Organizations for Acquiring Advance Payments.
Exhibit G—Patent Rights (Small Business Firm or Nonprofit Organization).
Attachment 1—Authorized Signature Card for Payment Vouchers on Letter of Credit (Standard Form 1194).
Attachment 2—Letter of Credit (Standard Form 1193).
Attachment 3—Payment Voucher on Letter of Credit (Sample) (TFS 5401).
Attachment 4—Federal Cash Transactions Report (Standard Form 272).
Attachment 5—Federal Cash Transactions Report (Continuation) (Standard Form 272-A).

The preceding list of forms and instructions may be obtained by the Grantee from the Procurement Officer of the following NASA Offices:

Ames Research Center, National Aeronautics and Space Administration, Moffett Field, CA 94035

Goddard Space Flight Center, National Aeronautics and Space Administration, Greenbelt, MD 20771
John F. Kennedy Space Center, National Aeronautics and Space Administration, Kennedy Space Center, FL 32899
Langley Research Center, National Aeronautics and Space Administration, Hampton, VA 23665
Lewis Research Center, National Aeronautics and Space Administration, Cleveland, OH 44135
Lyndon B. Johnson Space Center, National Aeronautics and Space Administration, Houston, TX 77058
George C. Marshall Space Flight Center, National Aeronautics and Space Administration, Huntsville, AL 35812
National Space Technology Laboratories, National Aeronautics and Space Administration, NSTL Station, MS 39529
Headquarters Contracts and Grants Division, National Aeronautics and Space Administration, Washington, DC 20546

Note.—This exhibit will appear in the CFR.

Exhibit G—Patent Rights

(Small Business Firm or Nonprofit Organization) (July 1981)

(a) *Definitions.*

(1) "Invention" means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code.

(2) "Subject Invention" means any invention of the Grantee conceived or first actually reduced to practice in the performance of work under this grant.

(3) "Practical Application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are to the extent permitted by law or Government regulations available to the public on reasonable terms.

(4) "Made" when used in relation to any invention means the conception or first actual reduction to practice of such invention.

(5) "Small Business Firm" means a small business concern as defined at Section 2 of Pub. L. 85–536 (15 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standards for small business concerns involved in Government procurement, contained in 13 CFR 121.3–8, and in subcontracting, contained in 13 CFR 121.3–12, will be used.

(6) "Nonprofit Organization" means universities and other institutions of higher education or an organization of the type described in Section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under Section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)) or any nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

(b) *Allocation of Principal Rights.* The Grantee may retain the entire right, title, and interest throughout the world to each Subject Invention subject to the provisions of this clause. With respect to any Subject Invention in which the Grantee retains title, the Federal Government shall have a non-exclusive, non-transferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States any Subject Invention throughout the world for which the Grantee has elected to retain title.

(c) *Invention Disclosure, Election of Title and Filing of Patent Applications by Grantee.* (1) After a Subject Invention has been disclosed in writing by the inventor(s) to Grantee personnel responsible for the administration of patent matters, the Grantee will:

(i) Disclose such invention to the Grants Officer within six months;

(ii) Elect whether or not to retain title to any such invention by notifying the Grants Officer within twelve months of disclosure to the Grantee, but in any event, at least three months (unless shortened by the Grants Officer) before (A) a public use or on sale of the invention occurs, (B) a manuscript describing the invention is submitted for publication without assurances of confidentiality, or (C) the invention is otherwise made available to the public;

(iii) File its initial patent application on an elected invention within two years after election; and

(iv) File patent applications in additional countries within either, ten months of the corresponding initial patent application, or six months from the date a license is granted by the Commissioner of Patents and Trademarks to file foreign patent applications when such filing was prohibited for security reasons.

(2) Request for extension of the time for disclosure to the Grants Officer, election and filing, where reasonable, will normally be granted.

(3) The disclosure to the Grants Officer shall be in the form of a written report and shall identify the grant under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding of the nature, purpose, operation, and, to the extent known, the physical, chemical, biological or electrical characteristics of the invention. The report shall also identify any publication, on sale or public use of the invention and whether a manuscript describing the invention has been submitted for publication and accepted at the time of disclosure.

(d) *Forfeiture of Title.* (1) The Grantee will convey to NASA, upon written request title to any Subject Invention:

(i) If the Grantee fails to disclose or elect the Subject Invention within the times specified in (c) above, or elects not to retain title;

(ii) In those countries in which the Grantee fails to file patent applications within the times specified in (c) above: *Provided however,* That if the Grantee has filed a patent application in a country after the times specified in (c) above but prior to its receipt of the written request of NASA, the Grantee shall continue to retain title in that country; or

(iii) In any country in which the Grantee decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in a reexamination or opposition proceeding on, a patent on a Subject Invention.

(e) *Minimum Rights to Grantee.* The Grantee will retain a nonexclusive, royalty-free, license throughout the world in each Subject Invention to which the Government obtains title except if the Grantee fails to disclose the Subject Invention within the times specified in (c) above. This license extends to, and is revocable and transferable as, specified in 9.108–4(b) of the NASA Procurement Regulation.

(f) *Grantee Action to Protect Government's Interest.* (1) The Grantee agrees to execute or to have executed and promptly deliver to NASA all instruments necessary to—

(i) Establish or confirm the rights the Government has throughout the world in those Subject Inventions for which the Grantee retains title, and

(ii) Convey title to NASA when requested under (d) above and to enable the Government to obtain patent protection throughout the world on that Subject Invention.

(2) The Grantee agrees to require, by written agreement, its employees, other than clerical and non-technical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Grantee each Subject Invention made under this grant in order that the Grantee can comply with the disclosure provisions of (c) above and to execute all papers necessary to file patent applications on Subject Inventions and to establish the Government's rights in the Subject Inventions. The disclosure format should require as a minimum, the information requested by subparagraph (c)(3) above. The Grantee shall instruct such employees through the employee agreements or other suitable educational programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to United States or foreign statutory bars.

(3) The Grantee will notify the NASA of any decision not to continue prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not less than thirty days before the expiration of the response period required by the patent office.

(4) The Grantee agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a Subject Invention, the following statement, "This invention was made with Government support under (identify the grant) awarded by NASA. The Government has certain rights in this invention."

(5) The Grantee shall furnish the Grants Officer:

(i) Interim reports every twelve months from the date of this grant, listing all Subject Inventions required to be disclosed during that period;

(ii) A final report prior to close out of this grant listing all Subject Inventions;

(iii) Notification of all subcontracts for experimental, developmental, research,

design or engineering work; identification of the patent rights clause therein, and a copy of the subcontract upon request; and

(iv) Upon request, the filing date, serial number, and title; a copy of the patent application; and patent number and issue date for any Subject Invention in any country in which the Grantee has applied for patents.

(g) *Subcontracts.* (1) The Grantee shall include this clause, suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental, developmental or research work to be performed in the United States, its possessions, or Puerto Rico, by a small business firm or a nonprofit organization. The subcontractor will retain all rights provided for the Grantee in this clause, and the Grantee will not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor's Subject Inventions.

(2) The Grantee will include in all subcontracts, regardless of tier, for experimental, developmental, research, design or engineering work with other than a small business firm or nonprofit organization the patent rights clause required by 9.107–4(b) of the NASA Procurement Regulation.

(h) *Reporting on Utilization of Subject Inventions.* The Grantee agrees to submit on request periodic reports no more frequently than annually on the utilization of a Subject Invention or on efforts at obtaining such utilization that are being made by the Grantee or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the Grantee, and such other data and information as NASA may reasonably specify. The Grantee also agrees to provide additional reports as may be requested by NASA in connection with any march-in proceeding or informal investigation undertaken by NASA in accordance with 9.108–12 of the NASA Procurement Regulation. To the extent data or information supplied under this section is considered by the Grantee, its licensee or assignee to be privileged and confidential and is so marked, NASA agrees that, to the extent permitted by 35 U.S.C. 202(c)(5), it will not disclose such information to persons outside the Government.

(i) *Preference for United States Industry.* Notwithstanding any other provision of this clause, the Grantee agrees that neither it nor any assignee will grant to any person the exclusive right to use or sell any Subject Invention in the United States unless such person agrees that any products embodying the Subject Invention or produced through the use of the Subject Invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by NASA upon a showing by the Grantee or assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

(j) *March-in Rights.* The Grantee agrees that with respect to any Subject Invention in which it has acquired title, NASA has the right in accordance with the procedures of 9.108–12 of the NASA Procurement Regulation to require the Grantee, an assignee or exclusive licensee of a Subject Invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the Grantee, assignee, or exclusive licensee refuses such a request, NASA has the right to grant such a license itself if NASA determines that:

(1) Such action is necessary because the Grantee or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the Subject Invention in such field of use;

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Grantee, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Grantee, assignee, or licensees; or

(4) Such action is necessary because the agreement required by section (i) of this clause has not been obtained or waived or because a licensee of the exclusive right to use or sell any Subject Invention in the United States is in breach of such agreement.

(k) *Special Provisions for Grants with Nonprofit Organizations.* If the Grantee is a nonprofit organization, it agrees that:

(1) Rights to a Subject Invention in the United States may not be assigned without the approval of NASA except where such assignment is made to an organization which has as one of its primary functions the management of inventions and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sale of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention (*Provided,* That such assignee will be subject to the same provisions as the Grantee);

(2) The Grantee may not grant exclusive licenses under United States patents or patent applications in Subject Inventions to persons other than small business firms for a period in excess of the earlier of (i) five years from first commercial sale or use of the invention, or (ii) eight years from the date of the exclusive license excepting that time before regulatory agencies necessary to obtain premarket clearance, unless on a case-by-case basis, NASA approves a longer exclusive license. If exclusive field of use licenses are granted, commercial sale or use in one field of use will not be deemed commercial sale or use as to other fields of use, and a first commercial sale or use with respect to a product of the invention will not be deemed to end the exclusive period to different subsequent products covered by the invention;

(3) The Grantee will share any royalties collected on a Subject Invention with the inventor(s); and

(4) The balance of any royalties or income earned by the Grantee with respect to Subject Inventions, after payment of expenses (including payments to inventors) incidental to the administration of Subject Inventions, will be utilized for the support of scientific research or education.

BILLING CODE 7510–01–M

CIVIL AERONAUTICS BOARD

14 CFR Part 322

[Reg. PR–232]

Automatic Market Entry Procedures; Revocation

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The CAB revokes its rule governing the procedures to be followed by airlines seeking new routes under the Automatic Market Entry Program. This action is taken because the statutory authority for this program has expired.

DATES: Adopted: December 16, 1981. Effective: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: David Schaffer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202–673–5442.

SUPPLEMENTARY INFORMATION: Section 401(d)(7) of the Federal Aviation Act of 1958, which was added by section 12 of the Airline Deregulation Act of 1978, established the Automatic Market Entry (AME) program. Under this program, air carriers were able to apply for and recieve one new route per year without having to undergo a proceeding to determine whether the additional service was consistent with the public convenience and necessity, as they would under other provisions of the Act.

Part 322 of the Board's rules (14 CFR Part 322) set forth the procedures that air carriers were to follow in applying for new routes under this program. By this notice, we are revoking this rule. The statutory authority (section 401(d)(7)) for the AME program has expired by its own terms. Furthermore, after December 31, 1981, air carriers will not need Board permission to commence service on additonal routes. Section 1601(a)(1)(C). They will be able to begin new service on their own initiative without having to follow the procedures of the AME or any other Board program.

Since Part 322 is procedural in nature and the statutory authority for it has expired, the Board finds that it may be revoked without notice and public procedure and that this action may take effect in less than 30 days.

Part 322—Automatic Market Entry Procedures [Reserved]

Accordingly, 14 CFR Part 322, Automatic Market Entry Procedures, is removed and reserved.

(Secs. 204 and 401, Pub. L. 85-726, as amended, 72 Stat. 743, 92 Stat. 1716; (49 U.S.C. 1324, 1371))

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1000

Commission Organization and Functions

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Commission is publishing revisions to its statement of organization and functions to reflect organizational changes made since December 31, 1980. These include a reduction in the number of regional offices; elimination of the Directorate for Field Operations, the Directorate for Communications, and the Office of Media Relations; renaming the Directorate for Hazard Identification and Analysis; creation of a Directorate for Economics and an Office of Public Affairs; and relocation of certain organizational units from Washington, D.C. to Bethesda, Maryland.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Sadye E. Dunn, Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Telephone (202) 634-7700.

SUPPLEMENTARY INFORMATION: The Commission is revising its statement of organization and functions, 16 CFR Part 1000, to include organizational changes since the part was last substantively revised on December 31, 1980, 45 FR 86415. The organizational changes are summarized below:

1. Certain functions of the Commission's Directorate for Hazard Identification and Analysis were transferred to a newly created Directorate for Economics, and the Directorate for Hazard Identification and Analysis was renamed the Directorate for Epidemiology.

2. The Commission's field organization was reduced from 10 Regional Offices and 3 District Offices to 5 Regional Offices. Some of the Regional Offices have moved to new addresses.

3. The Directorate for Field Operations was abolished, and certain of its functions transferred to the Office of the Executive Director.

4. The Directorate for Communications was abolished and certain of its functions were transferred to a newly created Office of Public Affairs, a newly created Office of Outreach Coordination, and the Office of Administration. Its Hotline and Correspondence functions were transferred to the Office of the Secretary.

5. The Office of Media Relations was abolished and its functions were transferred to the newly created Office of Public Affairs which reports to the Chairman.

6. The Office of General Counsel and the Office of the Secretary, except for the public reading room, were relocated from the Commission's headquarters at 1111 18th Street, N.W., Washington, D.C. to its offices at 5401 Westbard Avenue. Bethesda, Maryland.

Since this amendment deals only with internal agency organization, it is being made effective immediately and comments are not being solicited.

For the foregoing reasons, Part 1000 of Chapter II of Title 16 of the Code of Federal Regulations is amended as shown.

PART 1000—COMMISSION ORGANIZATION AND FUNCTIONS

1. The authority citation for Part 1000 reads as follows:

Authority: 5 U.S.C. 552(a).

2. Sections 1000.4, 1000.12, 1000.17 and 1000.21 are revised to read as follows:

§ 1000.4 Commission addresses.

(a) The principal offices of the Commission are in Washington, D.C. All written communications with the Commission should be addressed to the Consumer Product Safety Commission, Washington, D.C. 20207, unless otherwise specifically directed.

(b) The main headquarters of the Commission are at 1111 18th Street, N.W., Washington, D.C. At this location are the Offices of the Chairman and Commissioners, Office of Congressional Relations, Office of Public Affairs, a hearing room, and a public reading room maintained by the Office of the Secretary.

(c) The Office of the General Counsel, Office of the Secretary, Office of Internal Audit, Office of Equal Employment Opportunity and Minority Enterprise, the Executive Director and the operating units under his or her authority, are located at 5401 Westbard Avenue, Bethesda, Maryland.

(d) The Commission has 5 Regional Offices which are located at the following addresses and which serve the states indicated:

(1) Southeastern Regional Office, 800 Peachtree St. N.E., Suite 210, Atlanta, Georgia 30308; Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia.

(2) Midwestern Regional Office, 230 South Dearborn St., Room 2945, Chicago, Illinois 60604; Illinois, Indiana, Iowa, Michigan, Minnesota, North Dakota, Ohio, South Dakota, and Wisconsin.

(3) Southwestern Regional Office, 1100 Commerce St., Room 1 C10, Dallas, Texas 75242; Arkansas, Colorado, Kansas, Louisiana, Missouri, Nebraska, New Mexico, Oklahoma, and Texas.

(4) Northeastern Regional Office, 6 World Trade Center, Vesey Street, 6th Floor, New York, New York 10048; Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, and Virgin Islands.

(5) Western Regional Office, U.S. Customs House, 555 Battery St., Room 416, San Francisco, California 94111; Alaska, American Samoa, Arizona, California, Guam, Hawaii, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming.

§ 1000.12 Organization structure.

The Consumer Product Safety Commission is composed of the principal units listed in this section.

(a) The following units report directly to the Chairman of the Commission:

(1) Office of the General Counsel;

(2) Office of Congressional Relations;

(3) Office of Administrative Law Judge;

(4) Office of Public Affairs;

(5) Office of the Secretary;

(6) Office of Internal Audit;

(7) Office of Equal Employment Opportunity and Minority Enterprise;

(8) Office of the Executive Director.

(b) The following units report directly to the Executive Director of the Commission:

(1) Office of Program Management;

(2) Office of Budget, Program Planning and Evaluation;

(3) Office of Outreach Coordination;

(4) Directorate for Epidemiology;

(5) Directorate for Economic Analysis;

(6) Directorate for Engineering Sciences;

(7) Directorate for Health Sciences;

(8) Directorate for Compliance and Administrative Litigation;

(9) Directorate for Administration;

(10) Five Regional Offices.

§ 1000.17 Office of Public Affairs.

The Office of Public Affairs is responsible for the development, implementation, and evaluation of a comprehensive national public affairs program designed to promote product safety. The Office develops and maintains relations with a wide range of national groups, including: Consumer organizations; business groups; trade associations; state and local government associations; labor organizations; medical, legal, scientific, and other professional associations; national print and broadcast media; and other Federal health, safety, and consumer affairs agencies.

§ 1000.21 Office of the Executive Director.

The Executive Director, under the broad direction of the Chairman and in accordance with Commission policy, acts as the chief operating manager of the agency, supporting the development of the agency's budget and operating plan before and after Commission approval, and managing the execution of those plans. The Executive Director has direct line authority over six operating directorates: Epidemiology, Economic Analysis, Engineering Sciences, Health Sciences, Compliance and Administrative Litigation, and Administration; the Office of Program Management; the Office of Budget, Program Planning, and Evaluation; the Office of Outreach Coordination; and the five Regional Offices.

§§ 1000.28 and 1000.30 [Removed]

3. Sections 1000.28 and 1000.30 are removed.

§§ 1000.25 1000.26, 1000.27 and 1000.29 Redesignated as §§ 1000.27, 1000.28, 1000.29 and 1000.30.

4. Sections 1000.25, 1000.26, 1000.27, and 1000.29 are redesignated as sections 1000.27, 1000.28, 1000.29, and 1000.30 respectively.

5. Section 1000.24 is revised to read as follows:

§ 1000.24 Office of Outreach Coordination.

The Office of Outreach Coordination is responsible for implementing and monitoring, through CPSC's five regional offices, comprehensive public information, education, and other activities designed to promote consumer product safety and explain CPSC actions and policies on regional, state, and local levels. The Office coordinates the activities of the CPSC Regional Offices, Directorates, and the Office of Program Management in implementing comprehensive public outreach programs. It also assists the Office of Public Affairs by implementing outreach activities involving national business, consumer, and professional associations in local or regional meetings.

6. Section 1000.25 is added to read as follows:

§ 1000.25 Directorate for Epidemiology.

The Associate Executive Director for Epidemiology manages the Directorate for Epidemiology, which is responsible for injury data analysis to identify hazards or hazard patterns. The Directorate collects data on consumer product-related hazards and potential hazards, determines the frequency, severity, and distribution of the various types of injuries, and investigates their causes. It assesses the effects of product safety standards and programs on consumer injuries, conducts epidemiological studies and research in the fields of consumer-related injuries, and provides data describing the human factors aspects of injury. It maintains an injury data clearinghouse and manages the National Electronic Injury Surveillance System (NEISS). The Directorate also provides analysis and advice to assure that technical standards requirements are compatible with human anthropometric, perception, and other performance tolerances. It assists in reviewing hazard patterns and epidemiological analysis to clarify possible injury patterns attributed to human factors and advises on all other Commission activities requiring human factors input. It provides appropriate analytical representation to the Office of Program Management.

7. Section 1000.26 is added to read as follows:

§ 1000.26 Directorate for Economic Analysis.

The Associate Executive Director for Economic Analysis manages the Directorate for Economic Analysis which provides the Commission with advice and information on economic and environmental matters and on the economic, social and environmental effects of Commission actions. It analyzes the potential effects of CPSC actions on consumers and on industries, including effects on competitive structure and commercial practices. The Directorate acquires, compiles, and maintains economic data on movements and trends in the general economy and on the production, distribution, and sales of consumer products and their components to assist in the analysis of CPSC priorities, policies, actions, and rules. It plans and carries out economic surveys of consumers and industries. It studies the costs of accidents and injuries. It evaluates the economic, societal, and environmental impact of product safety rules and standards. It performs such regulatory analyses and such studies of costs and benefits of CPSC actions as are required by the Consumer Product Safety Act, The National Environmental Policy Act, the Regulatory Flexiblity Act and other Acts, and by policies established by the Consumer Product Safety Commission.

Dated: December 28, 1981.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket 8879]

Grolier Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order reopens the proceeding and modifies the Commission's order issued on March 13, 1978 (43 FR 18652; 91 F.T.C. 315), by changing the disclosure requirements contained in Paragraphs II (A), (B), (D), and (E), so as to give respondent a choice of several approved methods of

making required disclosures in advising those who reply to respondent's solicitations that they may be contacted directly by a salesperson; and allows sales personnel to present a business card containing prescribed information, when making a sales visit.

DATES: Order issued March 13, 1978. Modifying order issued December 10, 1981.

FOR FURTHER INFORMATION CONTACT: FTC/PS, David C. Fix or Robert D. Friedman, Washington, D.C. 20580. (202) 724–1037.

SUPPLEMENTARY INFORMATION: In the Matter of Grolier Incorporated, a corporation, et al. Codification appearing at 43 FR 18652 remains unchanged.

The Order Modifying Cease and Desist Order is as follows:

Before the Federal Trade Commission

In the matter of Grolier Incorporated, a corporation, et al. Docket No. 8879.

Order Modifying Cease and Desist Order

On August 13, 1981, the Commission issued an order denying respondent's motion to disqualify the Administrative Law Judge who rendered the Initial Decision in this proceeding. In its order, the Commission also invited the parties in this matter to file before the Commission their views as to whether the original Final Order of the Commission, 91 FTC 315 (1978), should be modified to conform to the modified order in *Encyclopedia Britannica*, 96 FTC 778 (1980).

On September 30, 1981, respondent filed a response to the Commission's order. In this submission, respondent first proposed modifying the *Grolier* order to incorporate modifications made in *Britannica* on October 28, 1980. Second, respondent asked for guarantees that any future modifications in *Britannica* also be granted to respondents here. Third, respondent moved that the instant proceeding be stayed until the Commission takes action on a pending motion for further modifications in the *Britannica* order. Finally, respondent also seeks a stay on the ground that a trade regulation rulemaking, rather than an adjudication, is the appropriate manner to conduct further proceedings involving Grolier.

Complaint counsel, on October 14, 1981, filed its answer to respondent's submission, pursuant to the August 13 order. Complaint counsel do not oppose modification of the *Grolier* order to conform with modifications already made in *Britannica*. But, they oppose any assurances of future modifications on the ground that in the event of such modifications, the Commission's rules afford Grolier an appropriate procedural vehicle, Rule 2.51(b), by which Grolier may petition for further modifications in its order. An assessment of whether further modifications should be made in either of the orders in question depends on facts and circumstances particular to the acts and practices of each company. Complaint counsel also oppose granting any stay in order to facilitate a conversion of this adjudication to a rulemaking proceeding.

The Commission agrees with the parties that the modifications in the *Britannica* order granted on October 28, 1980, should now be granted to Grolier. However, the Commission believes that the issue of further modifications in *Britannica* cannot now be resolved with respect to this respondent because the request for further modifications that Britannica made (and which we will allow Grolier to make) depends upon experience in complying with the first modification. See paragraphs 2 and 3, *infra*. Britannica has had this experience, but Grolier has not.[1] Moreover, Grolier has available to it a right to petition the Commission for reopening the *Grolier* matter should any further modifications in *Britannica* justify similar treatment of Grolier. Therefore, a stay of this matter pending further events in *Britannica* would be inappropriate.

Nor does the Commission believe a stay is justified pending resolution of this matter by an industrywide rulemaking proceeding. Respondents rely on *Ford Motor Co.* v. *FTC*, 654 F.2d 599 (9th Cir. 1981) for the proposition that rulemaking is preferable to adjudication where the Commission is attempting to change existing law or to establish rules of widespread application. In this matter the Commission did not engage in any novel interpretation of existing law as the court of appeals believed occurred in *Ford Motor Co.*, but rather the Commission declared practices to be unlawful that were established as violations of Section 5 of the FTC Act over a decade ago, see, e.g., *P. F. Collier & Son Corp.* v. *F.T.C.*, 427 F.2d 261 (6th Cir.), *cert. denied*, 400 U.S. 926 (1970). It is true that issues of relief involving affirmative disclosures distinguish *Grolier* from earlier cases, but the crafting of relief is particular to the facts and circumstances of each case. In this instance, affirmative disclosures were ordered because of the Commission's experience that mere cease and desist order provisions were inadequate to remedy the abuses found to be in violation of Section 5, practices that had persisted over time, despite earlier prohibitive relief. *Grolier, Inc.*, 91 F.T.C. 315, 437, n.98. In this regard, the Seventh Circuit held, in a related case, that rulemaking was not required to replace adjudication where relief differed because "[a] prior insufficient order does not necessitate the insufficiency of all later orders." *Encyclopaedia Britannica, Inc.* v. *FTC*, 605 F.2d 964, 974 (7th Cir. 1979), *cert. denied*, 445 U.S. 934 (1980).

[1] Grolier's argument that it would be at a competitive disadvantage if the Commission does not now assure Grolier it will receive all future modifications granted in *Britannica* is disingenuous. As matters now stand, Britannica is bound by our order while Grolier is not. Grolier has offered no evidence that it is voluntarily complying with our order and until it does comply it probably has a competitive advantage.

Therefore, it is ordered, that Paragraphs II(A), (B), (D), and (E) of the Order issued in this docket on March 13, 1978, shall be modified as follows:

1. Paragraph II(A) shall read:

A. Disseminating or causing to be disseminated any advertisement of promotional material which solicits participation in any contest, drawing or sweepstakes, or solicits any response to any offer of merchandise, service or information, unless any such solicitation clearly and conspicuously discloses that a person who replies as requested may be contacted directly by a salesperson for the purpose of selling respondent's products, using one of the following disclosures:

1. IMPORTANT: This card will let you know of my interest and enable your [location designation, if appropriate] sales representative to

(contact me at home)
(call or visit me) with (details)
(contact me in person) (facts)
(information)

on how I may (purchase) [applicable product].
(buy)

2. IMPORTANT: Returning this card allows me to have your [location designation, if appropriate] sales representative

(contact me at home)
(call or visit me) with (details)
(contact me in person) (facts)
(information)

on how I may (purchase) [applicable product].
(buy)

3. IMPORTANT: Returning this card will enable your [location designation, if appropriate] sales representative to

(contact me at home)
(call or visit me) with (details)
(contact me in person) (facts)
(information)

on how I may (purchase) [applicable product].
(buy)

Upon prior approval in writing of the Assistant Director of the Division of Compliance of the Bureau of Consumer Protection, or his designee, respondent may use any other disclosure that clearly and conspicuously discloses that a person who replies as requested may be contacted directly by a salesperson for the purpose of selling respondent's products. A request for approval shall be in writing and shall be deemed granted if not disapproved within 30 days after receipt by the Assistant Director of the Division of Compliance of the Bureau of Consumer Protection.

2. Paragraph II(B) shall read:

B. Providing any return card, coupon or other device which is used to respond to any advertisement or promotional material covered by Paragraph II(A) above, unless one of the disclosures set forth in such Paragraph, or a disclosure approved by the Assistant Director of the Division of Compliance or his designee as satisfying the requirements of Paragraph II(A), clearly and conspicuously appears in immediate proximity to the space provided for a signature or other identification of the responding party. During the one (1) year period from the date this Order becomes final, respondent may submit a request to reopen these proceedings pursuant to Section 2.51 of the Commission's Rules of Practice. Such petition shall contain information demonstrating that any proposed modifications of Paragraphs II(A) and II(B) will clearly and conspicuously disclose to potential purchasers of respondent's products that a person who replies as requested may be contacted directly by a salesperson for the purpose of selling respondent's products. The foregoing sentence shall not be construed as a limitation of respondent's submission of additional information regarding the request to reopen, including information relating to the financial impact of Paragraph II(A) and II(B) on respondent. Should a request be submitted, the Commission shall determine whether to reopen these proceedings within one hundred twenty (120) days of receipt of such request. The procedure to reopen the proceedings as set forth herein is in addition to, and not in lieu of, any other procedure (or time period with respect to such procedure) permitted by law or the Commission's Rules of Practice.

3. Paragraph II(D) shall be amended by adding the following proviso at the end thereof:

Provided, however, That for one (1) year from the date this Order becomes final, respondent may, in lieu of the card required by this Paragraph of the Order, substitute a business card of at least 2 inches by 3½ inches containing only the following information:

1. The name of the corporation.
2. The name of the salesperson.
3. The term "sales representative".
4. An address and telephone number at which the corporation or salesperson may be contacted.
5. The product or the corporation logo or identifying mark.

During this one (1) year period, respondent shall comply in all other respects with the requirements of Paragraph II(D) above. Prior to the expiration of the aforesaid time period, respondent may submit a request to reopen these proceedings pursuant to Section 2.51 of the Commission's rules of practice. Such petition shall contain information demonstrating that the business card required in Paragraph II(D), as modified above, is effective in communicating to potential purchasers, prior to the entry into their homes or places of business by any of respondent's sales representatives, that the purpose of the sales representative's call is to solicit the sale of respondent's products. The foregoing sentence shall not be construed as a limitation on respondent's submission of additional information regarding the request to reopen, including information on the financial impact of Paragraph II(D) on respondent. Should a request be submitted, the Commission shall determine whether to reopen these proceedings within one hundred twenty (120) days of receipt of such request. Respondent may continue to use the business card, as described by this proviso, during the time that a request to reopen these proceedings pursuant to this Paragraph is pending, and, if such proceedings are reopened, until the Commission determination of the matter has become final. The procedure to reopen the proceedings as set forth herein is in addition to, and not in lieu of, any other procedure (or time period with respect to such procedure) permitted by law of the Commission's Rules of Practice.

4. Paragraph II(E) shall be amended by striking the words "to direct each such person to read the information contained on such card." The amended paragraph shall read:

E. Failing to give the card, required by Paragraph II(D), above, to each person and to provide each such person with an adequate opportunity to read the card before engaging any such person in any sales solicitation.

It is further ordered, That the foregoing modifications shall become effective upon service of this Order.

It is further ordered, That in all other respects, respondent's other requests are denied.

By Direction of the Commission.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1018

Revisions to Advisory Committee Management Regulations

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Consumer Product Safety Commission is amending its advisory committee management regulations to delete references to three advisory committees which were abolished by the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35). The Commission is also correcting certain citations and making other minor corrections.

DATE: These amendments are effective December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Barbara Rosenfeld, Advisory Committee Management Officer, Consumer Product Safety Commission, Washington, D.C. 20207, telephone 202-634-7700.

SUPPLEMENTARY INFORMATION: Prior to August 13, 1981, the Commission had four statutory advisory committees as described in §§ 1018.12 and 1018.15 of the Commission's advisory committee management regulations. The Product Safety Advisory Council provided the Commission with diverse viewpoints on major policy issues, proposed rulemaking, and approaches to special problems and issues. The National Advisory Committee for the Flammable Fabrics Act provided the Commission with advice, opinions, and recommendations on its proposed regulations or other programs to reduce the frequency and severity of burn injuries involving flammable fabrics. The Technical Advisory Committee on Poison Prevention Packaging provided the Commission with advice and recommendations on the establishment of packaging standards to protect children from serious personal injury or illness resulting from handling, using, or ingesting household substances and reviewed and evaluated petitions requesting exemptions from poison prevention packaging regulations. The Toxicological Advisory Board provides the Commission with scientific and technical advice on precautionary labeling for hazardous substances.

Section 1205 of Pub. L. 97-35, enacted August 13, 1981, repealed the statutory authority for three of these committees: the Product Safety Advisory Council, the National Advisory Committee for the Flammable Fabrics Act, and the Technical Advisory Committee on Poison Prevention Packaging. Sections 1018.12 and 1018.15 are accordingly being revised to remove references to the terminated committees. In addition, the material in these sections relating to the Commission's remaining committee, the Toxicological Advisory Board, is being revised by correction of a section number in the U.S. Code citation of the Federal Hazardous Substances Act and by addition of the corresponding Statutes at Large citation. Section 1018.12 is being additionally revised to indicate that the Toxicological Advisory Board is the remaining statutory committee subject to the Federal Advisory Committee Act. While section 1206 of Pub. L. 97-35 also provides for new chronic hazard advisory panels, these panels are exempt from the Federal Advisory Committee Act, and thus are not provided for in these regulations. The Commission is preparing regulations for these panels, and will publish them as a separate part of Title 16.

A new paragraph is being added to § 1018.4, Applicability, to make explicit the fact that Part 1018 does not apply to committees specifically exempted by statute from the Federal Advisory Committee Act. As mentioned above, the chronic hazard advisory panels are specifically exempted from the Federal Advisory Committee Act by statute.

Also, several references to the OMB Committee Management Secretariat are being revised to reflect the transfer of the Committee Management Secretariat from OMB to the General Services Administration as effected by Reorganization Plan No. 1 of 1977, 91 Stat. 1633.

Since these amendments relate to matters of internal agency policy and management, and merely reflect changes effected by acts of Congress or the President, they are being made effective immediately and comments are not being solicited, in accordance with the provisions of 5 U.S.C. 553(a)(2).

PART 1018—ADVISORY COMMITTEE MANAGEMENT

For the reasons set out above, Part 1018 of Title 16 of the Code of Federal Regulations is amended as shown.

1. The authority citation for Part 1018 is as follows:

Authority: Sec. 8, Pub. L. 92-463, 86 Stat. 770 (5 U.S.C. App. I).

2. Section 1018.2(h) is revised to read as follows:

§ 1018.2 Definitions.

* * * * *

(h) "GSA Secretariat" means the Committee Management Secretariat of the General Services Administration.

* * * * *

3. Section 1018.4 is revised by adding paragraph (c) to read as follows:

§ 1018.4 Applicability.

* * * * *

(c) This part shall not apply to a committee or other group to the extent that it is specifically exempted by statute from the Federal Advisory Committee Act.

4. Section 1018.12 is revised to read as follows:

§ 1018.12 Statutory advisory committees.

The Commission has one statutory advisory committee subject to the Federal Advisory Committee Act. The Toxicological Advisory Board was established by the Commission on December 22, 1978, pursuant to section 20 of the Federal Hazardous Substances Act, as amended (Pub. L. 95-631, 92 Stat. 3747, 15 U.S.C. 1275).

5. Section 1018.15 is revised to read as follows:

§ 1018.15 Membership composition.

The Toxicological Advisory Board, as specified in section 20 of the Federal Hazardous Substances Act, as amended (Pub. L. 95-631, 92 Stat. 3747, 15 U.S.C. 1275), shall be composed of nine members appointed by the Commission. Each member of the Board shall be qualified by training and experience in one or more fields applicable to the duties of the Board, and at least three of the members of the Board shall be members of the American Board of Medical Toxicology. The Commission will seek a balanced membership, including individuals representative of consumers, government and industry.

§ 1018.11 [Amended]

§ 1018.43 [Amended]

§ 1018.62 [Amended]

6. In addition to the amendments set forth above, 16 CFR Part 1018 is amended by removing the word "OMB" and inserting, in its place, the word "GSA" in the following places:

16 CFR 1018.11(a);
16 CFR 1018.43;
16 CFR 1018.62 (c) and (d).

Dated: December 24, 1981.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 81-37252 Filed 12-30-81; 8:45 am]

BILLING CODE 6355-01-M

16 CFR Parts 1201, 1402, 1505, 1615, 1616, and 1632

Technical Amendments to Standards and Regulations To Correct Incorporations by Reference

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Consumer Product Safety Commission has issued several standards and regulations which contain citations to existing procedures, test methods, or standards, and provide that the cited materials will be used to determine compliance with the Commission's requirements. This procedure is called "incorporation by reference," and can be done only with the approval of the Director of the Federal Register. Some of the Commission's standards and regulations contain incorporations by reference which do not meet all applicable requirements established by the Office of the Federal Register, and published at 1 CFR Part 51. The Commission is issuing technical amendments to those standards and regulations so that they will meet all requirements for incorporation by reference. These technical amendments do not change any substantive provision of any of the standards or regulations which are the subject of this notice.

DATE: These technical amendments shall be effective December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Allen F. Brauninger, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207, (301) 492-6980.

SUPPLEMENTARY INFORMATION: The Consumer Product Safety Commission (Commission) issues standards and regulations under several statutes, including the Consumer Product Safety Act (CPSA, 15 U.S.C. 2051 et seq.), the Federal Hazardous Substances Act (FHSA, 15 U.S.C. 1261 et seq.), and the Flammable Fabrics Act, (FFA, 15 U.S.C. 1191, et seq.). The Commission has in force several standards and regulations under these statutes which contain citations to one or more existing procedures, test methods, or standards, and provide that provisions of the cited materials will be followed for purposes of determining compliance with the Commission's standard or regulation. This procedure is called "incorporation by reference," a technique employed to make the cited materials a part of the standard or regulation without the necessity of publishing the text of the cited materials, which in some cases can be voluminous. When done in accordance with the Administrative Procedure Act (5 U.S.C. 552(a)) and regulations issued by the Director of the Federal Register (1 CFR Part 51), incorporation by reference gives the cited materials the force and effect of law.

Some of the incorporations by reference appearing in the Commission's standards and regulations which were issued before 1979 do not comply with requirements for incorporation by reference set forth in 1 CFR Part 51, or with the format established by the Office of the Federal Register for incorporation by references.

For example, some do not contain an explicit statement that the cited material is incorporated by reference. Others do not state that the incorporation by reference has been approved by the Director of the Federal Register. some others do not state that the material incorporated by reference is available for inspection at the Office of the Federal Register.

For this reason, the Commission is making technical amendments to portions of the following standards and regulations so that they will meet all applicable requirements for incorporation by reference:

1. Safety Standard for Architectural Glazing Material, 16 CFR Part 1201, §§ 1201.4(b)(3), 1201.4(d)(2), 1201.4(e)(1), and 1201.7(b).

2. CB Base Station Antennas, TV Antennas, and Supporting Structures, 16 CFR Part 1402, § 1402.4(a)(1).

3. Requirements for Electrically Operated Toys or Other Electrically Operated Articles Intended for Use by Children, 16 CFR Part 1505, § 1505.5(e)(5), 1505.5(h)(2), 1505.6(e)(3), 1505.6(g)(5).

4. Standard for the Flammability of Children's Sleepwear: Sizes 0 Through 6X (FF 3-71), 16 CFR Part 1615, § 1615.4(g)(4).

5. Standard for the Flammability of Children's Sleepwear: Sizes 7 through 14 (FF 5-74), 16 CFR Part 1616, § 1616.5(c)(4).

6. Standard for the Flammability of Mattresses (and Mattress Pads) (FF 4-72), 16 CFR Part 1632, § 1632.5(b)(1).

Generally, the Administrative Procedure Act (APA, 5 U.S.C. 553) requires that agencies must give notice of proposed rulemaking and provide opportunity for interested parties to submit written comments on the proposal before a rule can be issued or amended. However, 5 U.S.C. 553(b)(B) provides that notice of proposed rulemaking and public participation are not required when the agency makes a finding for good cause that such notice and opportunity for comment are "impracticable, unnecessary, or contrary to the public interest."

The Commission finds for good cause that notice of proposed rulemaking and opportunity for comment are not necessary for issuance of the amendments published below because they do not affect any substantive requirement or provision of the standards and regulations in question. The only purpose of the amendments is to make the text of certain sections of those standards and regulations conform to the format for incorporation by reference now required by the Office of the Federal Register. In this instance, providing notice of proposed rulemaking and opportunity for submission of comments would be a meaningless gesture.

Similarly, the APA requires at 5 U.S.C. 553 that a "substantive rule" must be published at least 30 days before its effective date, unless the agency finds otherwise, for good cause and publishes that finding with the final rule.

As stated above, the amendments published below do not alter or affect any substantive provision of the standards and regulations which they modify; they change only the language used to incorporate various materials by reference into those standards and regulations. For this reason, the requirement of 5 U.S.C. 553 for publication of a final substantive rule, at least 30 days before its effective date is not applicable, and the amendments published below shall become effective immediately.

Accordingly, pursuant to section 9(h) and 30(a) and (b) of the Consumer Product Safety Act, 15 U.S.C. 2058(h), 2079(a) and (b), section 10(a) of the Federal Hazardous Substances Act, 15 U.S.C. 1269(a), and sections 4 and 5 of

the Flammable Fabrics Act, 15 U.S.C. 1193 and 1194, the Commission amends Title 16, Chapter II, Parts 1201, 1402, 1505, 1615, 1616, and 1632 of the Code of Federal Regulations, as follows:

PART 1201—SAFETY STANDARD FOR ARCHITECTURAL GLAZING MATERIALS

1. In § 1201.4, paragraphs (b)(3)(ii), (d)(2)(iii), and (e)(1)(iii) are revised to read as follows:

§ 1201.4 Test procedures.

* * * * *

(b) *Test equipment.* * * *

(3) * * *

(ii) *Simulated weathering test.* The equipment shall be a xenon arc (water-cooled) Weather-Ometer employing a lamp rated at 6500 watts and automatic light monitoring and control systems. Borosilicate inner and outer filters shall be used. An appropriate water spray cycle shall be used. Operating procedures shall be in accordance with ASTM G 26–70, "Standard Recommended Practice for Operating Light—and Water-Exposure Apparatus (Xenon-Arc Type) for Exposure of Nonmetallic Materials," April 13, 1970, as augmented for plastics by ASTM D 2565–70, "Standard Recommended Practice for Operating Xenon-Arc Type (Water-Cooled) Light- and Water-Exposure Apparatus for Exposure of Plastics," Procedure B, June 12, 1970, which are incorporated by reference. Copies of both documents are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103. They are also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register.

* * * * *

(d) *Test procedures.* * * *

(2) *Environmental durability test procedures* * * *

(iii) *Indoor aging test.* The specimens shall be hung in the test chamber for 10 complete cycles (480 hours). The procedure shall be in accordance with procedure A of ASTM D 756–56, "Test for Resistance of Plastics to Accelerated Service Conditioning," September 10, 1956. (Reapproved 1971), which is incorporated by reference, except that during the humid phase of the cycle the relative humidity shall be maintained at 95 percent. Copies of ASTM D 756–56 are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103. This test method is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register.

* * * * *

(e) *Interpretation of results*—(1) *Impact test.* * * *

(iii) The specimen has:

(A) A modulus of elasticity less than 750,000 psi (5,170 megapascal) when measured by ASTM D 790–71, "Standard Method of Test for Flexural Properties of Plastics," October 29, 1971, which is incorporated by reference, and

(B) A Rockwell hardness (M or R scale) less than 140 when measured by ASTM D 785–65 (Reapproved 1979), "Standard Method of Test for Rockwell Hardness of Plastics and Electrical Insulating Materials," August 31, 1965, which is incorporated by reference. Copies of both documents are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103. They are also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which was approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register.

* * * * *

2. In § 1201.7, paragraph (b)(1) is revised to read as follows:

§ 1201.7 Effective date.

* * * * *

(b) Architectural glazing materials manufactured before July 6, 1977 may be incorporated into architectural products listed in § 1201.1(a) through July 5, 1978 if:

(1) The architectural glazing material conforms to ANSI Standard Z97.1–1972 or 1975, "Performance Specifications and Methods of Test for Safety Glazing Material Used in Buildings," 1972 or 1975*, which is incorporated by reference, and

* * * * *

PART 1402—CB BASE STATION ANTENNAS, TV ANTENNAS, AND SUPPORTING STRUCTURES

3. In § 1402.4, paragraph (a)(1)(i)(E) is revised to read as follows:

§ 1402.4 Requirements to provide performance and technical data by labeling and instructions.

(a) *Notice to purchasers.* * * *

(1) *Antennas.* * * *

(i) *Label.* * * *

(E)(*1*) The colors in figure 1 shall conform to ANSI Standard Z53.1–1971, "Safety Color Code for Marking Physical Hazards," published in 1971 by the American National Standards Institute, which is incorporated by reference. Copies of this document are available from the American National Standards Institute, 1430 Broadway, New York, New York 10018. This standard is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register. Alternatively, the colors "red" and "yellow" in figure 1 may conform to Color Tolerance Charts, published by the Department of Transportation. Copies of the Color Tolerance Charts are available from the Office of Hazardous Materials, Department of Transportation, Washington, D.C. 20590. These materials are also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408.

(*2*) Color limit values shall be determined by ASTM D 1535–68, "Specifying Color by the Munsell System," published in 1968 by the American Society for Testing and Materials. Copies of ASTM D 1535–68 are available from the American Society for Testing and Materials, 1916 Race

* Copies of ANSI Standard Z97.1–1972 or 1975 are available from the American National Standards Institute, 1430 Broadway, New York, New York 10018. They are also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the editions which have been approved by the Director of the Federal Register and which have been filed with the Office of the Federal Register.

Street, Philadelphia, Pennsylvania 19103. These materials are also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register. Alternatively, color limit values for red or yellow may be determined by the Department of Transportation Color Tolerance Charts, which display the desired color within the tolerance limits.

* * * * *

PART 1505—REQUIREMENTS FOR ELECTRICALLY OPERATED TOYS OR OTHER ELECTRICALLY OPERATED ARTICLES INTENDED FOR USE BY CHILDREN

4. In § 1505.5, paragraphs (e)(5) and (h)(2) are revised to read as follows:

§ 1505.5 Electrical design and construction.

* * * * *

(e) *Power supply connections (cords and plugs).* * * *

(5) A flexible electrical power cord provided on a toy shall be type SP–2 (as defined in the "National Electrical Code," Chapter 4, article 400, pages 230–241 (1978)[1], or its equivalent, or a heavier general-use type, and shall be not less than 5 feet nor more than 10 feet in length when measured as the overall length of the attached cord outside the enclosure of the toy, including fittings, up to the face of the attachment-plug cap. However, hand-held educational or hobby-type products intended for heating such as woodburning tools, shall use one of the type cords designated below, in accordance with the weight of the product without the cord:

Weight of appliance (without cord) and cord type
½ lb. (0.227 kg) and lighter: SP–1, SPT–1, HPD. Heavier than ½ lb. (0.227 kg): SP–2, SPT–2, SV, SVO, SVT, SVTO, HPD, HPN, SJ, SJO, SJT, SJTO.

* * * * *

(h) *Strain relief.* * * *

(2) If suitable auxiliary insulation is provided under a clamp for mechanical protection, clamps of any material are acceptable for use on Type SP–2 (as defined in the "National Electrical Code," chapter 4, article 400, pages 184–194 (1971)[2]) or equivalent rubber-insulated cord. For heavier types of thermoplastic-insulated cord, clamps may be without auxiliary insulation unless the clamp may damage the cord insulation.

5. In § 1505.6, paragraphs (e)(3)(n) and (g)(5)(i) are revised to read as follows:

§ 1505.6 Performance.

* * * * *

(e) *Electrical.* * * *

(3) *Leakage current and repeated dielectrical withstand tests.* * * *

(iv) With the connections intended for the source of supply connected thereto and then connected to the ungrounded side of a power supply circuit having a voltage equal to 110 percent of the rated voltage of the toy, the leakage current through a noninductive 1,500-ohm resistor connected between the gounded side of the supply circuit and each dead metal part (accessible and inaccessible) shall, when stable, be measured in accordance with the test provisions established in ANSI Standard C 101.1–1971, "American National Standard for Leakage Current for Appliances," approved November 17, 1970, which is incorporated by reference. Copies of this document are available from American National Standards Institute, 1430 Broadway, New York, New York 10018. This document is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register.

* * * * *

(g) *Thermal.* * * *

(5) *Temperature measurements.*

(i) *General.* Temperatures shall be measured by means of instruments utilizing thermocouples of No. 30 AWG (American Wire Gage) wire (either copper and constantan or iron and constantan) and potentiometer-type instruments that are accurate and are calibrated in accordance with current good laboratory practices. The thermocouple wire shall conform with the requirements for "special" thermocouples as listed in the table of limits of error of thermocouples (Table VIII) in ANSI Standard C 96.1–1964, "American Standard for Temperature Measurement Thermocouples," approved June 9, 1964, which is incorporated by reference. Copies of this document are available from American National Standards Institute, 1430 Broadway, New York, New York 10018. This standard is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C., 20408. This incorporation by reference was approved by the Director of the Office of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register.

* * * * *

PART 1615—STANDARD FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZES THROUGH 6X (FF 3–71)

6. In § 1615.4, paragraph (g)(4)(i) is revised to read as follows:

§ 1615.4 Test procedure.

(g) *Testing.* * * *

(4) *Laundering.*

(i) The procedures described under paragraphs (b) through (g) of this section shall be carried out on finished items (as produced or after one washing and drying) and after they have been washed and dried 50 times according to AATCC Test Method 124–1969, "Appearance of Durable Press Fabrics After Repeated Home Laundering," Technical Manual of the American Association of Textile Chemists and Colorists, vol. 46, 1970, which is incorporated by reference. Copies of this

Copies of this document are available from the National Fire Protection Administration, 60 Batterymarch Park, Quincy, Massachusetts 02269. This document is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street, NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register.

[2] NFPA No. 70–1971, 1971 edition of National Electrical Code, Article 400, "Flexible Cords and Cables," pages 70–184 through 70–194, published by the National Fire Protection Association, which is incorporated by reference. Copies of this document are available from the National Fire Protection Association, 60 Batterymarch Park, Quincy, Massachusetts 02269. This document is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register.

document are available from the American Association of Textile Chemists and Colorists, P.O. Box 12215, Research Triangle Park, North Carolina 27709. This document is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register. Items which do not withstand 50 launderings shall be tested at the end of their useful service life.

* * * * *

PART 1616—STANDARDS FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZES 7 THROUGH 14 (FF 5–74)

7. In § 1616.5, paragraph (c)(4)(i) is revised to read as follows:

§ 1616.5 Test procedure.

* * * * *

(c) *Testing.* * * *

(4) *Laundering.*—(i) The Procedures described under § 1616.4 *Sampling and acceptance procedures,* § 1616.5(b) *Conditioning and mounting of specimens,* and (c) *Testing,* shall be carried out on finished items (as produced or after one washing and drying) and after they have been washed and dried 50 times according to the laundering procedures in AATCC Test Method 124–69, "Appearance of Durable Press Fabrics After Repeated Home Laundering," Technical Manual of the American Association of Textile Chemists and Colorists, vol. 46, 1970, which is incorporated by reference. Copies of this document are available from the American Association of Textile Chemists and Colorists, Post Office Box 12215, Research Triangle Park, North Carolina 27709. This document is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Office of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register. Items which do not withstand 50 launderings may be tested at the end of their useful service life with prior approval of the Consumer Product Safety Commission.

PART 1632—STANDARD FOR THE FLAMMABILITY OF MATTRESSES (AND MATTRESS PADS) (FF 4–72)

8. In § 1632.5, paragraph (b)(1) is revised to read as follows:

§ 1632.5 Mattress pads.

* * * * *

(b) *Laundering.* (1) Mattress pads which have had a chemical fire retardant treatment or contain any chemically fire retardant treatment components, shall be tested in accordance with § 1632.4 *Test procedure* in the condition in which they are intended to be sold, and after they have been washed and dried 10 times in accordance with washing procedure 6.2 (III), with a water temperature of 60° ±2.8° C (140° ±5° F), and drying procedure 6.3.2.(b), prescribed in AATC Test Method 12469, "Appearance of Durable Press Fabrics After Repeated Home Laundering," Technical Manual of the American Association of Textile Chemists and Colorists, vol. 46, 1970, which is incorporated by reference. Copies of this document are available from the American Association of Textile Chemists and Colorists, Post Office Box 12215, Research Triangle Park, North Carolina 27709. This document is also available for inspection at the Office of the Federal Register, Room 8401, 1100 L Street NW., Washington, D.C. 20408. This incorporation by reference was approved by the Director of the Federal Register. These materials are incorporated as they exist in the edition which has been approved by the Director of the Federal Register and which has been filed with the Office of the Federal Register. Maximum load shall be 3.46 kg (8 lb) and may consist of any combination of test items and dummy pieces. Alternatively, a different number of times under another washing and drying procedure may be specified and used, if that procedure has previously been found to be equivalent by the Consumer Product Safety Commission.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 211

[Release No. SAB–42]

Staff Accounting Bulletin No. 42; Business Combinations

AGENCY: Securities and Exchange Commission.

ACTION: Publication of staff accounting bulletin.

SUMMARY: The interpretations in this Staff Accounting Bulletin express the staff's views concerning the application of existing financial accounting standards to business combinations accounted for by the purchase method involving financial institutions, including the allocation of purchase price to tangible and intangible assets acquired and amortization periods for intangible assets.

EFFECTIVE DATE: December 23, 1981.

FOR FURTHER INFORMATION CONTACT: Marc D. Oken, Office of the Chief Accountant, Securities and Exchange Commission, 500 N. Capitol Street, Washington, D.C. 20549, (202—272–2131).

SUPPLEMENTARY INFORMATION: The statements in Staff Accounting Bulletins are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval. They represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

December 23, 1981.

George A. Fitzsimmons,

Secretary.

Staff Accounting Bulletin No. 42

The staff hereby adds new topic, 2–A–3, setting forth the staff's views on questions pertaining to the application of existing accounting standards to business combinations accounted for by the purchase method involving financial institutions.

Topic 2: Business Combinations

A. Purchase Method

* * * * *

3. Acquisitions Involving Financial Institutions

Facts

When financial institutions are acquired in periods of high interest rates, the use of the purchase method of accounting may result in significant

effects on the reported results of operations of the combined companies. In such periods, a substantial discount is applied to the historical cost of any low-yielding mortgage loans and investments to determine their fair value at the acquisition date. The amount paid by the acquiring entity can be significantly higher than the amounts allocated to the identifiable assets acquired. Therefore, the amount of the purchase price in excess of the fair value of the tangible and identifiable intangible assets acquired which is allocated to purchased goodwill is often very significant. The discount on the loans and investments is accreted to income using the interest method to report a market yield on the acquired assets over a relatively short period based on the estimated life of the loans and investments. Goodwill has been amortized over as many as 40 years on a straight-line basis. The accretion of the discount to income over a short period, which is partially offset by the amortization on a straight-line method over longer periods of the purchase price amounts allocated to goodwill, often results in substantial positive effects on the reported results of operations in the first few years subsequent to the acquisition. The effect on the reported results of operations of such business combinations varies depending on the amount of discount applied to the loan and investment portfolios to record them at their fair values, the purchase price allocated to tangible and identifiable intangible assets and to goodwill, and the related accretion and amortization periods and methods selected. In certain filings with the Commission involving banks and savings and loan institutions where this effect has been significant, the staff has questioned whether the financial statements and pro forma results of operations properly reflected the economics of the purchase transaction.

Question 1

Are there any unique considerations in the allocation of purchase price to acquired tangible and intangible assets in the acquisition of financial institutions?

Interpretive Response

The staff believes that adequate guidance is provided by Accounting Principles Board ("APB") Opinion No. 16, "Accounting for Business Combinations," APB Opinion No. 17, "Accounting for Intangible Assets," and by Financial Accounting Standards Board ("FASB") Interpretation No. 9, "Applying APB Opinions No. 16 and 17 When a Savings and Loan Association or a Similar Institution is Acquired in a Business Combination Accounted for by the Purchase Method." [1] These accounting standards generally require that all tangible and identifiable intangible assets acquired be recorded on the basis of their fair values at the acquisition date. The cost of unidentifiable intangible assets purchased (goodwill) is measured by the total cost of the purchase less the sum of the amounts assigned to the fair value of identifiable tangible and intangible assets and less the fair value of deposits and other liabilities assumed. In practice, however, some of the principles in these standards may be difficult to apply to acquisitions of financial institutions.

Determination of the fair value of loans and other investments acquired in a business combination involving financial institutions may not be difficult since these values are computed based on a comparison of the historical interest yields of the acquired portfolios and market yields for comparable loans and investments. However, the staff's experience has been that the applicable accounting standards have not always been properly considered. Many factors may need to be evaluated in the selection of an interest rate which properly reflects a comparable market yield. The discount applied to loans and investments to attain a market yield should be accreted using the interest method. The accretion period for the loan discount should be the remaining contractual term to maturity of the portfolio adjusted for anticipated prepayments. Recent trends which indicate slower turnovers of mortgaged residential properties should be considered when determining expected prepayments. The impact of any estimated future tax effects of differences between the tax bases and the amounts otherwise assignable to any assets acquired must be considered in estimating their fair value (paragraph 89 of APB Opinion No. 16).

Determination of the values of identifiable intangible assets purchased is often considered impracticable because they are not easily quantified. As a result, the methods of applying this aspect of the standards have varied considerably in financial statements included in registrant filings. A discussion of purchased identifiable intangible assets is contained in paragraph 8 of FASB Interpretation No. 9:

> The purchase price paid for a savings and loan association may include an amount for one or more factors, such as the following:
> (a) Capacity of existing savings accounts and loan accounts to generate future income,
> (b) Capacity of existing savings accounts and loan accounts to generate additional business or new business, and
> (c) Nature of territory served.

Application of the guidance provided in FASB Interpretation No. 9 could result in values assigned to various identifiable intangible assets in commercial bank or savings and loan association acquisitions, including:

- Mortgage escrow deposits.
- Branch networks.
- Mortgage servicing rights.
- Customer base.
- Deposit relationships.
- Name in the marketplace.
- Earning capacity.

The values inherent in some of these identifiable intangibles overlap. Determination of the specific intangibles purchased, as well as the fair values thereof, has to be made based on the individual facts and circumstances. The staff recognizes that this process is often difficult and that little practical guidance exists to facilitate such valuations. However, when the purchase price is not properly allocated to all intangibles, there may be a significant effect on the reported results of operations of the consolidated entity because the amount assigned to goodwill, which has usually been amortized over long periods, could be overstated. Although the practice of allocating costs to values associated with the earnings potential of acquired deposits has gained increased acceptance, the staff believes that the allocation of purchase price to all identifiable intangible assets acquired has often not received adequate consideration in business combinations involving financial institutions.

Question 2

What is the appropriate measure of the fair value of deposit liabilities assumed in the purchase of financial institutions?

Interpretative Response

The staff believes that the standards set forth in paragraph 7 of FASB Interpretation No. 9 for valuing the deposits of a savings and loan association are appropriate for other financial institutions. The fair value of such liabilities is the present value of the amounts to be paid using prevailing interest rates for similar deposits at the

[1] Footnote 1 to FASB Interpretation No. 9 states that the Interpretation is applicable to financial institutions other than savings and loan associations which have similar types of assets and liabilities.

acquisition date. For example, the values assigned to passbook savings accounts paying interest at the maximum allowable rate would be the historical cost of the savings deposits to the acquired association plus any accrued interest. Noninterest bearing demand deposits of an acquired commercial bank would be recorded at their carrying amount. Acquired time deposits with interest rates less than the prevailing interest rate for similar time deposits would be recorded at a discount to their carrying value on an individual or on some aggregate basis and the discount would be amortized to report the prevailing interest rate on the acquired deposits. Any discount on deposits should be amortized using the interest method.

Consideration should be given to adjusting the fair value of deposits for the estimated future tax effects of differences in the tax bases and amounts otherwise assignable to the deposits, as specified in paragraph 89 of APB Opinion No. 16.

As discussed in Question 1 above, any purchased identifiable intangible assets associated with the deposits of the acquired institution should be recorded at their estimated fair values at acquisition.

Question 3

What are the appropriate amortization periods and methods for intangible assets acquired in the acquisition of financial institutions?

Interpretive Response

APB Opinion No. 17 and FASB Interpretation No. 9 provide appropriate guidance on this matter. The amortization period should be determined separately for each identifiable intangible asset acquired and for goodwill. The amortization period for identifiable intangibles may be readily determinable. However, determination of the appropriate amortization period for goodwill is more difficult and should be carefully evaluated.

The lives of identifiable intangible assets are often closely related to other assets acquired or liabilities assumed. For example, an intangible asset whose fair value is the present value of expected earnings from mortgage escrow deposits should be amortized over the estimated life of the related mortgage investments; an amortization method should be used which reflects the decreasing escrow levels resulting from expected payoffs of the mortgage loans. An intangible asset whose fair value is the present value of expected net interest margins to be earned from other purchased deposits normally should be amortized on an accelerated basis over a period which reflects the pattern of the expected runoff of the related deposits.

When identifiable intangible assets have been purchased in the acquisition of a financial institution, but their fair values are not determinable, these costs should be assigned to goodwill. Paragraph 30 of APB Opinion No. 17 requires that goodwill be amortized on a straight line basis unless it is demonstrated that an accelerated method is more appropriate. Paragraph 9 of FASB Interpretation No. 9 indicates that an accelerated method of amortization would be appropriate and may be used for goodwill when the amount assigned to goodwill includes costs for identifiable intangibles whose fair values are not determinable and the benefits expected to be received from these intangibles decline over the expected life of the factors which are the basis for those intangibles. The staff believes that such circumstances demonstrate that an accelerated method of amortization for goodwill is more appropriate than a straight line method and should be used.

Paragraph 27 of APB Opinion 17 provides factors which should be considered in estimating the useful lives of intangible assets. There are many relevant matters which should be evaluated when applying these guidelines to determine the appropriate amortization period for goodwill. Regulated depository institutions, for example, are experiencing erosions of their traditional markets because of inroads made by unregulated financial segments. Competitive pressures, the potential effects of deregulatory initiatives, and rapid technology changes in the industry create an uncertain environment which must be considered when determining the period in which goodwill benefits will exist. This uncertainty may be greater for savings and loan associations and savings banks since high interest rates have adversely affected their financial positions due to the funding costs of their fixed-rate loan portfolios.

The staff believes that the automatic selection of a 40-year amortization period for goodwill purchased in a financial institution acquisition is not appropriate. The uncertainty which results from the economic, competitive and organizational changes facing these institutions suggests that it is usually not realistic to conclude that purchased goodwill benefits have indefinite lives. In some of the financial institution filings which the staff has reviewed, the staff concluded, based on the facts and circumstances, that short amortization periods were appropriate with respect to the business combinations reflected in the filings. The allocation to goodwill of significant amounts of the purchase price, where appeared to be the result of a failure to properly identify and quantify all intangible assets purchased, was often a factor which influenced these decisions. The staff recognizes that under certain circumstances, goodwill benefits may exist beyond a short-term period. For example, in a recent discussion with a savings and loan registrant, the staff agreed that an entrance into major new market areas resulting from an acquisition provided a basis for concluding that the purchased goodwill benefits could exist beyond a short-term period. In reaching this decision, the staff was influenced by the fact that the expected financial results appeared to adequately reflect the economic realities of the transaction.

17 CFR Part 240

[Release Nos. 33-6370; 34-18368]

Quarterly Reporting Requirements For Smaller Life Insurance Companies Whose Shares Are Not Actively Traded

AGENCY: Securities and Exchange Commission.

ACTION: Rule amendments.

SUMMARY: The Commission is further deferring, until 1983, the effective date of the quarterly reporting requirements for smaller life insurance companies whose shares are not actively traded. Such additional delay is necessary to allow sufficient time for the Commission to consider public comment on a proposed system of classifying small issuers for purposes of modifying certain reporting requirements under the Securities Exchange Act of 1934 and, if adopted, to implement such a classification system.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Mark R. Beatty, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202) 272-2644.

SUPPLEMENTARY INFORMATION: On December 22, 1980, the Commission announced that it was deferring until 1982 quarterly financial reporting, on Form 10-Q (17 CFR 249.308a), for smaller life insurance companies whose

shares are not actively traded.[1] The Commission noted that it had published an advance notice of proposed rulemaking regarding the classification of small issuers for purposes of reducing their reporting and other obligations under the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a et seq.),[2] which might have a direct impact on smaller life insurance companies whose shares are not actively traded.

On October 20, 1981, the Commission published for public comment a proposed system of classification of smaller issuers that would, in effect, provide an exemption from the registration and reporting requirements of the Exchange Act for certain Smaller issuers.[3] The Commission is reviewing the public comments submitted thereon and anticipates final action on the proposal in the second quarter of calendar year 1982. In order that smaller life insurance companies who may be exempt under a classification system, if adopted, not be required to file Form 10–Q reports for a short interim period, and to provide sufficient lead time for any smaller life insurance companies who may not continue to be exempt under a classification system, the Commission is deferring the effective date of the Form 10–Q reporting requirements until 1983 for life insurance companies whose securities are not actively traded. The Commission does not anticipate that any further deferral will be necessary.

For the reasons stated above and pursuant to the Administrative Procedure Act (5 U.S.C. 551 et seq.), the Commission finds for good cause that notice and public procedure on these rule amendments are impracticable, unnecessary and contrary to the public interest and that there is good cause for making these amendments effective immediately.

[1] Securities Exchange Act Release No. 17397 (December 22, 1980) (45 FR 86422). The requirement to file Form 10–Q reports was imposed on life insurance companies and holding companies having only life insurance subsidiaries in Securities Exchange Act Release No. 12815 (September 20, 1976) (41 FR 42845) but was deferred for life insurance companies with inactively traded securities. The Commission again deferred the requirement for such companies to allow it to consider the Commission's Advisory Committee Report on Corporate Disclosure and testimony taken at the Commission's Small Business Hearings. *See* Securities Exchange Act Release No. 14003 (September 28, 1977) (42 FR 54531); Securities Exchange Act Release No. 15445 (December 28, 1978) (44 FR 1727); and Securities Exchange Act Release No. 16430 (December 19, 1979) (44 FR 76777).

[2] Securities Exchange Act Release No. 16886 (June 2, 1980) (44 FR 40145).

[3] Securities Exchange Act Release No. 18169 (October 20, 1981) (46 FR 52382).

Text of Amendments

The Commission hereby amends paragraphs (c)(1) of §§ 240.13a–13 and 15d–13 of 17 CFR Part 240 to defer the effective date specified therein as given below.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Section 240.13a–13 is amended by revising (c)(1) as follows:

§ 240.13a–13 Quarterly reports on Form 10–Q (§ 249.308a of this chapter).

* * * * *

(c) * * *

(1) Life insurance companies and holding companies having only life insurance subsidiaries for quarters in fiscal years ending on or before December 20, 1983, if they do not meet the test specified in item 12, paragraph (a)(1)(i), of § 229.20; or

* * * * *

Section 240.15d–13 is amended by revising (c)(1) as follows:

§ 240.15d–13 Quarterly reports on Form 10–Q (§ 249.308a of this chapter).

* * * * *

(c) * * *

(1) Life insurance companies and holding companies having only life insurance subsidiaries for quarters in fiscal years ending on or before December 20, 1983, if they do not meet the test specified in item 12, paragraph (a)(1)(i), of § 229.20; or

* * * * *

Authority: These amendments are adopted pursuant to authority in Sections 12, 13, 15(d) and 23(a) (15 U.S.C. 781, 78m, 78o(d) and 78w(a)) of the Securities Exchange Act of 1934.

By the Commission.

December 22, 1981.

Shirley E. Hollis,

Assistant Secretary.

17 CFR Part 260

[Release Nos. 33–6372; 39–683]

Adoption of Final Rules Under the Trust Indenture Act of 1939

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of final rules.

SUMMARY: The Commission is adopting, after an interim period, final rules under Sections 304(a)(8) and 304(a)(9) of the Trust Indenture Act of 1939 to establish ceiling limitations on the amount of debt securities that can be totally or partially exempt from the Act at $2,000,000 and $5,000,000 respectively. The rules were adopted on an interim basis in October 1980 in response to legislative amendments of the Trust Indenture Act of 1939.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Mark Beatty or Paul A. Belvin (202/272–2644), Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549

SUPPLEMENTARY INFORMATION: On October 23, 1980, the Commission announced the adoption of interim rules effective until December 31, 1981, under Sections 304(a)(8) and 304(a)(9) of the Trust Indenture Act of 1939 (the "Trust Indenture Act") (15 U.S.C. 77ddd et seq.) to establish ceiling limitations at $2,000,000 and $5,000,000 respectively.[1] Sections 304(a)(8) and 304(a)(9) are the small offering exemptions under the Trust Indenture Act.

The interim rules were adopted in reponse to certain legislative amendments the substance of which was submitted to Congress by the Commission. The Commission solicited public comments on whether, and in what form, the interim rules should be adopted as final rules. No comment letters were received.

The Commission has determined to adopt the interim rules as final without modification for the reasons stated in the release adopting the rules on an interim basis.

Text of Rules

Part 260 of Chapter II of Title 17 of the Code of Federal Regulations is amended by adopting without change as final §§ 260.4a–1 and 260.4a–2 which were added on an interim basis at 45 FR 71778, Oct. 30, 1980:

PART 260—GENERAL RULES AND REGULATIONS, TRUST INDENTURE ACT OF 1939

§ 260.4a–1 Exempted securities under section 304(a)(8).

The provisions of the Trust Indenture Act of 1939 shall not apply to any security which has been or is to be issued otherwise than under an indenture, but this exemption shall not be applied within a period of twelve consecutive months to more than

[1] Securties Act Release No. 6249; Trust Indenture Act Release No. 594 (October 23, 1980) (45 FR 71776).

$2,000,000 aggregate principal amount of any securities of the same issuer.

§ 260.4a–2 Exempted securities under section 304(a)(9).

The provisions of the Trust Indenture Act of 1939 shall not apply to any security which has been or is to be issued under an indenture which limits the aggregate principal amount of securities at any time outstanding thereunder to $5,000,000 or less, but this exemption shall not be applied within a period of thirty-six consecutive months to more than $5,000,000 aggregate principal amount of securities of the same issuer.

Authority: The Commission hereby adopts Rules 4a–1 and 4a–2 pursuant to Sections 304(a)(8) and 304(a)(9) of the Trust Indenture Act of 1939. (Sec. 302, Pub. L. 86–477; secs. 304 (a)(8), 304(a)(9), 53 Stat. 1153; (15 U.S.C. 77ddd(a)(8), 77ddd(a)(9))).

By the Commission.

Dated: December 23, 1981.

Shirley E. Hollis,

Assistant Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. R81-945]

Schedule A—Fair Market Rents for New Construction and Substantial Rehabilitation—All Market Areas

AGENCY: Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Interim rule: Notice of correct effective date.

SUMMARY: On November 25, 1981, (46 FR 57838) HUD adopted an interim rule amending the section 8 fair market rents applicable to new construction and substantial rehabilitation for all market areas with an effective date that is dependent on whether a waiver were granted on the deferred effective date requirement of Section 7(o)(3) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)). In view of the urgency of this rule the Secretary sought waiver of the deferred effective date requirement in accordance with Section 7(o)(4) of the Act. The Effective Date section of the rule recited that the rule would become effective on December 28, 1981 if the waiver were granted. A waiver has been agreed to by the Chairmen and Ranking Minority Members of the Senate Committee on Banking, Housing and Urban Affairs and the House of Representatives Committee on Banking, Finance and Urban Affairs.

DATE: Accordingly, the correct effective date for the interim rule is December 28, 1981.

FOR FURTHER INFORMATION CONTACT:

Richard Lasner, Assistant General Counsel for Regulations, Department of Housing and Urban Development, Room 5218, 451 7th Street, S.W., Washington, D.C. 20410, Telephone No. (202) 755–6207. (This is not a toll-free number.)

(Secs. 7(d) and 7(o)(4), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d) and (o)(4)).

Issued at Washington, D.C., December 29, 1981.

Richard Lasner,

Assistant General Counsel for Regulations.

[T.D. 7800]

Income Tax; Special Rules for Leases Concerning Qualified Mass Commuting Vehicles and New Reporting Requirements for All Safe Harbor Leases

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the special rules for leases concerning qualified mass commuting vehicles under the Economic Recovery Tax Act of 1981. The regulations provide guidance to persons executing lease agreements concerning qualified mass commuting vehicles under section 168(f)(8) of the Internal Revenue Code of 1954. These regulations also contain a new reporting requirement applicable to all leases qualifying under section 168(f)(8).

DATE: The regulations apply with respect to safe harbor leases executed and certain mass commuting vehicles placed in service after December 31, 1980.

FOR FURTHER INFORMATION CONTACT:

John A. Tolleris of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., NW., Washington, D.C. 20224 (202–566–3294).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Temporary Income Tax Regulations under the Economic Recovery Tax Act of 1981 (26 CFR Part 5c) promulgated by Treasury Decision 7791 regarding special rules for leases under section 168(f)(8) of the Internal Revenue Code of 1954, which were published in the **Federal Register** for October 23, 1981 (46 FR 51907). This amendment expands upon those temporary regulations providing rules relating to certain mass commuting vehicles treated as qualified leased property and to a new filing requirement applicable to all safe harbor leases. This amendment will remain in effect until superseded by later final regulations with respect to section 168 concerning the accelerated cost recovery system.

Explanation

This amendment clarifies the special rules for leases with respect to certain mass commuting vehicles under section 168(f)(8)(D)(iii). It establishes certain requirements that must be met by the lessee (usually a State or local governmental unit which operates the local mass transit system) and the lessor in order that the lessor may, for Federal income tax purposes, lease mass commuting vehicles, such as buses and rapid rail cars, and take cost recovery deductions with respect to them.

The lessor is allowed no investment tax credit with respect to mass commuting vehicles. There is no requirement that such vehicles be leased under section 168(f)(8) within 3 months after being placed in service. In general, those portions of vehicles whose financing is allocable to grants from Federal agencies such as the Urban Mass Transportation Administration may not be leased under section 168(f)(8).

A notice of proposed rulemaking proposing a definition of "qualified mass commuting vehicles" under section 103(b)(9) is published in the Proposed Rules section of this issue of the **Federal Register.**

This amendment also contains a new reporting requirement applicable to all leases qualifying under section 168(f)(8) and executed after December 31, 1981. Basically, the new rule provides that the lessor and lessee are required to file jointly an information return setting

forth certain specified information concerning the leasing transaction within a 30-day period after the lease is executed or the election under section 168(f)(8) will be void. A copy of this information return is also required to be attached to the Federal income tax return of the lessor and lessee. For leases executed before January 1, 1982, only the lessor is required to file the information return postmarked by January 31, 1982. Unless the lessor's failure to file is shown to be due to reasonable cause, or unless the lessee files the return postmarked by January 31, 1982, the lessor's failure to timely file is a disqualifying event which may result in a recapture of the tax benefits to the lessor.

Inapplicability of Executive Order 12291

These regulations are not major legislative regulations for purposes of Executive Order 12291 because the economic effect of these regulations flows principally from the statutory provisions upon which these regulations are based.

Drafting Information

The principal author of these regulations is John A. Tolleris of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

Adoption of Amendments to the Regulations

Accordingly, the following amendments to 26 CFR Part 5c are adopted:

PART 5c—TEMPORARY INCOME TAX REGULATIONS UNDER THE ENERGY TAX ACT OF 1981

Paragraph 1. New §§ 5c.103–2 and 5c.103–3 are added. The new sections read as follows:

§ 5c.103–2 Leases and industrial development bonds.

For purposes of section 103(b)(2), the determination of whether an obligation constitutes an industrial development bond shall be made without regard to the characterization of the transaction as a lease under section 168(f)(8).

§ 5c.103–3 Leases and arbitrage.

In the case of a sale and leaseback transaction qualifying under section 168(f)(8), where the lessee's rental payments are substantially equal in timing and amount to the principal and interest payments on the lessor's note, the arbitrage provisions of section 103(c) and §§ 1.103–13, 1.103–14, and 1.103–15 shall apply to any obligations of the lessee (or party related to the lessee) without regard to the section 168(f)(8) lease transaction.

Par. 2. Section 5c.168(f)(8)–2 is amended by revising paragraph (a)(3) to read as follows:

§ 5c.168(f)(8)–2 Election to characterize transaction as a section 168(f)(8) lease.

(a) *Election.* * * *

(3) *Information return concerning the election.* (i) Except as provided in subdivision (ii), for each lease agreement, the lessor and lessee must jointly file Form 6793, Safe Harbor Lease Information Return, concerning their election under section 168(f)(8). The information return must be signed by both the lessor and the lessee and filed not later than the 30th day after the agreement is executed with the Commissioner of Internal Revenue, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attn: Form 6793). Unless the failure to file timely is shown to be due to reasonable cause, the failure to file the information return timely shall void the section 168(f)(8) election as of the date of the execution of the lease agreement. The information return shall include the following items:

(A) The name, address, and taxpayer identifying number of the lessor and the lessee (and the common parent company if a consolidated return is filed);

(B) The service center with which the income tax returns of the lessor and lessee are filed;

(C) A description of each property with respect to which the election is made;

(D) The date on which the lessee places the property in service (determined as defined in § 5c.168(f)(8)–6(b)(2)(i)), the date on which the lease begins, and the term of the lease;

(E) The recovery property class of the leased property under section 168(c)(2) (for example, 5 years) and the ADR midpoint life of the leased property;

(F) The terms of the payments between the parties to the lease transaction;

(G) Whether the ACRS deductions and the investment tax credit are allowable to the same taxpayer;

(H) The aggregate amount paid to outside parties to arrange or carry out the transaction, such as, for example, legal and investment banking fees;

(I) For the lessor only: The unadjusted basis of the property as defined in section 168(d)(1);

(J) For the lessor only: If the lessor is a partnership or a grantor trust, the name, address, and taxpayer identifying number of the partners or the beneficiaries, and the Service Center with which the income tax return of each partner or beneficiary is filed; and

(K) Such other information as may be required by the return or its instructions. The aggregate amount paid to outside parties which is described in paragraph (a)(3)(i)(H) of this section need not be disclosed unless it is reasonable to estimate that either the lessor or the lessee will lease property under section 168(f)(8) for the calendar year which has an aggregate adjusted basis to such person of more than $1,000,000. If either the lessor or the lessee reasonably expects to lease property with an aggregate basis of more than $1,000,000, then both parties must disclose their transaction costs.

(ii) In the case of an agreement executed before January 1, 1982, only the lessor is required to file the information return described in paragraph (a)(3)(i) of this section and the return must be postmarked not later than January 31, 1982. Unless the failure to file timely is shown to be due to reasonable cause, or unless the lessee files the information return postmarked by January 31, 1982, the lessor's failure to file the information return timely shall be a disqualifying event as of February 1, 1982, which shall cause an agreement to cease to be treated as a lease under section 168(f)(8). For the Federal income tax consequences of a disqualifying event, see § 5c.168(f)(8)–6.

(iii) A copy of the information return described in paragraph (a)(3) (i) and (ii) shall be filed by each party with its timely filed Federal income tax return for its taxable year during which the lease term begins. However, for taxable years ending in 1981 with respect to lease agreements executed during calendar year 1981, such statement shall be filed by the later of (A) the due date (taking extensions into account) of the party's 1981 Federal income tax return, or (B) where the filing of an amended return is required, with the amended return within 3 months following the execution of the lease agreement. For the requirement to file an amended return within 3 months and the consequences of the failure to so file, see § 5c.168(f)(8)–6(b)(2)(ii). A taxpayer that is required to file the information return with its Federal income tax return before an information return form is available shall file, in lieu of the required information return, a statement which contains the information set forth in subparagraphs (A) through (J) of

pargraph (a)(3)(i). The failure by the lessor to file the information return (or, if applicable, the statement referred to in the preceding sentence) with its timely filed Federal income tax return shall be a disqualifying event which shall cause an agreement to cease to be treated as a lease under section 168(f)(8). For the Federal income tax consequences of a disqualifying event, see § 5c.168(f)(8)–8.

* * * * *

Par. 3. Section 5c.168(f)(8)–6 is amended by revising paragraphs (a)(2)(ii) and (b)(3) to read as follows:

§ 5c.168(f)(8)–6 Qualified leased property.

(a) *Basic rules.* * * *

(2) *Sale and leaseback arrangement.* * * *

(ii) For purposes of this paragraph (a)(2) and paragraph (b)(3)(ii) of this section, transactional costs with respect to a sale and leaseback arrangement that are not currently deductible shall be allocated to the lease agreement (and not included in the lessor's adjusted basis with respect to the property) and amortized over the term of the lease. These costs include legal and investment banking fees and printing costs.

* * * * *

(b) *Special rules.* * * *

(3) *Qualified mass commuting vehicle.* (i) A qualified mass commuting vehicle as defined in section 103(b)(9) will constitute qualified leased property for purposes of section 168(f)(8)(D)(iii) and this section provided all of the following requirements are met:

(A) At least part (as, for example, 5 percent) of the financing for the purchase of such vehicle must be derived from proceeds of obligations the interest on which is excludable from income under section 103(a)(1) (whether or not such obligations are described in section 103(b)(4)(I));

(B) The vehicle must be recovery property (*i.e.*, it must have been first placed in service by the lessee after December 31, 1980); and

(C) the vehicle must not have been previously leased under a section 168(f)(8) lease by the lessee.

A qualified mass commuting vehicle that is qualified leased property may be leased under section 168(f)(8) at any time after December 31, 1980. The requirement of paragraph (b)(3)(i)(A) of this section may be satisfied where the vehicles leased under a section 168(f)(8) lease are refinanced with proceeds of an obligation the interest on which is excludable from income under section 103(a)(1).

(ii) Where the leased property is purchased, directly or indirectly, by the lessor from the lessee (or a party related to the lessee), the property will not qualify under this subsection unless the lessor's adjusted basis in the property does not exceed the adjusted basis of the lessee (or related party) at the time of the execution of the lease. The adjusted basis of property to a lessee (or related party) shall be determined under part II of subchapter O of chapter 1 of the Code for purposes of determining gain, except that the adjustment described in section 1016(a)(3) and § 1.1016–4 need not be made for property acquired during calendar year 1981 and leased no later than March 1, 1982.

(iii) In a transaction characterized as a lease under section 168(f)(8), the lessor's adjusted basis may not include that portion, if any, of the cost of the vehicle to the lessee (or related party) that is financed, directly or indirectly, with an Urban Mass Transportation Administration (UMTA) grant (excluding a grant under the interstate transfer provision of the Federal-Aid Highway Act (FAHA)), a FAHA grant, or any other Federal grant. Where a vehicle is included as part of an UMTA-funded project, 80 percent of the vehicle's cost will be deemed to be financed with an UMTA grant and 20 percent will be deemed to be financed from non-Federal sources without regard to whether the UMTA funds or the non-Federal funds are traceable to any particular vehicle included within the project. For purposes of this subparagraph and paragraph (b)(3)(ii) of this section, amounts originating from non-Federal sources which are paid or incurred with respect to leased property by a State or political subdivision of the State (or political subdivision created by the joint authorization of two or more States) shall be taken into account in computing the lessee's adjusted basis in the leased property as if the lessee had paid or incurred such amounts.

(iv) If a vehicle is purchased pending approval of an UMTA grant, the lessor's unadjusted basis in the vehicle may equal the lessee's unadjusted basis unreduced by any subsequently approved UMTA grant; however, if an UMTA grant is later approved and the vehicle is included as part of an UMTA-funded project, except as provided hereinafter in this subparagraph, the lease shall terminate with respect to an undivided 80 percent interest in the vehicle. For the Federal income tax consequences of the termination of a lease, see § 5c.168(f)(8)–8. If such a subsequently approved UMTA grant is used to purchase additional qualified mass commuting vehicles, the portion of each vehicle deemed to be allocable to non-UMTA financing (*i.e.*, 20 percent) may be leased under section 168(f)(8). If a vehicle is purchased pending approval of an UMTA grant and leased under section 168(f)(8), the lease will not be deemed to have terminated with respect to 80 percent of the vehicle when the UMTA grant is later approved if the total interest leased before the grant is approved did not exceed 20 percent of the lessee's adjusted basis in the vehicle (unadjusted basis prior to March 1, 1982) unreduced by any subsequently approved UMTA grant. For purposes of this subparagraph and paragraph (b)(3)(iii) of this section, the allocation principles applicable to UMTA grants shall apply in the case of FAHA grants except that 85 percent and 15 percent shall be substituted for 80 percent and 20 percent, respectively. Similar allocation rules shall also apply to other Federal grants used to finance the acquisition of qualified mass commuting vehicles.

(v)(A) Notwithstanding the provisions of § 5c.168(f)(8)–2(a)(3)(iii), the lessee in a transaction to which this paragraph (b)(3) applies is not required to file an information return or a statement concerning its election under section 168(f)(8).

(B) Notwithstanding the provisions of § 5c.168(f)(8)–2(a)(5), if the transfer of a qualified mass commuting vehicle is not otherwise a disqualifying event, the transferee is not required to file the statement mentioned therein.

(C) The fact that a qualified mass commuting vehicle is not section 38 property because it is used by an exempt entity will not disqualify the lease under § 5c.168(f)(8)–8(b)(4); however, a disqualifying event will occur, and the agreement will cease to be characterized as a lease under section 168(f)(8), with respect to a vehicle which (*1*) ceases to be a qualified mass commuting vehicle or (*2*) would cease to be section 38 property if used by a taxable entity as, for example, a vehicle used predominantly outside the United States. For the Federal income tax consequences of a disqualifying event, see § 5c.168(f)(8)–8.

(vi) The lessor of a qualified vehicle will not be allowed an investment tax credit with respect to it under section 38.

(vii) The application of this paragraph (b)(3) may be illustrated by the following examples:

Example (1). On July 1, 1981, a unit of city X, X Transit Authority (XTA), purchases 100 buses after receiving an UMTA grant for 80 percent of their purchase price. Fifteen percent of the purchase price is financed with a combination of State and local

governmental grants and 5 percent is financed with proceeds from an issue of tax-exempt obligations described in section 103(b)(4)(I). Because UMTA financed an 80 percent interest in the 100 buses, XTA may lease under section 168(f)(8) only a 20 percent interest in each bus. If XTA were to lease 100 percent of 20 buses, only 20 percent of such buses would be deemed to be leased under a safe harbor lease.

Example (2). The facts are the same as in example (1) except that UMTA has not yet approved XTA's application in 1981. Pending the UMTA approval, XTA purchases and places in service 20 buses in July 1981. The 20 buses are financed with tax-exempt obligations described in section 103(b)(4)(I). On December 15, 1981, XTA sells a 100 percent interest in these 20 buses to Corporation M and leases them back under a lease in which the parties elect to have the provisions of section 168(f)(8) apply. M is a calendar-year taxpayer and claims an ACRS deduction with respect to the buses on its return for taxable year 1981. On July 1, 1982, UMTA approves XTA's grant application, thus enabling XTA to purchase an additional 80 buses. Because 80 percent of the original 20 buses are deemed to have been financed by UMTA beginning on July 1, 1982, the safe harbor lease terminates with respect to an undivided 80 percent interest in the 20 buses. If XTA would be considered the owner of the buses without regard to section 168(f)(8), the termination will result in a deemed sale of an undivided 80 percent interest in the 20 buses by M to XTA. The amount realized by M on the sale will include a proportionate part of the outstanding amount of M's debt plus the sum of any other consideration received by M. M will realize gain or loss, depending upon its basis, with applicable section 1245 recapture. However, XTA may lease the 20 percent interest in the 80 new buses it purchased in 1982 which is deemed to have been financed with non-Federal funds.

Example (3). The facts are the same as in example (2) except that the grant approved by UMTA is used to purchase and renovate a bus garage facility. Eighty percent of the original 20 buses are deemed to have been financed by UMTA beginning on July 1, 1982. The lease would still terminate with respect to an undivided 80 percent interest in the vehicles. XTA cannot lease the garage facility under 168(f)(8) because it does not constitute a qualified mass commuting vehicle.

Example (4). The facts are the same as in example (2) except that on December 15, 1981, XTA sells and leases back only a 20 percent interest in the 20 buses acquired in July 1981. When the UMTA grant is later approved, the lease will not terminate with respect to any portion of the 20 buses. In addition, XTA may lease the 20 percent interest in the 80 new buses purchased in 1982 and deemed to have been financed with non-Federal funds.

Example (5). On August 1, 1982, UMTA approves a grant for a major 5-year capital expenditure program to improve city Y's rapid rail transit system. None of the funds relating to this UMTA-funded project, provided either by UMTA or by city Y, will be used to purchase qualified mass commuting vehicles. Instead, a number of rapid rail cars and buses will be purchased entirely with funds provided with a combination of grants by the State and city governments and of proceeds from an issue of tax-exempt obligations described in section 103(a). Because none of the rapid rail cars and buses are included as part of the UMTA-funded project, no part of them is deemed to be financed by UMTA. If at least 5 percent of the cost of the qualified mass commuting vehicles is provided by tax exempt obligations under section 103(a), the vehicles will be qualified leased property in their entirety.

Example (6). City Z has a mass transit agency (ZTA) which purchases on July 1, 1982, 10 buses for which it pays $1,000,000, 95 percent of which is derived from grants from city Z and 5 percent from tax exempt obligations described in section 103(a). The buses have a useful life within the meaning of § 1.167(a)–1(b) of 10 years and their salvage value is zero. On July 1, 1983, ZTA sells these buses to corporation P and leases them back in a transaction which the parties elect to have treated as a lease under section 168(f)(8). At the time of the sale and leaseback, ZTA's adjusted basis in the 10 buses under section 1016(a)(3) and § 1.1016–4 is $900,000 ($1,000,000 cost less $100,000 of depreciation sustained, computed on a stright-line basis). Before the transaction will qualify under section 168(f)(8) and § 5c.168(f)(8)–6(b)(3)(ii), P's adjusted basis in the vehicles may not exceed ZTA's basis, or [redacted].

Assuming that the transaction qualifies under section 168(f)(8) and that corporation P is a calendar year taxpayer, P may claim ACRS deductions for 1982 of $135,000 (15 percent of $900,000).

Example (7). The facts are the same as in example (6) except that the sale and leaseback transaction is closed on December 31, 1982. P's adjusted basis in the vehicles may not exceed ZTA's basis, or $950,000 ($1,000,000 cost less $50,000 of depreciation sustained, computed on a straight-line basis).

Example (8). The facts are the same as in example (6) except that ZTA purchases the buses on June 1, 1981, and enters into the sale and leaseback transaction with corporation P on December 31, 1981. Under § 5c.168(f)(8)–6(b)(3)(ii), no adjustment is made to ZTA's basis in the buses for depreciation sustained. Therefore, P's basis in the buses may equal ZTA's cost of $1,000,000.

Example (9). On July 1, 1981, a unit of city W, W Transit Authority (WTA), purchases 100 buses with local grants derived entirely from a city W sales tax. The buses do not constitute qualified leased property under 5c.168(f)(8)–6 (b) (3) because no part of the financing for their purchase was derived from the proceeds of tax exempt obligations.

Example (10). The facts are the same as in example (9) except that on November 1, 1981, WTA borrows 5 percent of the cost of the buses and pledges them as security. The interest on WTA's obligation is excludable from income under section 103(a)(1). On December 31, 1981, WTA sells to T Corp. all 100 buses and leases them back. Under § 5c.168(f)(8)–6(b)(3)(i), each bus is deemed to be financed with the proceeds of tax exempt obligations. Therefore, if the vehicles otherwise meet the definition of qualified leased property, all the vehicles will be qualified leased property under this section.

* * * * *

Par. 4. Section 5c.168(f)(8)–6 (b) is amended by revising subparagraph (2) and by adding new subparagraphs (13) and (14). The revised and added provisions read as follows:

§ 5c.168(f)(8)–6 Loss of section 168(f)(8) protection; recapture.

* * * * *

(b) *Events which cause an agreement to cease to be characterized as a lease.*

* * *

(2) The failure by the lessor to file a copy of the information return (or applicable statement) with its income tax return as required in § 5c.168 (f) (8)–2 (a)(3)(iii). * * *

* * * * *

(13) The property is leased under the provisions of section 168(f)(8)(D)(iii) and § 5c.168(f)(8)–6(b)(3) and ceases to be a qualified mass commuting vehicle.

(14) The failure by the lessor to file the required information return described in § 5c.168(f)(8)–2 (a)(3)(ii) by January 31, 1982, unless the lessee files such return by January 31, 1982.

* * * * *

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(Secs. 168(f)(8)(G) and 7805, Internal Revenue Code of 1954 (95 Stat. 216, 26 U.S.C. 168(f)(8)(G); and 68A Stat. 917, 26 U.S.C. 7805))

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: December 28, 1981.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF JUSTICE

Office of Juvenile Justice and Delinquency Prevention

28 CFR Part 31

Implementation of Formula Grants Program for Juvenile Justice

AGENCY: Office of Juvenile Justice and Delinquency Prevention, Justice.

ACTION: Notice of final regulations.

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is publishing final regulations for the implementation of the formula grant program authorized by Part B, Subpart I, of the Juvenile Justice and Delinquency Prevention (JJDP) Act of 1974, as amended. Formula grants are authorized to States which in turn make subgrants for use by State and local public and private agencies in carrying out juvenile justice and delinquency, improvement programs.

DATE: These regulations are effective December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Frank M. Porpotage, II, Formula Grants and Technical Assistance Division, 633 Indiana Avenue, NW., Room 742, Washington, D.C. 20531. Telephone: (202) 724–5911.

SUPPLEMENTARY INFORMATION: Draft regulations were originally published in the **Federal Register** on June 1, 1981 for public comment. Substantive changes were recommended and the draft regulations were again published for public comment on September 3, 1981. Written comments from some 66 national, regional, and local organizations were received. All comments have been considered by the OJJDP in this publication. These regulations, with the exception of § 31.303(i)(3), Valid Court Order, are final.

Discussion of Comments

Several respondents commented favorably upon the streamlining of the formula grant application requirements, an effort to simplify program administration.

The following is a summary of substantive comments and the response of the OJJDP:

1. *Comment:* The serious and violent juvenile offender emphasis of § 31.303(e) indicates that States should allocate a minimum of 30% of their formula grant funds to programs designed for these populations. Is this allocation mandatory?

Response: No. This provision in the regulations was designed to *encourage* States to address the problem of serious and violent crimes committed by juveniles. This is a major concern to the Congress, as reflected in the 1980 Amendments to the JJDP Act, and to the American public. The wording of this section attempts to focus State attention on a careful consideration of the need to allocate additional resources to this area of programming.

2. *Comment:* The serious and violent juvenile offender emphasis of § 31.303(e) should be redrafted to clarify that serious crime includes property crime. States have varying problems with juvenile violence and property crime and should be free to determine which to emphasize in programming.

Response: Agreed. A modification has been made in § 31.303(e) which serves to clarify this point.

3. *Comment:* The emphasis on serious and violent crime is inconsistent with the 66⅔% pass through to local government requirement of Section 223(a)(5) of the Act because programs for this segment of the juvenile offender population are generally organized at the State level.

Response: OJJDP will consider a waiver request from States where rehabilitation or other services for juveniles who commit serious and violent crimes are organized at the State level and to the extent justified by an increased State emphasis on this priority problem.

4. *Comment:* Specific reference to additional program areas, i.e., Project New Pride or Restitution, should be added to the serious and violent juvenile crime emphasis of the regulations.

Response: In drafting this section, OJJDP simply used the language of the legislation. Additional language specifying program options would be superfluous because States are free to select those program options which they determine have the best likelihood of success.

5. *Comment:* The jail removal requirement, Section 223(a)(14) of the JJDP Act, specifies two separate and distinct "exceptional circumstances" which are not reflected in the draft regulations.

Response: The regulations reflect the intent of the law. As Congressman Ike Andrews, Chairman of the House Subcommittee on Human Resources, stated in a letter to OJJDP on February 17, 1981, "You are completely correct that the exception language is intended to establish a single exception applying only to low population density areas. Only in such areas would the temporary detention in adult facilities of juveniles accused of serious crimes against persons be permitted should no acceptable alternative be available."

6. *Comment:* Will States be permitted, for the purpose of monitoring the Section 223(a)(14) jail removal requirement, a "grace period" in which a juvenile temporarily detained in an adult jail or lockup need not be reported as a monotoring violation? This would be similar to the 24-hour "grace period" currently permitted with respect to the Section 223(a)(12)(A) deinstitutionalization mandate.

Response: It is Congress' finding that juvenile offenders and nonoffenders should not be placed in an adult jail or lockup for any period of time. However, for the purpose of monitoring and reporting compliance with the jail removal requirement, the House Committee on Education and Labor stated, in its Committee Report on the 1980 Amendments, that it would be permissible for OJJDP to permit States to exclude, for monitoring purposes, those juveniles alleged to have committed an act which would be a crime if committed by an adult (criminal-type offenders) and who are held in an adult jail or lockup for *up to six hours*. This six-hour period would be limited to the temporary holding in an adult jail or lockup by police for the purpose of identification, processing, and transfer to juvenile court officials or to juvenile shelter or detention facilities. Any such holding of a juvenile criminal-type offender should be limited to the absolute minimum time necessary to complete this action, not to exceed six hours, but in no case overnight. Even where such a temporary holding is permitted, the Section 223(a)(13) separation requirement would operate to prohibit the accused juvenile criminal-type offender from being in sight or sound contact with an adult offender during this brief holding period. Under no circumstances does the allowance of a six hour "grace period" applicable to juvenile criminal-type offenders permit a juvenile status offender or nonoffender be detained, even temporarily, in an adult jail or lockup under Section 223(a)(14). In monitoring for compliance with Section 223(a)(14), the regulations require States to report the number of juvenile criminal-type offenders held in adult jails and lockups *in excess of six hours* (see § 31.303(i)(5)(iv)(G) and (H)).

7. *Comment:* The 48-hour limit on holding juveniles in adult jails or lockups under the Section 223(a)(14) "removal exception" is not sufficient to cover periods when court is not in session, such as weekends.

Response: Because this exception permits temporary incarceration in jails and lockups of juveniles *accused* of a serious crime against persons, a maximum 48-hour period is considered by OJJDP to be the outside limit and is intended to take into account weekends and other circumstances that would preclude the immediate transfer to an appropriate juvenile facility.

8. *Comment:* The guideline governing the "removal exception" to Section 223(a)(14), as promulgated in the draft regulations, § 31.303(i)(4), allows each

State to set specific criteria for determining "areas characterized by low population density" and to determine that "no alternative placement is available." These criteria should be established by OJJDP so that the criteria and standards are uniform for all States and can be reviewed by the public through the review and comment process of the **Federal Register.**

Response: The narrow "removal exception" of the law was designed to reflect "the special needs of areas characterized by low population density." OJJDP, in its rulemaking role, reviewed a number of possible criteria that could be imposed on States in defining the exception. However, we concluded that it was not feasible to establish uniform criteria applicable to all States that would be both fair and rational. OJJDP believes that the individual States are in a better position to determine the unique circumstances that warrant, subject to OJJDP's review and approval, the specific criteria to be applied in the States to implement the "removal exception" to the Section 223(a)(14) jail removal provision.

9. *Comment:* The regulations should define the term "not served by a local or regional juvenile detention facility" as used in the Section 223(a)(14) "removal exception."

Response: Agreed. A general definition of the term has now been added to regulations at § 31.303(i)(4)(iv). The definition provides that a county is not served by a local or regional juvenile detention facility when "there is no public or private juvenile detention facility operated within the county or there is no public or private juvenile facility which is in operation to provide secure detention for accused juvenile offenders from that county."

10 *Comment:* The 1980 Amendments to the JJDP Act allow an alternative State agency, other than the State Criminal Justice Council, to be designated by the Governor as the responsible agency to supervise the administration of the State's formula grant program. Any such designation is subject to approval by the OJJDP Administrator. One commentator recommended that operating agencies be specifically excluded from consideration as an acceptable alternative State agency.

Response: OJJDP is aware of the potential problems with having an operating agency serving as the administering agency for the formula grant program. The Fiscal Year 1982 Application Kit addresses this issue, requiring that in any instance where the Governor requests approval for the designation of an operating agency as the alternative State agency, it must be clearly demonstrated that the agency's supervisory board will have full policymaking authority *and* will be independent of the administrative structure of the operating agency.

11. *Comment:* The definition of "secure" as used in the terms "secure detention facility" and "secure correctional facility" has been substantially changed by removing the use of "staff security measures" in addition to other architectural means for restricting the movements and activities of residents. This change is not warranted.

Response: The change noted in the draft regulations (§ 31.304(b)) reflects the revised definitions of "secure detention facility" and "secure correctional facility" in Section 103(12) and (13) of the Act, as amended.

12. *Comment:* One third of the required 66⅔% pass through of funds to local government, § 31.301(b), should be required to be allocated to private nonprofit agencies.

Response: Such a requirement is beyond the authority of OJJDP as there is no statutory basis to support such a rule.

13. *Comment:* Because recent research has shown that there exists differential handling of minority youth in the juvenile justice system, it is recommended that a percentage of funds be set aside to further research this phenomenon and to generate specific proposals that may reduce the flow of minorities into the system.

Response: While OJJDP is aware of these research findings, the formula grant program is not the appropriate place for OJJDP to address funding for this purpose. Within the past six months, the National Institute for Juvenile Justice and Delinquency Prevention, the research arm of OJJDP, has awarded three research grants which address different aspects of this issue. It is expected that this research will provide the kinds of basic information needed to reduce the differential penetration of minority youth into the system.

Valid Court Order

There was substantial comment on and criticism of the revised valid court order guideline (§ 31.303(i)(3)). Fifteen of the commentators voiced the opinion that the revised provision failed to correctly reflect the Congressional intent underlying the valid court order amendment to Section 223(a)(12)(A) of the Juvenile Justice Act. These commentators generally favored retention of the initial implementing guideline published for comment in the **Federal Register** on June 1, 1981 (46 FR 29438, § 31.703(h)(3), at 29443). Specifically, they called for reinstatement of the following features of that guideline:

(1) *No secure detention under any circumstance* of a juvenile status offender or nonoffender *alleged* to have violated a valid court order;

(2) Reinstate the requirement that the judge presiding over the violation hearing, in entering a dispositional order directing or authorizing placement in a secure facility, *certify on the record* (rather than determine) *that all the elements of a valid court order have been met;* and

(3) Reinstate the requirement that the judge in (2) above also certify on the record (rather than make no certification or determination) that *there is no rational alternative to incarceration of the juvenile.*

In addition, a variety of suggestions were offered by commentators seeking to increase or clarify the protections afforded to juvenile status offenders and nonoffenders who may be subject to incarceration as a result of a court order violation. These suggestions are as follows:

(1) For a court order to be deemed valid the juvenile status offender or nonoffender should have had the *right to counsel* at the initial adjudication or other court proceeding in which the court order regulating future conduct was entered;

(2) For a court order to be deemed valid, the juvenile status offender or nonoffender should have received the *full range of due process rights* listed in § 31.303(i)(3)(v)(A)–(H) at the initial adjudication or other court proceeding in which the court order regulating future conduct was entered;

(3) The warning to the juvenile of the consequences of violating the court order (§ 31.303(i)(3)(iii)) should be provided to the juvenile *and to his attorney and/or to his parents or guardian;*

(4) The warning referenced in (3) above should be in writing *and* (rather than "or") be reflected in the court record and proceedings;

(5) The term "court of competent jurisdiction" (§ 31.303(i)(3)(iv)) should be defined so that a juvenile would only be subject to valid court order violation proceedings before the *same judge* in the *same court* in which the order was entered;

(6) The "24-hour grace period" referenced in § 31.303(i)(3)(iv) should clearly specify that this means 24 hours *exclusive of nonjudicial days* (i.e.,

holidays and weekends) consistent with OJJDP monitoring policy;

(7) The guideline should require that any judicial *determination of probable cause,* used as a basis for detaining a juvenile pending a violation hearing, must be held *within the 24-hour grace period;*

(8) There should be no *provision for a probable cause hearing.* Rather, the guideline should require that the violation hearing be held within the 24-hour grace period or the juvenile released to an appropriate nonsecure placement pending the violation hearing;

(9) A juvenile held in a secure detention facility, after a probable cause hearing pending a violation hearing, should be held for the minimum time necessary to schedule and hold a violation hearing, but in no event longer than:

(a) *3 calendar days;* or

(b) *72 hours;* or

(c) *72 hours exclusive of nonjudicial days;* or

(d) *5 calendar days;* or

(e) *10 calendar days or the number of days that an alleged delinquent offender* may be held under State law in secure detention prior to an adjudicatory hearing, whichever is less;

(10) Where a judicial determination is made that there is probable cause to believe that a status offender or nonoffender violated a valid court order, placement in a secure detention facility pending a violation hearing should require, at a minimum, a judicial finding that:

(a) There is a *probability that the juvenile will not appear for further proceedings;* or

(b) The *juvenile poses a danger to self or to community safety;*

(11) The authority to hold a juvenile status offender or nonoffender in a "secure detention facility" or a "secure correctional facility" should specify that such facilities include only those which are *exclusively for juvenile offenders;*

(12) The full due process rights enumerated in § 31.303(i)(3)(v) should include a *standard of proof beyond a reasonable doubt;* and

(13) OJJDP should establish *maximum numbers of juvenile status offenders and nonoffenders* who can be held for valid court order violations and establish a *maximum length of secure incarceration* for juveniles who violate valid court orders.

A lesser number of respondents believed that the guideline, rather than failing to provide adequate due process protection to juveniles, failed to provide sufficient judicial flexibility, offering the following suggestions to increase judicial discretion:

(1) The determination of probable cause to believe a juvenile status offender or nonoffender violated a valid court order should be made by a judge *or any duly authorized officer of the court acting on behalf of the judge;* and

(2) OJJDP should *defer to State law* in determining the maximum length of time a status offender or nonoffender alleged to have violated a valid court order may be held in secure detention pending a violation hearing.

As can be seen, there is a wide divergence of views on valid court order amendment implementation. This stems in part from a legislative history that is inconclusive on certain points, differences in various State laws, policies and practices, and the complex legal issues that underlie the treatment of juvenile status offenders and nonoffenders who violate valid court orders. It is OJJDP's conclusion that publication of a final regulation governing implementation of the valid court order amendment at this time, given the expressed concerns and information available, would not further the proper implementation of the amendment.

Consequently, OJJDP believes that further exploration and consideration of the issues raised above (and other relevant valid court order considerations) are desirable before a final rule is promulgated. Therefore, OJJDP plans to schedule at least two hearings to receive oral testimony and to give interested parties the opportunity to submit further written input on valid court order implementation. A notice will be placed in the **Federal Register** regarding the date and time for such hearings and providing for the receipt of written submissions. OJJDP anticipates that this notice will be published within 30 days. The notice will explain the rationale of the various positions and options presented in response to the **Federal Register** drafts. OJJDP's primary objective is to fully implement the congressional intent, considering the input and experience of practitioners, and to provide for a workable regulation that does not create unrealistic policies, and does not, by implication, undermine State procedural law.

OJJDP will reserve § 31.303(i)(3) of the final regulations. Pending the publication of a final regulation, States should continue to follow applicable State law and Constitutional principles of due process in their implementation and monitoring of the valid court order amendment. OJJDP urges States not to consider modification of existing State law or policy regarding the secure incarceration of juvenile status and nonoffenders who violate the lawful orders of the court until a final regulation is published.

This annoucement does not constitute a "major" rule as defined by Executive Order 12291 because it does not result in: (a) An effect on the economy of $100 million or more; (b) a major increase in any costs of prices; or (c) adverse effects on competition, employment, investment, productivity, or innovation among American enterprises.

Finally, because this regulation will not have significant economic impact on a substantial number of small entities, no analyses of the impact of these rules on such entities is required by the Regulatory Flexibility Act, U.S.C. 601, et seq., 28 CFR part 31 is accordingly revised to read as follows:

PART 31—FORMULA GRANTS

Subpart A—General Provisions

Sec.

31.1 General.
31.2 Statutory authority.
31.3 Submission date.

Subpart B—Eligible Applicants

31.100 Eligibility.
31.101 Establishment of State Criminal Justice Council.
31.102 Membership.

Subpart C—General

31.200 General.
31.201 Audit.
31.202 Civil rights.
31.203 Open meetings and public access to records.

Subpart D—Juvenile Justice Act Requirements

31.300 General.
31.301 Funding.
31.302 Applicant State Agency.
31.303 Substantive requirements.
31.304 Definitions.

Subpart E—General Conditions and Assurances

31.400 Compliance with statute.
31.401 Compliance with other Federal laws, orders, circulars.
31.402 Application on file.
31.403 Non-discrimination.

Authority: Juvenile Justice and Delinquency Prevention Act of 1974, as amended, (42 U.S.C. 5601 et seq.)

Subpart A—General Provisions

§ 31.1 General.

This Part defines eligibility and sets forth requirements for application for and administration of formula grants to State governments authorized by Part B, Subpart I, of the Juvenile Justice and Delinquency Prevention Act.

§ 31.2 Statutory authority.

The statute establishing the Office of Juvenile Justice and Delinquency Prevention and giving authority to make grants for juvenile justice and delinquency prevention improvement programs is the *Junvenile Justice and Delinquency Prevention Act of 1974,* as amended (42 U.S.C. 5601 et seq.).

§ 31.3 Submission date.

Juvenile Justice Plans for Fiscal Year 1982 shall be submitted to the OJJDP within 60 days after States are notified of fiscal year 1982 Formula Grant allocations.

Subpart B—Eligible Applicants

§ 31.100 Eligibility.

All States as defined by Section 103(7) of the JJDP Act.

§ 31.101 Establishment of State Criminal Justice Council.

Each state which chooses to apply for a formula grant shall establish or designate by law a State Criminal Justice Council unless an alternative State agency is designated by the Chief Executive and approved by the OJJDP Administrator pursuant to Section 261(c) of the JJDP Act. States must assure they have available for review a copy of the State law establishing the Council, and a current list of Council membership.

§ 31.102 Membership of Council.

Pursuant to Section 1301(i) of the Justice System Improvement Act (JSIA) of 1979, States participating in the formula grant program of the Juvenile Justice and Delinquency Prevention Act, in addition to statutory membership requirements, must include on the State Criminal Justice Council the chairperson and at least two additional citizen members of that Act. For purposes of this requirement a citizen member is defined as any person who is not a full-time government employee or elected official. Any executive committee of the Council must include the same proportion of juvenile justice advisory group members as are included in the total Council membership.

Subpart C—General Requirements

§ 31.200 General.

This subpart sets forth general requirements applicable to formula grant recipients under the JJDP Act of 1974, as amended. Applicants must assure compliance or submit necessary information on these requirements.

§ 31.201 Audit.

The State must assure that it adheres to the audit requirements enumerated in the "Financial and Administrative Guide for Grants" OJARS Guideline Manual 7100.1B, October 20, 1980. Chapter 8 of the Manual contains a comprehensive statement of audit policies and requirements relative to grantees and subgrantees.

§ 31.202 Civil rights.

(a) To carry out the State's Federal civil rights responsibilities the plan must:

(1) Designate a civil rights contact person who has lead responsibility in insuring that all applicable civil rights requirements, assurances, and conditions are met and who shall act as liaison in all civil rights matters with OJJDP and the OJARS' Office of Civil Rights Compliance (OCRC).

(2) Contain the Council's Equal Employment Opportunity Program (EEOP), if required to maintain one under 28 CFR 42.301, et seq., where the application is for $500,000 or more.

(b) The application must provide assurance that the State will:

(1) Require that every applicant required to formulate an EEOP in accordance with 28 CFR 42.301 et seq., submit a certification to the State that it has a current EEOP on file, which meets the requirement therein.

(2) Require that every criminal or juvenile justice agency applying for a grant of $500,000 or more submit a copy of its EEOP (if required to maintain one under 28 CFR 42.301, et seq.) to OCRC at the time it submits its application to the State;

(3) Inform the public and subgrantees of affected persons' rights to file a complaint of discrimination with OCRC for investigation;

(4) Cooperate with OCRC during compliance reviews of recipients located within the State; and

(5) Comply, and that its subgrantees and contractors will comply with the requirement that, in the event that a Federal or State court or administration agency makes a finding of discrimination on the basis of race, color, religion, national origin, or sex (after a due process hearing) against a State or a subgrantee or contractor, the affected recipient or contractor will forward a copy of the finding to OCRC.

§ 31.203 Open meetings and public access to records.

The State must assure that it will comply with the requirements of Section 402(c)(2) of the Justice System Improvement Act.

Subpart D—Juvenile Justice Act Requirements

§ 31.300 General.

This subpart set forth specific JJDP Act requirements for application and receipt of formula grants.

§ 31.301 Funding.

(a) *Allocation to States.* Each State receives a base allotment of $225,000 except for the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands and the Commonwealth of the Northern Mariana Islands where the base amount is $56,250. Funds are allocated among the States on the basis of relative population under 18 years of age,

(b) *Funds for Local Use.* At least two-thirds of the formula grant allocation to the State must be used for programs by local government, or local private agencies unless the State applies for and is granted a waiver by the Office of Juvenile Justice and Delinquency Prevention.

(c) *Match.* Formula grants under the JJDP Act shall be 100% of approved costs, with the exception of planning and administration funds, which require a 100% cash match (dollar for dollar), and construction projects funded under Section 227(a)(2) which require a 50% cash match.

(d) *Funds for Administration.* Not more than 7.5% of the total annual formula grant award may be utilized to develop the annual juvenile justice plan and pay for administrative expenses, including project monitoring evaluation. These funds are to be matched on a dollar for dollar basis. The State shall make available needed funds for planning and administration to units of local government or combinations on an equitable basis. Each annual application must identify uses of such funds.

§ 31.302 Applicant State Agency.

(a) Pursuant to Section 223(a)(2) and Section 261(c) of the JJDP Act, the State assures that a State Criminal Justice Council or other State agency approved under Section 261(c) has been designated as the sole agency for supervising the preparation and administration of the plan and has the authority to implement the plan.

(b) The Chief Executive shall establish a Juvenile Advisory Group pursuant to Section 223(a)(3) of the JJDP Act. The State shall provide a list of all current advisory group members, indicating their respective dates of appointment and how each member meets the membership requirements specified in this Section of the Act.

(c) The State shall assure that it complies with the Advisory Group Financial support requirement of Section 222(d) and the composition and function requirements of Section 223(a)(3) of the JJDP Act.

§ 31.303 Substantive requirements.

(a) *Consultation with and Participation of Units of General Local Government.* The State shall assure that it has complied with Sections 223(a) (4) and (6) of the Act.

(b) *Participation of Private Agencies.* The State shall assure that it has complied with Section 223(a)(9) of the Act.

(c) *Pass-Through Requirement.* The State shall assure that it complies with Section 223(a)(5) of the Act. For purposes of the pass-through requirement, a *local private agency* is defined as a private non-profit agency or organization that provides program services within an identifiable unit or a combination of units of general local government.

(d) *Rights of Privacy of Recipients of Services.* Pursuant to Sections 223(a)(17) and 229 of the JJDP Act, the State shall assure that it has established procedures to meet this requirement.

(e) *Serious Juvenile Offender Emphasis.* Pursuant to Sections 101(a)(8), 223(a)(10) and 224(a)(12) of the JJDP Act, the Office encourages States that have identified serious and violent juvenile offenders as a priority problem, to allocate a minimum of 30% of the formula grant award to programs designed for serious and violent juvenile offenders. Particular attention should be given to the areas of sentencing, providing resources necessary for informed dispositions, and rehabilitation. In accord with Administration policy direction, the Office will attempt to assist States to reach this goal.

(f) *Deinstitutionalization of Status Offenders and Non-Offenders.* Pursuant to Section 223(a)(12)(A) of the JJDP Act, the State shall:

(1) Describe its plan, procedure, and timetable covering the three-year planning cycle, for assuring that the requirements of this section are met. Refer to § 31.303(i)(3) for the rules related to the valid court order exception to this Act requirement.

(2) Describe the barriers the State faces in achieving full compliance with the provisions of this requirement.

(3) For those States that have achieved "substantial compliance" as outlined in Section 223(c) of the Act, indicate the unequivocal commitment to achieving full compliance. Attach documentation.

(4) Those States which, based upon the most recently submitted monitoring report, have been found to be in full compliance with Section 223(a)(12)(A) may, in lieu of addressing paragraphs (f)(1), (2), and (3) of this section, provide an assurance that adequate plans and resources are available to maintain full compliance.

(5) Submit the report required under Section 223(a)(12)(B) of the Act as part of the annual monitoring report required by Section 223(a)(15) of the Act.

(g) *Contact with Incarcerated Adults.* (1) Pursuant to Section 223(a)(13) of the JJDP Act the State shall:

(i) Describe its plan and procedure, covering the three-year planning cycle, for assuring that the requirements of this section are met. The term *regular contact* is defined as sight and sound contact with incarcerated adults, including inmate trustees. This prohibition seeks as complete a separation as possible and permits no more than haphazard or accidental contact between juveniles and incarcerated adults. In addition, include a timetable for compliance and justify any deviation from a previously approved timetable.

(ii) In those isolated instances where juvenile criminal-type offenders remain confined in adult facilities or facilities in which adults are confined, the State must set forth the procedures for assuring no regular sight and sound contact between such juveniles and adults.

(iii) Describe the barriers which may hinder the separation of alleged or adjudicated criminal-type offenders, status offenders and non-offenders from incarcerated adults in any particular jail, lockup, detention or correctional facility.

(iv) Those States which, based upon the most recently submitted monitoring report, have been found to be in compliance with Section 223(a)(13) may, in lieu of addressing paragraphs (g)(1)(i), (ii), and (iii) of this section, provide an assurance that adequate plans and resources are available to maintain compliance.

(v) Assure that adjudicated offenders are not reclassified administratively and transferred to an adult (criminal) correctional authority to avoid the intent of segregating adults and juveniles in correctional facilities. This does not prohibit or restrict waiver of juveniles to criminal court for prosecution, according to State law. It does, however, preclude a State from administratively transferring a juvenile offender to an adult correctional authority or a transfer within a mixed juvenile and adult facility for placement with adult criminals either before or after a juvenile reaches the statutory age of majority. It also precludes a State from transferring adult offenders to a juvenile correctional authority for placement.

(2) *Implementation.* The requirement of this provision is to be planned and implemented immediately by each state in light of identified constraints on immediate implementation. Immediate compliance is required where no constraints exist. Where constraints exist, the designated date of compliance in the latest approved plan is the compliance deadline. Those states not in compliance must show annual progress toward achieving compliance until compliance is reached.

(h) *Removal of Juveniles from Adult Jails and Lock-ups.* Pursuant to Section 223(a)(14) of the JJDP Act, the State shall:

(1) Describe its plan, procedure, and timetable for assuring that requirements of this section will be met by December 8, 1985. Refer to § 31.303(i)(4) to determine the "exceptional circumstances" which have to exist to permit, in areas characterized by low population density with respect to the detention of juveniles and where no existing acceptable alternative placement is available, the temporary detention of juveniles accused of serious crimes against persons.

(2) Describe the barriers which the State faces in removing all juveniles from adult jails and lock-ups. This requirement excepts only those juveniles formally waived or transferred to criminal court and criminal charges have been filed, or juveniles over whom a criminal court has original or concurrent jurisdiction and such court's jurisdiction has been involved through the filing of criminal charges.

(3) For those States that have achieved "substantial compliance" with Section 223(a)(14) as specified in Section 223(c) of the Act, indicate the unequivocal commitment to achieving full compliance. Attach documentation.

(4) Those States which, based upon the most recently submitted monitoring report, have been found to be in full compliance with Section 223(a)(14) may, in lieu of addressing paragraphs (b)(1), (2), and (3) of this section, provide an assurance that adequate plans and resources are available to maintain full compliance.

(i) *Monitoring of Jails, Detention Facilities and Correctional Facilities.* (1) Pursuant to Section 223(a)(15) of the JJDP Act, and except as provided by paragraph (i)(7) of this section, the State shall:

(i) Indicate how it will annually identify and survey all secure detention or correctional facilities, jails, lock-ups, and other facilities usable for the detention and confinement of juveniles.

(ii) Provide a plan for an annual on-site inspection of all such facilities identified in paragraph (i)(1)(i) of this section. Such plan shall include a procedure for reporting and investigating compliance complaints in accordance with Section 223(a)(12)(A), (13), and (14).

(iii) Include a description of the barriers which the State faces in developing a monitoring system to establish and report the level of compliance with Sections 223(a)(12), (13), and (14).

(2) For the purpose of monitoring for compliance with Section 223(a)(12)(A) of the Act a secure detention or correctional facility is:

(i) Any secure public or private facility used for the lawful custody of *accused* or adjudicated juvenile offenders or non-offenders; or

(ii) Any secure public or private facility, which is also used for the lawful custody of accused or convicted adult criminal offenders.

(3) *Valid Court Order* [Reserved].

(4) *Removal Exception (Section 223(a)(14))*. The following conditions must be met in order for an accused juvenile criminal-type offender to be temporarily detained (for up to 48 hours) in an adult jail or lock-up:

(i) The geographic area which has jurisdiction over the juvenile has been certified as having a low population density, based upon specific criteria developed by the State and approved by OJJDP. The criteria developed must take into account total county population per square mile. The State must provide rationale for the criteria proposed.

(ii) The juvenile must be accused of a serious crime against persons to include: Criminal homicide, forcible rape, mayhem, kidnapping, aggravated assault, robbery, and extortion accompanied by threats of violence.

(iii) A determination must be made that there is no existing acceptable alternative placement available for the juvenile pursuant to criteria developed by the State and approved by OJJDP.

(iv) The county is not served by a local or regional juvenile detention facility. Generally, this phrase means that there is no public or private juvenile detention facility operated within the county or there is no public or private juvenile facility which is in operation to provide secure detention for accused juvenile offenders from that county.

(5) *Reporting Requirement*. The State shall report annually to the Administrator of OJJDP on the results of monitoring for Sections 223(a)(12), (13), and (14) of the JJDP Act. Three copies of the report shall be submitted to the Administrator of OJJDP no later than December 31 of each year.

(i) To demonstrate the extent of compliance with Section 223(a)(12)(A) of the JJDP Act, the report must at least include the following information for both the baseline and the current reporting periods.

(A) Dates of baseline and current reporting period.

(B) Total number of public and private juvenile detention and correctional facilities AND the number inspected on-site.

(C) Total number of accused status offenders and non-offenders held in any secure detention or correctional facility as defined in § 31.303(i)(2) for longer than 24 hours exclusive of non-judicial days, excluding those held pursuant to a judicial determination that the juvenile violated a valid court order.

(D) Total number of adjudicated status offenders and non-offenders held in any secure detention or correctional facility as defined in § 31.303(i)(2), excluding those held pursuant to a judicial determination that the juvenile violated a valid court order.

(E) Total number of status offenders held in any secure detention or correctional facilities pursuant to a judicial determination that the juvenile violated a valid court order.

(ii) To demonstrate the extent to which the provisions of Section 223(a)(12)(B) of the JJDP Act are being met, the report must include the total number of accused and adjudicated status offenders and non-offenders placed in facilities that are:

(A) Not near their home community;

(B) Not the least restrictive appropriate alternative; and

(C) Not community-based.

(iii) To demonstrate the progress toward and extent of compliance with Section 223(a)(13) of the JJDP Act, the report must at least include the following information for both the baseline and the current reporting periods.

(A) Designated date for achieving full compliance.

(B) The total number of facilities that can be used for the secure detention and confinement of both juvenile offenders and adult criminal offenders.

(C) The total number of facilities used for the secure detention and confinement of both juvenile offenders and adult criminal offenders during the past 12 months AND the number inspected on-site.

(D) The total number of facilities used for secure detention and confinement of both juvenile offenders and adult criminal offenders which did not provide adequate separation.

(E) The total number of juvenile offenders and non-offenders NOT adequately separated in facilities used for the secure detention and confinement of both juveniles and adults.

(iv) To demonstrate the progress toward and extent of compliance with Section 223(a)(14) of the JJDP Act the report must at least include the following information for the baseline and current reporting periods:

(A) Dates of baseline and current reporting period.

(B) Total number of adult jails in the State AND the number inspected on-site.

(C) Total number of adult lock-ups in the State AND the number inspected on-site.

(D) Total number of adult jails holding juveniles during the past twelve months.

(E) Total number of adult lock-ups holding juveniles during the past twelve months.

(F) Total number of adult jails and lock-ups in areas meeting the "removal exceptions" as noted in subparagraph 4 above, including a list of such counties.

(G) Total number of juvenile-criminal-type offenders held in adult jails in excess of six hours.

(H) Total number of juvenile-criminal-type offenders held in adult lock-ups in excess of six hours.

(I) Total number of accused and adjudicated status offenders and non-offenders held in any adult jail or lock-up as defined in Section 31.304.

(J) Total number of juveniles accused of a serious crime against persons held less than 48 hours in adult jails and lock-ups in areas meeting the "removal exception" as noted in subparagraph 4 above.

(6) *Compliance*. The State must demonstrate the extent to which the requirements of Section 223(a)(12)(A), (13), and (14) of the Act are met. Should the State fail to demonstrate compliance with the requirements of these Sections within designated time frames, eligibility for formula grant funding shall terminate. The compliance levels are:

(i) *Substantial compliance* with Section 223(a)(12)(A) requires within three years of initial plan submission achievement of a 75% reduction in the aggregrate number of status offenders and non-offenders held in secure detention or correctional facilities or removal of 100% of such offenders from secure correctional facilities only. In

addition, the State must make an unequivocal commitment, through appropriate executive and legislative action, to achieving full compliance within two additional years. *Full compliance* is achieved when a State has removed 100% of such juveniles from secure detention and correctional facilities or can demonstrate full compliance with *de minimis* exceptions pursuant to the policy criteria contained in the **Federal Register** of January 9, 1981 (46 FR 2566–2569).

(ii) *Compliance* with Section 223(a)(13) has been achieved when a State can demonstrate that:

(A) The last submitted monitoring report, covering a full 12 months of data, demonstrates that no juveniles were incarcerated in circumstances that were in violation of Section 223(a)(13); or

(B)(*1*) State law, regulation, court rule, or other established executive or judicial policy clearly prohibits the incarceration of all juvenile offenders in circumstances that would be in violation of Section 223(a)(13);

(*2*) All instances of noncompliance reported in the last submitted monitoring report were in violation of, or departures from, the State law, rule, or policy referred to in paragraph (i)(6)(ii)(B)(*1*) of this section;

(*3*) The instances of noncompliance do not indicate a pattern or practice but rather constitute isolated instances; and

(*4*) Existing mechanisms for the enforcement of the State law, rule, or policy referred to in paragraph (i)(6)(ii)(B)(*1*) of this section are such that the instances of noncompliance are unlikely to recur in the future.

(iii) *Substantial compliance* with Section 223(a)(14) requires the achievement of a 75% reduction in the number of juveniles held in adult jails and lock-ups by December 8, 1985 and that the State has made an unequivocal commitment, through appropriate executive or legislative action, to achieving full compliance within two additional years.

(7) *Monitoring Report Exceptions.* States which have been determined by the OJJDP Administrator to have achieved full compliance with Section 223(a)(12)(A) and compliance with Section 223(a)(13) of the Juvenile Justice Act and which wish to be exempted from the annual monitoring report requirements must submit a written request to the OJJDP Administrator which demonstrates that:

(i) The State provides for an adequate system of monitoring jails, detention facilities, correctional facilities, and non-secure facilities to enable an annual determination of State compliance with Sections 223(a)(12)(A), (13), and (14) of the JJDP Act;

(ii) State legislation has been enacted which conforms to the requirements of Sections 223(a)(12)(A) and (13) of the Juvenile Justice Act; and

(iii) The enforcement of the legislation is statutorily or administratively prescribed, specifically providing that:

(A) Authority for enforcement of the statute is assigned;

(B) Timeframes for monitoring compliance with the statute are specified; and

(C) Adequate sanctions and penalties that will result in enforcement of the statute and procedures for remedying violations are set forth.

(j) *Juvenile Crime Analysis.* Pursuant to Section 223(a)(8)(A) and (B) the State shall conduct an analysis of juvenile crime problems and juvenile justice and delinquency prevention needs.

(1) *Analysis.* The analysis must be provided in the multi-year application. A suggested format for the analysis is provided in the Formula Grant Application Kit.

(2) *Product.* The product of the analysis is a series of brief written problem statements set forth in the application that define and describe the priority problems.

(3) *Programs.* Applications are to include descriptions of programs to be supported with Juvenile Justice Act formula grant funds. A suggested format for these programs is included in the application kit.

(4) *Performance Indicators.* A list of performance indicators must be developed and set forth for each program. These indicators show what data will be collected at the program level to measure whether objectives and performance goals have been achieved and should relate to the measures used in the problem statement and statement of program objectives.

(k) *Concentration of State Effort.* Pursuant to Section 223(a)(8)(C) the State shall assure that it has on file a plan for the concentration of State efforts as they relate to the coordination of all State juvenile delinquency programs with respect to overall policy and development of objectives and priorities for all State juvenile delinquency programs and activities.

(l) *Annual Performance Report.* Pursuant to Section 223(a) and Section 223(a)(21) the State Plan shall provide for submission of an annual performance report. The State shall report on its progress in the implementation of the approved programs, described in the three-year plan. The performance indicators will serve as the objective criteria for a meaningful assessment of progress toward achievement of measurable goals.

(m) *Equitable Distribution of Juvenile Justice Funds and Assistance to Disadvantaged Youth.* The State shall assure that it complies with Sections 223(a)(7) and (16) of the JJDP Act.

(n) *Advanced Techniques.* The State shall assure that it complies with Section 223(a)(10) of the JJDP Act.

(o) *Analytical and Training Capacity.* The State shall assure that it complies with Sections 223(a)(11) and (12) of the JJDP Act.

(p) *Equitable Arrangements for Employees Affected by Assistance Under the Act.* Pursuant to Section 223(a)(18) the State shall assure that fair and equitable arrangements are made to protect the interests of employees affected by assistance under the Act.

(q) *Non-Supplantation.* The State shall assure that it complies with Section 223(a)(20) of the JJDP Act.

(r) *Technical Assistance.* States shall include, within their plan, a description of technical assistance needs. Specific direction regarding the development and inclusion of all Technical Assistance needs and priorities will be provided in the "Application Kit for Formula Grants under the JJDPA."

(s) *Other Terms and Conditions.* Pursuant to Section 223(a)(22) of the JJDP Act, States shall agree to other terms and conditions as the Administrator may reasonably prescribe to assure the effectiveness of programs assisted under the formula grant.

§ 31.304 Definitions.

(a) *Private agency.* A private non-profit agency, organization or institution is:

(1) Any corporation, foundation, trust, association, cooperative, or accredited institution of higher education not under public supervision or control; and

(2) Any other agency, organization or institution which operates primarily for scientific, educational, service, charitable, or similar public purposes, but which is not under public supervision or control, and not part of the net earnings of which inures or may lawfully inure to the benefit of any private shareholder or individual, and which has been held by IRS to be tax-exempt under the provisions of Section 501(c)(3) of the 1954 Internal Revenue Code.

(b) *Secure.* As used to define a detention or correctional facility this term includes residential facilities which have fixtures designated to physically restrict the movements and activities of persons in custody such as locked rooms

and buildings, fences, or other physical structures.

(c) *Facility.* A place, an institution, a building or part thereof, set of buildings or an area whether or not enclosing a building or set of buildings which is used for the lawful custody and treatment of juveniles and may be owned and/or operated by public and private agencies.

(d) *Juvenile who is accused of having committed an offense.* A juvenile with respect to whom a petition has been filed in the juvenile court or other action has occurred alleging that such juvenile is a juvenile offender, i.e., a criminal-type offender or a status offender, and no final adjudication has been made by the juvenile court.

(e) *Juvenile who has been adjudicated as having committed an offense.* A juvenile with respect to whom the juvenile court has determined that such juvenile is a juvenile offender, i.e., a criminal-type offender or a status offender.

(f) *Juvenile offender.* An individual subject to the exercise of juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by State law, i.e., a criminal-type offender or a status offender.

(g) *Criminal-type offender.* A juvenile offender who has been charged with or adjudicated for conduct which would, under the law of the jurisdiction in which the offense was committed, be a crime if committed by an adult.

(h) *Status offender.* A juvenile offender who has been charged with or adjudicated for conduct which would not, under the law of the jurisdiction in which the offense was committed, be a crime if committed by an adult.

(i) *Non-offender.* A juvenile who is subject to the jurisdiction of the juvenile court, usually under abuse, dependency, or neglect statutes for reasons other than legally prohibited conduct of the juvenile.

(j) *Lawful custody.* The exercise of care, supervision and control over a juvenile offender or non-offender pursuant to the provisions of the law or of a judicial order or decree.

(k) *Other individual accused of having committed a criminal offense.* An individual, adult or juvenile, who has been charged with committing a criminal offense in a court exercising criminal jurisdiction.

(l) *Other individual convicted of a criminal offense.* An individual, adult or juvenile, who has been convicted of a criminal offense in a court exercising criminal jurisdiction.

(m) *Adult jail.* A locked facility, administered by State, county, or local law enforcement and correctional agencies, the purpose of which is to detain adults charged with violating criminal law, pending trial. Also considered as adult jails are those facilities used to hold convicted adult criminal offenders sentenced for less than one year.

(n) *Adult Lockup.* Similar to an adult jail except that an adult lock-up is generally a municipal or police facility of a temporary nature which does not hold persons after they have been formally charged.

Subpart E—General Conditions and Assurances

§ 31.400 Compliance with statute.

The applicant State must assure and certify that the State and its subgrantees and contractors will comply with applicable provisions of the Omnibus Crime Control and Safe Streets Act of 1968, Pub. L. 90–351, as amended, and with the provisions of the Juvenile Justice and Delinquency Prevention Act of 1974, Pub. L. 93–415, as amended, and the provisions of the OJARS Financial and Administrative Guide for Grants, M 7100.1B.

§ 31.401 Compliance with other Federal laws, orders, circulars.

The applicant State must further assure and certify that the State and its subgrantees and contractors will adhere to regulations of the Department and other applicable Federal laws, orders and circulars. These general Federal laws and regulations are described in greater detail in the "Fiscal Year 1982 Application Kit for Formula Grants under the JJDP Act."

§ 31.402 Application on file.

Any Federal funds awarded pursuant to an application must be distributed and expended pursuant to and in accordance with the programs contained in the applicant State's current approved application and any advance funds will not be awarded for any program not specifically approved and clearly set forth in the current comprehensive application. Any departures therefrom, other than to the extent permitted by current program and fiscal regulations and guidelines, must be submitted for advance approval by the Administration or of OJJDP.

§ 31.403 Non-discrimination.

The State assures that it will comply, and that subgrantees and contractors will comply, with all applicable Federal nondiscrimination requirements, including:

(a) Section 815(c)(1) of the Justice System Improvement Act of 1979, as made applicable by Section 262(a) of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended;

(b) Title VI of the Civil Rights Act of 1964;

(c) Section 504 of the Rehabilitation Act of 1973, as amended;

(d) Title IX of the Education Amendments of 1972;

(e) The Age Discrimination Act of 1975; and

(f) The Department of Justice Nondiscrimination Regulations, 28 CFR Part 42, Subparts C, D, E, and G.

Charles A. Lauer,

Acting Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410–18–M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Parts 1602, 1607, 1620 and 1627

Display of OMB Control Numbers For Recordkeeping Requirements

AGENCY: Equal Employment Opportunity Commission.

ACTION: Technical amendments.

SUMMARY: This document amends the Equal Employment Opportunity Commission's regulations to include Office of Management and Budget control numbers at the places in the regulations where current information collection requirements are described. It also removes obsolete references to previous Government Accounting Office or Office of Management and Budget approvals of information collection requirements.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Anthony J. De Marco, Supervisory Attorney, Office of General Counsel, Legal Counsel Division, Equal Employment Opportunity Commission, 2401 E Street, N.W., Washington, D.C. 20506, telephone number (202) 634–6595.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The information collection requirements contained in the regulatory sections listed below have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and assigned the control numbers contained in the listing.

Text of the Amendments

Following the text of each paragraph of Title 29 cited in the first column of the table, add parenthetically the corresponding Office of Management and Budget number listed in the second column:

CFR citation	OMB control No.
1602.39, 1602.40	3046-0003
1602.27, 1602.28	3046-0004
1602.12, 1602.14	3046-0007
1602.30, 1602.31	3046-0008
1602.48, 1602.49	3046-0009
1607.4, 1607.15	3046-0017
1627.3, 1627.4, 1627.5, 1627.6, 1627.7	3046-0018
1620.21	3046-0019

Signed at Washington, D.C. this 28th day of December 1981.

For the Commission.

J. Clay Smith, Jr.,

Acting Chairman, Equal Employment Opportunity Commission.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2610, 2615, 2616, 2617, 2622, 2643, 2671, and 2673

List of Existing Recordkeeping Requirements

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Technical amendments.

SUMMARY: This notice lists recordkeeping requirements which have been established by the Pension Benefit Guaranty Corporation. This notice is being published to inform the public of agency compliance with Section 3512, the public protection clause, of the Paperwork Reduction Act of 1980.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Nina R. Hawes, Attorney, Office of the General Counsel, Suite 7200, Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006, 202-254-3010.

SUPPLEMENTARY INFORMATION: On November 23, 1981, the Administrator for Information and Regulatory Affairs of the Office of Management and Budget (OMB) issued a memorandum requesting agencies to develop and publish in the **Federal Register**, lists of existing agency recordkeeping requirements, showing the regulatory citation and the current control number assigned by OMB.

The recordkeeping and reporting requirements of the Pension Benefit Guaranty Corporation, under their respective OMB control numbers, are listed below.

Following the text of each of the following cited sections in Title 29 CFR, add parenthetically the OMB Control numbers listed for that section.

1. Report title: Annual Premium Filing. Citation: 29 CFR 2610.3, (formerly 29 CFR 2602.3) OMB Control Number: 1212-0009

2. Report title: Notice of Intent to Terminate. Citation: 29 CFR 2616.3 (formerly 29 CFR 2604.3) OMB Control Number: 1212-0012

3. Report title: Reporting and Notification Requirements for Reportable Events. Citation: 29 CFR 2615.3 (formerly 29 CFR 2617.3) OMB Control Number: 1212-0013

4. Report title: Submission of net worth information. Citation: 29 CFR 2622.3 (formerly 29 CFR 2613.3) OMB Control Number: 1212-0017

5. Report title: Demonstration of sufficiency; Submission of distribution information. Citation: 29 CFR 2617.12 (formerly 29 CFR 2615.12), 29 CFR 2617.23, (formerly 29 CFR 2615.23) OMB Control Number: 1212-0018

6. Report title: Election of single employer status. Citation: 29 CFR 2671.3 OMB Control Number: 1212-0019

7. Report title: Notice of termination for multiemployer plans. Citation: 29 CFR 2673.2 OMB Control Number: 1212-0020

8. Report title: Variances for sale of assets. Citation: 29 CFR 2643.2, 46 FR 46129 OMB Control Number: 1212-0021

Henry Rose,

Acting Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

29 CFR Part 2619

Valuation of Plan Benefits in Non-Multiemployer Plans; Amendment Adopting Additional Table

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Interim rule; amendment.

SUMMARY: This publication sets forth an amendment to Appendix D of Part 2619, Valuation of Plan Benefits in Non-Multiemployer Plans. The amendment adds a new table, Table I-82, to Appendix D for plans which terminate in 1982. This table is to be used to determine an expected retirement age for certain plan participants in terminating pension plans covered under Title IV of the Employee Retirement Income Security Act of 1974. The expected retirement age is needed to calculate the value of an early retirement benefit and thus the total value of benefits under the plan.

EFFECTIVE DATE: January 1, 1982.

FOR FURTHER INFORMATION CONTACT: Nina R. Hawes, Staff Attorney, Office of General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, D.C. 20006, 202-254-3010.

SUPPLEMENTARY INFORMATION: On January 20, 1981, an interim rule on expected retirement age was published in the **Federal Register** at 46 FR 9504 as Subpart D of Part 2610, Valuation of Plan Benefits in Non-Multiemployer Plans. Subpart D of Part 2610 provided methods of determining an expected retirement age to be used in conjunction with the rules contained in Subparts B and C of that Part to determine the value of an early retirement benefit. Part 2610 was redesignated Part 2619 in a notice published June 24, 1981 (46 FR 32574).

Appendix D was published concurrently with Subpart D at 46 FR 9514. Appendix D contains two sets of tables to be used to determine an expected retirement age. The first set of tables, Selection of Retirement Rate Category (I-79, I-80 and I-81), are used to determine whether a participant has a low, medium or high probability of retiring early. The second set of tables, Expected Retirement Ages for Individuals in the Low, Medium and High Categories (II-A, II-B and II-C), are used to determine the expected retirement age.

The first set of tables are based on the year the participant reaches normal retirement age and the participant's monthly retirement benefit. Under the second set of tables, the expected retirement age is based on the earliest age a participant could retire and the normal retirement age under the plan. Once a plan administrator has determined the category of a participant using the first set of tables, he or she uses the second set of tables published in Appendix D to determine an expected retirement age. This age is used to calculate the value of the early retirement benefit and thus, the total amount of employer liability owed to PBGC.

The Selection of Retirement Rate Category Table is revised annually and normally will only remain in effect for a calendar year. The Appendix sets forth one table for each year, which applies to plans terminating in that year. The addition of in Table I-82 is necessary to update the correlation between the amount of a participant's benefit and the

probability that he or she will elect early retirement.

The PBGC has determined that notice and public comment on the addition of Table I–82 to Appendix D to Part 2619 are impracticable and contrary to the public interest. This determination is based on the need to issue the table promptly, so the table will reflect, as accurately as possible, the relationship between a participant's benefit and his or her probability of retiring early. The PBGC has found that the public interest is best served by issuing this table without an opportunity for notice and comment so that plans may be able to calculate the value of plan benefits before submitting a notice of intent to terminate. Also, plans will be able to predict employer liability more accurately prior to plan termination. Moreover, because of the need to provide immediate guidance for the valuation of benefits under plans that will terminate on or after January 1, 1982, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment to the final regulation effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291 of February 17, 1981 (46 FR 13193) because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, innovation or competition.

PART 2619—VALUATION OF PLAN BENEFITS IN NON-MULTIEMPLOYER PLANS

In consideration of the foregoing, Part 2619 of Chapter XXVI of Title 29, Code of Federal Regulations is hereby promulgated as an interim rule as follows:

1. The authority citation for Part 2619 reads as follows:

Authority: Secs. 4002(b)(3), 4041, 4044, and 4062(b)(1)(A), Pub. L. 93–406, 88 Stat. 1004, 1020, 1025–27, 1029 (1974), as amended by Secs. 403(l), 403(d) and 402(a)(7), Pub. L. 96–364, 94 Stat. 1302, 1301, 1299 (1980) (29 U.S.C. 1302, 1341, 1344, and 1362)

2. Appendix D to Part 2619 is amended by the addition of Table I–82.

Appendix D—Tables Used To Determine Expected Retirement Age

* * * * *

TABLE I–82.—SELECTION OF RETIREMENT RATE CATEGORY

[For plans with a valuation date after Dec. 31, 1981 and before Jan. 1, 1983]

Participant reaches NRA in year—	Participant's retirement rate category is—			
	Low[1] if monthly benefit at NRA is less than—	Medium[2] if monthly benefit at NRA is		High[3] if monthly benefit at NRA is greater than—
		From—	To—

BILLING CODE 7708-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD2 81-01]

Safety Zone; Upper Mississippi River, Mile 633.7 to 636.7

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment to the Coast Guard's Safety Zone Regulations removes the Safety Zone on the Upper Mississippi River between Mile 633.7 to Mile 636.7, including the Marquette-Joliet Highway 18 Bridge at Mile 634.7 near Prairie Du Chien, Wisconsin. The effect of this action is to eliminate all special operating requirements for certain vessels transiting the applicable waters of the Upper Mississippi River imposed by the Safety Zone, as amended.

EFFECTIVE DATE: The amendment became effective at 6:00 (cst) on November 27, 1981.

FOR FURTHER INFORMATION CONTACT: Commander L. Z. Katcharian, Project Officer, c/o Marine Safety Office, P.O. Box 3428, St. Paul, MN, telephone (612) 725–7452.

SUPPLEMENTARY INFORMATION: The Safety Zone was established between Mile 633.7 and Mile 636.7 Upper Mississippi River, by the Captain of the Port, Minneapolis/St. Paul, MN, under the authority of the Ports and Waterway Safety Act, as amended, on March 23, 1981 (published at 46 FR 26055, May 11, 1981). This initial action was taken due to the discovery of potential defects requiring repair efforts to the Marquette-Joliet Highway 18 bridge at Mile 634.7 near Prairie Du Chien, Wisconsin. In order to reduce the possibility of vessel or cargo damage or damage to life, property, or the marine environment, the Safety Zone was established imposing various navigational restrictions on certain vessels transiting the zone. As repairs have progressed the navigational restrictions have been modified in light of the changing conditions. Amendments were published at 46 FR 41494, August 17, 1981, and at 46 FR 48925, October 5, 1981. Due to the removal of obstructions from the channel which had been temporarily necessary to effect the repairs, the Captain of the Port, Minneapolis/St. Paul, MN, has determined that the restrictions are no longer necessary and has exercised his authority to terminate the Safety Zone.

This amendment is issued without publication of a notice of proposed rulemaking and is effective in less than 30 days from the date of publication. To continue the restrictions during a proposed rulemaking period when the conditions requiring the restrictions no longer exist would be an unnecessary burden on the affected maritime interests without any appreciable benefit to the public at large. This rulemaking has been reviewed under the provisions of Executive Order 12291 and has been determined not to be major. This amendment has been determined to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis and Review of Regulations (DOT Order 2100.5 of 5–77–80). As economic

evaluation has not been conducted since, for the reasons discussed above, its impact is expected to be minimal. In accordance with Section 605(b) of the Regulatory Flexibility Act (94 Stat. 1165), it is also certified that the rules will not have a significant economic impact on a substantial number of small entities.

Drafting Information

The principle persons involved in drafting this amendment are Commander Charles G. Hill, USCG, and Lieutenant Commander Richard A. Knee, USCG, Project Attorney, c/o Commander, Second Coast Guard District, 1430 Olive Street, St. Louis, Missouri 63103.

Comments

No written comments were received following the original creation of or amendments to the Safety Zone. Although this amendment gives notice of the termination of the Safety Zone, public comment is nevertheless desirable as part of the ongoing review of the conditions at this bridge. Accordingly, persons wishing to comment may do so by submitting written comments to Commander (m), Second Coast Guard District, 1430 Olive Street, St. Louis, Missouri 63103. Comments may be mailed or hand delivered. Commenters should include their names and addresses, identify the docket number, and give reasons for the comment. Based upon comments received and experience gained in evaluating the navigational needs of approaching and transiting the bridge span, the Safety Zone may be reestablished. Any person desiring acknowledgment of their written comments should include a self addressed stamped postcard or envelope.

Final Regulation

PART 165—SAFETY ZONES

§ 165.211 [Removed]

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended by removing § 165.211.

(92 Stat. 1475 (33 U.S.C. 1225); 92 Stat. 1477 (33 U.S.C. 1231); 49 CFR 1.46 (n)(4))

Dated: December 15, 1981.

L. Z. Katcharian,

Commander, Coast Guard, Captain of the Port, Minneapolis/St. Paul, MN.

[FR Doc. 81-37084 Filed 12-30-81; 8:45 am]

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AEN-5 FRL 1991-8]

Interim Enforcement Policy for Sulfur Dioxide Emission Limitations in Indiana

AGENCY: Environmental Protection Agency.

ACTION: Policy concerning the enforcement for sulfur dioxide emissions limitations.

SUMMARY: The United States Environmental Protection Agency (U.S. EPA) is announcing a policy concerning enforcement of sulfur dioxide emission limitations contained in the State Implementation Plan for Indiana.

The promulgated sulfur dioxide implementation plan is APC–13, as approved by U.S. EPA on May 14, 1973 (38 FR 12698) and August 24, 1976 (41 FR 35676). These regulations require subject sources to achieve specific emission limitations and demonstrate compliance using test methods specified in 40 CFR Part 60. U.S. EPA has initiated a review of its policies and procedures for regulating sulfur dioxide emissions from coal-fired plants and has addressed the question of sulfur variability in that context. As part of this review, U.S. EPA has announced its intention to propose policy and regulatory changes which would permit states to analyze the air quality impact of variable sulfur emissions in their attainment demonstrations. Since changes to the rules and policies are required for the new evaluation technique, a final determination on its acceptability can only be made after public comments on the policies are reviewed and final decisions are published.

In the interim, while the sulfur variability issue is under review, the Agency will focus its enforcement resources on those plants which present the greatest environmental threat. While the State of Indiana is reevaluating the emission limitations in a manner consistent with U.S. EPA's proposed policy, U.S. EPA will give enforcement priority to those plants in Indiana which fail to meet the conditions which are listed below.

FOR FURTHER INFORMATION CONTACT: Louise C. Gross at (312) 886–6844.

SUPPLEMENTARY INFORMATION: The United States Environmental Protection Agency (U.S. EPA) is announcing a policy concerning enforcement of sulfur dioxide emission limitations contained in the State Implementation Plan for Indiana.

The promulgated sulfur dioxide implementation plan is APC–13, as approved by U.S. EPA on May 14, 1973 (38 FR 12698) and August 24, 1976 (41 FR 35676). These regulations require subject sources to achieve specific emission limitations and demonstrate compliance using test methods specified in 40 CFR Part 60. U.S. EPA has initiated a review of its policies and procedures for regulating sulfur dioxide emissions from coal-fired plants and has addressed the question of sulfur variability in that context. As part of this review, U.S. EPA has announced its intention to propose policy and regulatory changes which would permit states to analyze the air quality impact of variable sulfur emissions in their attainment demonstrations. Since changes to the rules and policies are required for the new evaluation technique, a final determination on its acceptability can only be made after public comments on the policies are reviewed and final decisions are published.

In the interim, while the sulfur variability issue is under review, the Agency will focus its enforcement resources on those plants which present the greatest environmental threat. While the State of Indiana is reevaluating the emission limitations in a manner consistent with U.S. EPA's proposed policy, U.S. EPA will give enforcement priority to those plants in Indiana which fail to meet the conditions which are listed below.

1. The facility is meeting the currently applicable, promulgated SO_2 emission limit applied as a 30-day rolling, weighted average.[1]

2. The facility obtains information on SO_2 emissions as follows and makes this information available to the State and U.S. EPA upon request:

a. Coal-fired facilities with greater than 1000 million BTU per hour of heat input capacity must conduct daily fuel sampling analysis for each boiler or install continuous SO_2 monitoring equipment.

b. Coal-fired facilities with greater than 100 million BTU per hour of heat input but less than 1000 million BTU per hour of heat input capacity perform monthly composite coal samples for each boiler.

c. Coal-fired facilities with less than 100 million BTU per hour of heat input capacity but greater than 10 million BTU

[1] Facility, as defined in this proposal, refers to the combined aggregate of all fossil fuel-fired sources under common ownership or operation within the plant boundaries. The 30-day period refers to 30 consecutive operating days.

per hour of heat input capacity, must obtain a monthly average coal analysis based on coal supplier analyses for all shipments received during the calendar month.

d. Coal-fired facilities with less than 10 million BTU per hour of heat input may obtain a monthly average coal analysis based on coal supplier analyses for all shipments received during the calendar month or utilize other appropriate procedures approved by the Indiana Air Pollution Control Division.

3. The facility must maintain records on the coal consumption for each boiler (daily for sources with a heat input capacity of 1000 million BTU or more, monthly for others). The facility must calculate its emission rates on an as-burned basis, in pounds of SO_2 per million BTU of heat input. These records should be retained for a minimum of two years. In addition, sources should submit quarterly reports to the State of Indiana in which the required daily or monthly fuel information is provided.

4. All coal sampling and analysis should be performed in conformance with 40 CFR Part 60, Appendix A, Method 19.

Whether sampling is done as a 30-day rolling weighted average, a monthly weighted composite or a vendor certification, the underlying policy will be to proceed with enforcement against any sources which exceed the SIP emission limitation on a 30-day rolling weighted average basis. Thus, U.S. EPA or the State of Indiana could do its own sampling to establish such a violation. It should also be emphasized that this policy is intended to serve solely as a screening process for the selection of the highest priority cases in need of Federal enforcement action. It does not modify the applicable State Implementation Plan limits for any source of sulfur dioxide emissions. Thus, any facility in violation of the policy's conditions would be subject to enforcement of the Plan as originally promulgated. Finally, this policy does not apply to facilities subject to emission limitations under the Clean Air Act's various new source requirements, e.g., the Federal rules for the Prevention of Significant Deterioration (40 CFR 52.21) or the New Source Performance Standards (40 CFR Part 60).

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this policy does not have a significant economic impact on a substantial number of small entities. The policy is merely an option for sources who wish to avail themselves of U.S. EPA's enforcement discretion priorities. The policy does not impose any additional requirements beyond those previously required by the SIP unless a source chooses to comply with the option.

The information collection requirements contained in this notice have been cleared by the Office of Management and Budget under the authority of the Paperwork Reduction Act.

Under Executive Order 12291, U.S. EPA must judge whether a regulation is "major" and therefore, subject to the requirement of a regulatory impact analysis. This determination is not "major" as defined by Executive Order 12291, because this action imposes no new requirements on any source. Any source may opt to continue compliance with the existing SIP requirements as approved.

This determination was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

Dated: September 24, 1981.

Valdas V. Adamkus,

Acting Regional Administrator.

BILLING CODE 6560-38-M

---

40 CFR Part 81

[A-5-FRL 1998-4]

Designation of Areas for Air Quality Planning Purposes; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: EPA announces the redesignation of Tippecanoe County, Indiana from unclassifiable to attainment for total suspended particulate (TSP). This change is based on nine recent, consecutive quarters of representative quality assured monitored data showing attainment of the TSP standards. This action will be effective on March 1, 1982 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

EFFECTIVE DATE: This final rulemaking is effective on March 1, 1982.

ADDRESSES: Copies of the redesignation request and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Susanne S. Karacki at 312-353-2211 before visiting the Region V Office).

Environmental Protection Agency, Region V, Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

Indiana Air Pollution Control Division, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206

FOR FURTHER INFORMATION CONTACT: Susanne S. Karacki at 312-353-2211 or at the above Region V office.

SUPPLEMENTARY INFORMATION: On March 3, 1978 (43 FR 8962) and on October 5, 1978 (43 FR 45993), pursuant to the requirements of Section 107 of the Clean Air Act, EPA designated Tippecanoe County, Indiana unclassifiable for TSP. On August 20, 1981 the State petitioned EPA to revise the Tippecanoe County TSP designation from unclassifiable to attainment. Indiana's redesignation request was not accompanied by the correlated promulgation of changes in the Indiana Air Pollution Control Board Regulation 325 IAC 1.1-3 which designates the attainment status of geographical areas in Indiana.

Tippecanoe County was originally designated unclassifiable by EPA because of uncertainty in the validity of the air quality monitoring data. To support the redesignation request from unclassifiable to attainment, Indiana submitted nine recent, consecutive quarters (April 1, 1979 through June 30, 1981) of quality assured monitored data collected at one monitor in Lafayette, Indiana. The monitored data show no violations of the TSP standards. To demonstrate the representativeness of the data, the State provided information to show that all of the industrial TSP emission sources, and thus the highest industrial TSP emissions, are located in the vicinity of the Lafayette monitor.

EPA has determined that Indiana's submittal meets the criteria for a redesignation to attainment. Accordingly, EPA is redesignating Tippecanoe County from unclassifiable to attainment for TSP.

Because EPA considers today's action as noncontroversial and routine, EPA is approving it without prior proposal. The public is advised that this action will be effective March 1, 1982. However, if notice is received within 30 days at the Region V office listed above that someone wishes to submit adverse or critical comments, this action will be withdrawn and a subsequent notice will be published before the effective date. The notice will withdraw the final action and begin a new rulemaking by announcing a proposal of the action and a comment period.

Pursuant to the provisions of 5 U.S.C. 605(b) I hereby certify that the attached

rule will not have a significant economic impact on a substantial number of small entities. This action only approves State actions. It will impose no new requirements.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not Major because it merely changes the air quality designation to attainment.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

(Sec. 107, Clean Air Act, as amended (42 U.S.C. 7407))

Dated: December 24, 1981.

Anne M. Gorsuch,

Administrator.

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

Part 81 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart C—Section 107 Attainment Status Designations

1. Section 81.315 is amended by removing all reference to Tippecanoe County under the TSP column as follows:

§ 81.315 Indiana.

INDIANA—TSP

41 CFR Part 15

[AAA-FRL-2015-8]

Cost Sharing Contracts

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Executive Order 12291 dated February 17, 1981, called upon all agencies to review regulations with the objective of reducing the regulatory burden, minimizing duplication and conflict, and ensuring well-reasoned regulations. As a part of the effort to reduce government regulatory requirements, the Office of Management and Budget rescinded Federal Management Circular 73-3, "Cost Sharing on Federal Research," on June 23, 1981. The Environmental Protection Agency had issued guidelines for cost sharing contracts based on the Circular. This final rule abolishes the EPA guidelines. This revised regulation will grant greater flexibility in deciding when contract cost should be shared by a proposer and the Government.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Environmental Protection Agency, Procurement and Contracts Management Division (PM-214), Attention: Edward Murphy, 401 M Street SW., Washington, D.C. 20460, (202) 755-0030.

(40 U.S.C. 471)

Dated: December 3, 1981.

John P. Horton,

Assistant Administrator for Administration.

1. The table of contents for 41 CFR Subpart 15-3.4 is revised as follows:

PART 15-3—PROCUREMENT BY NEGOTIATIONS

* * * * *

Subpart 15-3.4—Types of Contracts

Sec.

15-3.405 Cost reimbursement type contracts.
15-3.405-3 Cost sharing contracts.
15-3.405-3-50 Basic guidelines.
15-3.405-3-51 Unsolicited proposals.
15-3.406 Letter contract.

* * * * *

2. 41 CFR 15-3.405-3 is revised as follows:

§ 15-3.405-3 Cost sharing contract.

This section prescribes the conditions under which cost sharing contracts are to be used. As defined in the Federal procurement regulations, a cost sharing contract is a cost-reimbursement type contract under which the contractor receives no fee but is reimbursed only for an agreed portion of its allowable costs. However, the principles set forth in this section are considered to apply equally to fixed-price contracts where the contractor agrees, or is required by statute, to bear a portion of the cost of performance.

3. 41 CFR 15-3.405-3-50 is revised as follows:

§ 15-3.405-3-50 Basic guidelines.

Cost sharing with non-Federal organizations shall be encouraged where the parties have considerable mutual interest in the basic or applied research subject matter of the contract. This mutual interest can occur, for example, when it is probable that the contractor will receive significant future benefits from the research such as increased technical knowledge useful in future operations, additional technical or scientific expertise or training for its personnel, opportunity to benefit through patent rights, and the use of background knowledge in future production contracts.

4. 41 CFR 15-3.405-3-51 is revised as follows:

§ 15-3.405-3-51 Unsolicited proposals.

The Department of Housing and Urban Development-Independent Agencies Appropriation Act contains a requirement that none of the funds provided in the Act may be used for payment through grants or contracts to recipients that do not share in the cost of conducting research resulting from proposals that are not specifically solicited by the Government. Accordingly, contracts which result from unsolicited proposals shall provide for the contractor to bear a portion of the cost of performance. However, where there is no measurable gain to the performing organization, there is no mutuality of interest, and therefore, no means by which the extent of cost sharing may reflect a mutuality of interest.

§ 15-3.405-3-52 [Removed]

5. 41 CFR 15-3.405-3-52 is removed.

[FR Doc. 81-37109 Filed 12-30-81; 8:45 am]

BILLING CODE 6560-38-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 405

Medicare Program; Determination of Reasonable Charges

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Interim final rule with a comment period.

SUMMARY: This final rule implements section 946 of the Omnibus Reconciliation Act of 1980 by amending our regulations concerning the payment of reasonable charges for services furnished under Part B of the Medicare program.

Section 946 specifies that payment for medical or other health care services will be determined on the basis of the customary and prevailing charge screens in effect at the time the services are furnished. (Current regulations provide that payment will be determined on the basis of the screens in effect at the time a claim is submitted or a request for payment is made.)

The statute also requires that, when services are furnished more than twelve months before the fee screen year (July 1–June 30) in which the claim is submitted, payment will be based on the customary and prevailing charge screens in effect for the fee screen year immediately preceding the one in which the claim is submitted. Thus, we will not go back further than the immediately preceding fee screen year to determine reasonable charges for claims filed after long delays.

EFFECTIVE DATE: Effective for bills submitted or requests for payment made on or after July 1, 1981.

Comment date: Although we are issuing this as a final rule for reasons stated in the Supplementary Information, we will consider any comments mailed by: March 1, 1982.

ADDRESS: Address comments in writing to: Administrator, Department of Health and Human Services, Health Care Financing Administration, P.O. Box 17073, Baltimore, Maryland 21235.

If you prefer, you may deliver your comments to Room 309–G, Hubert H. Humphrey Building, 200 Independence Ave., S.W., Washington, D.C., or to Room 789, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to BPP–137–FC. Agencies and organizations are requested to submit comments in duplicate.

Comments will be available for public inspection, beginning approximately two weeks after publication, in Room 309–G of the Department's office at 200 Independence Ave., S.W., Washington, D.C., 20201 on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (202–245–7890).

Because of the large number of comments we receive, we cannot acknowledge or respond to them individually. However, if as a result of comments we believe that changes are needed in these regulations, we will publish the changes in the **Federal Register** and respond to the comments in the preamble of that document.

FOR FURTHER INFORMATION CONTACT: Paul Riesel (301) 597–1843.

SUPPLEMENTARY INFORMATION: The Supplementary Medical Insurance program, Part B of Medicare, pays for a variety of medical and related health services, such as physicians' services, certain types of outpatient services, and medical supplies and equipment.

Section 1842(b)(3) of the Social Security Act (42 U.S.C. 1395u(b)(3)) provides that, where payment for services furnished under Part B is on a charge basis (as opposed to cost), the charge will be reasonable (and not higher than the charge applicable for a comparable service and under comparable circumstances to the policyholders and subscribers of the carrier). The statute further specifies that the carrier, in determining reasonable charges, shall take into consideration the customary charges for similar services generally made by the physician or other person furnishing the services, and the prevailing charges for similar services in the locality. The law provides that (1) The carrier's prevailing charge calculations for a fee screen year (July 1–June 30 of each year) may not exceed the 75th percentile of the customary charges made for services in the preceding calendar year (for example, the carrier's calculations of prevailing charges for the period July 1, 1980–June 30, 1981 are based on charges made for services during calendar year 1979), and (2) increases above fiscal year 1973 levels in prevailing charges for physicians' services can be recognized for Medicare reimbursement purposes only to the extent they are justified by economic index data. The economic index is calculated on the basis of changes in physicians' costs of practice and in general earnings levels, and is published in the **Federal Register** usually by July 1 of each year.

In order to receive reimbursement, the statute (section 1842(b)(3)(B)) requires beneficiaries or physicians and suppliers to submit an itemized bill, or some other written request for payment that is permitted under the regulations. Currently, payment is determined on the basis of the customary and prevailing charge screens in effect at the time the bill is submitted or the request for payment is made, not when the service was actually furnished. This situation can result in an inequity, because bills received by carriers after the charge levels are updated are paid at a higher rate than those submitted before the updating, even if the services in both instances were performed on the same day.

To reduce this inequity, section 946 of Pub. L. 96–499 (Omnibus Reconciliation Act of 1980) was enacted (see Congressional Record, p. S8247, June 26, 1980, regarding section 567 of S. 2885, for discussion of Congressional concern). This new provision amended section 1842(b)(3) to provide that payment for services furnished under Part B will be determined on the basis of customary and prevailing charge screens in effect at the time the service is actually furnished, rather than being based on the date of submittal of the bill or request for payment. The amendment also provides, however, that, if the service was furnished more than 12 months before the fee screen year in which the bill or request is submitted, payment will be made on the basis of the customary and prevailing charge screens in effect during the fee screen year that ended just before the fee screen year in which the bill or request for payment was submitted. For example, if a service is furnished on October 1, 1981, (during the July 1, 1981–June 30, 1982 fee screen year) but a bill is not submitted until August 1983 (during the fee screen year July 1983–June 1984), payment would be based on charge screens in effect during the period July 1, 1982–June 30, 1983, rather than when the service was furnished.

By enacting this legislation, the Congress has removed a financial incentive for beneficiaries, physicians and suppliers to delay filing claims, but also avoided unduly penalizing those who, for various reasons, submit claims much later than the date when the service was furnished.

We are revising the regulations at 42 CFR 405.501 and 405.504 to conform them to the requirements contained in the statutory amendments.

Waiver of Notice of Proposed Rulemaking

We are issuing these amendments to the regulations in final, rather than as proposed, because the statute is so

specific as to leave no room for discretion and because it provided an effective date of July 1, 1981. In view of the statutory requirements, we find that it would be impractical, unnecessary and contrary to the public interest to delay publication of final rules in order to allow a period of public comment. For these reasons, we find that good cause exists to waive proposed rulemaking procedures. For the same reasons, we find good cause to make the regulations effective July 1, 1981, rather than to provide the usual 30-day delayed effective date.

Executive Order 12291

Executive Order 12291, "Federal Regulation", issued February 19, 1981, requires Federal agencies to prepare a Regulatory Impact Analysis for any rule that "is likely to result" in an annual effect on the economy of $100 million or more (or meets certain other criteria). Actuarial estimates prepared in connection with the pending legislation indicate that there will be savings of $173 million in Fiscal Year 1981 and greater amounts (ranging from $226 million to $279 million) in subsequent years, through 1985. This impact exceeds the benchmark figure specified in the Executive Order, and therefore would normally require an impact analysis describing alternative policy proposals. Since section 946(c) of Pub. L. 96-499 provides that the amendment "shall become effective with respect to bills submitted or requests for payment made on or after July 1, 1981", the Office of Management and Budget has granted a waiver from the requirement to conduct a regulatory impact analysis.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 requires Federal agencies to prepare a Regulatory Flexibility Analysis for regulations which will have a "significant economic impact on a substantial number of small entities". For the reasons given in the Executive Order certification, we certify that a Regulatory Flexibility Analysis is not required. In addition, even if these impacts were the result of this regulation, we do not have any discretion in implementing the provisions of the statute, and the overall impact will be spread over approximately 300,000 providers.

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

42 CFR Part 405, Subpart E is amended as follows:

1. The authority citation for Part 405, Subpart E reads as follows:

Authority: Sections 1102, 1814(b), 1833(a), 1842(b), and 1871, 49 Stat. 647, as amended, 79 Stat. 286; 79 Stat. 302, 79 Stat. 310, 79 Stat. 331; 42 U.S.C. 1302, 1395f(b), 1395l(a), 1395u(b), and 1395hh.

2. 42 CFR 405.501 is revised to read as follows:

§ 405.501 Determination of reasonable charges.

(a) Except as specified in paragraph (b) of this section, Medicare pays no more for Part B medical and other health services than the "reasonable charge" for such service. The reasonable charge is determined by the carriers (subject to any deductible and coinsurance amounts as specified in § 405.240 and § 405.245).

(b) Part B of Medicare pays on the basis of "reasonable cost" (see Subpart D of this part) for certain institutional services, certain services furnished under arrangements with institutions, and services furnished by entities that elect to be paid on a cost basis (including health maintenance organizations, rural health clinics, and end-stage renal disease facilities).

(c) Carriers will determine the reasonable charge on the basis of the criteria specified in § 405.502, and the customary and prevailing charge screens in effect when the service was furnished. (Also see §§ 405.480 through 405.488, which pertains to determination of reimbursement for services performed by hospital-based physicians.) However, when services are furnished more than 12 months before the beginning of the fee screen year (July 1 through June 30) in which a request for payment is made, payment will be based on the customary and prevailing charge screens in effect for the fee screen year that ends just before the fee screen year in which the claim or request for payment is made.

3. In § 405.504, paragraph (a)(2) is revised to read as follows:

§ 405.504 Determining prevailing charges.

(a) Range of charges.

* * * * *

(2) No charge for Part B medical or other health services may be considered to be reasonable if it exceeds the higher of:

(i) The prevailing charge for similar services in the same locality in effect on December 31, 1970, provided such prevailing charge had been found acceptable by HCFA; or

(ii) The prevailing charge that, on the basis of statistical data and methodology acceptable to HCFA, would cover:

(A) 75 percent of the customary charges made for similar services in the same locality during the calendar year preceding the fee screen year (July 1 through June 30) in which the service was furnished; or (B) In the case of services furnished more than 12 months before the beginning of the fee screen year in which the claim or request for payment is submitted, 75 percent of the customary charges made for similar services in the same locality during the calendar year preceding the fee screen year that ends just before the fee screen year in which the claim or request for payment is submitted.

BILLING CODE 4120-03-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 151

[GGD 80-001]

Unmanned Barges Carrying Certain Bulk Dangerous Cargoes

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: In the interest of safety, the Coast Guard reviews all chemicals proposed for bulk shipment by water. All cargoes classified as dangerous are regulated. Since the original regulations were written, many cargoes have been accepted for bulk carriage under interim guidelines. This final rule updates Part 151 and incorporates modifications resulting from receiving additional information, experience, and public comments.

EFFECTIVE DATES: February 1, 1982. To alleviate hardship in those cases where more stringent carriage requirements are being imposed, the effective date is December 31, 1982 to permit a gradual phasing-in of the more stringent requirements.

FOR FURTHER INFORMATION CONTACT: Joseph J. Jakabcin, Office of Merchant Marine Safety (G-MHM-3), Room 1402, U.S. Coast Guard Headquarters, 2100

Second Street SW, Washington, D.C. 20593, (202–426–6260).

SUPPLEMENTARY INFORMATION: On July 3, 1980 (45 FR 45327), the Coast Guard published a notice of proposed rulemaking. Interested persons were given a deadline of August 18, 1980 for submission of written comments. A public hearing was to be scheduled if requested by anyone raising a genuine issue. No request for a public hearing has been received. However, we received three requests for an extension of the comment deadline. An extension until September 19, 1980 was granted on August 25, 1980 (45 FR 56376). Approximately thirty comments were submitted.

Two comments recommended that no changes be made in the minimum requirements. As discussed below in the explanation of individual changes, some changes are necessary.

Another comment suggests that Creosote, Perchloroethylene and Trichloroethylene should not be in Subchapter O. We base every classification on all the information available to us at the time of classification. However, if subsequent evidence indicates that a change is in order, such a change is made. Creosote, for example, is more toxic than realized when initially classified under Subchapter D. Creosote, already in Subchapter O for self-propelled vessels, 46 CFR Part 153, can produce severe neurological disturbances. Considerable evidence has been gathered by the U.S. Department of Health and Human Services and the Department of Labor indicating that both Perchloroethylene and Trichloroethylene are toxic and potential carcinogens. Therefore, these three chemicals have the same minimum requirements in this final rule as were given in the proposed rule.

The special requirements for Ethylidene Norbornene were inadvertently expanded to § 151.50–5; this is being corrected to § 151.50–5(g) and (h) by modifying 151.50–74.

Another comment indicates the need for a higher level of venting and gauging requirements for suspected carcinogens. We agree. Unfortunately, another legal document will be required since the indicated cargoes, except for Benzene Mixtures, are not included in this final rule. The gauging for Benzene Mixtures is being changed to restricted. The change to restricted gauging for Benzene itself will be made in the near future.

Several comments concern the original entry of Benzene-Hydrocarbon Mixtures (containing acetylenes). For purposes of clarification, this appears as two entries in the final rule: Benzene-Hydrocarbon Mixture and Benzene-Hydrocarbon Mixtures (containing acetylenes); and a new entry is added, as requested, of Benzene, Toluene, Xylene Mixtures.

One comment suggests that since Hexamethylenediamine is normally shipped with 10–15 percent water this fact should be reflected in the regulations. Accordingly, this cargo, as used in Chapter VI of IMCO, will be shown as Hexamethylenediamine Solutions.

Another comment recommends the addition of Propylene Dichloride. It should be noted that this cargo already appears in 46 CFR 151.05 as Dichloroprpane. The inclusion of other cargoes was recommended. Unfortunately, additional data are required for proper classification of the cargoes recommended. Minimum carriage requirements will be established for any cargo not already in 46 CFR 151.05 upon request with the submission of a completed CG–4355 form for that cargo. The CG–4355 form is entitled Characteristics of Liquid Chemicals Proposed for Bulk Water Shipment.

Relative to the proposed electrical hazard group of I–B for Spent Hydrochloric Acid, one comment states that there is definitely no need for electrical equipment on or above deck to be explosion proof. We agree. The group B requirement for Spent Hydrochloric Acid is rescinded pending comprehensive addressing of electrical requirements in a forthcoming rule-making. Meanwhile, however, the title for the electrical hazard column in Table 151.05 is being corrected when necessary from ELECT HAZARD GROUP CLASS to ELECT HAZARD CLASS GROUP.

In the Hydrochloric Acid, Spent (10% or less), one comment recommends an increase to 15 percent. A review of evidence provided reveals no chemical objection. Therefore, the recommendation is being adopted to increase the limitation to "(15% or less)."

One comment suggests the requirement for protection clothing under Cresylate Spent Caustic be limited to the immediate area of the transfer equipment. The suggestion is considered reasonable and is therefore incorporated.

Methyl-tertiary-Butyl Ether has been deleted, based on a reevaluation, and has been assigned to Subchapter D, 46 CFR 30–40 (45 FR 52386).

Section 151.50–72 was inadvertently omitted from the proposed rule and is therefore added in the final rule.

The following changes in the proposed rule appear in the final rule:

1. An entry of Benzene-Hydrocarbon Mixtures (having 10 percent benzene or more) is added to Tables 151.01–10(b) and 151.05.
2. In Table 151.05, the gauging requirements for Benzene-Hydrocarbon Mixtures (containing acetylenes) is restricted instead of open; (having 10 percent benzene or more) is added after Benzene-Hydrocarbon Mixtures (containing acetylenes). Table 151.01.10(b) is modified accordingly.
3. An entry of Benzene, Toluene, Xylene Mixtures (having 10 percent benzene or more) is added to Tables 151.01–10(b) and 151.05.
4. In the entry of Butadiene, Butene Mixture (inhibited) (containing acetylene) a correction is made in the Special Requirement Section.
5. The concentration of Hydrochloric Acid, Spent (10 percent or less) is increased to (15 percent or less).
6. The electrical hazard group is deleted for the following: Hydrochloric Acid, Spent (15 percent or less); Hydrofluorosilicic Acid (25 percent or less); and Nitric Acid (70 percent or less).
7. Methyl-tertiary-Butyl Ether is deleted.
8. Polyethyleneamine is changed to Polyethylenepolyamine.
9. The concentration of Sodium Chlorate Solution is increased from 45 percent to 50 percent.
10. Part 151.50–72 is added.
11. Part 151.50–73 is modified.
12. Part 151.50–74 is modified.
13. In 151.50–76, 10 percent is changed to 15 percent.

Several changes are made to correct errors of no substantive effect.

These regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. In addition, these regulations are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–22–80). Although section 605(b) of the regulatory Flexibility Act (94 Stat. 1164) does not apply because the NPRM was published before January 1, 1981, these rules have been reviewed and it has been determined that they will not have a significant economic impact on a substantial number of small entities.

This final rule has been evaluated in accordance with DOT "Regulatory Policies and Procedures," 44 FR 11033 (February 26, 1979), as amended by 44 FR 28126 (May 14, 1979). A copy of the final evaluation may be obtained from the Commandant (G–CMC), Room 2418,

U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593; telephone (202) 426–1477.

In consideration of the foregoing, the proposed amendments in the **Federal Register** of July 3, 1980 (45 FR 45327) are adopted with some modifications as set forth below.

December 9, 1981.

Clyde T. Lusk, Jr.,

Rear Admiral, Coast Guard, Chief, Office of Merchant Marine Safety.

§ 151.05 [Amended]

3. By inserting in the footnotes of Table 151.05–1 between "Gauging devices" and "General usage":

* Padded with dry nitrogen (100 ppm or less of water)

§ 151.50–20 [Amended]

4. By inserting the following in § 151.50–20(b)(1) between Hydrochloric Acid and Phosphoric Acid: Hydrofluorosilicic Acid—50 pounds per square inch gage.

5. By adding the following new sections to Subpart 151.50 after § 151.50–65:

§ 151.50–71 Benzene-hydrocarbon mixtures (containing acetylenes).

(a) Copper, silver, mercury, or other acetylide forming metals and their alloys must not be used as materials of construction for tanks, pipelines, valves, fittings, and other items of equipment that may come in contact with the cargo liquid or vapor.

§ 151.50–72 Butadiene, Butene mixture (inhibited).

When Table 151.05 refers to this section, the following requirements must be met:

(a) 151.50–30

(b) 151.50–71(a)

§ 151.50–73 Cresylate spent caustic.

Protective clothing (eye goggles, gloves, apron, and boots) must be worn in the vicinity of the cargo transfer equipment during cargo transfer and tank gauging operations.

§ 151.50–74 Ethylidene norbornene (inhibited).

When Table 151.05 refers to this section, the following apply:

(a) 151.50–5 (g) and (h)

(b) Rubber hoses or fittings may not be used in transfer operations.

§ 151.50–75 Ferric chloride solution.

(a) A containment system (cargo tank piping system, venting system, and gauging system) carrying this solution must be lined with rubber, corrosion resistant plastic, or a material approved by the Commandant (G–MHM).

(b) Protective clothing must be worn during cargo transfer and tank gauging operation.

§ 151.50–76 Hydrochloric acid, spent (NTE 15%).

(a) (1) Gravity type cargo tanks must be designed and tested to meet the rules of the American Bureau of Shipping for a head of water at least 8 feet above the tank top or the highest level the lading may rise, whichever is greater. The plate thickness of any part of the tank may not be less than three-eighths inch. A shell plating of a barge may not be on the boundary of any part of the cargo tank.

(2) Gravity tank vents must—

(i) Terminate above the weatherdeck, clear of all obstructions and away from any from any source of ignition; and

(ii) Be fitted with a single flame screen or two fitted flame screens as described in § 151.03–25. Neither a shut-off valve nor a frangible disk may be fitted in the vent lines.

(b) Openings in the tanks are prohibited below deck, except for access openings used for inspection and maintenance of tanks, or unless otherwise specifically approved by the Commandant (G–MHM). Openings must be fitted with bolted cover plates and acid-resistant gaskets.

(c) Where special arrangements are approved by the Commandant (G–MHM) to permit a pump suction to be led from the bottom of the tank, the filling and discharge lines must be fitted with shutoff valves located above the weatherdeck or operable from it.

(d) The outage may not be less than 1 percent.

(e) An enclosed compartment containing, or a compartment adjacent to, a cargo tank—

(1) May have no electrical equipment that does not meet or exceed class I–B electrical requirements; and

(2) Must have at least one gooseneck vent of 2.5 inch diameter or greater. The structural arrangement of the compartment must provide for the free passage of air and gases to the vent or vents.

(f) No lights may be used during the cargo transfer operations, except installed electric or portable battery lights. Smoking is prohibited and the person in charge of cargo transfer shall ensure that "No Smoking" signs are displayed during cargo transfer operations.

(g) Tanks approved for the transportation of acid cargoes subject to this section may not be used for the transportation of any other commodity, except upon authorization by the Commandant (MHM).

(h) Each cargo tank must be examined internally at least once in every 4 years. If the lining of the cargo tank has deteriorated in service or is not in place, the Marine Inspector may require the tank to be tested by such nondestructive means as he may consider necessary to determine its condition.

§ 151.50–77 Hydrofluorosilicic acid (25% or less).

(a) Hydrofluorosilicic acid must be carried in gravity or pressure type cargo tanks independent of the vessel's structure. The tanks must be lined with rubber or other equally suitable material approved by the Commandant (G–MHM). See § 151.15–3(f)(2).

(b) Notwithstanding the provisions of § 151.50–20(b)(3), no compressed air may be used to discharge hydrofluorosilicic acid from gravity type cargo tanks unless—

(1) The tanks are of cylindrical shape with dished heads, and

(2) The air pressure does not exceed—

(i) The design pressure of the tank, and

(ii) 10 pounds per square inch gage.

The tanks must be fitted with pressure relief devices.

(c) During cargo tansfer, a water hose must be connected to a water supply and be ready for immediate use. Any leakage or spillage of acid must be immediately washed down. This requirement can be met by facilities provided from shore.

§ 151.50–78 Industrial wastes (containing dimethyldisulfide, methyl mercaptan, and methomyl).

(a) Protective clothing must be worn during cargo transfer and tank gauging operations.

§ 151.50–79 Methyl acetylene-propadiene mixture.

(a) The composition of the methyl acetylene-propadiene mixture at loading must be within one of the following sets of composition limits:

(1) Composition 1 is—

(i) Maximum methyl acetylene to propadiene molar ratio of 3 to 1;

(ii) Maximum combined concentration of methyl acetylene and propadiene of 65 mole percent;

(ii) Minimum combined concentration of propane, butane, and isobutane of 24 mole percent, of which at least one-third (on a molar basis) must be butanes and one-third propane; and

(iv) Maximum combined concentration of propylene and butadiene of 10 mole percent.

(2) Composition 2 is—

(i) Maximum methyl acetylene and propadiene combined concentration of 30 mole percent;

(ii) Maximum methyl acetylene concentration of 20 mole percent;

(iii) Maximum propadiene concentration of 20 mole percent;

(iv) Maximum propylene concentration of 45 mole percent;

(v) Maximum butadiene and butylenes combined concentration of 2 mole percent;

(vi) Minimum saturated C_4 hydrocarbon concentration of 4 mole percent; and

(vii) Minimum propane concentration of 25 mole percent.

(b) A barge carrying a methyl acetylene-propadiene mixture must have a refrigeration system that does not compress the cargo vapor or have a refrigeration system with the following features:

(1) A vapor compressor that does not raise the temperature and pressure of the vapor above 60°C (140°F) and 1.72 MPa guage (250 psig) during its operations, and that does not allow vapor to stagnate in the compressor while it continues to run.

(2) At the discharge piping from each compressor stage or each cylinder in the same stage of a reciprocating compressor—

(i) Two temperature actuated shutdown switches set to operate at 60°C (140°F) or less;

(ii) A pressure actuated shutdown switch set to operate at 1.72 MPa gauge (250 psig) or less; and

(iii) A safety relief valve set to relieve at 1.77 MPa gauge (256 psig) or less anywhere except into the compressor suction line.

(c) The piping system, including the cargo refrigeration system, for tanks to be loaded with methyl acetylene-propadiene mixture must be completely separate from piping and refrigeration systems for other tanks. If the piping system for the tanks to be loaded with methyl acetylene-propadiene mixture is not independent, the required piping separation must be accomplished by the removal of spool pieces, valves or other pipe sections and the installation of blank flanges at these locations. The required separation applies to all liquid and vapor piping, liquid and vapor vent lines and any other possible connections, such as common inert gas supply lines.

§ 151.50–80 Nitric acid (70% or less).

(a) Tanks, cargo piping, valves, fittings, and flanges (where exposed to the acid) must be lined with nitric acid resistant rubber or fabricated from nitric acid resistant stainless steel.

(b) During cargo transfer, a water hose must be connected to a water supply, ready for immediate use. Any leakage or spillage of acid must be immediately washed down. This requirement can be met by facilities provided from shore.

(c) Nitric acid contaminated by other chemicals, oils, solvents, etc. may not be transported in bulk without an authorization from the Commandant (G–MHM).

§ 151.50–81 1- or 2-Nitropropane.

(a) Must not be carried in a tank equipped with heating coils unless the heating supply to the coils is disconnected.

(b) Must not be carried in a tank adjacent to another tank containing an elevated temperature cargo.

(c) Must not be carried in a deck tank.

§ 151.50–82 Polyvinylbenzyltrimethyl ammonium chloride solution.

(a) Persons involved with cargo transfer operations shall wear protective clothing.

§ 151.50–83 Sodium sulfide, hydrosulfide solutions.

(a) Protective clothing must be worn during cargo transfer operations.

§ 151.50–84 Sulfur dioxide.

(a) Sulfur dioxide that is transported under the provisions of this part may not contain more than 100 ppm of water.

(b) Cargo piping must be at least Schedule 40 pipe.

(c) Flanges must be 150 lb. A.N.S.I. Standard minimum with tongue and groove or raised face.

(d) A cargo tank must—

(1) Meet the requirements of a Class I welded pressure vessel;

(2) Be designed for a maximum allowable working pressure of at least 125 psig;

(3) Be hydrostatically tested every two years to at least 188 psig;

(4) Be provided with one or more manholes that are fitted with a cover sized not less than 15 inches by 23 inches or 13 inches nominal diameter, located above the maximum liquid level, and as close as possible to the top of the tank;

(5) Have no openings other than those required in paragraph (d)(4) of this section;

(6) Have no liquid level gauges other than closed or indirect gauges;

(7) Have all valves and the closed gauge that is required by Table 151.05 bolted to the cover or covers that are required in paragraph (d)(4) of this section;

(8) Have a metal housing that is fitted with a drain and vent connection protecting all valves and the closed gauge within this housing against mechanical damage;

(9) Have all safety relief valves discharging into the protective housing;

(10) Not be intercommected with another cargo tank by piping or manifold that carriers cargo liquid, except vapor lines connected to a common header, and

(11) Have an excess flow valve that is located on the inside of the tank for every liquid and vapor connection, except the safety relief valve;

(12) Have no bypss opening on any excess flow valve.

(e) Cargo transfer operations—

(1) May not be conducted with more than one cargo tank at a time unles each tank is filled from or discharged to shore tanks through separate lines;

(2) Must be conducted with connections between fixed barge piping and shore piping of either Schedule 40 pipe having flexible metallic joints that meet § 151.04–5(h) or of flexible metallic hose that is acceptable to the Commandant (G–MHM);

(3) From barge to shore must be by pressurization with an oil free, non-reactive gas that has a maximum of 100 ppm moisture;

(4) Must be conducted with vapor return to shore connections that ensure that all vapor is returned to shore; and

(5) Must be conducted with every person on the barge carrying a respiratory protective device that protects the wearer against sulfur dioxide vapors and provides respiratory protection for emergency escape from a contaminated area that results from cargo leakage.

(f) Respiratory protective equipment must be of a size and weight that allows unrestricted movement and wearing of a lifesaving device.

(g) After the completion of cargo transfer, all liquid sulfur dioxide in the cargo piping must be removed and cargo transfer piping must be disconnected at the cargo tanks. After the cargo piping is disconnected, both ends of the line must be plugged or fitted with blind flanges.

§ 151.50–85 1,2,3-Trichloropropane.

(a) Aluminum may not be used as a material of construction for tanks, pipelines, valves, fittings, and other items of equipment that may come in contact with the cargo liquid or vapor.

(b) Protective clothing (goggles, gloves, boots, and apron) must be worn by persons involvd in cargo transfer operations.

Vessel Equipment Specifications; Pilot Hoist, Pilot Ladder, and Chain Ladder

AGENCY: Coast Guard, DOT.

ACTION: Final rules.

SUMMARY: These regulations contain a new Coast Guard specification for pilot hoists and revised specifications for pilot ladders and chain ladders. The pilot ladder specification incorporates the standards for pilot ladders contained in the International Convention for the Safety of Life at Sea, 1974, which came into force on May 25, 1980. The pilot hoist specification incorporates standards for pilot hoists adopted by the Inter-Governmental Maritime Consultative Organization in 1973. The chain ladder specification includes modifications that will allow manufacturers more flexibility in designing equipment. The principal effect of these regulations will be to provide for greater safety and security of pilots and other persons who board vessels away from a dock.

DATES: (a) *Effective date:* These amendments become effective on February 1, 1982.

(b) *Closing date for comments:* As explained more fully below, comments on these rules may be submitted on or before March 31, 1982.

ADDRESSES: (a) Comments should be mailed to the Commandant (G–CMC/24) (CGD 74–140), U.S. Coast Guard, Washington, DC 20593. Between 7 a.m. and 5 p.m., Monday through Thursday (except holidays), comments may be delivered to, and are available for inspection and copying at the Marine Safety Council (G–CMC/24), Room 2418, U.S. Coast Guard Headquarters, 2100 Second St., SW, Washington, DC.

(b) Copies of ASTM D 1435 which is incorporated by reference into Subpart 163.003, can be obtained from the American Society for Testing and Materials, 1916 Race St., Philadelphia, PA 19103. It is also available for inspection at the Office of the Federal Register Information Center, Room 8301, 1100 L Street, NW, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Markle, Office of Merchant Marine Safety (G–MMT–3/12), Department of Transportation, U.S. Coast Guard Headquarters, Washington, DC 20593, (202) 426–1444.

SUPPLEMENTARY INFORMATION: On July 23, 1979, the Coast Guard published a notice of proposed rulemaking (NPRM) in the **Federal Register** that proposed a new pilot hoist approval specification and revised specifications for pilot ladders and chain ladders (44 FR 43016). The comment period was extended to October 22, 1979, in response to a request by the American Pilots' Association. Notice of the extension was published in the **Federal Register** of September 13, 1979 (44 FR 53184).

A total of 136 comments were received from 20 parties on the NPRM before the comment period closed on October 22, 1979. Commenters included pilots and pilot organizations, vessel operators, and equipment manufacturers. These comments are discussed in subsequent paragraphs.

The final rules contain various changes that have been made in response to comments and on the basis of further analysis of the proposed rules within the Coast Guard. Commenters who recommended changes generally provided sufficient supporting rationale for the Coast Guard to reach informed decisions on whether the changes are needed and workable. None of the changes will significantly increase the cost of equipment or approval testing, and they will provide a greater measure of safety to users of the equipment.

Although a public comment period has already been provided in this rule making, an additional opportunity for comment, principally on the changes made, is being provided to assure that the rules as revised represent workable and reasonable procedures and requirements. Accordingly, persons wishing to comment may do so by submitting comments to the address listed in the ADDRESSES section. Commenters should include their names and addresses, identify this rule making (CGD 74–140) and the specific section of the regulations to which their comments apply, and give reasons for the comments. Persons desiring acknowledgment of their comments should enclose a self-addressed post card or envelope. Based upon comments received, the regulations may be further revised or additional regulations may be issued. All comments received before the expiration of the comment period will be considered.

Some comments have not been specifically addressed in the discussion of comments that follows. These comments generally fall into one of the following categories:

(a) Comments that resulted in minor revisions or clarifications to the final rules.

(b) Comments that were not relevant to the proposed regulations.

(c) Comments that recommended addition of requirements already in the proposed regulations.

(d) Comments that apply to the installation, maintenance and inspection of pilot ladders, accommodation ladders, chain ladders and pilot hoists on vessels. The Coast Guard is currently preparing proposed regulations governing these matters, and the comments will be considered in that rule making. Its docket number is CGD 79–032.

(e) Comments making recommendations that would result in overregulation. (For example, some commenters recommended requiring features of a specific manufacturer's equipment that would accomplish a purpose already accomplished by other regulations in this rule making.)

(f) Comments that recommended changes without providing supporting reasons, and for which no sound reasons could otherwise be established.

Summary of Final Evaluation

A Final Evaluation has been prepared for these regulations in accordance with the Department of Transportation's Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of May 22, 1980). That order requires that the evaluation quantify, to the maximum extent practicable, the estimated cost of the regulations to the private sector, consumers, and Federal, State and local governments, as well as the anticipated benefits and impact of the regulations.

This rule making is expected to result in an initial cost of about $165,750 to obtain approval of equipment, and a recurring annual cost of about $49,375 for production testing and increased equipment cost. These costs will be imposed directly on manufacturers of pilot hoists, pilot ladders, and chain ladders. The manufacturers, in all probability, will pass the costs through to the ultimate consumers of this equipment in the form of price increases.

There are seven pilot ladder and chain ladder manufacturers and eight known manufacturers of pilot hoists. Equipment approval cost per manufacturer of pilot ladders would be approximately $6,750, and approximately $17,590 for each pilot hoist manufacturer. Annual recurring costs per manufacturer would average between $2,000 and $2,500. No objections have been received in this rule making concerning the costs involved with the regulations and none of the regulations should hinder or restrict manufacturers in building equipment or obtaining certificates of approval.

The Coast Guard will administer the regulations within existing resources. Coast Guard inspectors are no longer performing the approval and production tests required for this equipment. A program to transfer this function to independent laboratories was established under a separate rule making published in the **Federal Register** on December 17, 1979 (44 FR 73038).

The primary benefit identified for this rule making is the increased safety for pilots and other users of the equipment.

The Final Evaluation has been included in the public docket for this rule making, and may be obtained from the Marine Safety Council at the address listed in the "ADDRESSES" section of this preamble.

On the basis of the information contained in the final evaluation, the Coast Guard has determined that these regulations are not major rules under Executive Order 12291 of February 17, 1981. Also, it is certified that these regulations will not have a significant impact on a substantial number of small entities for the purposes of the Regulatory Flexibility Act (Pub. L. 96-354).

Drafting Information

The principal persons involved in drafting these regulations are: Mr. Robert Markle, Office of Merchant Marine Safety, and Mr. William Register, Office of the Chief Counsel.

Discussion of the Regulations

a. *General.*

1. These regulations revise the existing specifications for pilot ladders and chain ladders and add a new specification for pilot hoists. Pilot hoists and pilot ladders are items of vessel equipment used in routine boarding of pilots and other personnel when the vessel is away from the dock. Chain ladders are items of lifesaving equipment that are intended for emergency use in boarding lifeboats and liferafts. The requirements for pilot ladders and chain ladders were in Subpart 160.017 of Title 46. However, in the amendments published here, the requirements for pilot ladders and the new requirements for pilot hoists have been placed in Subparts 163.003 and 163.002 respectively. The requirements for chain ladders have been retained in Subpart 160.017. A detailed description of the amendments was provided in the NPRM but is not repeated here in order to minimize publishing costs.

2. The specification for pilot ladders is based primarily on Chapter V, Regulation 17 of the Safety of Life at Sea Convention, 1974 (SOLAS 1974) and on the comments that were received on the notice of proposed rule making. Until SOLAS 1974 came into force on May 25, 1980, the requirements of Chapter V, Regulation 17 were Recommendation A.283 (VIII) of the Inter-Governmental Maritime Consultative Organization (IMCO). The specification for pilot hoists is based primarily on Resolution A.275 (VIII) adopted by IMCO in 1973. The Coast Guard actively participated in developing this resolution and Resolution A.283 (VIII).

3. The notice of proposed rule making contained detailed procedures for approval and production testing. These procedures have been deleted in the final rules and replaced with a cross reference to the approval procedures in 46 CFR Part 159. The procedures in Part 159 are essentially the same as corresponding procedures proposed in the NPRM. Part 159 was published in the Federal Register of December 17, 1979 (44 FR 73038).

4. A number of changes have been made in each of the specification regulations which are intended to remove unnecessary detail requirements in order to remove barriers to innovative design. New §§ 160.017-9(c) (chain ladder) and 160.003-9(c) (pilot ladder) contain a discussion on the approval of alternative designs. These sections are similar to § 163.002-9(c) (pilot hoists) which was in the NPRM. Other changes were made to replace design requirements with performance requirements. These are noted in the following discussion of changes to each of the specifications.

5. Section 163.003-3 of these regulations incorporates by reference the American Society for Testing and Materials' "Standard Recommended Practice for Outdoor Weathering of Plastics." The number of the standard is ASTM D 1435, published in 1975 and reapproved in 1979. The standard may be purchased from ASTM at the address listed under **ADDRESSES.** Approval to incorporate this standard by reference was obtained from the Director of the Federal Register on January 13, 1981. The standard is incorporated as it exists on the date of approval, and notice of any future changes that are incorporated will be published in the Federal Register.

Discussion of Changes to the Proposed Regulations

a. *Chain Ladders.*

1. *Section 160.017-11(a).* This paragraph required single-loop, weldless, lock-link pattern chain, trade number 7-0 or larger. This design requirement was replaced with a requirement for non-kinking chain with a minimum breaking strength of at least 16 kN (3,560 lb.) (the equivalent strength of trade 7-0 single-loop, weldless, lock-link chain). Although at the present time there is no other commonly available chain known to be suitable for this application, the change in the requirement does provide both ladder and chain manufacturers with a degree of design flexibility.

2. *Sections 160.017-11(b) and -13(h).* One commenter recommended that stainless steel bolts be required and that galvanized steel bolts be prohibited. The commenter pointed out that the bolts would have to be peened over the nuts and that this would lead to damage of the zinc coating on the end of the galvanized bolts, so that they would eventually rust. Section 160.017-11(b) has been revised to require that the peened over ends of galvanized bolts be given an additional corrosion resisting treatment after peening.

3. *Section 160.017-11(d).* The details on the type of water repellant wood preservative and method of application have been removed.

4. *Section 160.017-11(e)* The dimensional details of the lashing ring have been deleted (with the exception of the inside diameter) and have been replaced with a requirement that the lashing ring be of the same minimum strength as the chain.

5. *Section 160.017-13(a).* The figure that identified the detail parts of the ladder has been deleted.

6. *Sections 160.017-13(b) and 163.003-13(b)(5).*

(a) The requirement that the suspension member be a continuous length of chain has been deleted from § 160.017-13(b). The strength requirements in § 160.017-11(a), as well as the ladder strength tests, are sufficient to determine that there are no "weak links" in the ladder suspension members.

(b) One commenter recommended that a small line of considerable strength be interlaced through the chain for additional strength. This recommendation has not been adopted. The requirements for chain are the same as those in existing ladder designs currently approved by the Coast Guard. Existing ladders have been shown through use over many years to be of sufficient strength for their intended use.

(c) Another commenter made a recommendation for pilot ladders that was considered to be relevant for chain ladders as well. The comment was that a maximum distance between suspension members of 480 mm (19 in.) should be specified, because the 400 mm (16 in.) minimum spacing without a specified maximum would allow the production of steps that could be too wide to use safely. The 480 mm (19 in.) maximum distance is the same as that required on all chain ladders approved by the Coast Guard up to this time, and these ladders have been used satisfactorily in service. A wider distance could place the suspension members at a position wider than the

shoulders of most persons, which would make using the ladder awkward. A 480 mm (19 in.) maximum distance between suspension members has been added to § 160.017–13(b) and § 163.003–13(b)(5).

7. *Sections 160.017–13(c) and –13(d).* These paragraphs replace §§ 160.017–13(c), –13(d), –13(e), –13(f), and –13(g) in the NPRM that described the attachment of the lashing rings to the top and bottom of the suspension members in detail. Since these lashing rings are part of the suspension members which have an overall strength requirement, as well as a strength test, these details were found to be unnecessary.

8. *Section 160.017–13(e).* The reasons for the detail requirements in this paragraph have been added. The purpose of the addition is to provide ladder designers with a performance requirement which must be met if an alternate design is proposed.

9. *Section 160.017–13(f).* The reasons for the detail requirements for rungs have been added wherever detail requirements remain. The requirement for each edge of a rung to be rounded or chamfered has been deleted since this is adequately covered in § 160.017–13(i). The requirement for each rung to be attached to the spacer ear by a clip has been deleted since there are a number of ways that rungs could be successfully attached.

10. *Section 160.017–13(g).* The requirement for each spacer ear to have a smooth finish with rounded or chamfered edges has been deleted since this is adequately covered in § 160.017–13(i). Section 160.017–13(g)(4) has been revised to delete specific requirements for ribs, flanges, and stress relief holes, and instead the ear is required to be designed to prevent its tearing or bending. The details are listed as examples of the ways that this can be accomplished.

11. *Section 160.017–13(h).* The details in this paragraph have been replaced with a performance requirement for fastening devices to have a means to prevent their loosening.

12. *Sections 160.017–25 and –27.* To comply with § 160.017–25, each manufacturer of an approved chain ladder must begin marking ladder steps constructed after the effective date of these regulations. Each manufacturer will also have to make arrangements to have production tests conducted by or under supervision of an independent laboratory. This procedure is required under § 160.027–27.

b. *Pilot Hoist*

13. One commenter objected to the various sections of the proposed regulations that included provisions in addition to those in IMCO Resolution A.275 (VIII). The IMCO Resolution provides a good starting point for pilot hoist requirements, but additional provisions have also been included in the specification to provide an additional margin of safety for users. This possibility was forseen by the IMCO Lifesaving Appliances Subcommittee which developed the Resolution. At its sixth session in 1973, the Subcommittee declined to develop detailed regulations for pilot hoists to be incorporated into SOLAS 1974 because of continuing developments in mechanical pilot-hoists, the variety of designs available, and the desire not to inhibit further development.

14. *Section 163.002–11(a) and –11(d).* The reason for the material requirement has been added to each of these paragraphs. The purpose of the additions is to provide pilot hoist designers with a performance requirement which must be met if an alternate design is proposed.

15. *Section 163.002–11(b).* The requirement for each suspension cable to be at least 4.5 mm (3/16 in.) in diameter has been deleted. The strength tests make sure that these cables are of adequate size.

16. *Section 163.002–13(h).* One commenter recommended that air-powered portable pilot hoists be allowed to use a simple air disconnect instead of a deck interlock. This recommendation has not been adopted. A simple air disconnect would not pevent the hoist from operating when improperly installed. An interlock for an air-powered hoist does not have to be especially complex or costly. It simply requires an air valve that is always closed, except when held open by a part of the device that secures the pilot hoist to the deck.

17. *Sections 163.002–13(k) and –17(c).* One commenter noted that past problems with pilot hoists included insufficient air pressure and wet and frozen air lines. Section 163.002–13(k) in both the NPRM and the final rules requires pilot hoists to have a pressure gauge, air filter and regulator, oil lubricator, and water trap which should prevent these problems. In line with the commenter's concern, however, § 163.002–17(c) has been added in the final rules to require each gauge on a pilot hoist to be marked with normal operating ranges.

18. *Section 163.002–13(p).* One commenter questioned the need for the hand operated device to be operable from the standing position, rather than from a kneeling position, because of the cost required to redesign some existing hoists. Redesigning costs should not be expensive. In all probability, the only design change needed will be to reposition the shaft of the device so that the operator can stand rather than kneel to use it. The purpose of this requirement is to allow a person to operate the hand crank safely and efficiently. Operating the crank from a kneeling position would be difficult and would not allow the operator to concentrate attention on movement of the ladder or lift platform.

19. *Section 163.002–13(r).* This paragraph has been expanded so that the reason for requiring worm gears to operate in an oil bath is included. Sliding contact gears, such as worm gears, are subject to accelerated wear unless provided with ample lubrication. Alternate means of lubricating the gear teeth on each revolution are also permitted.

20. *Section 163.002–13(s).* Several unnecessary detail requirements on the design of inspection ports and provisions for drainage have been deleted from this paragraph.

21. *Section 163.002–13(t).* Two commenters stated that designing a hoist with two cables arranged so that the ladder or lift platform would remain level and stationary if one cable brakes is difficult to accomplish. At least one pilot hoist manufacturer has produced such a device. It has cables that lead from the winch drum down to the rigid ladder, through a sheave on either side, and back up to an anchor point on the hoist unit on deck.

22. *Section 163.002–13(u) and –21(c)(11).*

(a) Two commenters recommended that something be done to prevent hoist cables from jumping off sheaves and jamming. Section 163.002–13(u) has been revised in accordance with this recommendation to require a device on each sheave that prevents the cable from jumping out of the sheave groove.

(b) Two commenters recommended that a level winding mechanism be required for the winch drum of a hoist. Section 163.002–13(u), as proposed, required that winch drums be designed to accept one level wind of wrap and the test in proposed § 163.002–21(c)(11) required the cable to wind onto the drum in one level wind. This may be accomplished with or without a level winding device. Accordingly, this recommendation has not been adopted. However, the test in § 163.002–21(c)(11) has been revised in the final rules to provide a more thorough check for reliability of level wrap winding. As proposed, the test was run once with the full working load on the hoist, and again with the weight of only the rigid ladder or lift platform on the hoist. The test, as

revised, requires ten repetitions under both conditions. This should reveal any cable designs that, on occasion, will fail to wind in a level wrap.

23. *Section 163.002–13(w) and –21(c)(12).* Section 163.002–13(w) has been revised to prohibit the use of adhesive sheets as a means for providing the non-skid stepping surface required by that section. An example of how the requirement can be met has been added. Also, a test has been added in § 163.002–21(c)(12) to measure the surface friction of the step. These changes were made in response to a comment on pilot ladders and are more fully discussed in paragraph 40 below.

24. *Section 163.002–13(w) and –13(z)(1).* Three comments on the proposed pilot ladder requirements recommended that the distance from the top of one step to the top of the next should be 13⅛ in. instead of the range of 300 mm (12 in.) to 380 mm (15 in.). Section 163.002–13(w) has been revised in accordance with this comment to require a step spacing of between 300 mm (12 in.) and 350 mm (13¾ in.). This comment and the revisions are discussed in paragraph 25 below. Another commenter recommended that the distance from the top step of the pilot ladder under the pilot hoist ladder or lift platform to the top of the bottom step of the rigid ladder or the surface of the lift platform should be the same as the pilot ladder step spacing instead of the wide range of 225 mm (9 in.) to 400 mm (16 in.) permitted in proposed § 163.002–13(z)(1). This section has been changed in accordance with the commenter's recommendation to require the same spacing that is required between pilot ladder steps.

25. *Section 163.003–13(z).* One commenter recommended that a chain ladder be permitted at the bottom of a pilot hoist in place of a pilot ladder. This recommendation was not adopted since a rope pilot ladder provides a better hand grip than the chain ladder.

26. *Section 163.002–13(bb).* The details listing various fasteners and locking methods have been deleted. The remaining paragraph is a performance requirement for fasteners to have a means to prevent loosening.

27. *Section 163.002–21(c)(8).* One commenter objected to the speed requirement of 1.5 m (5 ft.) per minute for the hand operated device on the pilot hoist as being cost prohibitive since existing hoists would have to be redesigned to meet the requirement. This speed requirement was proposed as one which could be reasonably met by an operator in good physical condition and that would allow recovery of a stranded ladder or lift platform in a reasonable amount of time. In the case of some present designs, if the hoist becomes disabled 9 m (30 ft.) from the deck of the vessel, it can require as much as 20 minutes to recover it. This is an unacceptable risk for a person on the ladder or lift platform in cold temperatures or in heavy seas. At a speed of 1.5 m per minute, the ladder or lift platform can be recovered in about 6 minutes.

d. *Pilot Ladder.*

28. *Section 163.003–7.* One commenter objected to the introduction of independent laboratories as unnecessary and stated that a recent production test of pilot ladders by a Coast Guard inspector required only an hour. The conversion from Coast Guard testing to independent laboratory testing is proceeding since there are no longer enough inspectors available in the Coast Guard to conduct or observe testing of all present and potential manufacturers of Coast Guard approved equipment, even though each test, taken individually, would not appear to be a great burden.

29. *Section 163.003–11(a).* Six commenters recommended that dacron "safety core" rope be permitted or required in place of manila rope. This particular rope is white dacron with an orange polypropylene rope core. The advantage of this rope is supposed to be that it provides a better gripping surface than manila and has durability properties as good or better than manila. The core of a different color indicates that the rope is severly worn when the core shows through the outer strands of the rope. Synthetic ropes in general have not been favored for pilot ladder use in the past, since some types deteriorate rapidly when exposed to the weather, and other types such as nylon stretch so much that the pilot on the end of a long ladder tends to bounce. However, dacron rope is as durable as manila and, although it stretches more than manila rope, it does not stretch nearly as much as nylon rope. Accordingly, § 163.003–11(a) has been modified to permit the use of this rope as an alternative to manila.

30. *Section 163.003–11(b).* The list of different types of defects has been removed from this paragraph to eliminate unnecessary detail.

31. *Section 163.003–11(c).* The specific types of water-repellant wood preservatives and their methods of application have been deleted from this paragraph as unnecessary design details.

32. *Section 163.003–11(e).* Four commenters recommended that all of the metal parts of the ladder be a corrosion resistant metal and that galvanized steel be prohibited. Fasteners such as bolts and nuts may have to be removed in order to replace broken steps and a galvanized coating would probably be destroyed in such an operation. However, galvanizing can be successfully used for other metal parts if applied by the hot dip process after the part is formed. Accordingly, the section has been revised to require that metal fasteners be a corrosion resistant metal, but retains the provision allowing other metal parts to be of galvanized steel.

33. *Section 163.003–13(a).*

(a) The figures that were in the NPRM identifying the detailed parts of the ladder have been eliminated as unnecessary detail.

(b) One commenter recommended that a pilot ladder be required to float, presumably so that if the ladder falls from a vessel while in use, it can also be used for flotation. This comment has not been adopted. Persons climbing pilot ladders should be wearing personal flotation devices and should not have to depend on the ladder for flotation.

(c) Three commenters recommended weight limitations for the pilot ladder. One suggested drilling holes in the step to lighten it. Two others suggested upper weight limits of 6 kg per m (4 lb./ft.). The reason for limiting the weight would be to prevent the ladder from becoming too cumbersome to handle on the vessel. The weight limitation has not been adopted since it is not directly related to the safety of persons using the ladder. A heavier ladder means more material and a more expensive ladder in general. Therefore, there is an economic incentive for the manufacturer to keep the weight low. It is believed that market forces will prevent ladders from becoming too heavy to handle on deck, and that Federal regulation in this area is unnecessary.

34. *Section 163.003–13(b)(3).* The reference to tarred marline for use in serving the ends of the suspension members has been deleted as an unnecessary design detail.

35. *Section 163.003–13(b)(4).* Six commenters recommended that metal clamps be required in place of tarred marline for securing the steps, inserts, and suspension members in place. Reasons for opposing the use of tarred marline include its tendency to loosen once it has been wet and dries, and a lowering quality of marline being produced. Section 163.003–13(b)(4) has been revised in accordance with these comments to require the use of metal clamps in lieu of tarred marline.

36. *Section 163.003–13(b)(5).* As explained in paragraph 8(c) above, this requirement has been revised to include

an upper limit of 480 mm of clear space between suspension members.

37. *Section 163.003–13(b)(6).* One commenter recommended prohibiting shackles, thimbles, or similar fittings at the bottom of the ladder to discourage the attachment of additional ladder sections. This requirement has been changed as recommended. SOLAS 1974 requires that ladders used on vessels be of a single length, so there is no reason to have fittings at the bottom of the ladder.

38. *Section 163.003–13(c).*

(a) Section 163.003–13(c)(5) in the NPRM which required the top edges of the step to be rounded or chamfered has been deleted since it unnecessarily repeats the requirements of § 163.003–13(f).

(b) Section 163.003–13(c)(10) in the NPRM which required four inserts has been deleted since there are a number of ways that the suspension members can be secured to the steps besides inserts. Other paragraphs referring to inserts and providing detailed requirements for them have also been deleted. This includes all of what was § 163.003–13(d) in the NPRM.

39. *Section 163.003–13(c)(1) and* –21(c)(1).

(a) One commenter recommended that molded steps at the bottom of the ladder not be required since wood steps provide a better stepping surface than molded steps. This comment has not been adopted. The reason for requiring the molded steps at the bottom of the ladder is that they can withstand the abuse to which the lower steps of a pilot ladder are subjected better than wooden steps can. Furthermore, the requirement in § 163.003–13(c)(2) for a non-skid surface on the step will result in a step that is comparable in traction to the wood step, wet or dry. Section 163.003–13(c)(2) is discussed in more detail in paragraph 40 below.

(b) Five commenters recommended that molded steps be either required or permitted in lieu of wood steps in a ladder. Section 163.003–13(c)(1) has been changed to permit molded steps, and § 163.003–21(c)(1) has been changed to provide for appropriate testing which is discussed further in paragraph 48 below.

40. *Section 163.003–13(c)(2) and* –21(c)(6). Six commenters recommended that the required non-skid surface of ladder steps be provided by a permanently applied grit. Some of these commenters also recommended that (1) the steps should have grooving in a diamond pattern so that all of the grooves would lead to the edge of the step to promote drainage of water, (2) grooves should be either ⅛ in. or 3/16 in. deep, (3) non-skid surfaces should not be provided by adhesive sheets (presumably since they can peel off), and (4) the grit should be set back from the edge of the step so that it will not have a cutting abrasive edge. Section 163.003–13(c)(2) has been revised to prohibit the use of adhesive sheets. The other features have been added as an example of how the non-skid requirement can be met. An approval test has also been added in § 163.003–21(c)(6) to check for effectiveness of the non-skid surface. This test is similar to one developed by Underwriters Laboratories.

41. *Section 163.003–13(c)(5).* Two commenters recommended more positive requirements regarding the use of replacement steps. Special replacement steps will be approved under this subpart if they are necessary to permit steps to be replaced without unstringing the ladder. This section has been revised to make it clear that replacement steps are acceptable and that they must meet all of the other requirements for steps in the subpart.

42. *Section 163.003–13(c)(7).* Three commenters recommended that either 13⅜ in. or 13½ in. be specified as the distance from the top of one step to the top of the next. The NPRM specified a maximum distance of 380 mm (15 in.). This provision has been revised in accordance with these comments to require a maximum top-to-top step spacing of 350 mm (13¾ in.). (350 mm was selected as the closest round metric figure including 13⅜ in. and 13½ in.) As evidenced by the commenters' concern, spacing that is much larger than 350 mm, could result in making the ladder steps difficult to climb.

43. *Section 163.003–13(c)(8).* Seven commenters recommended that the steps be a highly visible color such as orange and that a hard epoxy paint be required for wooden steps so that the paint would stand up to hard use and be easier to keep clean. In support of this recommendation, the commenters stated that brightly colored steps, when contrasted against a dark ship hull, would make the ladder more visible to an approaching pilot boat. A requirement has been added to § 163.003–13(c)(8) of the final rules in accordance with this recommendation. Section 163.003–13(c)(8) does not require the non-skid step surface be brightly colored since it would be difficult to paint the grit and retain the required non-skid surface. An unpainted stepping surface, however, should not reduce the visibility of the ladder from an oncoming pilot boat since the stepping surfaces of the steps are not seen from this vantage point. One commenter's recommendation that the clamps used on the ladder also be orange was not adopted since the major factor in visibility will be the brightly colored step area.

44. *Section 163.003–13(c)(9).* The reason for requiring that devices attached to the top of the step not be higher than one-half the step width has been added. This provides a performance requirement for manufacturers that might propose an alternative design.

45. *Section 163.003–13(d).* One commenter recommended that spreaders be optional. This recommendation has not been adopted since spreaders are required by SOLAS 1974.

46. *Sections 163.003–13(e) and 163.002–13(bb).* One commenter recommended that self-locking nuts be required instead of peening over the ends of bolts as the means to secure them. Peening over the ends of bolts would discourage prompt and easy replacement of damaged steps. To correct this, § 163.003–13(e) has been revised to require fasteners to have lock washers or other locking devices to prevent the fasteners from loosening. The pilot hoist specification also includes this requirement in § 163.002–13(bb).

47. *Sections 163.003–21(a) and –27(b).* One commenter recommended that steps subjected to the 900 kg load not be used in any production ladders because of the heavy load to which they have been subjected. A step that passes the test may be distorted and should not be used in a ladder that is sold for use. However, a step that is not distorted as a result of the test should be satisfactory for use. The recommendation has been adopted for steps that have a permanent deflection as a result of testing.

48. *Sections 163.003–21(c)(1) and* –27(b). One commenter recommended that a flexibility test be required at a load of 150 kg (330 lb.) with a maximum deflection of 20 mm (¾ in.) permitted during testing. The purpose of the test is to prevent the use of steps that are too flexible for safe use. Although a 20 mm deflection at 150 kg is acceptable for the lowest four rungs that must withstand frequent impact from a pilot boat, this is too much flexibility for steps used in the rest of the ladder since it would be difficult to climb. The recommended test has been adopted, but a step that passes this test would be acceptable only for the bottom four molded steps. For steps used above the bottom four steps, a test at 320 kg (700 lb.) has been added. The approval tests for pilot ladders currently approved by the Coast Guard also include a test at 320 kg.

In consideration of the foregoing, the amendments to Subchapter Q of Title 46 of the Code of Federal Regulations as proposed in the **Federal Register** of July 23, 1979 (44 FR 43016) are adopted with changes set forth below.

Dated: December 22, 1981.

J. B. Hayes,

Admiral, Coast Guard Commandant.

PART 160—LIFESAVING EQUIPMENT

1. Subpart 160.017 is revised to read as follows:

Subpart 160.017—Chain Ladder

Sec.

160.017–1 Scope.
160.017–7 Independent laboratory.
160.017–9 Approval procedure.
160.017–11 Materials.
160.017–13 Construction.
160.017–15 Performance.
160.017–17 Strength.
160.017–21 Approval tests.
160.017–25 Marking.
160.017–27 Production tests and examination.

Authority: R.S. 4405 as amended (46 U.S.C. 375), R.S. 4417a as amended (46 U.S.C. 391a), R.S. 4482 as amended (46 U.S.C. 416), R.S. 4488 as amended (46 U.S.C. 481), sec. 6(b), 80 Stat. 937 (49 U.S.C. 1655(b)); 49 CFR 1.46.

Subpart 160.017—Chain Ladder

§ 160.017–1 Scope.

(a) This subpart contains standards and approval and production tests for chain ladders used on a merchant vessel to get on and off the vessel in an emergency.

(b) The requirements in this subpart apply to a chain ladder designed for use along a vertical portion of a vessel's hull.

§ 160.017–7 Independent laboratory.

The approval and production tests in this subpart must be conducted by or under the supervision of an independent laboratory accepted by the Coast Guard under Subpart 159.010 of this chapter.

§ 160.017–9 Approval procedure.

(a) *General.* A chain ladder is approved by the Coast Guard under the procedures in Subpart 159.005 of this chapter.

(b) *Approval testing.* Each approval test must be conducted in accordance with § 160.017–21.

(c) *Approval of alternatives.* A chain ladder that does not meet the materials, construction, or performance requirements of this subpart may be approved if the application and any approval tests prescribed by the Commandant in place of or in addition to the approval tests required by this subpart, show that the alternative materials, construction, or performance is at least as effective as that specified by the requirements of this subpart. The Commandant may also prescribe different production tests if the tests required by this subpart are not appropriate for the alternative ladder configuration.

§ 160.017–11 Materials.

(a) *Suspension members.* Each suspension member of a chain ladder must be a continuous length of non-kinking chain, such as single loop lock link coil chain, with a minimum breaking strength of at least 16 kN (3,560 lbs.).

(b) *Metal parts.* Each metal part of a ladder must be made of corrosion-resistant metal or of steel galvanized by the hot dip process after the part is formed. If the ends of galvanized fasteners are peened over to lock them in place, a corrosion resisting surface treatment must be applied to each peened surface.

(c) *Wooden parts.* Each wooden part of a ladder must be made of hardwood that is free of defects affecting its strength or durability.

(d) *Wood preservative.* After each wooden part is formed and finished, it must be treated with water-repellant wood preservative that is properly applied.

(e) *Lashing rings.* The inside diameter of each lashing ring must be at least 75 mm (3 in.). Each lashing ring must have a minimum breaking strength of at least 16 kN (3,560 lbs.).

§ 160.017–13 Construction.

(a) *General.* Each chain ladder must have two suspension members. Each step in the ladder must be supported at each end by a suspension member.

(b) *Suspension member.* The distance between the two suspension members must be at least 400 mm (16 in.), but not more than 480 mm (19 in.). The chain between each top lashing ring and the first step must be long enough so that the distance between the center of the lashing ring and the top of the first step is approximately 600 mm (24 in.).

(c) *Lashing rings.* A lashing ring must be securely attached to the top and bottom of each suspension member. The means of attachment must be at least as strong as the chain and the lashing ring.

(d) *Thimble or wear plate.* A thimble or wear plate must be attached to the chain where it can slide on its connections to the lashing rings.

(e) *Steps.* Each step of a ladder must have two rungs arranged to provide a suitable handhold and stepping surface. The distance between steps must be uniform. This distance must be between 300 mm (12 in.) and 380 mm (15 in.).

(f) *Rungs.* Step rungs must meet the following requirements:

(1) Each rung must be wooden, or a material of equivalent strength, durability, handhold, and step surface characteristics.

(2) In order to provide a suitable handhold and step surface, the width of each rung must be at least 40 mm (1½ in.) and the thickness must be at least 25 mm (1 in.), but not more than 40 mm (1½ in.).

(3) the distance between the rungs in each step must be uniform. This distance must be between 40 mm (1½ in.) and 65 mm (2½ in.).

(4) Each rung must be attached to a spacer ear by a method that prevents the rung from rotating and that supports it in a horizontal position when the ladder is hung vertically.

(g) *Spacer ears.* Spacer ears must meet the following requirements:

(1) All spacer ears on a ladder must be the same size and shape.

(2) The top and bottom of each spacer ear must be attached to a suspension member.

(3) The top point of attachment must be at least 100 mm (4 in.) above the top surfaces of the rungs attached to the spacer ear.

(4) Each spacer ear made of sheet metal must have features such as formed ribs, rolled flange edges, and stress relief holes at the ends of cuts, to prevent the ear from bending or tearing.

(h) *Fasteners.* Each fastening device must have a means to prevent the device from loosening.

(i) *Workmanship.* A ladder must not have splinters, burrs, sharp edges, corners, projections, or other defects that could injure a person using the ladder.

§ 160.017–15 Performance.

(a) Each chain ladder must be capable of being rolled up for storage.

(b) Each ladder when rolled up must be able to unroll freely and hang vertically.

§ 160.17–17 Strength.

(a) Each chain ladder must be designed to pass the approval tests in § 160.17–21.

§ 160.017–21 Approval tests.

(a) *General.* Each approval test must be conducted on a ladder of the longest length for which approval has been requested. If a ladder fails one of the tests in this section, the cause of the failure must be identified and any needed changes made. After a test failure and any design change, the failed test, and any other previously completed

tests affected by the design change, must be rerun.

(b) *Visual examination.* Before starting the tests described in this section, an assembled chain ladder is examined for evidence of noncompliance with the requirements in §§ 160.017.11, 160.017–13, and 160.017–15.

(c) The following approval tests must be conducted:

(1) *Strength test #1.* An assembled ladder is supported so that a static load, if placed on any of its steps, would exert a force both on the step and each suspension member. A static load of 315 kg (700 lb.) is then placed on one step for at least one minute. The load must be uniformly distributed over a contact surface that is approximately 100 mm (4 in.) wide. The center of the contact surface must be at the center of the step. This test is performed on six different steps. No step may break, crack, or incur any deformation that remains after the static load is removed. No attachment between any step and a suspension member may loosen or break during this test.

(2) *Strength test #2.* A ladder is suspended vertically to its full length from its top lashing rings. A static load of 900 kg (2000 lbs.) is then applied to the bottom lashing rings so that it is distributed equally between the suspension members. The suspension members, lashing rings, and spacer ears must not break, incur any elongation or deformation that remains after the test load is removed, or be damaged in any other way during this test.

(3) *Strength test #3.* A rolled-up ladder is attached by its top lashing rings to anchoring fixtures in a location away from any wall or structure that would prevent it from falling freely, and where it can hang to its full length vertically. The ladder when dropped must unroll freely. When unrolling the ladder, its steps and attachments must not become cracked, broken, or loosened. Other similar damage making the ladder unsafe to use must likewise not occur.

§ 160.017–25 Marking.

(a) Each chain ladder step manufactured under Coast Guard approval must be branded or otherwise permanently and legibly marked on the bottom with—

(1) The name of the manufacturer;

(2) The manufacturer's brand or model designation;

(3) The lot number and date of manufacture; and

(4) The Coast Guard approval number.

§ 160.017–27 Production tests and examination.

(a) *General.* Each ladder manufactured under Coast Guard approval must be tested in accordance with this section and subpart 159.007 of this chapter. Steps that fail testing may not be marked with the Coast Guard approval number and each assembled ladder that fails testing may not be sold as Coast Guard approved.

(b) *Test #1: Steps.* Steps must be separated into lots of 100 steps or less. One step from each lot must be selected at random and tested as described in § 106.017–21(c)(1), except that the step may be supported at the points where it would be attached to suspension members in an assembled ladder. If the step fails the test, ten more steps must be selected at random from the lot and tested. If one or more of the ten steps fails the test, each step in the lot must be tested.

(c) *Test #2: Ladders.* Assembled ladders must be separated into lots of 20 ladders or less One ladder must be selected at random from the ladders in the lot. The ladder selected must be at least 3 m (10 ft.) long or, if each ladder in the lot is less than 3 m long, a ladder of the longest length in the lot must be selected. The ladder must be tested as prescribed in § 160.017–21(c)(2), except that only a 3 m section of the ladder need be subjected to the static load. If the ladder fails the test each other ladder in the lot must be tested.

(d) *Independent laboratory.* Each production test must be conducted or supervised by an independent laboratory. However, if a test is performed more than 4 different times per year, laboratory participation is required only 4 times per year. If the laboratory does not participate in all tests, the times of laboratory participation must be as selected by the laboratory. The times selected must provide for effective monitoring throughout the production schedule.

(e) *Visual examination.* The visual examination described in § 160.017–21(b) must be conducted as a part of each production test.

PART 163—CONSTRUCTION

2. A new Subpart 163.002 is added to Part 163 to read as follows:

Subpart 163.002—Pilot Hoist

Sec.
163.002–1 Scope.
163.002–3 Applicable technical regulations.
163.002–5 Definitions.
163.002–7 Independent laboratory.
163.002–9 Approval procedure.
163.002–11 Materials.
163.002–13 Construction.
163.002–15 Performance.
163.002–17 Instructions and marking.
163.002–21 Approval tests.
163.002–25 Marking.
163.002–27 Production tests and examination.

Authority: R.S. 4405 as amended (46 U.S.C. 375), R.S. 4417a, as amended (46 U.S.C. 391a), R.S. 4462, as amended (46 U.S.C. 416), R.S. 4488, as amended (46 U.S.C. 481), Sec. 6(b), 80 Stat. 937 (49 U.S.C. 1655(b)); 49 CFR 1.46.

Subpart 163.002—Pilot Hoist

§ 163.002–1 Scope.

(a) This subpart contains standards and approval and production tests for pilot hoists used on merchant vessels.

(b) The requirements in this subpart apply to a pilot hoist designed for use along a vertical portion of a vessel's hull.

§ 163.002–3 Applicable technical regulations.

(a) This subpart makes reference to the following Coast Guard regulations in this chapter:

(1) Subpart 58.30 (Fluid Power and Control Systems).

(2) Section 94.33–10 (Description of Fleet Angle).

(3) Part 111 (Electrical System, General Requirements).

(4) Subpart 163.003 (Pilot Ladder).

163.002–5 Definitions.

(a) "Maximum persons capacity" means—

(1) If the hoist has a rigid ladder, one person; or

(2) If the hoist has a platform, one person per square meter (10.75 sq. ft.) or fraction thereof of platform area (including hatch area);

(b) "Working load" means the sum of the weights of—

(1) The rigid ladder or lift platform, the suspension cables (if any) and the pilot ladder on a pilot hoist; and

(2) 150 kilograms (330 pounds) times the maximum persons capacity of the hoist;

(c) "Lift height" means the distance from the lowest step of the pilot ladder on a pilot hoist to the deck of a vessel on which the hoist is designed for installation when—

(1) The suspension cables of the hoist are run out until only three turns of cable remain on each drum; or

(2) If the hoist does not have suspension cables, the ladder or lift platform is in its lowest position.

§ 163.002–7 Independent laboratory.

(a) The approval and production tests in this subpart must be conducted by, or under the supervision of, an independent laboratory accepted by the

Coast Guard under Subpart 159.010 of this chapter.

§ 163.002–9 Approval procedure.

(a) *General.* A pilot hoist is approved by the Coast Guard under the procedures in Subpart 159.005 of this chapter.

(b) *Approval testing.* Each approval test must be conducted in accordance with § 163.002–21.

(c) *Approval of alternative designs.* A pilot hoist that does not meet the materials, construction, or performance requirements of this subpart may be approved if the application and any approval tests prescribed by the Commandant in place of or in addition to the approval tests required by this subpart, show that the alternative materials, construction, or performance is at least as effective as that specified by the requirements of this subpart.

§ 163.002–11 Materials.

(a) *Gears.* Each gear in a pilot hoist must be made of machine cut steel or machine cut bronze, or must be of a design of equivalent strength, durability, reliability and accuracy.

(b) *Suspension cables.* Each suspension cable on a pilot hoist must be a corrosion-resistant wire rope other than galvanized wire rope.

(c) *Corrosion-resistant materials.* Materials of a pilot hoist that are not in watertight enclosures must be—

(1) Corrosion-resistant or must be treated to be corrosion-resistant; and

(2) Galvanically compatible with each other adjoining material.

(d) *Aluminum alloys.* Any aluminum alloy which is not resistant to stress corrosion in marine atmospheres (i.e., contains more than 0.6 percent copper), must not be used in a structural component or in any other hoist component subject to stress.

§ 163.002–13 Construction.

(a) *General.* Each hoist must have a rigid ladder or a lift platform on which a person being raised or lowered may stand.

(b) *Spreader.* Each hoist must have a spreader or other device to prevent twisting of its ladder or lift platform. If a spreader is provided, it must be at least 1800 millimeters (5 feet, 10 inches) long.

(c) *Rollers.* The rigid ladder or lift platform on a pilot hoist and the ends of its spreader (if a spreader is provided) must have rollers at each point of contact with the vessel that allow the ladder or platform to move smoothly over the side of the vessel.

(d) *Load carrying parts.* Each load carrying part of a pilot hoist must be designed to have a minimum breaking strength of at least six times the load imposed on the part by the working load during operation of the hoist.

(e) *Exposed moving parts.* Each exposed moving part of a pilot hoist that poses a hazard to personnel must have a screen or guard.

(f) *Nonfunctional sharp edges and projections of excessive length.* A pilot hoist must not have nonfunctional sharp edges and must not have fastening devices or other projections of excessive length.

(g) *Installation requirements.* Each pilot hoist must be designed to allow—

(1) Its installation along the edge of a deck at a vertical portion of the hull;

(2) Its installation on the deck in a manner that does not require use of the vessel's side rails for support; and

(3) Unobstructed passage between the ladder or lift platform of the hoist and the deck of a vessel.

(h) *Deck interlock for portable hoist.* A pilot hoist, if portable, must have a deck interlock that prevents movement of the ladder or lift platform when the hoist is not installed.

(i) *Power source.* Each hoist must be designed to operate on electric, pneumatic, or hydraulic power or a combination of these.

(j) *Electrical equipment.* Electrical equipment of a pilot hoist must meet the electrical engineering regulations in Part 111 of this chapter. The operating voltage of electrical equipment on the ladder or lift platform of a pilot hoist must not exceed 25 volts.

(k) *Pneumatic and hydraulic equipment.* Pneumatic and hydraulic equipment of a pilot hoist must comply with the marine engineering regulations of Subpart 58.30 of this chapter. Each pneumatically powered hoist must have a water trap, air filter, air regulator, pressure gauge, and oil lubricator in the air line between the vessel's compressed air source and the pneumatic motor.

(l) *Hoist control lever.* Each pilot hoist must have a control lever for raising and lowering its ladder or lift platform. Movement of the lever upward or toward the operator must result in upward movement of the ladder or lift platform. Movement of the control in the opposite direction must result in downward movement of the ladder or lift platform. The control must be designed so that when released by the operator the ladder or lift platform stops immediately.

(m) *Emergency disconnect device.* Each pilot hoist must have a switch or valve for disconnecting the main power source in an emergency.

(n) *Power indicator.* Each pilot hoist must have an indicator to show the operator when power is being supplied to the hoist.

(o) *Arrangement of controls and power indicator.* The hoist control lever, the emergency disconnect device, and the power indicator on a pilot hoist must be arranged so that the hoist operator, when standing, can view all movement of the ladder or lift platform while using this equipment.

(p) *Hand-operated device and interlock.* Each pilot hoist must have a hand-operated device for raising and lowering its ladder or lift platform. The device must be operable from a standing position. The hoist must have an interlock that prevents simultaneous operation of its hand-operated device and its power source. Any removable hand gear, crank, or wheel of the hand-operated device must be securely stowed on the hoist.

(q) *Upper position step.* Unless a hoist has a pneumatic motor that stalls at the end of cable travel without jarring, jerking, or damaging the hoist, it must have one or more limit switches or valves that stop the ladder or lift platform at its upper end of travel without jarring, jerking, or damaging the hoist.

(r) *Means of lubrication.* Each hoist must have a means to lubricate its bearings. Sliding-contact gearing, such as worm gears, must operate in an oil bath, or have another means of lubricating the gear teeth on each revolution. Each lubricant enclosure must be designed so that it can be readily filled, drained, and checked for lubricant level.

(5) *Machinery housing.* Each machinery housing on a pilot hoist except gear boxes and other enclosures that retain lubricants, must have means that permit examination of all internal moving parts using common tools or without tools. Each machinery housing, except gear boxes and other enclosures that retain lubricants, must be designed to prevent moisture accumulation.

(t) *Suspension cable.* If a hoist has suspension cables, at least 2 cables must be provided and they must be arranged so that the ladder or lift platform remains level and stationary if one of the cables breaks. Each cable must be arranged to lead fair in a 15 degree vessel list toward the side of the vessel on which the hoist is installed. The devices for attaching the cables to their winch drums must be capable of supporting 2.2 times the workig load with the cables run all the way out.

(u) *Sheaves and drums.* Each sheave and each winch drum for a suspension cable on a pilot hoist must be of a size recommended by the cable supplier for

the diameter and construction of the cable. Each sheave must have a device that prevents the cable from jumping out of the sheave groove. Each drum must be designed to accept one level wind of wrap. The fleet angle of a grooved drum must not exceed 8 degrees, and the fleet angle of a non-grooved drum must not exceed 4 degrees.

Note—The term "fleet angle" is defined in § 94.33–10 of this chapter.

(v) *Rigid ladder.* A rigid ladder on a pilot hoist must have thermally insulated handholds and a padded backrest so that the person being raised or lowered may firmly brace himself or herself between the ladder and the backrest. The ladder must be at least 2.5 m (100 in.) long from the bottom rung to the top of the handholds.

(w) *Ladder rungs.* Each rigid ladder must have at least six rungs, each with a non-skid surface that does not retain water. Adhesive non-skid sheets may not be used. (For example, a suitable surface for a wooden rung is one that has grooves at least 3 mm (⅛ in.) deep cut in a diamond pattern so that water runs off the edge of the step. Non-skid grit is applied directly to the step surface.) The stepping surface of each rung must be not less than 115 mm (4½ in.) wide and not less than 400 mm (16 in.) long. The distance from the top of one rung to the top of the next must be uniform, between 300 mm (12 in.) and 350 mm (13¾ in.).

(x) *Platform railing.* A lift platform on a pilot hoist must be enclosed by a guardrail that has a diameter of between 30 millimeters (1¼ inches) and 75 millimeters (3 inches). The center of the guardrail must be at least 900 millimeters (3 feet) above the platform. At least one intermediate rail must be provided between the guardrail and the platform. Each rail must be set back from the edge of the platform at least 50 millimeters (2 inches). Each gate in the rails must have a latch that can keep the gate securely closed.

(y) *Platform floor.* The platform floor of a pilot hoist must have a non-skid surface and must be at least 750 millimeters (30 inches) by 750 millimeters, exclusive of the surface area of any hatch. Each hatch in the platform floor must be at least 750 millimeters (30 inches) by 750 millimeters. Each hatch must have a means to keep it securely positioned both when opened and closed.

(z) *Pilot ladder fittings.* The bottom of the rigid ladder or lift platform on a pilot hoist must have fittings to attach a pilot ladder of the type that meets the requirements of Subpart 163.003 of this chapter. The fittings must be arranged so that—

(1) The distance between the top of the highest step on the pilot ladder and the surface of the lift platform or top of the bottom rung on the rigid ladder is between 300 and 350 millimeters (12 and 13¾ inches);

(2) The steps of the pilot ladder are directly below and in line with the steps of the rigid ladder or edge of the lift platform; and

(3) The pilot ladder can bear on the side of the vessel when in use.

(aa) *Emergency stop switch.* Each pilot hoist must have an emergency stop switch that can be operated by a person on the ladder or lift platform.

(bb) *Fasteners.* Each fastening device securing a part of a pilot hoist must have a means to prevent the device from loosening.

(cc) *Gears.* Each gear must be keyed to its shaft.

(dd) *Welding.* Each weld must be made using automatic welding equipment or be made by a welder who is qualified by the U.S. Coast Guard, U.S. Navy, American Bureau of Shipping, American Welding Society, American Society of Mechanical Engineers, or other organization that has similar procedures for welder qualifications that are acceptable to the Commandant.

§ 163.002–15 Performance.

(a) Each pilot hoist must have sufficient performance capability to pass the approval tests in § 163.002–21.

§ 163.002–17 Instructions and markings.

(a) *Instruction plates or placards.* Each pilot hoist must have instructions that show its method of operation and lubrication of its working parts. The instructions must be on one or more corrosion-resistant plates, or must be weatherproof placards. The instructions must be attached to the hoist. Each instruction must be in English or must have understandable symbols or pictograms. The operator of the hoist must be able to see and read the operating instructions when operating the hoist control lever. The lubricating instructions must state the recommended lubricants for the temperature range in which the hoist is designed to operate. The temperature range must be stated in both degrees Celsius and Fahrenheit.

(b) *Marking of controls.* Each control on a pilot hoist and each position of the control must be identified by a marking on the hoist.

(c) *Marking of gauges.* Each gauge on a pilot hoist must be marked with its normal operating range.

(d) *Manual.* Each pilot hoist must have a manual of installation instructions, operating instructions, maintenance and repair instructions, a lubrication chart, a parts list, a list of sources of repair parts, and a log for keeping maintenance records. Each manual must be in English.

§ 163.002–21 Approval tests.

(a) *General.* If a pilot hoist fails one of the tests in this section the cause of the failure must be identified and any needed design changes made. After a test failure and any design change, the failed test, and any other previously completed tests affected by the change, must be rerun.

(b) *Visual examination.* Before starting the tests described in this section an assembled pilot hoist is examined for evidence of noncompliance with the requirements in §§ 163.002–11 and 163.002–13.

(c) The following approval tests must be conducted:

(1) *Rung strength.* If the pilot hoist has a rigid ladder a static load of 900 kilograms (2000 pounds) is applied to the center of a ladder rung for one minute. The load must be uniformly distributed over a 100 millimeter (4 inch) wide contact surface. The test must be repeated using a second ladder rung. The rungs must not break or crack during these tests.

(2) *Platform strength.* If the pilot hoist has a lift platform, the platform is lifted to a level where it is supported only by its suspension components. A static load of 900 kilograms (2000 pounds) is then applied to the center of the platform for one minute. The load must be uniformly distributed over a 100 millimeter (4 inch) square contact surface. The test must be repeated enough additional times so that the load is placed in the center of each hatch cover when in its closed position, and in the center of each area of the platform located between floor supports. The platform must not break or crack during these tests.

(3) *Deck interlock.* If the pilot hoist is portable, it is placed in an uninstalled position. Its hoist control lever is then activated. The deck interlock must prevent movement of the ladder or lift platform when the lever is activated.

(4) *Lifting and lowering speed and level wind.* The hoist is installed in a level operating position and a weight equal to the weight of the pilot ladder plus 150 kg (330 lb.) times the maximum persons capacity of the hoist is placed on its ladder or lift platform. The ladder or lift platform is repeatedly raised and lowered under power operation until a total distance of at least 150 meters (500

feet) has been traversed. The ladder or lift platform is raised and lowered each time through a distance of at least 5 meters (16 feet). The average speed of raising the ladder or lift platform and the average lowering speed during this test must both be between 15 and 21 meters per minute (50 and 70 feet per minute). During the test, each suspension cable must have one level wind of wrap each time it is rewound onto its drum.

(5) *Upper position stop.* The hoist is installed in a level operating position and a weight equal to the weight of the pilot ladder plus 150 kg (330 lb.) times the maximum persons capacity is attached to the hoist. The hoist must be able to raise the weight to the upper limit of travel of the ladder or lift platform and must be able to stop at the upper limit without jarring, jerking, or damage. The test is repeated with no weight on the ladder or lift platform.

(6) *Cable securing device.* If the hoist has suspension cables, it is installed in a level operating position and the cables are run all the way out. A weight equal to 2.2 times the working load is then attached to the cables. The cables must remain securely attached to the drums for at least one minute after the weight has been attached.

(7) *Controls and power indicator.* The hoist is installed in a level operating position and a weight equal to the working load is attached to the hoist. The hoist control lever is then operated with the power both on and off. The lever, when operated, must meet the requirements in § 163.002–13(l). The power indicator must meet the requirements in § 163.002–13(n) during the test. When the power is turned off, the ladder or lift platform must stop immediately and remain stationary until power is turned on. The emergency stop switch on the ladder or lift platform is activated at some point when the ladder or lift platform is being raised or lowered. Upon activation, the ladder or lift platform must stop and remain stationary.

(8) *Hand operation and interlock.* The hoist is installed in a level operating position and a weight equal to the working load is attached to the hoist. The hand operated device is then engaged. One person, when using the hand operated device, must be able to raise and lower the weight through a distance of at least 5 meters (16 ft.) in each direction and must be able to raise and lower it at a speed of at least 1.5 meters per minute (5 ft. per minute). When raising or lowering the hoist with the hand operated device, the power source for the hoist is turned on, or an attempt is made to turn it on. Then, with power source turned off, the hand operated device is disengaged. The power source is then turned on and an attempt made to engage the hand operated device. The interlock must prevent simultaneous operation of the power source and the hand operated device.

(9) *2.2x overload.* The hoist is installed in a level operating position. Each roller on the ladder or lift platform is placed in contact with a vertical surface. A weight equal to the difference between 2.2 times the working load and the weight of the ladder or lift platform is placed on the ladder or lift platform. The ladder or lift platform is raised through a distance of at least 5 meters (16 feet) and the hoist control lever is then released. The ladder or lift platform must stop without jarring or damage and must hold the weight for at least one minute. The weight is then lowered through a distance of not less than 5 meters (16 feet) and the control lever is then released. The ladder or lift platform must stop within 600 millimeters (2 ft.) of where the hoist was when the lever was released and the ladder or lift platform must remain stationary for at least one minute thereafter. Each roller must move smoothly over the vertical surface without jamming or sliding during the test.

(10) *6x overload.* The hoist is installed in a level operating position. A load of six times the working load is attached to the hoist. (If the hoist has suspension cables, the cables must be run out at least one meter (3 ft.) before adding the load to the hoist). The weight must remain stationary for at least one minute without damage to any part of the hoist. The test is repeated simulating a vessel list of 15 degrees toward the side on which the hoist is installed.

(11) *Level wind suspension cable.* If the hoist has suspension cables, it is installed in a level operating position with the cables wound onto the drums. A weight equal to the working load is attached to the hoist. The cables are run all the way out and then rewound back onto the drums at least ten times. Each drum and cable is observed for level winding as the cable is wound onto the drum. The test must be repeated with a weight equal to the weight of the rigid ladder or lift platform. In each test, each cable must always rewind onto the drum in one level wind of wrap.

(12) *Rung friction test.* One rung of each type used on a rigid ladder must be subjected to this test. This test compares the dry and wet surface friction characteristics of ladder rungs with those of a standard oak step.

(i) The standard step must have a surface of clean oak that meets S/163.003–11(b) of this chapter and that is 115 mm (4½ in.) wide by 400 mm (16 in.) long. The stepping surface must have grooves that are 3 mm (⅛ in.) deep and 3 mm wide. The grooves must run in two different directions at right angles to each other, and at 45 degree angles with each edge of the stepping surface, so that the grooves form a diamond pattern covering the stepping surface. The centers of all parallel grooves must be 13 mm (½ in.) apart.

(ii) The standard step must be set in a level position. A metal block must be placed on one end of the step so that the block is in contact with the stepping surface. The metal block must weigh between 1.5 kg (3.3 lb.) and 3.0 kg (6.6 lb.) and must not be more than 100 mm (4 in.) wide by 135 mm (5⅜ in.) long. The surface of the block in contact with the step must have leather or composition shoe sole material attached to it.

(iii) The end of the step that has the metal block on it must be slowly raised until the block starts to slide. The angle of the step in this position must be measured and recorded. The step and block must then be placed under water and the procedure repeated.

(iv) The procedure in paragraph (c)(12)(iii) of this section must be repeated using a rigid ladder rung in place of the standard step.

(v) The ladder rung must then be secured in a horizontal position with a block resting on its stepping surface. The block must be of a size similar to the one used in the previous tests and have the same shoe sole surface used in the previous tests. The block must be arranged to apply a vertical load of 40 kg (88 lb.) to the rung. The block must be then moved back and forth in the same line from one end of the stepping surface to the other. This must be done for a total of 1,500 cycles.

(vi) The rung must again be tested as described in paragraph (c)(12)(iii) of this section, except that the initial position of the block must be on a part of the stepping surface that was subjected to the 1,500 cycles of rubbing.

(vii) The angles at which the block starts to slide on a wet and dry ladder rung when tested under paragraphs (c)(12)(iv) and (c)(12)(vi) of this section must be equal to or greater than the corresponding angles measured for the standard step when tested under paragraph (c)(12)(iii) of this section.

§ 163.002–25 Marking.

(a) Each pilot hoist manufactured under Coast Guard approval must have a corrosion-resistant nameplate. The nameplate must contain the—

(1) Name of the manufacturer;

(2) Manufacturer's brand or model designation;
(3) Working load;
(4) Lift height;
(5) Maximum persons capacity;
(6) Hoist serial number;
(7) Date of manufacture; and
(8) Coast Guard approval number.
(b) The hoist must be permanently and legibly marked with the name of the laboratory that conducted the production tests.

§ 163.002–27 Production tests and examination.

Each pilot hoist manufactured under Coast Guard approval must be tested as prescribed in § 163.002–21(c)(9) and Subpart 159.007 of this chapter. The tests must be conducted by an independent laboratory. If the hoist fails the tests its defects must be corrected and retested until it passes. The laboratory must also conduct the visual examination described in § 163.002–21(b). The hoist may not be sold as Coast Guard approved unless it passes testing and unless each defect discovered in the visual examination is corrected.

3. A new Subpart 163.003 is added to Part 163 as follows:

Subpart 163.003—Pilot Ladder

Sec.
163.003–1 Scope.
163.003–3 ASTM standard.
163.003–7 Independent laboratory.
163.003–9 Approval procedure.
163.003–11 Materials.
163.003–13 Construction.
163.003–15 Performance.
163.003–17 Strength.
163.003–21 Approval tests.
163.003–25 Marking.
163.003–27 Production tests and examination.
163.003–29 Effective date and status of prior approval.

Authority: R.S. 4405 as amended (46 U.S.C. 375), R.S. 4417a as amended (46 U.S.C. 391a), R.S. 4482 as amended (46 U.S.C. 416), R.S. 4488 as amended (46 U.S.C. 481), sec. 6(b), 80 Stat. 937 (49 U.S.C. 1655(b); E.O. 12234, 45 FR 58801; and 49 CFR 1.46.

Subpart 163.003—Pilot Ladder

§ 163.003–1 Scope.

(a) This subpart contains standards and approval and production tests for a pilot ladder used on a merchant vessel to embark and disembark pilots and other persons when away from the dock.
(b) The requirements in this subpart apply to a pilot ladder designed for use along a vertical portion of a vessel's hull.

§ 163.003–3 ASTM standard.

The following standard of the American Society of Testing and Materials is incorporated by reference into this subpart: ASTM D 1435 entitled "Standard Recommended Practice for Outdoor Weathering of Plastics."

§ 163.003–7 Independent laboratory.

The approval and production tests in this subpart must be conducted by or under the supervision of an independent laboratory accepted by the Coast Guard under Subpart 159.010 of this chapter.

§ 163.003–9 Approval procedure.

(a) *General.* A pilot ladder is approved by the Coast Guard under the procedures in Subpart 159.005 of this chapter.
(b) *Approval testing.* Each approval test must be conducted in accordance with § 163.003–21.
(c) *Approval of alternatives.* A pilot ladder that does not meet the materials, construction, or performance requirements of this subpart may be approved if the application and any approval tests prescribed by the Commandant in place of or in addition to the approval tests required by this subpart, show that the alternative materials, construction, or performance is at least as effective as that specified by the requirements of this subpart. The Commandant may also prescribe different production tests if the tests required by this subpart are not appropriate for the alternative ladder configuration.

§ 163.003–11 Materials.

(a) *Suspension members.* Each suspension member must be mildew-resistant manila rope or a dacron polyester rope with a polypropylene core of a color that contrasts with the dacron. Each suspension member must have a breaking strength of not less than 24 kN (5,400 lb.) and a nominal circumference of not less than 60 mm (2¼ in.).
(b) *Wooden parts.* Each wooden part of a pilot ladder must be hardwood that is free from knots and any other defects affecting its strength or durability.
(c) *Wood preservative.* After each wooden part is formed and finished, it must be treated with water-repellant wood preservative that is properly applied.
(d) *Molded steps.* Each step made of molded construction must be rubber or resilient plastic.
(e) *Metal parts.* Each metal fastener must be made of a corrosion resistant metal. Each other metal part must be made of corrosion-resistant metal or of steel galvanized by the hot dip process after the part is formed.
(f) *Plastics.* Each plastic material must be of a type that retains at least 30 percent of its original tensile strength and at least 80 percent of its original impact strength when subjected to the one year outdoor weathering test described in ASTM D 1435.

§ 163.003–13 Construction.

(a) *General.* Each pilot ladder must have two suspension members on each side. Each step in the ladder must be supported by each suspension member.
(b) *Suspension member.* The suspension members of a pilot ladder must meet the following requirements:
(1) Each suspension member must be continuous from the top of the ladder to the bottom and must not be painted or otherwise coated or covered.
(2) Except as provided in paragraph (g) of this section—
(i) The top end of one suspension member on each side of the ladder must extend at least 3 m (10 ft.) beyond the top ladder step; and
(ii) The top ends of the other suspension members must be just above the top step and must have an eye splice or thimble large enough to fit two passes of a suspension member.
(3) The top end of each suspension member that does not have an eye splice or thimble must be served or treated to prevent fraying.
(4) Each pair of suspension members must be clamped together both above and below each step. Marline seizing may not be used.
(5) The clear space between the suspension members on one side of a ladder and those on the other side must be at least 400 mm (16 in.), but not more than 480 mm (19 in.).
(6) The suspension members must not have fittings at the bottom of the ladder that can be used for attaching additional ladder sections.
(c) *Steps.* Pilot ladder steps must meet the following requirements:
(1) The four lowest steps must be molded steps and the rest of the steps must be either wooden or molded steps.
(2) The top face of each step must have a rectangular surface that is at least 115 mm (4½ in.) wide with a non-skid surface that does not retain water. Adhesive non-skid sheets may not be used. (For example, a suitable surface for a step is one that has grooves at least 3 mm (⅛ in.) deep cut in a diamond pattern so that water runs off the edge of the step. Non-skid grit is applied directly to the step surface extending to almost the full width of the step.)
(3) Each step at its thinnest point must be at least 25 mm (1 in.) thick and in determining this thickness, the depth of the grooves in the non-skid surface and

the diameter of any hole extending from one side of the step to the other must not be counted.

(4) Each step must be at least 400 mm (19 in.) long.

(5) Each step must be designed so that it can be removed and replaced without unstringing the ladder. If special replacement steps are made to meet this requirement, the replacement steps must meet the requirements of this section.

(6) If a step has grooves for its suspension members, the grooves must be in the sides of the steps.

(7) The spacing from the top of one step to the top of the next step must be uniform and this spacing must be between 300 mm (12 in.) and 350 mm (13¾ in.).

(8) Each step must be a bright orange color, except that this color is not required for the non-skid surface. If a step is painted, it must be painted with a two-part epoxy paint intended for marine use, or a paint of equivalent durability.

(9) The height of each device attached to the step for securing the suspension members must not be more than one-half the width of the step so that the step is not prevented from rolling if the ladder is caught between a pilot boat and the hull of the vessel.

(d) *Spreaders.* Each pilot ladder with 9 or more steps must have one or more spreaders that meet the following requirements:

(1) Each spreader must be at least 1.8 m (70 in.) long.

(2) The spreaders must be positioned at intervals of not more than 9 steps.

(3) The lowest spreader on a ladder must be on the fifth step from the bottom.

(e) *Fasteners.* Each fastening device securing a part of a pilot ladder must have a means to prevent the device from loosening.

(f) *Workmanship.* A pilot ladder must not have splinters, burrs, sharp edges, corners, projections, or other defects that could injure a person using the ladder.

(g) *Special arrangements for pilot hoists.* Each pilot ladder produced for use with an approved pilot hoist must have at least 8 steps. The top ends of its suspension members need not have an eye splice or thimble or be arranged as required in paragraph (b) of this section if necessary to permit attaching the ladder to fittings of a particular pilot hoist.

§ 163.003–15 Performance.

(a) Each pilot ladder must be capable of being rolled up for storage.

(b) Each ladder when rolled up must be able to unroll freely and hang vertically.

(c) Each suspension member must be arranged so that, when the ladder is in use on a vessel, the suspension member cannot come in contact with the vessel's side.

(d) Each step must be arranged so that it can bear on the side of the vessel when the ladder is in use.

§ 163.003–17 Strength.

(a) Each pilot ladder must be designed to pass the approval tests in § 163.003–21.

§ 163.003–21 Approval tests.

(a) *General.* Each approval test must be conducted on a ladder of the longest length for which approval has been requested. If the ladder fails one of the tests, the cause of the failure must be identified and any needed design changes made. After a test failure and any design change, the failed test, and any other previously completed tests affected by the change, must be rerun. Any ladder step that has a residual deflection after testing under this section may not be used thereafter in any ladder represented as Coast Guard approved.

(b) *Visual examination.* Before starting the approval tests, an assembled pilot ladder is examined for evidence of noncompliance with the requirements in §§ 163.003–11, 163.003–13, and 163.003–15.

(c) The following approval tests must be conducted:

(1) *Step flexibility test.* This test is performed on six different steps, one of which must be a molded step and one of which must be a replacement step if special replacement steps are made by the manufacturer. Each step is placed on a pair of supports located at the points where the step would ordinarily be attached to the suspension members. A static load must be applied uniformly for a period of at least one minute over a contact surface that is at the center of the step and is approximately 100 mm (4 in.) wide. The load must be 150 kg (330 lb.) for each molded step that is used only as one of the four bottom steps in the ladder. The load must be 320 kg (700 lb.) for each other step. The deflection of the step is measured while the step is under load and after the load is removed. The step must not deflect more than 20 mm (¾ in.) under the load, and there must be no residual deflection after the load is removed.

(2) *Strength test #1.* An assembled ladder is supported so that a static load, if placed on any of its steps, would exert a force on both the step and each suspension member. A static load of 900 kg (2,000 lb.) is then placed on one step for at least one minute. The load must be uniformly distributed over a contact surface that is approximately 100 mm (4 in.) wide. The center of the contact surface must be at the center of the step. This test is performed on six different steps, one of which must be a molded step. None of the steps may break or crack. No attachment between any step and a suspension member may loosen or break during this test.

(3) *Strength test #2.* An assembled ladder is suspended vertically to its full length. A static load of 900 kg (2,000 lb.) is then applied to the bottom step of the ladder so that it is distributed equally between the suspension members. The suspension members, and inserts must not break, incur any elongation or deformation that remains after the test load is removed, or be damaged in any other way during this test.

(4) *Strength test #3.* A rolled up ladder is attached to anchoring fixtures in a location away from any wall or structure that would prevent it from falling freely, and where it can hang to its full length vertically. The ladder when dropped must unroll freely. When unrolling the ladder, its steps and attachments must not become cracked, broken, or loosened. Other similar damage making the ladder unsafe to use must likewise not occur.

(5) *Step friction test.* One step of each type used on a pilot ladder must be subjected to this test. This test compares the dry and wet surface friction characteristics of ladder steps with those of a standard oak step.

(i) The standard step must have a surface of clean oak that meets S/163.003–11(b) and that is 115 mm (4½ in.) wide by 400 mm (16 in.) long. The stepping surface must have grooves that are 3 mm (⅛ in.) deep and 3 mm wide. The grooves must run in two different directions at right angles to each other, and at 45 degree angles with each edge of the stepping surface, so that the grooves form a diamond pattern covering the stepping surface. The centers of all parallel grooves must be 13 mm (½ in.) apart.

(ii) The standard step must be set in a level position. A metal block must be placed on one end of the step so that the block is in contact with the stepping surface. The metal block must weigh between 1.5 kg (3.3 lb.) and 3.0 kg (6.6 lb.) and must not be more than 100 mm (4 in.) wide by 135 mm (5⅜ in.) long. The surface of the block in contact with the step must have leather or composition shoe sole material attached to it.

(iii) The end of the step that has the metal block on it must be slowly raised until the block starts to slide. The angle of the step in this position must be measured and recorded. The step and block must then be placed under water and the procedure repeated.

(iv) The procedure in paragraph (c)(6)(iii) of this section must be repeated using a pilot ladder step in place of the standard step.

(v) The ladder step must then be secured in a horizontal position with a block resting on its stepping surface. The block must be of a size similar to the one used in the previous tests and have the same shoe sole surface used in the previous tests. The block must be arranged to apply a vertical load of 40 kg (88 lb.) to the step. The block must be then moved back and forth in the same line from one end of the stepping surface to the other. This must be done for a total of 1,500 cycles.

(vi) The step must again be tested as described in paragraph (c)(6)(iii) of this section, except that the initial position of the block must be on a part of the stepping surface that was subjected to the 1,500 cycles of rubbing.

(vii) The angles at which the block starts to slide on a wet and dry ladder step when tested under paragraphs (c)(6)(iv) and (c)(6)(vi) of this section must be equal to or greater than the corresponding angles measured for the standard step when tested under paragraph (c)(6)(iii) of this section.

§ 163.003–25 Marking.

(a) Each pilot ladder step manufactured under Coast Guard approval must be branded or otherwise permanently and legibly marked on the bottom with—

(1) The name of the manufacturer;

(2) The manufacturer's brand or model designation;

(3) The lot number or date of manufacture; and

(4) The Coast Guard approval number.

§ 163.003–27 Production tests and examination.

(a) *General.* Each ladder produced under Coast Guard approval must be tested in accordance with this section and Subpart 159.007 of this chapter. Steps that fail testing may not be marked with the Coast Guard approval number and each assembled ladder that fails testing may not be sold as Coast Guard approved.

(b) *Test No. 1: Steps.* Steps must be separated into lots of 100 steps or less. Steps of different types must be placed in separate lots. One step from each lot must be selected at random and tested as described in § 163.003–21(c)(2) except that supports are placed under the step at the points where it would be attached to suspension members in an assembled ladder. If the step fails the test, ten more steps must be selected at random from the lot and tested. If one or more of the ten steps fails the test, each step in the lot must be tested. No step that has any residual deflection after the test may be used in a ladder represented by the manufacturer as Coast Guard approved.

(c) *Test No. 2: Ladders.* Assembled ladders must be separated into lots of 20 ladders or less. One ladder must be selected at random from the ladders in each lot. The ladder selected must be at least 3 m (10 ft.) long or, if each ladder in the lot is less then 3 m long, a ladder of the longest length in the lot must be selected. The ladder must be tested as prescribed in § 163.003–21(c)(3) except that only a 3 m section of the ladder need be subjected to the static load. If the ladder fails the test, each other ladder in the lot must be tested.

(d) *Independent laboratory.* Each production test must be conducted or supervised by an independent laboratory. However, if a test is performed more than 4 different times per year, laboratory participation is required only 4 times per year. If the laboratory does not participate in all tests, the times of laboratory participation must be as selected by the laboratory. The times selected must provide for effective monitoring throughout the production schedule.

(e) *Visual examination.* The visual examination described in § 163.003–21(b) must be conducted as a part of each production test.

§ 163.003–29 Effective date and status of prior approval.

(a) Approval certificates for pilot ladders issued under Subpart 160.017 terminate on March 31, 1982.

(b) Applications for approval of pilot ladders under this subpart will be accepted on and after December 31, 1982.

(c) In previous regulations, pilot ladders were referred to as Type I—Rope Suspension Ladders.

[FR Doc. 81–37110 Filed 12–30–81; 8:45 am]
BILLING CODE 4910–14–M

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amdt. 1–166]

Organization and Delegation of Powers and Duties; Superfund

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Final rule.

SUMMARY: DOT delegates to appropriate Departmental officials functions vested in the Secretary by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 and by Executive Order 12316, Response to Environmental Damage.

DATE: This amendment becomes effective December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Robert I. Ross, Office of the General Counsel, (202) 426–4723.

SUPPLEMENTARY INFORMATION: Since this amendment relates to Departmental management, procedures, and practice, notice and comment on it are unnecessary and it may be made effective in fewer than thirty days after publication in the **Federal Register.**

Executive Order 12316 of August 14, 1981 (46 FR 42237; August 20, 1981) delegates to various officials of the Executive Branch functions vested in the President by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (94 Stat. 2796; 42 U.S.C. 9615) ("Superfund"). A number of the functions are delegated to the Secretary of Transportation specifically and a number are delegated to the Secretary of the department in which the Coast Guard is operating (currently, DOT; in case of war or order of the President, Coast Guard transfers to the Navy under 14 U.S.C. 3). This document delegates to the Commandant of the Coast Guard the second type of functions and to other appropriate DOT officials the first type.

Not all functions of the second type are being delegated to the Coast Guard. Pursuant to section 8(f) of the Executive Order, a number of these functions have been delegated to the Administrator of the Environmental Protection Agency (EPA). A copy of the agreement between DOT and EPA on those functions appears below and the delegation to Coast Guard reflects this agreement.

Finally, one section of Superfund itself vests authority directly in the Secretary: § 108(a)(3), concerning denial of entry and detention of vessels not evidencing the financial responsibility required by § 108(c)(1); that is also delegated to the Coast Guard.

PART 1—ORGANIZATION AND DELEGATION OF POWERS AND DUTIES

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations, is amended as follows:

1. Section 1.46 is amended by adding at the end thereof the following new

paragraphs (ff) and (gg), to read as follows:

§ 1.46 Delegations to Commandant of the Coast Guard.

The Commandant of the Coast Guard is delegated authority to—

* * * * *

(ff) Carry out the functions vested in the Secretary by section 108(a)(3) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (94 Stat. 2798; 42 U.S.C. 9615).

(gg) Carry out the functions vested in the Secretary by sections 2(d) (f), and (g); 3(a); and 4(b) of Executive Order 12316 insofar as they relate to—

(1) Responses to releases or threats of releases from vessels,

(2) Immediate removal action concerning releases or threats of releases at facilities other than active or inactive "hazardous waste management facilities" (as defined in 40 CFR 122.3), and

(3) Immediate removal action concerning releases or threats of releases at active or inactive "hazardous waste management facilities" only when the Coast Guard On-Scene Coordinator determines that such action must be taken pending the arrival on scene of an Environmental Protection Agency On-Scene Coordinator. Unless otherwise agreed upon by EPA and Coast Guard, this authority will not be exercised unless the EPA OSC is scheduled to arrive on scene within 48 hours of notification of the release or threat.

As used in this paragraph, "immediate removal action" includes any removal action which, in the view of the Coast Guard On-Scene Coordinator, must be taken immediately to prevent or mitigate immediate and significant harm to human life or health, to the environment, or to real or personal off-site property. Situations in which such actions may be taken include, but are not limited to, fire, explosions, and other sudden releases; human, animal, or food chain exposure to acutely toxic substances; and the contamination of a drinking water supply. All functions listed in this paragraph include the authority to contract for, obligate monies for, and otherwise arrange for and coordinate the responses included within such functions.

2. Section 1.47 is amended by adding at the end thereof a new paragraph (m), to read as follows:

§ 1.47 Delegations to Federal Aviation Administrator.

The Federal Aviation Administrator is delegated authority to—

* * * * *

(m) Carry out the functions vested in the Secretary by sections 4(a) and 5(c) of Executive Order 12316 of August 14, 1981 (46 FR 42237; August 20, 1981) (delegating sections 107(c)(1)(c) and 108(b), respectively, of the Comprehensive Environmental Response, Compensation, and Liability Act of 1981, Pub. L. 96–510), insofar as they relate to aircraft.

3. Section 1.48 is amended by adding at the end thereof a new paragraph (w), to read as follows:

§ 1.48 Delegations to Federal Highway Administrator.

The Federal Highway Administrator is delegated authority to—

* * * * *

(w) Carry out the functions vested in the Secretary by sections 4(a) and 5(c) of Executive Order 12316 of August 14, 1981 (46 FR 42237; August 20, 1981) (delegating sections 107(c)(1)(c) and 108(b), respectively, of the Comprehensive Environmental Response, Compensation, and Liability Act of 1981, Pub. L. 96–510), insofar as they relate to motor carriers.

4. Section 1.49 is amended by adding at the end thereof a new paragraph (x), to read as follows:

§ 1.49 Delegations to Federal Railroad Administrator.

The Federal Railroad Administrator is delegated authority to—

* * * * *

(x) Carry out the functions vested in the Secretary by sections 4(a) and 5(c) of Executive Order 12316 of August 14, 1981 (46 FR 42237; August 20, 1981) (delegating sections 107(c)(1)(c) and 108(b), respectively, of the Comprehensive Environmental Response, Compensation, and Liability Act of 1981, Pub. L. 96–510), insofar as they relate to rolling stock.

5. Section 1.53 is amended by adding at the end of paragraph (a) a new subparagraph (7), to read as follows:

§ 1.53 Delegations to the Administrator of the research and special programs.

Administration. The Administrator of the Research and Special Programs Administration is delegated authority to exercise powers and perform duties, including duties under the specified statutes as follows:

(a) *Pipelines.* * * *

(7) Sections 4(a) and 5(c) of Executive Order 12316 of August 14, 1981 (46 FR 42237; August 20, 1981) (delegating sections 107(c)(1)(c) and 108(b), respectively, of the Comprehensive Environmental Response, Compensation, and Liability Act of 1981, Pub. L. 96–510), insofar as they relate to pipelines.

* * * * *

(Sec. 9(e), Department of Transportation Act, 49 U.S.C. 1657(e))

Issued in Washington, D.C., on December 16, 1981.

Andrew L. Lewis, Jr.,

Secretary of Transportation.

Instrument of Redelegation

In accordance with Section 8(f) of Executive Order 12316 of August 14, 1981, the Secretary of the Department in which the Coast Guard is operating hereby redelegates to the Administrator, Environmental Protection Agency, subject to the Administrator's consent, all functions specified in sections 2(d), 2(f), 2(g), 3(a), and 4(b) of that Executive Order with the exception of the following:

a. Functions related to responses to releases or threats of releases from vessels;

b. Functions related to immediate removal action concerning releases or threats of releases at facilities other than active or inactive "hazardous waste management facilities" (as defined in 40 CFR 122.3); and

c. Functions related to immediate removal action concerning releases or threats of releases at active or inactive "hazardous waste management facilities" when the Coast Guard On-Scene Coordinator determines that such action must be taken pending the arrival on scene of an Environmental Protection Agency On-Scene Coordinator. Unless otherwise agreed upon by EPA and Coast Guard, this authority will not be exercised unless the EPA OSC is scheduled to arrive on scene within 48 hours of notification of the release or threat.

For purposes of this instrument: the term "immediate removal action" includes any removal action which, in the view of the Coast Guard on-Scene Coordinator, must be taken immediately to prevent or mitigate immediate and significant harm to human life or health, to the environment, or to real or personal offsite property. Situations in which such action may be taken include, but are not limited to, fire, explosions, and other sudden releases; human, animal, or food chain exposure to acutely toxic sutstances; and the contamination of a drinking water supply.

All functions described in this instrument, whether redelegated or retained, include the authority to contract for, obligate monies for, and otherwise arrange for and coordinate the responses included within such functions.

Andrew L. Lewis, Jr.,

Secretary of Transportation.

October 2, 1981.

I hereby consent to the redelegation as set forth in this instrument.

Anne M. Gorsuch,

Administrator

October 9, 1981.

BILLING CODE 4910-62-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Kangaroos; Effect of Final Decision To Permit Commercial Importation

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of interpretation.

SUMMARY: On April 29, 1981, the Service published in the **Federal Register** (46 FR 23929) a notice of final agency action authorizing the importation for commercial purposes of hides and parts of the red kangaroo (*Megaleia rufa*), the eastern gray kangaroo (*Marcropus giganteus*) and the western gray kangaroo (*Macropus fuliginosus*), species listed as threatened pursuant to the Endangered Species Act of 1973, 50 CFR 17.12. By this notice the Service notifies the public of the effect of the April 29, 1981 action in terms of interstate commerce in red, eastern gray, and western gray kangaroo hides and parts.

ADDRESSES: Questions concerning this notice may be addressed to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240 (703–235–2771).

SUPPLEMENTARY INFORMATION: The red, eastern gray, and western gray kangaroos were listed as threatened pursuant to the Endangered Species Act of 1973 on December 16, 1974 (39 FR 44990). This listing prohibited the commercial importation of these kangaroos [50 CFR 17.40(a)(1)(i)], and also prohibited interstate commerce in unlawfully imported kangaroo [50 CFR 17.40(a)(1)(iii)]. Since the red, eastern gray, and western gray kangaroo are foreign species, the effect of the regulation was to make unlawful both importation of, and interstate commerce in, these species.

At the time of the listing, however, it was stated [50 CFR 17.40(a)(1)(i)(B)] that:

> Upon receiving from the Australian Government a certificate that (1) a particular Australian state has developed an effective sustained-yield program for such wildlife and (2) the taking of such wildlife in that state will not be detrimental to the survival of the species or subspecies of which such wildlife is a part, the Director may, consistent with the purposes of the Act, permit by publication in the **Federal Register** the commercial importation of any such wildlife originating from the state. . . .

In an April 29, 1981 **Federal Register** notice (46 FR 23929), the Service announced that the Australian States had met the conditions of 50 CFR 17.40(a)(1)(i)(B) for resuming commercial trade with the United States in the three kangaroo species. Commercial importation of kangaroo from these states was therefore permitted provided certain conditions relating to point of entry were met. Since the prohibition against interstate commerce applies only to unlawfully imported kangaroo and importation is now lawful, interstate commerce in these species is now also lawful. *See* 50 CFR 17.40(a)(1)(a)(1)(iii).

The Service thus interprets its April 29, 1981 action as authorizing, pursuant to an exemption provided for by regulation, [50 CFR 17.40(a)], the importation of, and interstate commerce in, the red, eastern gray, and western gray kangaroo.

G. Ray Arnett,

Assistant Secretary of the Interior.

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 675

Foreign Fishing; Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule implementing the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP). The FMP governs fishing for groundfish by United States and foreign fishing vessels in those parts of the Bering Sea and Aleutian Islands area that are subject to Federal fishery management jurisdiction under the Magnuson Fishery Conservation and Management Act. This action is necessary to assure optimum utilization while preventing overfishing of groundfish resources, and to ensure the regular collection of reliable information concerning the developing United States groundfish fishery. It is expected that this action will accomplish these objectives and that experience gained in applying the rule will provide insights concerning ways in which the efficiency and effectiveness of this fishery's management can be improved.

EFFECTIVE DATE: January 1, 1982, for all sections except §§ 611.93(d), 675.4, and 675.5(a). Section 675.4, Federal permits, and § 675.5(a), domestic reporting requirements, are not effective until February 1, 1982. Notice of the effective date of § 611.93(d) will be published later in the **Federal Register.**

ADDRESSES: Communication concerning this rule may be addressed to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802.

FOR FURTHER INFORMATION CONTACT: Robert W. McVey, (907) 586–7221.

SUPPLEMENTARY INFORMATION:

Introduction

On October 19, 1979, the Assistant Administrator for Fisheries, NOAA (Assistant Administrator) preliminarily approved the fishery management plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP), under section 304 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, 90 Stat. 331, as amended, 16 U.S.C. 1801 *et seq.*, (Magnuson Act)). The FMP had been prepared by the North Pacific Fishery Management Council (Council) under Magnuson Act sections 302 and 303 to govern fishing for groundfish by United States and foreign vessels in the fishery conservation zone (FCZ) of the Bering Sea and of that part of the North Pacific Ocean adjacent to Alaska west of 170° W. longitude. The FCZ, over which the Magnuson Act extends the exclusive fishery management authority of the United States, includes ocean areas lying between the seaward boundary of the State of Alaska (the "three-mile limit") and a line each point of which lies two hundred miles from the baseline used to measure the territorial sea, except for those areas lying west of the United States-Russia Convention line of 1867. The Assistant Administrator, acting under a delegation of authority from the Secretary of Commerce, has primary authority under the Magnuson Act for regulating fisheries carried out in the FCZ by all United States and foreign vessels. In addition, a State may enforce regulations consistent with those of the Assistant Administrator governing fishing in the FCZ by vessels "registered under the laws" of that State.

Pursuant to Magnuson Act section 305(a), the Assistant Administrator published the FMP and proposed regulations to implement the FMP in the

Federal Register on November 19, 1979, inviting public comments on both the FMP and the proposed regulations for 45 days ending January 18, 1980 (44 FR 66356). In light of the comments received and other information obtained following publication of the FMP and proposed regulations, the Assistant Administrator decided that a revised draft environmental impact statement (EIS) should be prepared on the proposed implementation of the FMP under the National Environmental Policy Act. The revised draft EIS was released for public review and filed with the Environmental Protection Agency on September 19, 1980. A final EIS, based upon the draft, the public comments received on the draft, and other information obtained since the release of the draft, was released and filed on November 20, 1981.

In addition to the original FMP, the EIS deals with certain amendments to the FMP that have been adopted or considered by the Council. These include Amendments 1a and 2, discussed further below. Public comments on these amendments to the FMP and proposed implementing regulations were published for a 45 day comment period on October 29, 1981 (46 FR 53475).

A draft regulatory analysis (RA) on implementation of the FMP was prepared in accordance with Executive Order 12044, 43 FR 12261 (March 24, 1978). Subsequently, Executive Order 12044 was superseded by Executive Order 12291, 46 FR 13193, February 19, 1981, requiring the preparation and submission to the Office of Management and Budget (OMB) of a regulatory impact analysis (RIA) on any "major rule." In addition, the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1165, 5 U.S.C. 601 *et seq.*), requiring the preparation of a regulatory flexibility analysis (RFA) on any rule which has been determined by the Administrator of NOAA "have a significant economic impact on a substantial number of small entities" took effect on January 1, 1981.

Under interim procedures required by the National Marine Fisheries Service (NOAA) to implement Executive Order 12291 and the Regulatory Flexibility Act, a regulatory impact review (RIR) was prepared that analyzed the extent to which this final rule may be burdensome or would significantly impact a number of small business entities. On the basis of this analysis, the Administrator has determined that the final rule is not major under Executive Order 12291 and is not significant within the meaning of the Regulatory Flexibility Act.

The Assistant Administrator, upon consideration of the comments received on the notice of proposed rulemaking:

(1) Finds that the FMP is consistent with the National Standards of Magnuson Act section 301, with other provisions of the Magnuson Act, and with other applicable law; and

(2) Promulgates this final rule to implement the FMP.

The Assistant Administrator takes this action under Magnuson Act section 305(c).

The final rule includes certain reporting requirements, which have been approved by the Director, Office of Management and Budget, under the Paperwork Reduction Act of 1980. The OMB control numbers are as follows:

Federal Permit application, OMB 648-0097; domestic reporting requirements, OMB 648-0016; domestic intent to process form, OMB 648-0114. Domestic fishermen should note that the Federal requirement that a State of Alaska fish ticket be submitted for each sale or delivery of groundfish within the State of Alaska, proposed at § 675.5 (a), has been eliminated. These final regulations do not duplicate valid State of Alaska reporting requirements, which remain in effect with respect to fishing for groundfish in the Bering Sea and Aleutian Islands area. The recordkeeping provisions at § 611.93(d) have been submitted to OMB. They are not effective until OMB approval has been obtained. A notice will be published in the Federal Register at that time.

A number of specific points were raised in the comments on the notice of proposed rulemaking, and these are responded to below. Comments on the draft EIS are responded to in the final EIS. In addition, several issues were raised repeatedly in the sources of information enumerated above. These sources draw heavily upon experience gained in the actual management of the foreign fishery during the past five years under the Preliminary Fishery Management Plan for the Trawl Fisheries and Herring Gillnet Fishery of the Bering Sea and Northeast Pacific (PMP). During this time, the PMP and its implementing rules have prescribed management measures for the foreign fishery that are substantially identical to those of the FMP. These general issues, which received detailed treatment in the sources mentioned above, will now be discussed in turn.

General Issues Concerning Approval and Implementation of the FMP

1. *Treatment of "Prohibited Species" Under the FMP*

The most controversial issue that was considered by the Council and the Assistant Administrator during the development and review of the FMP was whether and what kinds of restrictions should be imposed on foreign groundfish operations for the protection of "prohibited species," in addition to the restrictions imposed for that purpose by current regulations on foreign fishing operations in the FCZ generally.

The groundfish species of the Bering Sea and Aleutians that are the primary targets of the fishery governed by the FMP are commingled throughout their range, and particularly in the eastern Bering Sea, with salmon, halibut, king crab, and Tanner crab, as well as with a wide variety of other marine life. The trawl gear that currently provides the most efficient means of exploiting most groundfish in the area, particularly the vast pollock stocks, is unselective, catching all forms of marine life that it encounters, whether or not it is a target groundfish species. Because of the close association of the target groundfish species with other forms of marine life, the Council and Assistant Administrator could have included the "incidental catch" of all those other marine life forms, except for marine mammals, in the fishery covered by the FMP under the wide discretion granted them by Magnuson Act section 306, which defines the term "fishery" as one or more stocks of fish which can be treated as a unit for purposes of conservation and management and which are identified on the basis of "geographic, scientific, technical, recreational, and economic characteristics," and "any fishing for such stocks." Once the incidental catch of these other marine life forms was included as part of the "fishery," it would have constituted part of the "optimum yield" (OY) of the fishery, to be allocated between United States and foreign vessels in a manner related to their respective expected harvests of the target groundfish species. In fact, the FMP treats the great majority of the marine life that is caught incidentally to the target groundfish species in just this way. It divides them into "other species," which have some commercial value, to which a single OY figure applies, and "nonspecified species," a residual category of creatures having little or no current commercial value, the OY for which is defined as the amount actually taken

incidentally to the harvest of the "target" and "other" groundfish species. Both types of species, like the target groundfish species, may be retained when caught.

While the Magnuson Act would have permitted similar treatment of salmon, halibut, king crab, and Tanner crab, both the Council and the Assistant Administrator have determined as a matter of policy that they should be treated more stringently. Unlike most of the other species that are caught incidentally to the groundfish fishery, each of these four types of fish is the target in its own right of one or more other fisheries which are extemely lucrative to the United States fishermen. In addition, they are so valuable in comparison to the target groundfish species that there is strong reason to believe that vessels ostensibly fishing for groundfish would begin to target on the salmon, halibut, or crabs if they were allowed to be retained. In recognition of this situation, which also exists for other species in other regions of regulation, 50 CFR 611.13 designates a category of "prohibited species" which may not be targeted upon, the incidental harvest of which must be minimized, and which may not be retained.

A species may be declared "prohibited" to foreign vessels by excluding it from the "fishery" to which a FMP applies, so that its incidental harvest in that fishery does not form a component of that fishery's OY. Because no OY figure is recognized for the species in that fishery, none of it can be allocated as part of the total allowable level of foreign fishing (TALFF) for that fishery, and it is a prohibited species to that fishery.

Until 1981, salmon, halibut, Tanner crab and king crab, as well as several fish of lesser importance, were treated as prohibited species and made subject to the requirements of 50 CFR 611.13 without any additional limitations. Foreign vessels in the groundfish fishery were therefore required only to minimize their incidental catch of these species and to return them to the seas with a minimum of injury regardless of condition. In addition, certain time and area closures, such as those of the Bristol Bay Pot Sanctuary and the Winter Halibut Savings Area, were imposed partly to reduce incidental catches of crab and halibut.

During 1979 and 1980, however, it appeared that the incidental catch of chinook salmon in the groundfish fishery had risen sharply. This gave rise to concern by residents of western Alaska, who harvest these salmon for commercial and subsistence purposes when they return to spawn in the Yukon and Kuskokwim river systems that continuation of the foreign groundfish fishery in the Bering Sea without further restrictions would endanger the Alaskans' livelihood. Through administrative and judicial means, they sought unsuccessfully to have the eastern Bering Sea closed to foreign groundfish trawling between October and March, the period when the concentration of Alaska salmon in that area is highest. Subsequently, they entered into negotiations with representatives of the Japanese groundfish trawl industry to arrive at mutually agreeable measures for further limitation and reduction of the incidential chinook salmon catch. They agreed upon a system by which an area of the central Bering Sea would be closed for the winter to trawling after a certain annual amount of salmon had been caught incidentially by the foreign groundfish fishery. This amount was 65,000 fish for calendar year 1981 and 55,250 fish for 1982. The Council adopted this agreement as Amendment 1a to the FMP. Proposed rules to implement the amendment were published on October 9, 1981 (46 FR 53475).

Concurrently with the controversy and negotiated settlement concerning the incidental catch of salmon, the Council has been considering more comprehensive and permanent proposals for the long term reduction of prohibited species incidental catches. At its meeting of September 24–25, 1981, the Council adopted Amendment 3 to the FMP, prescribing management standards and procedures designed for this purpose, and treating halibut, king crab, and Tanner crab, as well as salmon.

2. Treatment of Herring Under the FMP

Pacific herring is an unavoidable incidental catch in the groundfish trawl fishery of the Bering Sea and Aleutian Islands Area, particularly in the eastern Bering Sea. From 1977 through 1979, foreign vessels were allowed to catch and retain Pacific herring under the PMP's herring regulations. However, the U.S. District Court in Alaska nullified the PMP's herring regulations, and there has been no foreign fishery for herring in 1980 or 1981. Instead, herring have been treated as a prohibited species.

The Assistant Administrator has determined that the herring provisions of the PMP will remain in effect when this Bering Sea and Aleutian Islands Area groundfish FMP is implemented. Because data on the herring stock are scanty when the herring are offshore, the special reporting requirements under the PMP are retained in § 611.93(d) of these final regulations, and expanded to include the reporting of retained "non-specified species." This section requires foreigners to notify the U.S. Coast Guard when they enter or leave the geographic area in which herring congregate during September through April, and to provide weekly reports of the herring catch, even though herring must be discarded.

The Council is preparing an FMP for herring. It probably will limit offshore harvest to the true incidental catch rate. A limited foreign fishery on herring may be allowed in special circumstances.

3. The Effects of the Fishery Under the FMP on Marine Mammals and Birds and Endangered Species

In a biological opinion issued under section 7 of the Endangered Species Act of 1973, the Assistant Administrator concluded that implementation of the FMP would not jeopardize the continued existence of endangered whales in the Bering Sea and Aleutians, or their critical habitat. This opinion is included as part of the final EIS. The fishery, as it would be carried out under the FMP would, however, have significant effects on other marine mammal species in the area, including pinnipeds and sea otters, which occur in great numbers. (Many of the marine mammals are relied upon for subsistence by Alaska Natives.) These effects are of two major kinds: direct injury of marine mammals by groundfish trawl gear, and food competition by the fishery with marine mammals. Like the other forms of marine life discussed above, marine mammals caught in groundfish trawl gear are unlikely to survive. Marine mammals feed on the target groundfish species, and there is evidence that their numbers in recent years have been lower than they would have been in the absence of the groundfish fishery. Both of the effects of the fishery appear to have had the greatest impact on the northern sea lion and the northern fur seal. The OY specifications for groundfish prescribed in the FMP have been depressed in order to reduce the level of food competition with marine mammals. In addition, the Assistant Administrator has determined, on the basis of information presented in the FMP and the final EIS, that all marine mammals that are likely to be affected significantly by the fishery are at their optimum sustainable population (OSP) levels, and are not likely to be reduced to levels below OSP by the fishery as it would be conducted under the FMP. Fishery operations that are likely to result in the direct taking of marine mammals must be conducted under a certificate of inclusion issued by the Assistant Administrator under a general permit for the taking of marine mammals

incidental to commercial fishing operations. The Assistant Administrator has therefore concluded that implementation of the FMP will comply with both the spirit and the letter of the Marine Mammal Protection Act of 1972.

The fishery also has the same kinds of effects, though probably to a lesser extent, on the many marine birds that inhabit the Bering Sea and Aleutians, including some species that are protected under the Migratory Bird Treaty Act (MBTA). Birds protected under the MBTA tend to congregate in the area of groundfish trawling operations, and are occasionally captured in the trawl gear. Any such capture that was intended or negligently caused by those conducting the trawling operations would be a "taking" in violation of the MBTA.

The question has been raised whether food competition between the fishery and marine birds might not constitute a "taking" of such birds under the MBTA. The Assistant Administrator's analysis of judicial interpretation of the MBTA reveals that the courts have extended the MBTA's concept of "taking" beyond its longstanding reference to hunting or other direct killing or wounding of birds to include certain limited circumstances in which birds are directly poisoned by toxic pollutants released into the environment in ways that give rise to liability for negligence or to strict liability at common law. *United States* v. *Corbin Farm Service*, 44 F. Supp. 510 (E.D. Cal.), *affirmed in part*, 578 F.2d 259 (9th Cir. 1978); *United States* v. *FMC Corporation*, 428 F. Supp. 615 (W.D.N.Y. 1977), *affirmed* 572 F.2d 902 (2nd Cir. 1978). Thus, the fact that fishing operations under the FMP may compete to some extent with migratory birds for food does not appear to render these operations in violation of the MBTA.

4. Whether Additional Restrictions Should Be Imposed on the Use of Bottom Trawls

It is believed that the use of trawl gear that is deployed several feet from the ocean floor would substantially reduce the adverse effects of groundfish trawling on the benthic environment and would reduce incidental catches of crab and halibut. Almost all trawl gear currently in use in the Bering Sea and Aleutians remains in contact with the bottom during fishing operations. Despite the benefits of off-bottom trawl gear, the Assistant Administrator has determined that a requirement that it be used should not be included in the FMP at this time. Because flounders and other flatfish that are heavily relied upon by both the foreign and the United States groundfish fisheries cannot be caught with off-bottom trawl gear, it is highly likely that any off-bottom requirement extensive enough to have significant benefits would cause great economic distress to current participants in the fishery, and would leave flatfish resources largely unutilized. If an off-bottom requirement is found to be particularly helpful in limited areas, it might be imposed in such areas through later amendment of the FMP. The Assistant Administrator considers it more realistic to expect longline harvest of flatfish to substitute economically for trawling in such limited areas rather than in the entire fishery area. When more limited areas are subjected to an off-bottom requirement, foreign trawl vessels already in the fishery can shift to other areas and foreign longline vessels already available to the fishery can intensify their efforts in the more limited areas without a massive dislocation of capital investment. An off-bottom requirement throughout the fishery imposed on United States fishing vessels would also seriously cripple United States efforts to establish a viable groundfish fishery. This would be contrary to the purposes of the Magnuson Act. Even if imposed in limited areas, an off-bottom trawl requirement would be difficult to enforce without greatly increased enforcement resources.

5. Limitations on Fishing by United States Vessels in the Bristol Bay Pot Sanctuary and the Winter Halibut Savings Area

The FMP as adopted by the Council imposes certain restrictions on groundfish fishing by United States vessels in the Bristol Bay Pot Sanctuary and the Winter Halibut Savings Area, which lie just north of the Alaska Peninsula and northern Aleutians. The FMP would allow United States vessels to trawl in the Pot Sanctuary only during open seasons for United States crab fisheries. It would allow United States trawling in the Savings Area between December 1 and May 31 only until the United States trawl catch of groundfish equaled 2,000 metric tons (mt); and would permit United States longlining landward of the 500 meter isobath only until the United States longline catch of groundfish, excluding halibut, equaled 2,000 mt. More stringent restrictions in foreign fishing would be imposed in each area.

Following adoption of the FMP by the Council, representatives of United States groundfish fishing interests protested against the proposed restrictions on United States fishing in the Pot Sanctuary and Savings Area. Following publication of the notice of proposed rulemaking, the Council voted to decrease the size of the Savings Area by eliminating the "Misty Moon" grounds south of the Pribilof Islands, and also voted to allow a closely monitored United States groundfish fishery in both the Pot Sanctuary and the Savings Area on a year-round basis. These changes to the FMP have been incorporated into Amendment 1, which is now under review by the Assistant Administrator. Even though Amendment 1 has not yet been approved, the Assistant Administrator has decided to accommodate the concern of the United States groundfish industry, and the Council's intent by deleting from this final rule any provisions that would implement the current restrictions in the FMP on United States fishing in both the Pot Sanctuary and Savings Area. Restrictions on foreign fishing in the "Misty Moon" grounds also are deleted.

6. Implementation of the FMP Before Amendments 1 and 3 Are Approved and Implemented

Four amendments to the FMP have thus far been adopted by the Council and submitted to the Secretary for approval. Amendment 1 puts the OY specification for target and "other" groundfish species on a multispecies basis, with provision for fluctuation from year to year in the total OY and the allowable catch of each species group. Amendment 1 also increases the authority of the Secretary to impose in-season time and area closures; revises the estimates of DAH; changes the restrictions on United States fishing in the Pot Sanctuary and Savings Area, as described above, as well as reducing the size of the Savings Area; and specifies that the fishing year under the plan is the same as the calendar year.

Amendment 1a incorporates into the FMP the measures for reducing the salmon incidental catch, described above. Amendment 2 changes certain allowable catch specifications for Pacific cod and yellowfin sole, reflecting recent increases in the United States harvest of those species. Amendment 3 introduces to the FMP the comprehensive management measures for conservation of prohibited species discussed above.

The Assistant Administrator has not yet completely evaluated Amendments 1 and 3, or the scientific information on which they are based. He has concluded, however, that there is nothing in the information upon which these amendments were based that would render the FMP, as implemented by this final rule, inconsistent with the Magnuson Act or other applicable law,

even if that information is eventually accepted by the Assistant Administrator as the best available scientific information. Except for Pacific cod and yellowfin sole, the data on stock condition upon which Amendment 1 is based would support the OY level currently specified in the FMP. The DAH figures set forth in Amendment 1 can, with the exception of the figures for these two species, be effected through the FMP's current flexible system of reserve releases, a fact that has been demonstrated by practice under the PMP. As was discussed above, the incidental catches of halibut, king crab, and Tanner crab have not presented the same problems as those of salmon in recent years, so that the FMP can be implemented before the approval and implementation of Amendment 3 without the serious risk of harm to these species.

In contrast with Amendments 1 and 3, Amendments 1a and 2 respond to significant changes in relevant information about the fishery that have occurred since the FMP was adopted by the Council. While opinions on the urgency of the two amendments, particularly Amendment 1a, have differed, the Assistant Administrator considers both of them, in light of the new information, to be highly desirable additions to the FMP that should be implemented as soon as possible. The Assistant Administrator has evaluated the new information upon which these two amendments are based in his consideration of similar amendments to the PMP, which he has implemented, and has found that information to be the best scientific information available. Amendments 1a and 2, published as proposed rules on October 29, 1981 (46 FR 53475) will be implemented early in 1982.

More detailed discussion of these general issues, as well as others that were raised in the course of the FMP's development and consideration, can be found in the final EIS and the RIR, as well as in the FMP itself and its amendments. All of these documents are available free of charge upon request from the Regional Director at the address listed above.

Responses to Specific Comments on the Notice of Proposed Rulemaking

In response to the notice of proposed rulemaking, the Assistant Administrator received comments on the FMP and proposed rules from ten interested persons, agencies, and organizations. The substantive points raised in these comments will now be addressed. The names of those submitting each comment appear after the comment, in parentheses.

(1) *Comment:* The eastern Bering Sea should be closed to foreign trawling from November 1 through March 1 to reduce the incidential catch of salmon. (Nunam Kitlutsisti)

Response: Amendment 1a to the FMP responds to this concern as was discussed above. Nunam Kitlutsisti is a party to the agreement with the Japanese trawl industry upon which Amendment 1a is based.

(2) *Comment:* The original FMP's restrictions on fishing by United States vessels in the Pot Sanctuary and Halibut Savings Area are so stringent as to threaten the development of United States groundfish fisheries, and should be relaxed. (Steuart Fisheries, Marine Resources Company, Daniel E. Webster, Marine Construction and Design Company)

Response: The Council has voted to relax the original FMP's restrictions on United States fishing in the Pot Sanctuary and Savings Area, as was discussed above, and the new measures are part of Amendment 1. Pending approval and implementation of Amendment 1, the restrictions currently contained in the FMP will not be implemented by this final rule.

(3) *Comment:* The OY for Pacific cod should be raised in light of a recent increase in abundance. (Japanese fishing industry)

Response: Amendment 2 raises the Pacific cod OY.

(4) *Comment:* The OY for the fishery, and particularly the pollock component of the OY, should be increased. (Government of Japan; North Pacific Fisheries Development Association of Korea)

Response: Given the best available scientific information, as determined by the Council and the Assistant Administrator, and the objectives of rebuilding depleted stocks and minimizing the impact of the groundfish fishery on other components of the ecosystem, the OY specifications of the FMP as modified by Amendment 2 are appropriate.

(5) *Comment:* A separate pollock OY should not be specified for the Aleutians. (Government of Japan)

Response: The Assistant Administrator has concluded that there is good evidence supporting the contention that the deep-water pollock resource found in the Aleutians is a separate stock. Therefore, a separate OY for this stock should be specified for the time being.

(6) *Comment:* The DAH specifications contained in the FMP are too high. (Government of Japan, North Pacific Longline-Gillnet Association)

Response: While the DAH specifications are generally much higher than the amounts of fish actually taken by United States fishermen in previous years, the erratic situation of the United States fishery and the sudden spurts of growth that have occurred in the past due to joint ventures or other markets make initial high DAH specifications reasonable. If, in the course, of the year, these amounts are not taken by United States vessels, the unused portions may be reassigned to TALFF.

(7) *Comment:* Because the DAH specifications are too high, there should be no reserves if DAH is left at the current level. (Government of Japan)

Response: See response to the immediately preceding comment. It has already proved necessary to supplement DAH for yellowfin sole, pollock, Atka mackerel, and "other species" with reserves under the identical provisions of the PMP.

(8) *Comment:* The FMP's provisions for transferring unused DAH and reserves to TALFF are desirable. (Government of Japan, North Pacific Longline-Gillnet Association)

Response: Comment noted.

(9) *Comment:* The introduction of the "nonspecified species" component of OY is desirable. (Government of Japan, North Pacific Longline-Gillnet Association)

Response: Comment noted.

(10) *Comment:* The FMP's establishment of a longline sanctuary is desirable. (North Pacific Longline-Gillnet Association)

Response: Comment noted.

(11) *Comment:* The foreign longlining restrictions in the Savings Area are unduly severe, because longlining results in a lower incidental catch of halibut than other fishing methods and most of them are returned to the sea alive and in good condition. (North Pacific Longline-Gillnet Association)

Response: The council and the Assistant Administrator regard protection of halibut in the Savings Area to be so important as to make even the limited foreign longline incidental catch undesirable. This is particularly so in light of the poor condition of the halibut resource in the Bering Sea and the relaxation of the restrictions on United States trawling originally contained in the FMP.

(12) *Comment:* A foreign nation's longline fishery should not be closed when that nation's allocation of "other species" is taken, because longline fisheries do not take any of the "other species" except for sculpins. This

provision fails to reflect the transfer rattails to the "nonspecified species" category. (North Pacific Longline-Gillnet Association)

Response: Comment accepted. The reference to "other species" in the FMP and regulatory provisions on fishery closure should have been changed as part of the introduction of the "nonspecified species" category, and appropriate changes are made in these final rules.

(13) *Comment:* The 500 meter isobath, which the FMP specifies as a boundary between open and closed fishing areas, is difficult to comply with and enforce, as there is no corresponding contour depicted on nautical charts. It should be replaced with specified distances from shore or geographically defined zones. (U.S. Coast Guard)

Response: This problem will be brought to the attention of the Council. While the Assistant Administrator cannot unilaterally make the suggested changes, and while the problem does not appear to warrant further delay in the FMP's implementation, this difficulty is worthy of prompt investigation.

(14) *Comment:* Prohibited species mortality would be reduced if the FMP either imposed a time limit within which catcher vessels must deliver cod ends to mother ships, or required that each catcher vessel sort its own catch for prohibited species before delivering it to a mother ship. (U.S. Coast Guard)

Response: The Assistant Administrator has considered such measures both for this and other fisheries. He has concluded both that such requirements would be extremely difficult to enforce and that the additional costs they would impose on foreign fisheries would be far out of proportion to any reduction in prohibited species mortality. Most salmon and halibut mortality seems to occur soon aftef the cod end is brought aboard the catcher vessel as a result of crushing, and could not be prevented even by prompt sorting of the catch.

(15) *Comment:* The FMP should require that foreign vessels provide a certified hold plan to enforcement personnel; and that they contain more prominent identifying markings. (U.S. Coast Guard)

Response: Both of these requirements are desirable. They are, however, relevant to enforcement needs nationwide and will be addressed by the Assistant Administrator on a more comprehensive basis.

(16) *Comment:* The rule's definition of "vessel of the United States" should be changed to include any vessel documented under the laws of the United States; any vessel numbered by a State or the Federal government under the Federal Boat Safety Act of 1971; and any non-powered vessel owned by a United States national and operated from a United States port. (U.S. Coast Guard)

Response: The rule's definition of "vessel of the United States" includes any vessel documented or numbered by the Coast Guard and any vessel which is "registered under the laws of any State." The comment appears to reflect an erroneous assumption that "registration" under State law is limited to vessel numbering by States under the Boat Safety Act. This is not the case, and the Assistant Administrator, as well as certain courts that have addressed the matter, have treated State "registration" under the Magnuson Act to include a broader range of the State fishing vessel licensing. One change that will be made to conform the rule to the definition of this term in the foreign fishing regulations is to clarify that registration under the laws of a State alone will make a vessel a "vessel of the United States" only if it weighs less than five net tons, and is therefore not subject to Federal registration.

(17) *Comment:* Both United States fishermen and enforcement personnel would benefit if fishermen were advised to monitor Channel 16, VHF–FM, or 2182 KHz for instructions; and if it were made clear that visual signals might also be used. (U.S. Coast Guard)

Response: Comment accepted. The suggested changes have been made.

(18) *Comment:* Formal constraints should be placed upon the discretion of the Regional Director to delegate his authority under the rule. (Steuart Fisheries)

Response: Since ultimate responsibility lies with the Secretary of Commerce, the proposed provision has been deleted from the final regulations.

(19) *Comment:* It is unclear whether the permit for a United States vessel to take part in the fishery remains valid if there is a change of ownership or gear, or if the vessel is chartered. (Steuart Fisheries)

Response: United States vessel permits for the fishery do not specify or restrict the kind of gear to be employed. A charterer of a permitted vessel does not require a new permit. The Regional Director must be notified within thirty days of a change of ownership, or of any other fact set forth in the permit application, but the permit will remain in effect unless the Regional Director takes affirmative action to revoke it.

(20) *Comment:* The Magnuson Act authorizes only the revocation of foreign vessel permits. To allow the revocation or suspension of a United States vessel permit for use of the vessel in the commission of a violation of the Magnuson Act would allow the government to impose a drastic penalty for minor violations or violations based on honest differences in interpretation. (Steuart Fisheries)

Response: 50 CFR Part 621, Subpart D, governs the imposition of permit sanctions under the Magnuson Act. Section 621.51(c) specifically provides that sanctions may be imposed on United States vessel permits. Neither section 303(b)(1) nor any other provision of the Magnuson Act limits the agency's authority to impose such sanctions on United States vessels. An entire section of the Magnuson Act, section 204, is devoted to foreign vessel permits, and this section provides for many details, including imposition of permit sanctions, that are left to the agency's discretion under the very general provisions of section 303(b)(1). United States participants in this fishery who commit serious violations of the Magnuson Act and this rule will be subject to permit sanctions, seizure and civil forfeiture, civil penalties, and criminal prosecution to the same extent as serious foreign violators. Each type of sanction is imposed only through administrative and judicial procedures, including opportunities for formal hearings, designed to ensure, among other things, that the penalty is proportionate to the seriousness of the violation.

(21) *Comment:* Because the State of Alaska might change the information required on its fish tickets, the rule should specify exactly what information fishermen must report for Federal purposes, rather than simply requiring submission of a State of Alaska fish ticket or equivalent document. (Steuart Fisheries)

Response: Because of the State of Alaska's expertise in collection of fishery data, the Assistant Administrator considers it advisable to retain the flexibility to implement improvements in the fish ticket form without amendment of the rule. Such changes would, however, be subject to the safeguards of the Paperwork Reduction Act of 1980.

(22) *Comment:* The requirements that United States fishermen submit catch reports within one week after sale or delivery and that United States processors submit reports on fish handled by them are excessively burdensome and unnecessary. (Steuart Fisheries)

Response: The Assistant Administrator disagrees with these assertions. The lack of data on the groundfish stocks subject to this fishery

represents the greatest obstacle to its sound conservation and full utilization. In season management measures and decisions on allocation among United States and foreign fishermen require that the progress of the fishery be closely monitored. It is imperative, therefore, that timely, accurate information on their catches be provided by United States fishermen. Most businesses maintain weekly records and therefore should be able to provide catch information within one week, if not sooner. Failure of United States fishermen to report their catches fully will merely increase the size of the allocations to the foreign fishery, for lack of evidence that the resource is being used by United States fishermen. Reports by United States fish processors on the amount of fish utilized by them is necessary for a determination of the amount of United States-harvested fish, if any, that can be made available to foreign processing vessels through joint ventures.

(23) *Comment:* The rule should clearly state that information required to be submitted under it is subject to the Magnuson Act's confidentiality requirements and that such information will not be used for enforcement purposes. (Steuart Fisheries)

Response: Information required to be submitted under this rule is subject to the confidentiality provisions of Magnuson Act section 303(d) and of 50 CFR Part 603. Nothing in these provisions forbids the use of such information by NOAA for enforcement purposes, and it will be so used to the extent consistent with other law.

(24) *Comment:* The rule's requirement that prohibited species be avoided and that the catch be sorted as soon as possible is unrealistic. In addition, the rebuttable presumption that any prohibited species on board was caught and retained in violation of the rule could result in penalties for a species that was on board only a short time after a catch was retrieved. The only rebuttable presumption authorized by the Magnuson Act is that of section 310(3) relating to civil forfeiture of vessels or catch. (Steuart Fisheries)

Response: The requirements on avoidance and sorting of prohibited species contained in the rule have been applied successfully in the foreign fishery for several years and are the backbone of the effort to minimize the impact of the groundfish fishery on these species. If anything, more stringent measures can be expected to be imposed on both foreign and United States participants in the groundfish fishery in future years. The rebuttable presumption that prohibited species found on board were taken and retained in violation of the rule is in addition to and distinct from the statutory presumption of Magnuson Act section 310(3) that all fish on board a seized fishing vessel were taken or retained in violation of that act. It should be apparent that the presumption would be rebutted if the prohibited species in question had just been brought on board with a groundfish catch before a reasonable time for sorting the catch had passed.

(25) *Comment:* It is indefensible to halt all fishing for groundfish when the OY for any single species group has been attained. (Steuart Fisheries)

Response: Because of the nonselective nature of most groundfish fishing gear, especially trawl gear, this measure is necessary for adequate conservation of the fishery. It has applied for years to foreign operations in this fishery and to both foreign and United States groundfish fisheries in the Gulf of Alaska.

(26) *Comment:* It is unfair to allow longlining to continue even after the OY for certain species has been attained when trawling must stop. (Steuart Fisheries)

Response: This difference in the treatment of longline and trawl gear is based on the facts that longline gear is more selective than trawl gear and that a much higher percentage of the fish caught on longline gear can be returned to the sea in viable condition.

(27) *Comment:* The rule should specify the procedures other than publication in the **Federal Register** to be used to publicize field orders. The 48-hour notice currently provided for in the State procedures, which are referred to in the rule, is insufficient. Closures without full opportunity for prior public comment should be allowed only in cases of true emergency. (Steuart Fisheries)

Response: The State of Alaska procedures for publicizing field orders have proven to be effective over a long period of time, and 48-hour notice of closures is sufficient to ensure that participants are adequately informed. The risk of closures on short notice is one that participants in any fishery, no matter how large, must be prepared to accept, due to the fluctuating characteristics of fishery resources. There is no reason to specify the State's procedures in detail in the rule, and this would simply make it more difficult for improvements in the procedure to be made. Closures by field order without prior public comment will be imposed only when there is "good cause" within the meaning of the Federal Administrative Procedure Act for not providing prior public notice and opportunity for comment.

Classification

As was discussed above, the NOAA Administrator has determined that this rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291, because it will not result (1) in an annual effect on the economy of $100 million or more; (2) in a major increase in costs or prices to consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and (3) in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets. By enhancing the long-term productivity of the groundfish fishery resources and thus increasing the long-term availability of this resource to U.S. and/or foreign fishermen and to consumers, this rule can be expected to enhance investment in, and the productivity of, the United States fishing industry. The Administrator has also certified that this rule will not have a significant economic impact on a substantial number of small entities, and thus does not require preparation of a regulatory flexibility analysis under 5 U.S.C. 603 and 604 of the Regulatory Flexibility Act.

The Administrator finds for good cause that it is impracticable, unnecessary, and contrary to the public interest to delay effectiveness of this rule for 30 days. That finding is based on the following:

1. A delay in the effective date of this rule would delay collection of information on amounts of fish being harvested by domestic fishermen, and would make impracticable timely reserve apportionments based on the best available information. Timely receipt of catch information from domestic fishermen is essential to the mission of NMFS, which must make a determination as early as February 2 concerning the need to supplement DAH with reserves. Without knowledge of the domestic harvest levels, amounts of fish may be declared surplus to domestic needs and allocated to TALFF. This could be harmful to the public if amounts of fish available to domestic fishermen prove inadequate and certain segments of the domestic fishery are prematurely closed.

2. The affected public has advance notice of this action, is generally familiar with it, and was afforded ample opportunity to participate in

development of the FMP—at public hearings and meetings of the North Pacific Fishery Management Council, and during the 45-day comment periods on the draft EIS and the proposed rulemaking. Domestic fishermen will be informed through news releases of the effective date of the final rule.

3. The affected public expects the implementation of the FMP through regulations effective January 1, 1982. Implementation on that date will greatly reduce uncertainty, will allow better planning by user groups, and will facilitate improved monitoring of the fishery. The regulations will be amended to reduce the incidental catch of Chinook Salmon.

Paperwork Reduction Act of 1980

This rule contains a number of collection of information requirements that are subject to comment and approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (Pub. L. 96–511, 44 U.S.C. 3501–3520). These requirements and the corresponding information collection request forms have either been approved or are being reviewed by the Office of Management and Budget under that Act.

National Environmental Policy Act

The final EIS discussed above, which was filed with the Environmental Protection Agency on November 20, 1981, treats the implementation of the original FMP and of all four amendments to it that have thus far been developed. As a result, it is not expected that further environmental analyses will be required when Amendments 1, 1a, 2 and 3 to the FMP are implemented.

Dated: December 23, 1981.

E. Craig Felber,

Acting Executive Director, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Part 611 is amended and a new 50 CFR Part 675 is added, as follows:

PART 611—FOREIGN FISHING

1. The authority citation of Part 611 reads as follows:

Authority: 16 U.S.C. 1821 and 1855.

2. In Part 611, § 611.9, Appendix II, Figure 2 is revised as follows:

§ 611.9 Reports and recordkeeping.

* * * * *

Appendix II—Area Codes

* * * * *

BILLING CODE 3510-22-M

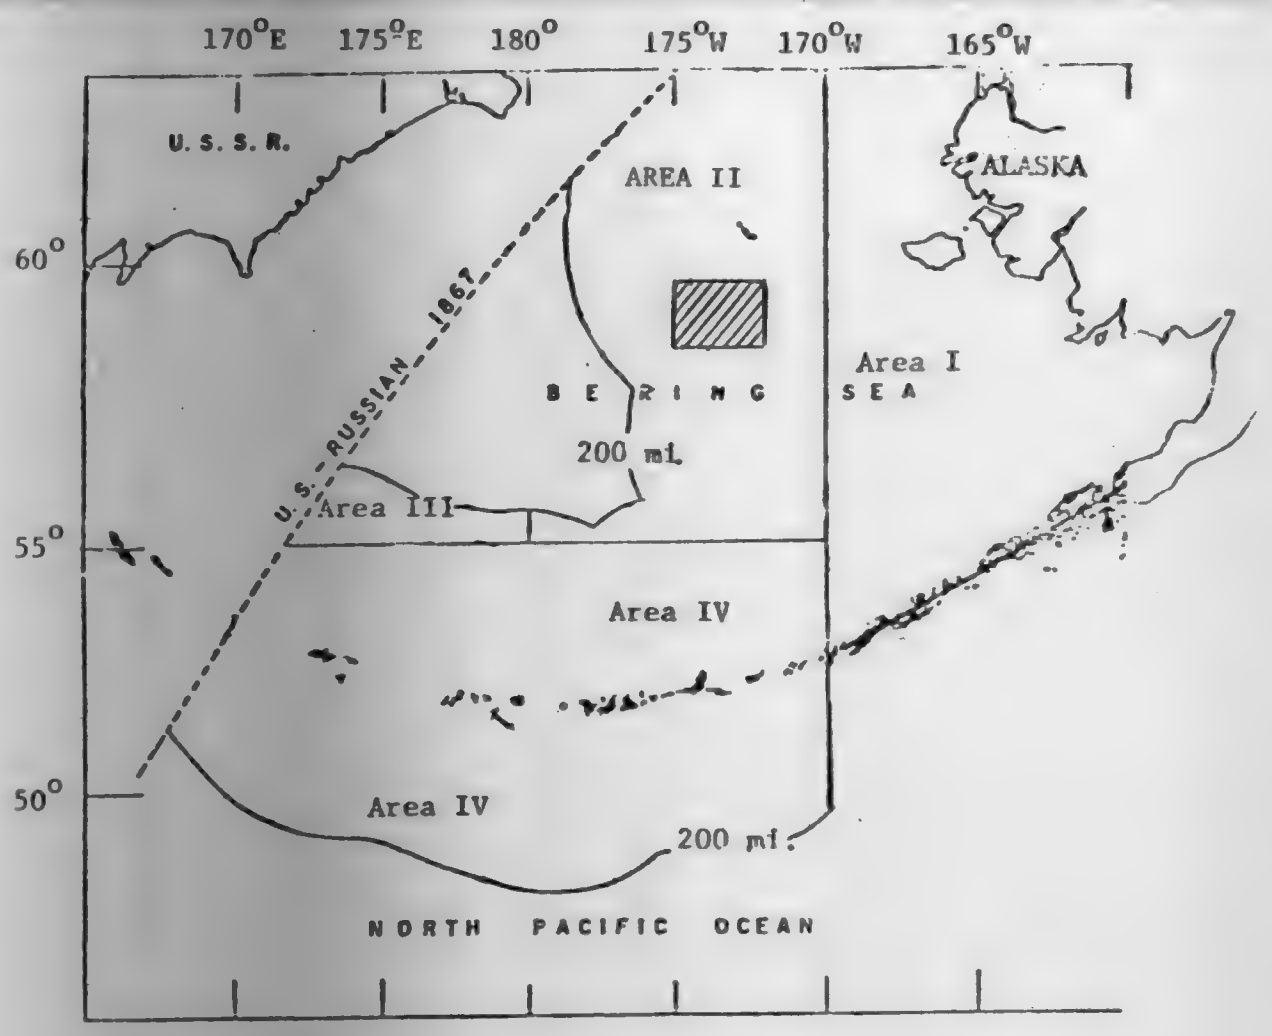

Figure 2. Fishing areas of the Bering Sea and Aleutian Islands. 1/

1/ For the purposes of §611.4 only, and for the period September 1 through April 30, the term "fishing area" shall, for all foreign trawl vessels subject to the requirements of §611.93, also mean the area described in §611.93(d)(1). This area is represented by the cross-hatched portion of Fishing Area III, above.

BILLING CODE 3510-22-C

3. In Part 611, § 611.20, Appendix I is amended by revising the appendix heading and entry 4A to read as follows:

§ 611.20 Total allowable level of foreign fishing.

* * * * *

APPENDIX 1.—OPTIMUM YIELD (OY), DOMESTIC ANNUAL HARVEST (DAH), DOMESTIC ANNUAL PROCESSING (DAP), JOINT VENTURE PROCESSING (JVP), DOMESTIC NONPROCESSED FISH (DNP), RESERVE, AND TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING (TALFF), ALL IN METRIC TONS. OY = DAH + RESERVE + TALFF.

Species	Species code	Area	OY	DAH [4]	DAP	JVP	DNP	Reserve	TALFF
4. Alaska Fisheries:									
A. Bering Sea and Aleutian Islands Groundfish Fishery:									
Pollock	701	Bering Sea [1]	1,000,000	19,550	10,500	9,050		50,000	930,450
		Aleutians [2]	100,000	0	0	0		0	100,000
Yellowfin sole	720		117,000	2,050	1,200	25,000		5,850	109,150
Turbots	721,118		80,000	1,075	1,000	75		4,500	84,425
Other flatfish	129		61,000	1,300	1,200	3,000		3,050	56,650
Pacific ocean perch [5]	760	Bering Sea [1]	1,270	1,270	800	630		162	1,708
		Aleutians [2]	7,500	1,380	800	630		375	5,745
Other rockfish	849		7,727	1,550	1,100	450		500	5,677
Sablefish	703	Bering Sea [1]	2,800	700	800	800		350	2,450
		Aleutians [2]	1,500	700	500	200		150	650
Pacific cod	702		58,700	24,265	35,000	17,065	200	2,935	31,500
Atka mackerel	207		24,800	100	0	100		1,240	23,460
Squid	794		10,000	50	0	50		500	9,450
Other species [3]	499		74,249	2,000	1,800	200		3,712	68,537

[4] DAH = DAP + JVP + DNP.
[1] Bering Sea means fishing areas I, II, and III in Figure 2, Appendix II of 50 CFR 611.9.
[2] Aleutian means fishing area IV in Figure 2, Appendix II of 50 CFR 611.9.
[3] The category "other species" includes sculpins, sharks, skates, eulachon, smelts, capelin, and octopus.
[5] The category "Pacific ocean perch" includes *Sebastes* species *S. aleutus*, (Pacific ocean perch), *S. polyspinus* (northern rockfish), *S. aleutianus*, (rougheye rockfish), *S. borealis* (shortraker rockfish), and *S. zacentrus* (sharpchin rockfish).

4. In Part 611, § 611.93 is revised to read as follows:

§ 611.93 Bering Sea and Aleutian Islands groundfish fishery.

(a) *Purpose.* (1) This section regulates foreign fishing for squid, octopus, and all species of finfishes except salmon, Pacific halibut, herring, and steelhead, within that portion of the Bering Sea, and that portion of the North Pacific Ocean adjacent to the Aleutian Islands west of 170° W. longitude, over which the United States exercises exclusive fishery management authority under the Act (hereinafter referred to in this section as the "management area"). See § 611.9, Appendix II, Figure 2.

(2) For regulations governing fishing in the Bering Sea and Aleutian Islands groundfish fishery by vessels of the United States, see 50 CFR Part 675. Regulations governing foreign fishing for Tanner crab and snails are set forth in 50 CFR 611.91 and 611.94, respectively.

(3) The specifications of optimum yield (OY), domestic annual harvest (DAH), total allowable level of foreign fishing (TALFF), and reserves in Appendix I to § 611.20 shall apply to each calendar year.

(b) *Authorized fishery.*—(1) *TALFFs and reserves.* (i) The OY, DAH, TALFF, and reserve for target species and other species taken in the fishery are specified in § 611.20, Appendix 1, Entry 4A. The TALFF for nonspecified species shall be any amount of such species taken incidentally to the harvest of the TALFF specified in § 611.20, Appendix 1, Entry 4A, and of such amounts of the reserve and DAH specified therein as may be apportioned to TALFF.

(ii) *Categories of species.* Five categories of species are recognized for regulatory purposes in this fishery. They are set forth in Table 1.

TABLE 1.—CATEGORIES OF SPECIES INVOLVED IN THE BERING SEA AND ALEUTIAN ISLANDS FISHERY

Unallocated species [1]	Target species [2]	Other species [2]	Non-specified species [4]	Groundfish
Salmonids, Halibut, Herring, King Crab, Tanner Crab, Coral, Shrimp, Horsehair Crab, Lyre Crab, Scallops, Snails, Dungeness Crab, Surf Clams.	Pollock, Cod, Other flat fishes, Atka Mackerel, Sablefish, Turbots, Squid, Pacific Ocean perch, other rockfish, Yellowfin sole.	Sculpins, Sharks, Skates, Eulachon, Smelts, Capelin, Octopus.	All species not included in previous categories.	Target, "other", and non-specified species.

[1] Records must be maintained as required by § 611.9.
[2] Records must be maintained.
[3] Records must be maintained of the aggregate catches.
[4] If non-specified species are retained, records must be maintained of the aggregate retained catches.

(A) The term "unallocated species" means for purposes of this section: shrimps (Pandalidae); scallops (Pactinidae); snails (Gastropoda), Pacific herring (*Clupea harengus pallasi*); salmonids (Salmonidae), Pacific halibut (*Hippoglossus stenolepis*); king crab (*Paralithodes* spp.), Tanner crab (*Chionoecetes opilio, C. bairdi*); Dungeness crab (*Cancer magister*); corals (Coelenterata); surf clam (*Spisula solidissima*); horsehair crab (*Erimacrus isenbeckii*); and lyre crab (*Hyas lyratus*). Foreign allocations for these species exists, if at all, only under other fishery management plans.

(B) The term "other species" means: sculpins, sharks, skates; eulachon; smelts, capelin; and octopus.

(C) The term "nonspecified species" means all fish other than those specifically listed in paragraphs (b)(1)(ii) (A), (B), and (D) of this section.

(D) The term "target species" means pollock, Pacific cod, all flatfishes, Atka mackerel, sablefish, all rockfishes, and squids.

(E) "Groundfish" includes all fish listed in paragraphs (b)(1)(ii) (B), (C), and (D) of this section.

(2) *Apportionment to TALFF of reserves and initial DAH.*—(i) *Apportionment of reserves.* As soon as practicable after each of the following dates, and after consultation with the North Pacific Fishery Management Council, the Secretary shall apportion to TALFF up to one-fourth (¼) of each reserve amount set forth at § 611.20, Appendix I, Entry 4A, in accordance with paragraph (b)(2)(iii) of this section: February 2, April 2, June 2, and August 2.

(ii) *Apportionment of initial DAH.* As soon as practicable after each of the following dates, and after consultation with the North Pacific Fishery Management Council, the Secretary shall reassess each DAH amount set forth at § 611.20, Appendix I, Entry 4A, and shall apportion to TALFF such parts thereof as he or she determines to be appropriate in accordance with paragraph (b)(2)(iii) of this section: June 2 and August 2.

(iii) *Standards and Procedure for Apportionment.*—(A) *General.* The Secretary shall apportion under paragraphs (b)(2)(i) and (b)(2)(ii) of this section such amounts as the Regional Director determines will not be harvested by vessels of the United States during the remainder of the calendar year. The amount of reserve which the Regional Director determines will be harvested by vessels of the United States may, at the discretion of the Secretary, be either apportioned to the estimate of domestic annual harvest (DAH) or retained in the reserve as eligible for later apportionment under paragraph (b)(2)(iii)(F) of this section.

(B) *Factors.* In determining whether or not amounts proposed to be apportioned under paragraphs (b)(2)(i) and (b)(2)(ii) of this section will be harvested by vessels of the United States during the remainder of the fishing year, the Regional Director shall consider the following factors, although he or she shall not be limited to these factors:

(*1*) Reported United States catch and effort by species and area compared to previously projected United States harvesting capacity;

(*2*) Projected United States catch and effort by species and area for the remainder of the fishing year;

(*3*) Amounts of fish, particularly United States harvested fish, already purchased or processed by United States fish processors during the fishing year, compared to the previously projected processing capacity of United States fish processors;

(*4*) Projected processing capacity, and utilization of that capacity for the processing of United States harvested fish, by United States fish processors for the remainder of the fishing year; and

(*5*) Amounts of United States harvested fish already purchased or processed by foreign fishing vessels, compared to previously projected levels of such purchasing or processing.

(C) *Allocation of increases and decreases in DAH among DAP, JVP, and DNP.* The Secretary shall allocate any increases or decreases in DAH amounts resulting from apportionments under paragraphs (b)(2)(i) and (b)(2)(ii) of this section among the three components of DAH: the estimates of domestic annual processing (DAP); joint venture processing (JVP); and domestic non-processed fish (DNP).

(D) *Public comment.* (*1*) Comments may be submitted to the Regional Director concerning:

(*i*) Whether, and the extent to which, vessels of the United States will harvest reserve or DAH amounts during the remainder of the fishing year; and

(*ii*) Whether and the extent to which United States harvested groundfish can or will be processed by United States fish processors or by foreign processing vessels.

Comments should be addressed to Director, Alaska Region, NMFS, P.O. Box 1668, Juneau, Alaska 99802, and must be received by the Regional Director no later than 5 days before the relevant date specified in paragraph (b)(2)(i) or (b)(2)(ii) of this section.

(*2*) The Secretary shall consider any timely comments submitted in accordance with this paragraph in determining whether, and to what extent, vessels of the United States will harvest reserve or DAH amounts during the remainder of the fishing year, and whether any part of such amounts will be allocated to TALFF under paragraphs (b)(2)(i) and (b)(2)(ii) of this section.

(*3*) The Regional Director shall compile, in aggregate form, the most recent available reports on (*i*) level of catch and effort by vessels of the United States fishing for groundfish in the Bering Sea and Aleutian Islands fishery; and (*ii*) amounts of United States-harvested groundfish taken in the Bering Sea and Aleutian Islands fishery and processed by United States fish processors or delivered at sea to foreign fishing vessels. These data shall be available for public inspection during business hours (8:00 a.m.–4:30 p.m., Monday–Friday) at the National Marine Fisheries Service Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802, during the last 15 days of each comment period.

(E) *Procedure.* As soon as practicable after each of the dates specified in paragraphs (b)(2)(i) and (b)(2)(ii) of this section, the Secretary shall publish in the **Federal Register**:

(*1*) Any reserve amounts to be apportioned to TALFF or DAH;

(*2*) Any DAH amounts to be apportioned to TALFF;

(*3*) The distribution of amounts apportioned to or from DAH among DAP, JVP, and DNP;

(*4*) The reasons for any apportionments and their distribution; and

(*5*) Responses to any comments received.

(F) *Add-on.* If, following any of the first three of the four dates specified in paragraph (b)(2)(i) of this section, the Secretary apportions less than 25 percent of any reserve amount to TALFF and DAH, the nonapportioned part of that 25 percent shall be added to the reserve amounts available for apportionment on the next date specified in paragraph (b)(2)(i) of this section.

(3) *Fishing permitted.* (i) The catching in the management area and retention of any groundfish for which a nation has an allocation is permitted, except as provided in this section.

(ii) Under the procedures of § 611.15(c), the Regional Director shall notify the foreign nation(s) involved and the designated representative for any affected fishing vessel of a closure prohibiting fishing with specified gear types for any species or species group. The closure may be for all or part of the management area.

(A) *Optimum yield.* If the optimum yield (OY) for any species or species group except sablefish, turbots, or Pacific cod will be reached, the Regional Director shall prohibit fishing using trawl gear until January 1. If the optimum yield for sablefish, turbots, or Pacific cod will be reached, the Regional Director shall prohibit all fishing for groundfish until January 1.

(B) *Total allowable level of foreign fishing.* If the total allowable level of foreign fishing (TALFF) for any species or species group except sablefish, turbots, or Pacific cod will be reached, the Regional Director shall prohibit fishing using trawl gear by foreign vessels. If the TALFF for sablefish, Pacific cod, or turbots will be reached, the Regional Director shall prohibit fishing for groundfish by foreign vessels.

(C) *Allocation of a nation.* If the allocation of a nation for any species or species group except sablefish, turbots, or Pacific cod will be reached, the Regional Director shall prohibit fishing

using trawl gear by that nation. If the nation's allocation of sablefish, Pacific cod, or turbots will be reached, the Regional Director shall prohibit fishing for groundfish by all vessels of that nation.

(iii) On the effective date of a notice of closure from the Regional Director under the procedures of § 611.15(c), fishing by vessels of that nation is prohibited for the groundfish species or species groups, in the areas and during the periods stated in the notice. A notice of closure issued pursuant to paragraph (b)(3) of this section shall not apply to any receipt or processing by foreign vessels of United States-harvested fish which is authorized by permit issued by the Department of Commerce under the Act. Foreign receipt and processing of U.S. harvested fish may continue until specifically prohibited under the restrictions prescribed in the applicable permit.

(iv) A notification pursuant to paragraph (b)(3)(ii) of this section shall expire: (A) On the effective date of a notification issued pursuant to § 611.15(c) rescinding that previous notice; (B) when the time period stated in that notice expires; or (C) at midnight, Alaska Standard Time, or the following December 31, whichever is earlier.

(4) *Fishing prohibited.* Whether or not a nation receives a notice under paragraph (b)(3) of this section, fishing for groundfish by trawl vessels of a nation is prohibited when that nation's national allocation for any groundfish species is reached; and fishing for groundfish by all vessels of a nation is prohibited when that nation's national allocation for sablefish, Pacific cod, or turbots is reached.

(c) *Open and closed areas.*—(1) *General.* Foreign fishing for groundfish may be conducted beyond 12 nautical miles from the baseline used to measure the territorial sea in the entire management area, except as prohibited in this paragraph. No foreign vessels may engage in fishing within 12 nautical miles of the baseline used to measure the territorial sea, unless authorized in this paragraph.

(2) *Trawling.* (i) Trawling by foreign vessels between 3 and 12 nautical miles from the baseline used to measure the territorial sea is allowed west of 178°30′ W. longitude, from May 1 through December 31, except in the area known as Petrel Bank, described in paragraph (c)(2)(ii)(E) of this section.

(ii) Trawling is prohibited in the areas and during the periods which follow:

(A) At all times in the Bristol Bay "Pot Sanctuary" which is the area enclosed by straight lines from Cape Sarichef light at 54°36′ N. latitude, 164°55′42″ W. longitude; to 55°16′ N. latitude, 166°10′ W. longitude; to 56°20′ N. latitude, 163°00′ W. longitude; to 57°10′ N. latitude, 163°00′ W. longitude; to 58°10′ N. latitude, 160°00′ W. longitude; then due south along 160°00′ W. longitude to the Alaska Peninsula.

(B) At all times in the area between 172° W. longitude and 178°30′ W. longitude and south of a line connecting the following coordinates in the order listed: 53°14′ N. latitude, 172°00′ W. longitude; 52°13′ N. latitude, 176°00′ W. longitude; 52°00′ N. latitude, 178°00′ W. longitude; and 52°00′ N. latitude, 178°30′ W. longitude.

(C) From December 1 through May 31 in the area bounded by straight lines connecting the following coordinates in the order listed: 54°36′ N. latitude, 164°55′42″ W. longitude (Cape Sarichef light); 52°40′ N. latitude, 170°00′ W. longitude; 55°30′ N. latitude, 170°00′ W. longitude; 55°30′ N. latitude, 166°47′ W. longitude, 56°00′ N. latitude, 167°45′ W. longitude; 56°00′ N. latitude, 166°00′ W. longitude; 56°30′ N. latitude, 166°00′ W. longitude; 56°30′ N. latitude, 163°00′ W. longitude; 56°20′ N. latitude, 163°00′ W. longitude; 55°16′ N. latitude, 166°10′ W. longitude; 54°36′ N. latitude, 164°55′42″ W. longitude (Cape Sarichef light).

(D) From January 1 through April 30 in the area west of 178°30′ W. longitude and south of 55°00′ N. latitude.

(E) From May 1 through June 30 between 3 and 12 nautical miles from the baseline from which the United States territorial sea is measured in the area known as Petrel Bank, bordered by straight lines connecting the following coordinates in the order listed: 52°51′ N. latitude, 178°30′ W. longitude; 52°51′ N. latitude, 179°00′ E. longitude; 51°15′ N. latitude, 179°00′ E. longitude; 51°15′ N. latitude, 178°30′ W. longitude; 52°51′ N. latitude, 178°30′ W. longitude.

(F) *Limitation of salmon catch.* [Reserved]

(3) *Longlining.* (i) Longlining by foreign vessels between 3 and 12 nautical miles of the baseline used to measure the territorial sea is allowed west of 172°00′ W. longitude.

(ii) Longlining by foreign vessels is prohibited from December 1 through May 31 in water less than 500 meters deep in the area bounded by straight lines connecting the following coordinates in the order listed: 54°36′ N. latitude, 164°55′42″ W. longitude (Cape Sarichef light); 52°40′ N. latitude, 170°00′ W. longitude; 55°30′ N. latitude, 170°00′ W. longitude; 55°30′ N. latitude, 166°47′ W. longitude; 56°00′ N. latitude, 167°45′ W. longitude; 56°00′ N. latitude, 166°00′ W. longitude; 56°30′ N. latitude, 166°00′ W. longitude; 56°30′ N. latitude, 163°00′ W. longitude; 56°20′ N. latitude, 163°00′ W. longitude; 55°16′ N. latitude, 166°10′ W. longitude; 54°36′ N. latitude, 164°55′42″ W. longitude (Cape Sarichef light).

(4) *Receipts of fish at sea.* Foreign fishing vessels holding permits to receive U.S.-harvested fish may receive those fish in the management area between 3 and 12 nautical miles from the baseline from which the United States territorial sea is measured. Receiving foreign-harvested fish in the 3 to 12 mile area is prohibited, except: (i) When the foreign vessel delivering the foreign-caught fish is authorized to harvest fish in the 3 to 12 mile area, or (ii) in the support operations areas designated in § 611.90(c)(2).

(d) *Additional reporting requirements.*—(1) *Vessel reporting.* During the period from September 1 through April 30, and for the purposes of the requirements of 50 CFR 611.4 only, the area bounded by the following coordinates is a "fishing area" for all foreign trawl vessels fishing for groundfish under this § 611.93: 58° N. latitude, 175° W. longitude; 58° N. latitude, 172° W. longitude, 59°30′ N. latitude, 172° W. longitude, 59°30′ N. latitude, 175° W. longitude. (See § 611.9, Appendix II, Figure 2).

(2) *Reports and recordkeeping.* (i) In addition to the requirements of 50 CFR 611.9, the operator of each foreign fishing vessel fishing for groundfish in the management area and each nation whose vessels fish for groundfish in the management area shall also comply with all the requirements of § 611.9 for the prohibited species herring (code 209), even though discarded, and for non-specified species which are retained, by weight of fish to the nearest 1/10 (tenth) of a metric ton.

(ii)(A) During the period September 1 through April 30, and in addition to the requirements of § 611.9, each foreign nation shall submit, through the designated representative, a weekly report stating any catch of herring by trawl vessels in the area described in § 611.9(d)(1).

(B) The weekly report shall contain the following information:

(*1*) Name of vessel;

(*2*) Permit number;

(*3*) Effort in hours trawled, by each weekly reporting period, by vessel, by ½° (latitude) × 1° (longitude) of area fished;

(*4*) Catch of herring (code 209) to the nearest ⅒ (one-tenth) of a metric ton, by vessel, by each weekly reporting period, by ½° (latitude) × 1° (longitude) of area fished.

(C) The weekly report shall be received from the designated

representative by the Director, Alaska Region (National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99801, Telex No. 009945–377), at the times specified in § 611.9, Appendix IV, D, and in the format specified by the Director, Alaska Region.

(3) *Annual report.* Each nation whose vessels fish for groundfish in the management area shall report, by May 30 of the following year, annual catch and effort statistics as follows:

(i) Effort in hours trawled, number of longline units (300 fathoms of longline or groundline per unit) and number of hooks per unit, number of pots, duration of soaking time for longlines and pots, and number of days fished, by vessel class, by gear type, by month, by ½° latitude and 1° longitude statistical area; and (ii) catch in metric tons, by vessel class, by gear type, by month, by ½° latitude and 1° longitude statistical area, by the following species categories: yellowfin sole; rock sole; flathead sole; arrowtooth flounder; greenland halibut; other flounders; Pacific Ocean perch; Pacific cod, sablefish (blackcod); walleye (Alaska) pollock; Atka mackerel; any other species taken in excess of 1,000 metric tons; "other species," and retained "non-specified species."

5. Part 675 is added to 50 CFR Chapter VI, to read as follows:

Part 675—Groundfish of the Bering Sea and Aleutian Islands Area

Subpart A—General

Sec.

675.1 Purpose and scope.
675.2 Definitions.
675.3 Relation to other laws.
675.4 Permits.
675.5 Reporting requirements.
675.6 [Reserved].
675.7 General prohibitions.
675.8 Enforcement.
675.9 Penalties.

Subpart B—Management Measures

675.20 General limitations.
675.21 [Reserved].
675.22 [Reserved].
675.23 [Reserved].
675.24 [Reserved].
675.25 [Reserved].

Authority: 16 U.S.C. 1855, Section 305, Pub. L. 94–265, 90 Stat. 354–55.

Subpart A—General

§ 675.1 Purpose and scope.

(a) Regulations in this part govern fishing for groundfish by vessels of the United States within that portion of: (1) the Bering Sea, and (2) the North Pacific Ocean adjacent to the Aleutian Islands west of 170°00′ W. longitude, over which the United States exercises exclusive fishery management authority under the Act.

(b) For regulations governing fishing in the Bering Sea and Aleutian Islands groundfish fishery by fishing vessels other than vessels of the United States, see 50 CFR § 611.93.

(c) These regulations implement the Bering Sea and Aleutian Islands groundfish fishery management plan developed by the North Pacific Fishery Management Council.

§ 675.2 Definitions.

In addition to the definitions in the Act, and unless the context requires otherwise, the terms used in this part shall have the following meanings (some definitions in the Act have been repeated here to aid understanding of the regulations):

Act means the Magnuson Fishery Conservation and Management Act, Pub. L. 94–265, as amended, 16 U.S.C. 1801–1882.

ADF&G means the Alaska Department of Fish and Game.

Assistant Administrator means the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, United States Department of Commerce, or an individual to whom the Assistant Administrator for Fisheries has delegated appropriate authority.

Authorized Officer means:

(a) Any commissioned, warrant, or petty officer of the United States Coast Guard;

(b) Any certified enforcement or special agent of the National Marine Fisheries Service;

(c) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary and the Commandant of the Coast Guard to enforce the provisions of the Act; or

(d) Any Coast Guard personnel accompanying and acting under the direction of any person described in paragraph (a) of this definition.

Bering Sea and Aleutian Islands management area means the fishery conservation zone (FCZ) in the Bering Sea, and that portion of the FCZ in the North Pacific Ocean that is adjacent to the Aleutian Islands and west of 170°00′ W. longitude.

(a) The Bering Sea sub-area of the management area means that portion of the FCZ contained in areas I, II, and III of Figure 1.

(b) The Aleutian Islands sub-area of the mangement area means that portion of the FCZ contained in area IV of Figure 1.

BILLING CODE 3510-22-M

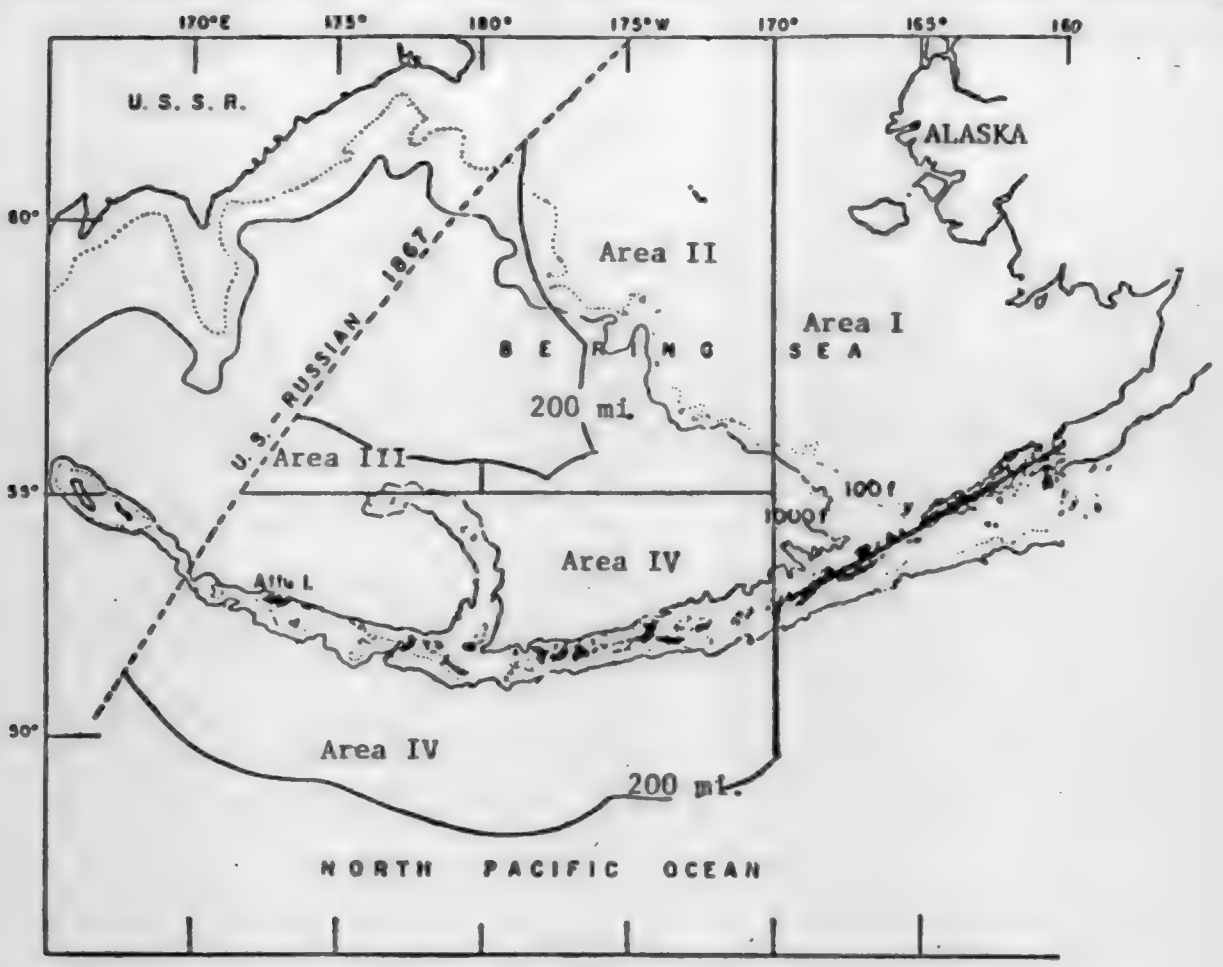

Figure 1. Bering Sea and Aleutian Islands Management Area

(a) Bering Sea sub-area are areas I, II, and III.
(b) Aleutian Islands sub-area is area IV.

BILLING CODE 3510-22-C

Fishery, for the purposes of this part, means all fishing for groundfish which is conducted in the Bering Sea and Aleutian Islands management area and adjacent territorial waters.

(a) The Bering Sea sub-area of the fishery means areas I, II, and III of Figure 1.

(b) The Aleutian Islands sub-area of the fishery means area IV of Figure 1.

Fishery Conservation Zone (FCZ) means that area adjacent to the United States which, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal States to a line on which each point is 200 nautical miles from the baseline from which the territorial sea of the United States is measured.

Fishing means any activity, other than scientific research activity conducted by a scientific research vessel, which involves:

(a) The catching, taking, or harvesting of fish;

(b) The attempted catching, taking or harvesting of fish;

(c) Any other activity which can reasonably be expected to result in the catching, taking or harvesting of fish; or

(d) Any operations at sea in support of, or in preparation for, any activity described in paragraphs (a), (b), or (c) of this definition.

Fishing vessel means any vessel, boat, ship, or other craft which is used for, equipped to be used for, or of a type which is normally used for: (a) fishing; or (b) aiding or assisting one or more vessels at sea in the performance of any activity relating to fishing, including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing.

Groundfish means pollock, cod, any species of flatfish, Pacific ocean perch, other rockfish, sablefish, Atka mackerel, squid, octopus; all other marine invertebrates except shrimp, scallops, snails, king crab, Tanner crab, Dungeness crab, horsehair crab, lyre crab, coral, and clams; and all other finfish except salmonids, Pacific herring, and Pacific halibut. The scientific names of these species are as follows:

Pollock means *Theragra chalcogramma;*

Cod means *Gadus macrocephalus;*

Arrowtooth flounder means *Atheresthes stomias;*

Other flatfish means Pleuronectiformes (order) not specifically defined;

Yellowfin sole means *Limanda aspera;*

Rock sole means *Lepidopsetta bilineata;*

Flathead sole means *Hippoglossoides elassodon;*

Greenland halibut means *Reinhardtius hippoglossoides;*

Pacific ocean perch means *Sebastes alutus, S. polyspinus, S. aleutianus, S. borealis,* and *S. Zacentrus;*

Atka mackerel means *Pleurogrammus monopterygius;*

Other rockfish means Scorpaenidae (family) not specifically defined;

Sablefish means *Anoplopoma fimbria;*

Squid means sepioid and teuthoid squid;

Octopus means Octopoda, not specifically defined;

Salmonids means of the family Salmonidae;

Pacific halibut means *Hippoglossus stenolepis;*

Pacific herring means *Clupea harengus pallasi.*

Landing means off-loading fish.

Longline means a stationary, buoyed, and anchored line with hooks or pots (other than king or Tanner crab pots) attached, or the taking of fish by means of such a device.

Operator, with respect to any vessel, means the master of other individual on board and in charge of that vessel.

Owner, with respect to any vessel,

[illegible]

(a) Any person who owns that vessel in whole or in part;

(b) Any charterer of the vessel, whether bareboat, time, or voyage;

(c) Any person who acts in the capacity of a charterer, including but not limited to parties to a management agreement, operating agreement, or any similar agreement that bestows control over the destination, function or operation of the vessel; or

(d) Any agent designated as such by any person in paragraphs (a), (b), or (c) of this definition.

Person means any individual (whether or not a citizen or national of the United States), corporation, partnership, association, or other entity (whether or not organized or existing under the laws of any State), and any Federal, State, local, or foreign government or any entity of such government.

Regional Director means Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802, or an individual to whom the Regional Director has delegated appropriate authority.

Secretary means the Secretary of Commerce, or his or her designee.

Trawl means a bag-shaped net dragged through the water to capture fish.

Vessel of the United States means

(a) A vessel documented or numbered by the Coast Guard under United States law; or

(b) A vessel weighing less than five net tons which is registered under the laws of any state.

United States fish processors means facilities located within the United States for, and vessels of the United States used or equipped for, the processing of fish for commercial use or consumption.

United States-harvested fish means fish caught, taken, or harvested by vessels of the United States within any fishery regulated by a fishery management plan or preliminary fishery management plan implemented under the Act.

§ 675.3 Relation to other laws.

(a) *Federal law.* For regulations governing fishing by vessels of the United States for halibut, see the regulations of the International Pacific Halibut Commission. For regulations governing fishing for Tanner crab, see 50 CFR Part 671; for those governing fishing for groundfish in the Gulf of Alaska, see 50 CFR Part 672; for those governing salmon fishing off Alaska, see 50 CFR Part 674; for those governing permits and certificates of inclusion for the taking of marine mammals, see 50 CFR 216.24.

(b) *State law.* Certain responsibilities relating to the issuance of permits, data collection, and enforcement may be performed by personnel of the State of Alaska under an agreement with NOAA/NMFS and the United States Coast Guard.

§ 675.4 Permits.

(a) *General.* No vessel of the United States may fish for groundfish in the Bering Sea and Aleutian Islands management area without first obtaining a permit issued under this Part. Such permits shall be issued without charge.

(b) *Application.* A vessel owner may obtain a permit required under the preceding subsection by submitting to the Regional Director a written application containing the following information:

(1) The applicant's name, mailing address, and telephone number;

(2) The name of the vessel;

(3) The vessel's U.S. Coast Guard documentation number or state registration number;

(4) The home port of the vessel;

(5) The length of the vessel;

(6) The type of fishing gear to be used; and

(7) The The signature of the applicant.

The Regional Director may accept a completed State of Alaska commercial

fishing license application in satisfaction of the requirements of this subsection.

(c) *Issuance.* (1) Upon receipt of a properly completed application, the Regional Director shall issue a permit required by paragraph (a) of this section.

(2) Upon receipt of an incomplete or improperly completed application, the Regional Director shall notify the applicant of the deficiency in the application. If the applicant fails to correct the deficiency within 30 days following the date of notification, the application shall be considered abandoned.

(d) *Notification of change.* Any person who has applied for and received a permit under this section shall give written notification of any change in the information provided uder paragraph (b) of this section to the Regional Director within 30 days of the date of that change.

(e) *Duration.* A permit issued under this section shall authorize the permitted vessel to fish for groundfish in the Bering Sea and Aleutian Islands management area during a single specified year, and shall continue in full force and effect through December 31 of the year for which it was issued, or until it is revoked, suspended, or modified pursuant to 50 CFR Part 621 (Civil procedures).

(f) *Alteration.* No person shall alter, erase, or mutilate any permit issued under this section. Any such permit that has been intentionally altered, erased, or mutilated shall be invalid.

(g) *Transfer.* Permits issued under this section are not transferable or assignable. Each such permit shall be valid only for the vessel for which it is issued. The Regional Director must be notified of a change in ownership, pursuant to paragraph (d) of this section.

(h) *Inspection.* Any permit issued under this section must be carried aboard the vessel whenever the vessel is fishing for groundfish in the Bering Sea and Aleutian Islands management area. The permit shall be presented for inspection upon request of any authorized officer.

(i) *Sanctions.* Subpart D of 50 CFR 621 (Civil procedures) shall govern the imposition of permit sanctions against a permit issued under this section. As specified in that subpart D, a permit may be revoked, modified, or suspended if the permitted vessel is used in the commission of an offense prohibited by the Act or these regulations; and such a permit shall be revoked if a civil penalty or criminal fine imposed under the Act and pertaining to a permitted vessel is not paid.

§ 675.5 Reporting requirements.

(a) *Fishing vessel reporting requirements.*—(1) *Port of Landing outside Alaska.* The operator of any fishing vessel regulated under this part whose port of landing is outside the State of Alaska shall submit a completed State of Alaska fish ticket, or an equivalent document containing all of the information required on an Alaska fish ticket. This information must be submitted to ADF&G within one week after the date of each sale or delivery not at sea of any groundfish taken in the Bering Sea and Aleutian Islands management area. The address to which these documents must be sent is: Director, Commercial Fish Division, Alaska Department of Fish and Game Headquarters, Subport Building, Juneau, Alaska 99801.

(2) *Sale, delivery, or consumption at sea.* (i) For each consumption or sale or delivery to a United States fish processor at sea of unlanded groundfish taken in the Bering Sea and Aleutian Islands management area, the operator of any fishing vessel regulated under this part shall submit the following information to ADF&G:

(A) A completed State of Alaska fish ticket, or an equivalent document containing all of the information required on an Alaska fish ticket; and

(B) A statement indicating whether or not the vessel to which any sale or delivery was made was a vessel of the United States.

(ii) The information required by paragraph (a)(2)(i) of this section shall be submitted to ADF&G within one week of the first return of that vessel to port following such sale, delivery, or consumption. Such information may be submitted by the United States fish processor to which the sale or delivery at sea was made, acting as the agent of the fishing vessel operator.

(b) *Processor reporting requirements.* When requested by the Regional Director, but not more than four times a year, each United States fish processor who intends to process United States harvested groundfish taken in the Bering Sea and Aleutian Islands management area shall complete a written survey received from the Regional Director to include the following information:

(1) The quantity of groundfish that the processor has the capacity to process during the following six-month period; and

(2) The quantity of United States-harvested groundfish from the Bering Sea and Aleutian Islands management area that the processor expects to process during the following six-month period.

§ 675.6 [Reserved]

§ 675.7 General prohibitions.

It shall be unlawful for any person to:

(a) Fish for groundfish in the Bering Sea and Aleutian Islands management area with a vessel of the United States which does not have aboard a valid permit issued pursuant to this part;

(b) Possess, have custody or control of, ship, transport, import, export, offer for sale, sell, or purchase any fish taken or retained in violation of the Act, this part, or any other regulation or permit issued under the Act;

(c) Refuse to permit an authorized officer to board a fishing vessel subject to such person's control for purposes of conducting any search or inspection in connection with the enforcement of the Act, this part, or any other regulation or permit issued under the Act;

(d) Forcibly assault, resist, oppose, impede, intimidate, or interfere with any authorized officer in the conduct of any search or inspection described in paragraph (c) of this section;

(e) Resist a lawful arrest for any act prohibited by this part;

(f) Interfere with, delay, or prevent, by any means, the apprehension or arrest of another person knowing that such person has committed any act prohibited by this part;

(g) Violate any other provision of this part, the Act, or any other regulation or permit issued under the Act.

§ 675.8 Enforcement.

(a) *General.* The owner or operator of any fishing vessel regulated under this part shall immediately comply with instructions issued by an authorized officer to facilitate safe boarding and inspection of the fishing vessel, its gear, equipment, and catch for purposes of enforcing the Act and this part.

(b) *Signals.* Upon being approached by a Coast Guard cutter or aircraft, or other vessel or aircraft authorized to enforce the Act, the operator of a fishing vessel shall be alert for signals conveying enforcement instructions. The vessel may guard Channel 16, VHF–FM, or 2182 KH2, if equipped with suitable radios, to receive verbal instructions. The following visual signals extracted from the International Code of Signals are among those which may be used:

(1) "L" meaning "You should stop your vessel instantly,"

(2) "SQ3" meaning "You should stop or heave to; I am going to board you,"

(3) "RY CY" meaning "You should proceed at slow speed, a boat is coming to you," and

(4) "AA AA AA etc." is the call to an unknown station.

(c) *Boarding.* A vessel signaled to stop or heave to for boarding shall:

(1) Stop immediately and lay to or maneuver in such a way as to permit the authorized officer and his or her party to come aboard;

(2) If requested, provide a safe ladder for the authorized officer and his or her party;

(3) When necessary to facilitate the boarding, provide a man rope, safety line, and illumination for any ladder; and

(4) Take such other actions as necessary to ensure the safety of the authorized officer and his or her party and to facilitate the boarding.

§ 675.9 Penalties.

Any person or fishing vessel found to be in violation of this part will be subject to the civil and criminal penalty provisions and forfeiture provisions prescribed in the Act, in 50 CFR Parts 620 (Citations) and 621 (Civil Procedures), and in other applicable law.

Subpart B—Management Measures

§ 675.20 General limitations.

(a) *Optimum yield.* The optimum yield (OY), initial estimates of domestic annual harvest (DAH), initial estimates for total allowable level of foreign fishing (TALFF), and reserves for the fishery are set forth in Table 1 of this section. These specifications are for a fishing year beginning on January 1 and ending on December 31. If the combined catch by foreign and United States vessels in all or part of the management area equals the OY for any species or species group except sablefish, turbots, or Pacific cod, the Secretary shall prohibit fishing using trawl gear through December 31. If the OY for sablefish, turbots, or Pacific cod has been caught, the Secretary shall prohibit fishing by United States vessels using longline gear. Except when prohibited under this paragraph, fishing for groundfish by vessels of the United States is permitted at all times in the Bering Sea and Aleutian Islands management area.

TABLE 1.—BERING SEA AND ALEUTIAN ISLANDS FISHERY OPTIMUM YIELDS, TALFF'S, AND RESERVES (IN METRIC TONS)

Reference: Species group	Sub-area[1]	ABC=OY	Reserve	Initial DAH	Initial TALFF
Pollock	Bering Sea	1,000,000	50,000	19,550	930,450
Pollock	Aleutians	100,000			100,000
Yellowfin sole		117,000	5,850	2,050	109,100
Turbots		90,000	4,500	1,075	84,425
Other flatfishes[2]		61,000	3,050	1,300	56,650
Pacific cod		58,700	2,935	24,265	31,500
Pacific ocean perch	Bering Sea	3,250	162	1,380	1,708
Pacific ocean perch	Aleutians	7,500	375	1,380	5,745
Other rockfish		7,727	500	1,550	5,677
Sablefish	Bering Sea	3,300	350	700	2,450
Sablefish	Aleutians	1,500	150	700	650
Atka mackerel		24,900	1,240	100	23,460
Squid		10,000	500	50	9,450
Others		74,249	3,712	2,000	68,537
Total		1,559,226	73,324	56,100	1,429,802

[1] Bering Sea (Statistical areas I, II, III combined). Aleutians (Statistical area IV). Includes Territorial waters.
[2] Excluding Pacific halibut.

(b) *Apportionment to TALFF of reserves and initial DAH.*—(1) *Apportionment of reserves.* As soon as practicable after each of the following dates, and after consultation with the North Pacific Fishery Management Council, the Secretary shall apportion to TALFF up to one fourth (¼) of each reserve amount set forth in Table 1, in accordance with paragraph (b)(3) of this section: February 2, April 2, June 2, and August 2.

(2) *Apportionment of initial DAH.* As soon as practicable after each of the following dates and after consultation with the North Pacific Fishery Management Council, the Secretary shall reassess each DAH amount set forth in Table 1 and shall apportion to TALFF such parts thereof as he determines to be appropriate in accordance with paragraph (b)(3) of this section: June 2 and August 2.

(3) *Standards and procedure for apportionment.*—(i) *General.* The Secretary shall apportion under paragraphs (b)(1) and (b)(2) of this section such amounts as the Regional Director determines will not be harvested by vessels of the United States during the remainder of the fishing year. The amount of reserve which the Regional Director determines will be harvested by vessels of the United States may, in the discretion of the Secretary, be either apportioned to the estimate of domestic annual harvest (DAH) or retained in the reserve as eligible for later apportionment under paragraph (b)(3)(vi) of this section.

(ii) *Factors.* In determining whether or not amounts proposed to be apportioned under paragraphs (b)(1) and (b)(2) of this section will be harvested by vessels of the United States during the remainder of the fishing year, the Regional Director shall consider the following factors, although he shall not be limited to these factors:

(A) Reported United States catch and effort by species and area compared to previously projected United States harvesting capacity;

(B) Projected United States catch and effort by species and area for the remainder of the fishing year;

(C) Amounts of fish, particularly United States harvested fish, already purchased or processed by United States fish processors during the fishing year, compared to previously projected processing capacity of United States fish processors;

(D) Projected processing capacity, and utilization of that capacity for the processing of United States fish processors for the remainder of the fishing year;

(E) Amounts of United States harvested fish already purchased or processed by foreign fishing vessels, compared to previously projected levels of such purchase or processing.

(iii) *Allocation of increases and decreases in DAH among DAP, JVP, and DNP.* The Secretary shall allocate any increases or decreases in DAH amounts resulting from apportionments under paragraphs (b)(1) and (b)(2) of this section among the three components of DAH: the estimates of domestic annual processing (DAP); joint venture processing (JVP); and domestic non-processed fish (DNP).

(iv) *Public Comments:* (A) Comments may be submitted to the Regional Director concerning:

(*1*) Whether, and the extent to which, vessels of the United States will harvest reserve or DAH amounts during the remainder of the fishing year; and

(*2*) Whether, and the extent to which, United States harvested groundfish can or will be processed by United States fish processors or by foreign processing vessels.

Comments should be addressed to Director, Alaska Region, NMFS, P.O. Box 1668, Juneau, Alaska 99802, and must be received by the Regional Director no later than 5 days before the relevant date specified in paragraph (b)(1) or (b)(2) of this section.

(B) The Regional Director shall consider any timely comments submitted in accordance with this paragraph in determining whether and to what extent vessels of the United

States will harvest reserve or DAH amounts during the remainder of the fishing year, and whether any part of such amounts will be allocated to TALFF under paragraphs (b)(1) or (b)(2) of this section.

(C) The Regional Director shall compile, in aggregate form, the most recent available reports on (*1*) level of catch and effort by vessels of the United States fishing for groundfish in the Bering Sea and Aleutian Islands fishery; and (*2*) amounts of United States harvested groundfish taken in the Bering Sea and Aleutian Islands fishery and processed by United States fish processors or delivered at sea to foreign fishing vessels. These data shall be available for public inspection during business hours (8:00 a.m.–4:30 p.m., Monday–Friday) at the National Marine Fisheries Service Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802, during the last 15 days of each comment period.

(v) *Procedure.* As soon as practicable after each of the dates specified in paragraphs (b)(1) and (b)(2) of this section, the Secretary shall publish in the **Federal Register:**

(A) Any reserve amounts to be apportioned to TALFF or DAH;

(B) Any DAH amounts to be apportioned to TALFF;

(C) The distribution of amounts apportioned to or from DAH among DAP, JVP, and DNP;

(D) The reasons for any apportionments and their distribution; and

(E) Responses to any comments received.

(vi) *Add-on.* If, following any of the first three of the four dates specified in paragraph (b)(1) of this section, the Secretary apportions less than 25 percent of any reserve amount to TALFF and DAH, the nonapportioned part of that 25 percent shall be added to the reserve amounts available for apportionment on the next date specified in paragraph (b)(1) of this section.

(c) *Prohibited species.* (1) Prohibited species, for the purpose of this part, means any species of fish caught while fishing for groundfish in the Bering Sea and Aleutian Islands management area, the retention of which is prohibited by other applicable law. Any catch of Pacific halibut by fishing vessels regulated under this part is a catch of a prohibited species, unless retention is authorized by regulations of the International Pacific Halibut Commission. Any catch of Tanner crab or salmon by vessels regulated under this part is catch of a prohibited species.

(2) The operator of each vessel regulated under this part shall minimize its catch of prohibited species.

(3) The operator of each vessel regulated under this part shall sort its catch as soon as possible after retrieval of the catch and, after allowing for sampling by an observer (if any), shall return any catch of prohibited species or parts thereof to the sea immediately with a minimum of injury regardless of its condition.

(4) It shall be a rebuttable presumption that any prohibited species found onboard a fishing vessel regulated under this part was caught and retained in violation of this subsection.

Proposed Rules

Federal Register
Vol. 46, No. 251
Thursday, December 31, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 958

Onions Grown in Certain Designated Counties in Idaho and Malheur County, Oregon; Decision on Proposed Amendment of Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision proposes an amendment to the marketing agreement and order regulating onions grown in Idaho and Malheur County, Oregon. The proposed amendment would add a public member to the marketing order administrative committee and authorize the prohibition of overloading railcars. The primary intent of the proposal is to improve the program's administration and usefulness.

DATES: Referendum Period January 11–January 20, 1982.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter, Chief, Vegetable Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447–2615.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing—Issued April 13, 1981, and published April 17, 1981 (46 FR 22382). Notice of Recommended Decision—Issued September 23, 1981, and published September 29, 1981 (46 FR 47585).

This action is subject to the formal rulemaking requirements of the Administrative Procedure Act, and therefore is not subject to the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a have a significant economic impact on a substanital number of small entities because it would not measurably affect costs for the regulated handlers.

This proposed amendment was formulated on the record of a public hearing held in Ontario, Oregon, on May 13, 1981. Notice of the hearing was published in the April 17, 1981, issue of the **Federal Register**. The notice set forth a proposed amendment submitted by the Idaho-Eastern Oregon Onion Committee on behalf of onion producers and handlers in the production area.

On the basis of the evidence introduced at the hearing and placed in the record, on September 23, 1981, the Deputy Administrator filed a recommended decision with the U.S. Department of Agriculture Hearing Clerk. Notice of such recommended decision was published in the September 29, 1981 issue of the **Federal Register** (46 FR 47585). In the recommended decision notice was given of the opportunity to file comments by October 29, 1981. One exception was filed by M. J. Glen, Market Manager, Exempt Agricultural Products, Union Pacific Railroad Company.

Findings and Conclusions. The material issues, findings and conclusions, rulings and general findings of the recommended decision are hereby incorporated by reference and made part of this decision, subject to the following modifications and corrections.

In Material Issue (2), seven new paragraphs are added after the thirteenth paragraph as follows:

"The exceptor opposed adding authority to establish maximum limits on railcar loading for three reasons: (1) The evidence does not show that the arrival condition of onions is directly related to the quantity loaded in a railcar; (2) This authority would have detrimental effects on the competitive positions of the Idaho-Eastern Oregon onion industry and of the Union Pacific Railroad Co.; and (3) The proposal is beyond the authority of the act."

"In support of his first point, the exceptor questions conclusions drawn from the results to a sruvey conducted by the Idaho-Eastern Oregon Fruit and Vegetable Association, an organization whose membership includes all area onion shippers. The association requested the 21 area onion shippers to indicate damage claims experienced during the 1979–80 season which were related to overloaded railcars, and eight responses were received. Results appearing in the hearing record show total dollar amounts of claims for different ranges of loading levels, with larger dollar amounts appearing for cars loaded more heavily. The exceptor contends that these total amounts are meaningless and that it is necessary to take into consideration the number of cars in each weight category and calculate the average claim per sack. Using Union Pacific records, these figures were calculated. The relationship between the number of sacks per car and the claim per sack was not linear; that is, there was not an increase in the claim per sack figure for each increase in the number of sacks per car. The exceptor concludes that damage is therefore not related to heavier loading."

"However, the claim per bag figures for cars loaded with less than 1,800 sacks are substantially below those for cars more heavily loaded. This fact, in conjunction with other information on the record, supports the conclusion that heavier loading and increased damage to onions are related."

"In relation to his second point, the exceptor contends that a loading limitation would increase transportation costs. This increase would be reflected in higher delivered prices, and therefore onions from Idaho-Eastern Oregon would be less competitive with those from other areas."

"The marketing order program is used to improve the quality of onions shipped from the production area and to promote that quality, thereby improving the position of the area's onions in the marketplace. It is financed by assessments levied on handlers and voluntary contributions from industry members. Investments in the program are believed to be offset by benefits derived from offering a higher quality product. Limiting loads on railcars is necessary for the success of this program, and any increase in cost should be offset by gains in consumer acceptance resulting from offering higher quality."

"The exceptor believes the increased transportation cost will also make Union Pacific less competitive in relation to trucks. Over 80 percent of the onions from Idaho-Eastern Oregon that are transported by rail are shipped to eastern markets. This is primarily due to cost savings relative to trucks in shipping onions this distance. As

previously discussed, it recently cost $3.25 per sack to haul a load to New York City by truck, $2.07 to haul a railcar loaded with 2,200 sacks, and $2.84 to haul a railcar loaded with 1,600 sacks. Even if the loading limit were established at 1,600 sacks per car, rail transportation would still provide a savings of $0.41 per sack. It is unlikely that the committee would recommend a limit so low that it would erase the economic benefits of using the railroad, especially since about one-third of total shipments are transported by rail."

"Finally, the exceptor states that adding the authority to prohibit overloading railcars would subject the railroad to regulation. Although regulations which may be issued under this authority may indirectly affect the railroad, they would only apply to, and be legally binding on, onion handlers."

In addition, the following revisions correcting the recommended decision are made:

On page 47585, third column, third paragraph, line 23, change "pubic" to "public."

On page 47587, first column, fourth paragraph, line 8, change "very" to "vary."

Rulings on exceptions. In arriving at the findings and conclusions of this decision, the exception to the recommended decision was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions of this decision are at variance with the exception, such exception is hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed and made a part of this decision are two documents entitled "Marketing Agreement, as Further Amended, Regulating the Handling of Onions Grown in Certain Designated Counties in Idaho and Malheur County, Oregon," and "Order Amending the Order, Regulating the Handling of Onions Grown in Certain Designated Counties in Idaho and Malheur County, Oregon," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the annexed marketing agreement,[1] be published in the **Federal Register**. The regulatory provisions of the marketing agreement are identical to those contained in the order which is published with this decision.

Referendum order. It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 *et seq.*), to determine whether the issuance of the annexed order amending the order regulating the handling of onions grown in Idaho and Malheur County, Oregon, is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production of the regulated commodity for market.

The representative period for the conduct of such referendum is hereby determined to be July 1, 1980, through June 30, 1981.

The agents of the Secretary to conduct such referendum are hereby designated to be Joseph C. Perrin, Gary D. Olson, and Anne M. Dec.

Copies of this decision are being mailed to known interested persons. Others may obtain copies from Mr. Charles W. Porter, Chief, Vegetable Branch, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, Phone (202) 447–2615, or from Joseph C. Perrin, Northwest Marketing Field Office, AMS–USDA, Boise-Cascade Building, Suite 805, 1600 SW., 4th Avenue, Portland, Oregon 97201, Phone (503) 221–2724.

Signed at Washington, D.C., on December 23, 1981.

John Ford,

Deputy Assistant Secretary, Marketing and Inspection Services.

Order[1] amending the order regulating the handling of onions grown in certain designated counties in Idaho and Malheur County, Oregon

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of Marketing Order No. 958 (7 CFR Part 958), regulating the handling of onions grown in Idaho and Malheur County, Oregon.

Upon the basis of the record, it is found that:

(1) The order, as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as hereby amended, regulates the handling of onions grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing order upon which hearings have been held;

(3) The order, as hereby amended, is limited in its application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as hereby amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of onions grown in the production area; and

(5) All handling of onions grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of onions grown in Idaho and Malheur County, Oregon, shall be in conformity to and in compliance with the terms and conditions of the said order, as hereby amended.

The provisions of the proposed marketing order, amending the order, contained in the recommended decision issued by the Deputy Administrator on September 23, 1981, and published in the **Federal Register** on September 29, 1981 (46 FR 47585), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

PART 958—ONIONS GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO, AND MALHEUR COUNTY, OREGON

1. Revise paragraph (a) of § 958.20 to read:

§ 958.20 Establishment and membership.

(a) The Idaho-Eastern Oregon Onion Committee, consisting of six producer

[1] The marketing agreement is filed as part of the original document.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

members, four handler members, and one public member is hereby established. Each shall have an alternate who shall have the same qualifications as the member.

* * * * *

2. Revise the introductory text and add paragraph (e) to § 958.22 to read:

§ 958.22 Selection.

The Secretary shall select committee members and alternates from the nominee lists submitted pursuant to this part or from among other eligible persons.

* * * * *

(e) The public member shall be a resident of the production area and have no direct financial interest in the commercial production, financing, buying, packing or marketing of onions except as a consumer nor be a director, officer or employee of any firm so engaged.

§ 958.25 [Amended]

3. Add a new paragraph (k) to § 958.25 to read:

* * * * *

(k) To recommend nominees for the public member and alternate.

4. Add a new paragraph (g) to § 958.28 to read:

§ 958.28 Nominations.

* * * * *

(g) The producer and handler members of the committee shall nominate the public member and alternate. The committee shall prescribe such additional qualifications, administrative rules and procedures for selection and voting for each candidate as it deems necessary and as the Secretary approves.

5. Add a new paragraph (a)(6) to § 958.52 to read:

§ 958.52 Issuance of regulations.

* * * * *

(a) * * *

(6) Regulate the handling of onions by establishing, in terms of total weight or total number of layers of containers of onions, the maximum load in railcars, taking into account types of containers and sizes of railcars used, potential resulting damage, and other relevant factors.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Emergency Planning and Preparedness for Research and Test Reactors: Extension of Submittal Dates

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Nuclear Regulatory Commission is proposing to amend its regulations in order to extend: (1) For four months after effective date of rule the present November 3, 1981 date by which each licensee authorized to possess and/or operate a research or test reactor facility at a power level greater than or equal to 2 MW thermal must submit emergency plans complying with 10 CFR Part 50, Appendix E, and (2) for one year the present November 3, 1981 date by which each licensee must submit emergency plans for research and test reactors with authorized power levels between 500 KW and 2 MW thermal.

DATES: Comment period expires February 1, 1982. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given as to comments received on or before this date.

ADDRESSES: Interested persons are invited to submit written comments and suggestions on the *proposed amendment* to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received by the Commission may be examined in the Commission's Public Document Room at 1717 H Street, NW, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Steve L. Ramos, Chief, Emergency Preparedness Development Branch, Division of Emergency Preparedness, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Telephone: 301-492-9602).

SUPPLEMENTARY INFORMATION: On August 19, 1980, the Nuclear Regulatory Commission published in the **Federal Register** (45 FR 55402) amendments to its regulations concerning the upgrading of emergency planning and preparedness. The effective date for these regulations was November 3, 1980.

Among other things, the revised regulations required each licensee authorized to possess and/or operate a research or test reactor facility with power levels greater than or equal to 500 KW thermal, under licenses of the type specified in 10 CFR 50.21(c), to submit emergency plans to the Director of Nuclear Reactor Regulation for approval within one year from the effective date of the rule, *i.e.* by November 3, 1981. A similar requirement for such reactors with power levels less than 500 KW thermal requires emergency plan submittals by November 3, 1982.

The NRC staff has evaluated the capabilities of the 24 licensees operating at 500 KW thermal or above to submit revised emergency plans by November 3, 1981 which will meet all of the requirements in the emergency planning and preparedness regulations. *See* 10 CFR 50.47, 50.54, and Appendix E to Part 50.

These 24 licensees will not be able to submit emergency plans fully complying with 10 CFR Part 50 requirements by November 3, 1981. This inability to meet the November 3, 1981 date for submitting emergency plans is attributed to the delay in development of revised guidance criteria for the preparation of emergency plans for research and test reactors that are consistent with the amended regulations. If the extensions of time in the proposed rule are not finally adopted enforcement action on this requirement will not be initiated until a reasonable time after a Commission decision not to adopt the rule. A copy of this notice will be sent to all affected licensees.

While compliance by affected licensees with the November 3, 1981 date for submittal of emergency plans will be delayed, the Commission considers that the state of emergency preparedness has significantly improved within the last year at research and test reactor facilities. This improvement has been confirmed by licensee participation and exchange of information in the development of guidance criteria on planning standards for preparation and evaluation of radiological emergency response plans for research and test reactors. In addition, all research and test reactor licensees (65 total) presently have emergency plans prepared pursuant to 10 CFR Part 50 prior to the upgrade of the emergency planning regulations in 1980.

The other proposed change offered for public consideration is in the thermal power level threshold-from 500 KW to MW-which governs the applicable date for submittal of emergency plans. The NRC believes this upward revision more accurately reflects the power level at which core degradation, and therefore, the potential for offsite consequences

could occur from a loss of coolant accident.

A loss of coolant accident for research and test reactors is where the reactor pool or tank could be drained through a break of an experimental beam port, crack of a primary coolant line, or other means, thus removing the liquid coolant medium from the reactor. This has the possibility, for reactors operating at above 2 MW thermal, of causing fuel melt with the possible consequences of releasing fission products. A heat transfer analysis of plate-type fuel with aluminum cladding shows that these fuel elements do not melt until they reach a temperature of 923°K. The University of Michigan's 2 MW pool reactor has shown by analysis and simulation experiments for MTR plate-type fuel that if the pool was drained (water cooling removed) over a period of 10 minutes, the fuel would not melt. Some types of research reactors, operating at power levels up to 0.1 MW, routinely dump water from the core on scram to further assure a rapid decrease in reactivity. In light of the credible accidents postulated for research and test reactors resulting in core degradation, the 2 MW thermal power level is a more realistic power level threshold governing the dates for submittal of emergency plans for these facilities. Specifying that the few higher power research and test reactors must submit emergency plans first will assure that priority attention will be given to those reactors which have the most potential to present an offsite hazard.

Based on the above information, the Commission finds that there exists sufficient reason to believe that appropriate protective measures can and will be taken for the protection of the health and safety of the public in the event of a radiological emergency if the date to submit emergency plans for 2 MW and above licensees is deferred from November 3, 1981 to four months after effective date of rule, and if the authorized power level threshold governing those licensees subject to the new submittal date is changed from 500 KW thermal to 2 MW thermal. For licensees under 2 MW thermal, the submittal date of November 3, 1982 would remain unchanged. The results of this proposed amendment would be that 10 facilities having power levels of 2 MW and above would be required to make submittals by four months after effective date of rule and the remaining 55 facilities by November 3, 1982.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the NRC certifies that this rule will not have a significant economic impact on a substantial number of small entities. The proposed rule concerns an extension of the date for research and test reactors licensed under 10 CFR Parts 50 and 70 to submit emergency plans complying with 10 CFR Part 50, Appendix E, to the Director of Nuclear Reactor Regulation for approval. Accordingly, there is no significant economic impact on a substantial number of small entities, under the Regulatory Flexibility Act of 1980.

Paperwork Reduction Act Statement

Pursuant to the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the NRC has made a preliminary determination that this proposed rule does not impose new recordkeeping, information collection, or reporting requirements.

Accordingly, notice is hereby given that, pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, adoption of the following amendments to 10 CFR Part 50 is contemplated.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 reads ad follows:

Authority: Sections, 103, 104, 161, 182, 183, 189, 68 Stat. 936, 937, 948, 953 954, 955, 956, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2239); secs. 201, 202, 206, 88 Stat. 1243, 1244, 1246 (42 U.S.C. 5841, 5842, 5846), unless otherwise noted. Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 50 100–50.102 issued under sec. 186, 68 Stat. 955 (42 U.S.C. 2236). For the purpose of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273, § 50.54(i) issued under sec. 161i, 68 Stat. 949 (42 U.S.C. 2201(i)); §§ 50.70, 50.71, and 50.78 issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)), and the laws referred to in Appendices.

2. Paragraph (r) of 10 CFR 50.54 is revised to read as follows:

§ 50.54 Conditions of licenses.

* * * * *

(r) Each licensee who is authorized to possess and/or operate a research or test reactor facility with an authorized power level greater than or equal to 2 MW thermal, under a license of the type specified in § 50.21(c), shall submit emergency plans complying with 10 CFR Part 50, Appendix E, to the Director of the Nuclear Reactor Regulation for approval within four months after effective date of rule. Each licensee who is authorized to possess and/or operate a research or test reactor facility with an authorized power level less than 2 MW thermal, under a license of the type specified in § 50.21(c), shall submit emergency plans complying with 10 CFR Part 50 Appendix E, to the Director of the Nuclear Reactor Regulation for approval by November 3, 1982.

* * * * *

Dated at Washington, D.C. this 28th day of December, 1981.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 81–37291 Filed 12–30–81; 8:45 am]

BILLING CODE 7590–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 81–EA–33]

Proposed Alteration of Transition Area: Oneonta, N.Y.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Oneonta, N.Y., Transition Area over Oneonta Municipal Airport, Oneonta, N.Y. A new instrument approach has been developed for the airport and will require protection for aircraft executing the new instrument approach. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before February 8, 1982.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA–530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430. The docket may be examined at the following locations: FAA, Office of Regional Counsel, AEA–7, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT:

Al Reale, Airspace and Procedures Branch, AEA–530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995–3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

All communications received on or before February 8, 1982, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA–530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York, 11430, or by calling (212) 995–3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Oneonta, N.Y., Transition Area. The area will be altered by adding an extension to the northeast approximately 7 miles wide and 11.5 miles long.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposed to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by altering the description of the Oneonta, New York, 700-foot floor transition area by deleting, "extending from the 7-mile radius area to the VORTAC." and by substituting therefor, "extending from the 7-mile radius area to the VORTAC; and within 3.5 miles each side of the Oneonta Municipal Airport localizer course extending from the 7-mile radius area to 11.5 miles northeast of the outer marker."

Section 307(a) of the Federal Aviation Act of 1958 [72 Stat. 749; 49 U.S.C. 1348(a)] and of Section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)]; and CFR 11.65.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York, on December 1, 1981.

Timothy L. Hartnett,

Acting Director, Eastern Region.

[FR Doc. 81-36838 Filed 12-30-81; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 81-ASW-68]

Proposed Alteration of Transition Area: Leeville, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration proposes the alteration of a transition area at Leeville, LA. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing new instrument approach procedure to the Caillou Island Seaplane Base. This action is necessary since new instrument operations will be conducted arriving/departing the seaplane base. The standard instrument approach procedure (SIAP) will utilize the Leeville VORTAC. Coincident with this action, the seaplane base is changed from visual flight rules (VFR) to instrument flight rules (IFR).

DATES: Comments must be received on or before February 1, 1982.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Forth Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8 a.m. and 4:30 p.m. The FAA Rules Docket is located in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT:

Kenneth L. Stephenson, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (817) 624–4911, extension 302.

SUPPLEMENTARY INFORMATION:

History

Federal Aviation Regulation Part 71, Subpart G § 71.181 as republished in the **Federal Register** on January 2, 1981 (46 FR 540), contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Alteration of the transition area at Leeville, LA, will necessitate an amendment to this subpart. This amendment will be required at Leeville, LA, since there are proposed IFR procedures to the Caillou Island Seaplane Base.

Comments Invited

Interested persons may participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. (Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals.) Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 81–ASW–68." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available

for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, or by calling (817) 624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by adding the following:

Leesville, LA

* * * and within a 5-mile radius of the Caillou Island Seaplane Base (latitude 29°06'20" N., longitude 90°28'40" W.) and within 2.5 miles each side of the 258° radial of the Leesville VORTAC extending from the 5-mile radius area to 16 miles west of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 1103; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation, will not have significant effect on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on December 21, 1981.

F. E. Whitfield,

Acting Director, Southwest Region.

BILLING CODE 4910-13-M

14 CFR Parts 71 and 73

[Airspace Docket No. 81-AWP-22]

Proposed Temporary Restricted Area, Calif.; GALLANT EAGLE 82

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to designate temporary Restricted Area GALLANT EAGLE 82 in the vicinity of Death Valley, CA, to contain a major military exercise. Those segments of restricted areas that penetrate the Continental Control Area would be designated as controlled airspace. This action would permit military exercises, both ground and air, to be conducted in a safe and secure environment.

DATES: Comments must be received on or before February 1, 1982.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Western Pacific Region, Attention: Chief, Air Traffic Division, Docket No. 81-AWP-22, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, CA 90009.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal.

Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 81-AWP-22." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.151 and § 73.25 of Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to designate temporary Restricted Areas R-2538 A through H to contain a major joint military exercise called GALLANT EAGLE 82. This exercise would provide training for several military commands operating under the sponsorship of the United States Readiness Command. The air activities associated with the exercise will be such that flights of nonparticipating aircraft cannot be safely conducted within the proposed temporary restricted airspace when the airspace is in use by the military.

Approximately 115 aircraft would be utilized to conduct about 160 daily sorties. Communications equipment would be installed and maintained between the appropriate military and FAA facilities to coordinate the operations of nonparticipating aircraft

through the temporary restricted area whenever military activity permits. Additionally, a reverse charge telephone number would be established and published for pilots of nonparticipating aircraft to coordinate directly with the military if desired. The proposed restricted area would be designated as a joint use to permit authorization by the controlling agency (FAA) for access/egress by VFR and IFR traffic whenever military activity permits. All airports within the proposed temporary restricted area would be given relief by excluding the airspace 1,200 feet AGL and below within 3 nautical miles (NM) radius of the airport. Exercise aircraft will remain clear of VFR nonparticipating aircraft outside restricted airspace. Appropriate altitude separation will be used to provide separation from IFR nonparticipating aircraft.

Provision will be made to accommodate civil aircraft through the exercise area, except for the permanent restricted airspace, on a noninterference basis.

The Tactical Air Command/DEEV will serve as lead agency for purposes of compliance with the National Environmental Policy Act (NEPA). The certification of NEPA compliance has been forwarded to the FAA Western Region, Attention: Mr. Thomas Binczak, telephone number (213) 966–6182. Sections 71.151 and 73.25 of Parts 71 and 73 were republished on January 2, 1981 (46 FR 446 and 787).

Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.151 and § 73.25 of Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as republished (46 FR 446 and 787) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

§ 71.151 [Amended]

By adding the following temporary restricted areas:

R–2538A, GALLANT EAGLE 82
R–2538B, GALLANT EAGLE 82
R–2538C, GALLANT EAGLE 82
R–2538D, GALLANT EAGLE 82
R–2538E, GALLANT EAGLE 82
R–2538F, GALLANT EAGLE 82
R–2538G, GALLANT EAGLE 82
R–2538H, GALLANT EAGLE 82

PART 73—SPECIAL USE AIRSPACE

§ 73.25 [Amended]

By adding the following temporary restricted areas:

R–2538A, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 34°59′N., long. 116°53′W.; to lat. 35°01′N., long. 116°41′W.; to lat. 35°39′N., long. 115°53′W.; to lat. 37°12′N., long. 117°20′W.; to lat. 37°12′N., long. 118°10′W.; to lat. 36°39′N., long. 117°57′W.; to lat. 36°20′N., long. 117°23′W.; to lat. 35°48′N., long. 117°16′W.; to lat. 35°36′N., long. 117°16′W.; to lat. 35°36′N., long. 117°26′W.; to lat. 35°16′N., long. 117°26′W.; to lat. 35°16′N., long. 117°05′W.; to point of beginning.

Designated altitudes. 100 feet AGL to FL 500 (3,000 feet AGL minimum altitude over Death Valley National Monument).

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

R–2538B, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 34°59′N., long. 116°53′W.; to lat. 35°01′N., long. 116°41′W.; to lat. 35°39′N., long. 115°53′W.; to lat. 34°43′N., long. 115°27′W.; to lat. 34°43′N., long. 116°26′W.; to lat. 34°34′N., long. 116°35′W.; to point of beginning.

Designated altitudes. FL 350 to FL 500.

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

R–2538C, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 34°41′N., long. 116°30′W.; to lat. 34°43′N., long. 116°30′W.; to lat. 34°43′N., long. 116°02′W.; to lat. 35°22′N., long. 116°14′W.; to lat. 35°01′N., long. 116°41′W.; to point of beginning.

Designated altitudes. 100 feet AGL to 7,500 feet MSL.

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

R–2538D, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 34°14′N., long. 115°44′W.; to lat. 34°17′N., long. 115°40′W.; to lat. 34°22′N., long. 115°35′W.; to lat. 34°43′N., long. 115°27′W.; to lat. 34°43′N., long. 116°26′W.; to lat. 34°34′N., long. 116°35′W.; to lat. 34°14′N., long. 116°19′W.; to point of beginning.

Designated altitudes. 500 feet AGL to FL 500.

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

R–2538E, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 34°03′N., long. 116°11′W.; to lat. 34°08′N., long. 115°53′W.; to lat. 34°14′N., long. 115°44′W.; to lat. 34°14′N., long. 116°19′W.; to point of beginning.

Designated altitudes. 2,000 feet AGL to 17,000 feet MSL.

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

R–2538F, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 36°01′N., long. 116°13′W.; to lat. 36°28′N., long. 115°26′W.; hence NW along boundary of R–4806; to lat. 36°41′N., long. 115°55′W.; to lat. 36°21′N., long. 116°32′W.; to point of beginning.

Designated altitudes. 14,000 feet MSL to 15,000 feet MSL.

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

R–2538G, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 36°53′N., long. 117°01′W.; to lat. 37°03′N., long. 116°43′W.; to lat. 37°20′N., long. 116°59′W.; to lat. 37°12′N., long. 117°20′W.; to point of beginning.

Designated altitudes. FL 210 to 220.

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

R–2538H, GALLANT EAGLE 82 [New]

Boundaries. Beginning at lat. 36°53′N., long. 117°01′W.; to lat. 37°03′N., long. 116°43′W.; to lat. 37°20′N., long. 116°59′W.; to lat. 37°12′N., long. 117°20′W.; to point of beginning.

Designated altitudes. 100 feet AGL to 2,000 feet AGL.

Time of designation. 0100 to 2300 local time, March 30–April 6, 1982.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. U.S. Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED) Langley AFB, VA 23665.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory

Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, DC, on December 23, 1981.

John W. Baier,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 81-37147 Filed 12-30-81; 8:45 am]

BILLING CODE 4910-13-M

CIVIL AERONAUTICS BOARD

14 CFR Ch. II

Regulatory Flexibility Act Review List

AGENCY: Civil Aeronautics Board.

ACTION: Publication of annual Regulatory Flexibility Act review list.

SUMMARY: The CAB invites comments on several of its rules in accordance with the review provisions of the Regulatory Flexibility Act.

DATES: Adopted: December 23, 1981.

ADDRESSES: Twenty copies of comments should be sent to Docket 39932, 40336, or 40337 (see below). Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Mark Schwimmer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; 202-673-5442.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, Pub. L. 96-354, requires each agency to publish in the **Federal Register** a plan for the periodic review of the agency's rules that "have or will have a significant economic impact on a substantial number of small entities." The plan must provide for review of all such rules within 10 years. In addition, the agency must publish annually in the **Federal Register** a list of those rules to be reviewed during the following 12 months, with an invitation for public comments on them. The purpose of the review is to determine,

whether such rules should be continued without change, or should be amended or rescinded, consistent with the stated objectives of applicable statutes, to minimize any significant economic impact of the rules upon a substantial number of such small entities. (5 U.S.C. 610)

The Board publish its review plan at 46 FR 33353, June 29, 1981. The Board explained that, in connection with the impending sunset of the agency, it was reviewing all its rules, not merely those that met the impact criterion of the Regulatory Flexibility Act. The Board also listed seven rules that were already under review, and announced that in December 1981 it would publish a list of the most important rules that it had not already begun to review in individual proceedings.

This notice updates the status of the rules listed in June, and invites comments on three of them. The rules are as follows:

Denied boarding compensation. (14 CFR Part 250). In ER-1237, 46 FR 42442, August 21, 1981, the Board amended its rules governing oversales and denied boarding compensation to exclude entirely operations with 60-seat and smaller aircraft. Further review of these rules is discussed below under the invitation for comments.

Smoking on airplanes. (14 CFR Part 252). In ER-1245, 46 FR 45934, September 16, 1981, the Board revised its smoking rule after a general review of the smoking issue. The rule now applies to certificated and commuter airlines in their operations with larger than 30-seat aircraft. It requires these airlines to separate smokers and nonsmokers and to provide a seat in the no-smoking section for all nonsmokers who arrive by the airline's check-in deadline. The Board is now considering a petition from the Regional Airline Association in Docket 29044 to limit the applicability of this rule to larger than 60-seat aircraft.

Rules tariffs and notice to passengers of conditions of carriage (14 CFR Part 221). Earlier notices of proposed rulemaking on this subject were EDR-396, Docket 38021, 45 FR 25817, April 16, 1980, and EDR-404, Docket 38348, 45 FR 42629, June 25, 1980. These proceedings were consolidated by supplemental notice of proposed rulemaking EDR-404B, Docket 38348, 46 FR 35936, July 13, 1981. Comments were due August 26 and reply comments were due September 14, 1981.

Charters (14 CFR Parts 207, 208, 212, 380). (See invitation for comments below.)

Baggage liability in domestic air transportation. (See invitation for comments below.)

Registration procedures for Canadian charter air taxi operators. In ER-1257, Docket 39000, 46 FR 52590, October 27, 1981, the Board eliminated the requirement that Canadian charter air taxi operators obtain foreign air carrier permits under section 402 of the Federal Aviation Act. Instead of the extensive information normally required by 14 CFR Part 211, these small carriers now merely have to register with the Board, a quicker and easier process.

Registration of foreign charters operators. In SPR-179, Docket 38023, 46 FR 56605, November 18, 1981, the Board substituted a simple registration procedure for the previous requirement that foreign charter operators obtain a foreign air carrier permit.

Request for Comments

1. *Denied boarding compensation.* (14 CFR Part 250). By notice of proposed rulemaking EDR-436, Docket 39932, 46 FR 62285, December 23, 1981, the Board has recently begun a comprehensive review of its rules on oversales and denied boarding compensation. Comments are due February 22, 1982 and reply comments are due March 9, 1982.

2. *Charters.* (14 CFR Parts 207, 208, 212, 380). The Board's current charter rules are based on sections 204, 401, 402, 403, 404, 407, 408, 409, 411, and 416 of the Federal Aviation Act of 1958. They specify the types of charters that may be performed, and prohibit all others. For those that are authorized, the requirements can be divided into four areas: (1) protection for public charter participants' funds, in the form of requirements for both carriers and charter operators to post bonds and set up depository accounts, (2) protection of participants' expectations, in the form mainly of detailed rules concerning the contents of operator-participant contracts, such as price changes, cancellations, and itinerary changes, (3) a body of rules dealing with non-public charters, such as "affinity group" and "single-entity" charters, and (4) the remainder, a miscellaneous collection of rules dealing mainly with the relations between the direct air carrier and the charterer. The Board is reconsidering all these rules on charters in light of deregulation, and plans to issue a notice of proposed rulemaking on this subject in Docket 40336 in the near future. Interested persons are invited to file comments on charters in this docket, and need not await publication of the proposal.

3. *Baggage liability in domestic air transportation.* The Board's domestic baggage liability rules are based on sections 204, 403, 404, and 411 of the Federal Aviation Act of 1958. The rules govern air carriers' liability limits for

lost, damaged, or delayed baggage. They also affect disclaimers of liability for fragile or perishable items and carriers' baggage claim procedures. The Board is reconsidering these rules in light of deregulation, and plans to issue a notice of proposed rulemaking on baggage liability in Docket 40337 in the near future. Interested persons are invited to file comments on baggage liability in this docket, and need not await publication of the proposal.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76 (Wyoming-8)]

High-Cost Gas Produced From Tight Formations; Wyoming

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking by the Director of the Office of Pipeline and Producer Regulations contains the recommendation of the State of Wyoming that the Frontier Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on January 22, 1982.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on January 7, 1982.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street NE,. Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8317, or Victor Zabel, (202) 357-8616.

SUPPLEMENTARY INFORMATION:

I. Background

On December 14, 1981, the State of Wyoming Oil and Gas Conservation Commission (Wyoming) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Frontier Formation located in Lincoln, Sublette, and Sweetwater Counties, Wyoming, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Wyoming's recommendation that the Frontier Formation be designated a tight formation should be adopted. The United States Geological Survey concurs with Wyoming's recommendation. Wyoming's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The recommended formation is located north and east of the La Barge platform area in southwest Wyoming. The area contains about 222,720 acres and is in Lincoln, Sublette, and Sweetwater Counties, Wyoming. It encompasses all or part of Townships 25 and 26 North, Range 109 West; Township 29 North, Range 111 West; Townships 26 through 31 North, Range 112 West; and Townships 28 through 31 North, Range 113 West.

The vertical limits of the Frontier Formation are defined by the Baxter Shale Formation above and the Mowry Shale Formation below. The depth to the top of the formation averages 7,700 feet and gross thickness varies from 50 to 150 feet.

III. Discussion of Recommendation

Wyoming claims in its submission that evidence gathered through information and testimony presented at a public hearing in Case No. 1, Order No. 1, Docket No. 53-81(A) convened by Wyoming on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Wyoming further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Wyoming that the Frontier Formation, as described and delineated in Wyoming's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C., 20426, on or before January 22, 1982. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76 (Wyoming-8), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing that they wish to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than January 7, 1982.

(Natural Gas Policy Act of 1978, (15 U.S.C. 3301-3342))

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations as set

forth below, in the event Wyoming's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—CEILING PRICES

Section 271.703(d) is amended by adding new subparagraph (84) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* The following formations are designated as tight formations. A more detailed description of the geographical extent and geological parameters of the designated tight formations is located in the Commission's official file for Docket No. RM79-76, subindexed as indicated, and is also located in the official files of the jurisdictional agency that submitted the recommendation.

* * * * *

(60) through (83) [Reserved]

(84) *Frontier Formation in Wyoming. RM79-76 (Wyoming-8)*—(i) *Delineation of formation.* The Frontier Formation is found in Lincoln, Sublette, and Sweetwater Counties, Wyoming, encompassing all or parts of Townships 25 and 26 North, Range 109 West; Township 29 North, Range 111 West; Townships 26 through 31 North, Range 112 West; and Townships 28 through 31 North, Range 113 West.

(ii) *Depth.* The Frontier Formation's vertical limits are defined by the Baxter Shale Formation above and the Mowry Shale Formation below. The gross thickness of the formation varies from 50 to 150 feet. The average depth to the top of the Frontier Formation is 7,700 feet.

BILLING CODE 6717-01-M

INTERNATIONAL COMMUNICATION AGENCY

22 CFR Part 514

Exchange-Visitor Program

AGENCY: International Communication Agency.

ACTION: Proposed rule.

SUMMARY: The International Communication Agency proposes to establish criteria for the use of the J-1 Visa for the following: (a) Practical Trainees; (b) Summer Student Travel/Work Programs; and (c) International Camp Counselor Programs.

These categories under the J-1 Visa are described by this regulation to ensure proper adherence to the law by program sponsors who are designated to sponsor aliens classified as exchange visitors.

DATE: Comments are due by March 1, 1982.

ADDRESS: Comments should be sent to: James Kelman, Deputy Chief, Exchange Visitor Program, Designation Branch (ECA/PE), International Communication Agency, Room 849, 1776 Pennsylvania Avenue, NW., Washington, D.C. 20547.

FOR FURTHER INFORMATION CONTACT: James Kelman (202) 724-9896.

SUPPLEMENTARY INFORMATION: The International Communication Agency (USICA) assumed from the Department of State overall responsibility for the Exchange-Visitor Program and all related procedures effective April 1, 1978, by Reorganization Plan No. 2 of 1977 and by Executive Order 12048 of March 27, 1978. The Exchange-Visitor Program serves as the accrediting authority for both U.S. Government agencies and private organizations to bring students, teachers, scholars, and trainees to the United States. The Exchange-Visitor Program monitors the host organization's performance to ensure that established criteria are met. The proposed amendment to the present regulations is expected to provide organizations with effective guidelines and criteria with which to administer practical training use of the J-1 Visa.

PART 514—EXCHANGE-VISITOR PROGRAM

22 CFR Part 514 is amended by adding three new paragraphs (c), (d), and (e) to § 514.13 to read as follows:

§ 514.13 Sponsor obligations—specific.

* * * * *

(c) *Practical trainees.* These criteria govern the designation and monitoring by the International Communication Agency (USICA) of Exchange-Visitor Programs under which foreign nationals are provided with opportunities for on-the-job, practical training in the United States for periods of up to 18 months. These criteria apply to Exchange-Visitor Programs having practical training as the primary purpose and do not apply to practical training opportunities which may, under certain conditions, be authorized for foreign students who have completed the requirements for degrees or certificates at educational institutions in the United States. The primary purpose of practical training programs is to improve the participant's knowledge of American techniques, methodology, and philosophy of the individual's own field of endeavor and to enhance the participant's skills through active participation in the day to day operations at the training location. It is also designed to enable the exchange visitor to observe and participate in American life and, if applicable, to improve his or her English language competency. Another prime purpose is to improve American knowledge of a foreign culture by providing the opportunity for an open interchange of ideas between the trainees and their American counterparts.

(1) *Selection.* The Exchange-Visitor Program sponsor must assume ultimate responsibility for the selection of trainees, regardless of the extent to which cooperating organizations in other countries may be involved. Professional recruiters, as well as employment or travel agencies, either in the United States or abroad, shall not be used for the recruitment, screening, or selection of trainees or prospective trainees. The sponsor shall secure sufficiently detailed background data on the individual's education and previous practical training and/or work experience to be able to ensure that the practical training experience in the United States is suitable and appropriate for the individual's level of career development. Trainees must have sufficient knowledge of English to enable them to function in the English speaking environment, both during the normal work period and non-working hours. Selection procedures should ensure that the trainee is medically qualified to perform the specific duties to be assigned.

(2) *Content of training assignments and related activities.* Practical training is intended to provide the individual with a "real life" experience in the conduct of his or her field of endeavor as normally practiced in the United States. As such, the normal or standard number of working hours per week for the particular business or industry must be observed. Suitable training may include one or more of the following: (i) Rotation through several departments; (ii) concentration in a single department; (iii) special projects; (iv) rotation followed by projects; (v) participation in an employer's regularly scheduled training program; or (vi) a special program determined after the trainee's arrival. Related activities which support the practical training experience such as attendance at conferences or conventions, participation in short courses, or enrollment in English language improvement courses may be appropriate in specific individual cases. Such related activities must be clearly secondary to and supportive of the practical training experience. The

content of the practical training assignment and any realted activities must be suitable and appropriate to the individual's level of educational attainment and previous practical training and/or work experience. The future employment and career development of the individual should also be considered in designing the practical training experience.

(3) *Orientation.* The sponsor shall be responsible for providing each participant (and each employer, if appropriate) with orientation which is suitable to the nature and length of the training assignment. This orientation should clearly indicate: (i) The purposes of the program; (ii) the role of the sponsor; (iii) the explanation that the participant is being admitted on a temporary nonimmigrant visa and that he or she must depart from the United States at the conclusion of the training assignment; (iv) the procedures to be followed in the event of an emergency; and (v) the details, to the extent they apply, on matters such as the individual's tax liability, procedures for securing of a Social Security Number, securing of a driver's license, etc. Where possible, orientation for individual participants should also include basic information about the United States, the city or state in which the participant will be assigned, the practice of the individual's field of endeavor in the United States, and any other information which would help to make the individual's experience while in the United States professionally rewarding and personally enriching.

(4) *Interaction with Americans.* The sponsor shall assist and encourage trainees to seek maximum interaction with American citizens during the training period. Subject to limitations imposed by geographic location, length and/or nature of the training assignment, interaction should be encouraged with groups such as families, professional societies, trade unions, educational institutions, service clubs, etc.

(5) *Financial responsibility.* All materials provided to program participants must clearly state the amount(s) to be paid to the trainess by the employer, and additional amount(s) to be paid by the designated program sponsor, and the costs which the trainee is expected to cover personally. Such information should include estimated cost of living in the area where the participant will work. The amount paid to the participant by the employer should be comparable to that paid to other individuals having similar education and previous work experience. In all cases, at least the prevailing minimum wage as determined by the United States Department of Labor must be paid to the participant by the employer. Payment in kind (housing, meals, etc.) may be used to supplement the prevailing minimum wage, but may not be used in lieu of payment of the minimum wage. Payment on the basis of commissions and similar forms of variable amount wages may be used only to the extent that such payments exceed the prevailing minimum wage. If payments are to be made by third parties (i.e., parents, schools, sponsors, government or international organization agencies, etc.) in lieu of payment by the employer, the Exchange-Visitor Program Designation Branch (ECA/PE), International Communication Agency, Washington, D.C. 20547 must be notified in writing to enable the Agency to determine the suitability of such payments.

(6) *Insurance.* The sponsor should be responsible for determining that each participant and any accompanying dependents are adequately covered by health and accident insurance, including provision for repatriation in the event of death or disability, for the entire duration of their stay in the United States in Exchange-Visitor status. A Certificate of Eligibility for Exchange-Visitor Status (IAP–66) should not be issued to a participant and/or dependents unless the sponsor can verify that they are adequately protected.

(7) *Evaluation.* To assure quality control of the training experience, the sponsor shall develop procedures for the on-going evaluation of each training assignment. Such evaluation should include, as a minimum, evaluation reports from the trainee and the immediate supervisor at the end of the training period. Mid-point reports (verbal or written) should also be used for training assignments of one year or more.

(8) *Dependents.* As a general rule, trainees shall be permitted to have their spouse and dependent children accompany them to the United States and the sponsor may document such dependents for J–2 status. All such dependents must be covered by health and accident insurance.

(9) *Limitation on duration of stay.* As specified in § 514.23(a)(1)(vii) of these regulations, the maximum length of stay for practical training employment shall not exceed 18 months total for any one individual, except as specifically approved by USICA under highly unusual circumstances. Such limitation shall apply regardless of the number of Exchange-Visitor Programs in which the individual participates.

(10) *Reciprocity.* As a general principle, each program sponsor shall be expected to seek, as feasible, reciprocal practical training or work experience in other countries for American citizens, either directly or through cooperating agencies, organizations, or institutions abroad. Ideally, the number of placement opportunities for Americans in other countries should be approximately equal to the number of foreign trainees placed in the United States. The Exchange-Visitor Program Designation Branch, International Communication Agency, will review the sponsor's program annually to assure good faith compliance with this objective.

(11) *Reports.* Designated sponsors shall furnish the Exchange-Visitor Designation Branch, International Communication Agency, with an annual report at the end of each calendar year or the close of such other yearly reporting period as may be mutually agreed upon. The annual report shall include: (i) Statistical data on foreign trainees placed in the United States and, where applicable, on American trainees placed in other countries; (ii) A brief evaluation report of the effectiveness of the program for the year including a description of standards and methods used in the evaluation process; and (iii) Specific examples of program accomplishments over a long-range period. Copies on descriptions of program materials such as information folders, orientation data, general publications, evaluation forms, etc. may be appended to the report to varify compliance with criteria stated above. Organizations which have been granted tax-exempt status under the provisions of section 501(c)(3) of the Internal Revenue Code shall also submit a copy of the Form 990 report most recently filed with the Internal Revenue Service.

(12) *Suspension or revocation of Exchange-Visitor Program designation.* Designated sponsors found to be in violation of the above criteria are subject to having program designations suspended or revoked in accordance with § 514.17 of these regulations.

(d) *Summer Student Travel/Work Programs.* The following criteria apply to United States organizations which have been designated by the International Communication Agency (USICA) to administer Summer Student Travel/Work Programs. These programs are designed to achieve the educational objectives of international exchange by involving students during their summer vacations directly in the daily life of the

host country through temporary employment opportunities. The criteria require program sponsors to promote the exchange of United States and foreign students on a reciprocal basis thereby assuring that the operation of such programs will not have an adverse impact on labor opportunities for United States youth in the 18–23 year age bracket.

(1) *Selection.* The selection will be limited to *bona fide* university students screened for maturity and ability to get maximum benefit from Summer Travel/Work Programs. These programs are designed to give foreign university students an opportunity to travel to the United States during their summer vacations with permission to accept employment to help defray their travel and living expenses while here. Priority consideration will be given to students who do not live in close proximity to the United States who would not be able to visit this country if temporary work permission were not authorized to help defray their travel expenses.

(2) *Orientation.* All students should be provided with orientation, both pre-departure and upon arrival in the United States. The orientation should be designed to give the students a good basic knowledge of our country and its people. Students should be fully informed of the nature of the program in which they are participating. They should be provided with some type of identification card which includes the name and phone number of an official of the sponsoring organization as well as the number of the Exchange-Visitor Programs in which they are participating. In addition, orientation should cover proper methods of obtaining and holding a job and the customary practices of giving employers adequate advance notice of resignation. Students should be fully briefed on the employment situation in the United States and admonished not to seek jobs in areas where a high unemployment situation exists.

(3) *Supervision.* Sponsors must be prepared to help their students at any time they have a medical, personal, employment, or other type of problem.

(4) *Jobs.* Each student sponsored on such a program must either have a pre-arranged job before he or she comes to the United States, or firm appointments with prospective employers, or have sufficient personal funds so as not to be financially embarrassed if not employed.

(5) *United States employment.* Sponsors are required to check in advance with the Department of Labor to obtain information regarding areas or cities which have a high unemployment rate. Students should be advised to avoid such areas in seeking employment.

(6) *Financial responsibility.* Sponsors are reuired to ensure that all participants return home at no charge to the United States Government.

(7) *Health and accident insurance.* Sponsors are required to ensure that all students are adequately covered with health and accident insurance.

(8) *Geographical distribution.* Sponsors should develop plans to ensure that groups of students, especially those of the same nationality, are not "clustered" in certain areas or cities. Every effort should be made to have the students widely dispersed throughout the country.

(9) *Arrival time.* Students for whom the sponsors have arranged "preplacement" for jobs can begin their programs at any time. Travel for students who have not been "pre-placed" should be delayed by the sponsors as late as possible, preferably after June 15. Such delayed travel will give American students who are interested in obtaining summer jobs from two to four weeks in an uncompetitive market.

(10) *Reciprocity.* Sponsors are required to administer Student Travel/Work Programs on a reciprocal basis. The number of foreign students a sponsor brings to the United States under this program shall not exceed, in any calendar year, the number of American students who were sent abroad by the sponsor on a Travel/Work Program. Should a sponsor fail in the realization of reciprocity in any given calendar year, the Agency may restrict the number of foreign students that the sponsor brings to the United States in the next calendar year to the number sent abroad by the sponsor in the preceding calendar year.

(11) *Report requirement.* Sponsors are required to submit an annual report, not later than July 31, on the United States students who were sent abroad the previous calendar year under Travel/Work Programs. The report should contain the following information: name and United States address of the student, the country where the student was employed, name of employer and type of business, and the type and length of employment (dates). The report should also include an ongoing evaluation of both the incoming program for foreign students and the outgoing program for American students. Major problems encountered in the administration of the program should also be listed. Failure to submit the report by July 31 will result in the automatic suspension of the program. The program will not be reactivated until the report is received by USICA and the sponsor notified that suspension has been lifted.

(12) *Unauthorized activities.* Employment as servants, mother's helpers, au pair or other jobs of a domestic nature in private homes are not authorized. Employment must be of a commercial or industrial capacity. Also, employment as a Camp Counselor is not authorized under the Travel/Work Program. Special programs with guidelines and criteria have been prepared for both Camp Counselor and Family Placement Programs. All such unauthorized placements will be removed from the count of United States placements abroad which could reduce the number of foreign students which the sponsor will be permitted to bring into the United States during the following year.

(e) *International Camp Counselor Program.* These criteria apply to the designation and monitoring by the International Communication Agency (USICA) of Exchange-Visitor Programs which are designed to give carefully selectd International Camp Counselors an opportunity to spend approximately eight (8) weeks at an American camp imparting appropriate skills to American youth concluding with an optional one to three week period to tour the United States. The principal purpose of these programs bringing International Counselors to serve in American summer camps is to improve American knowledge of a foreign culture and to allow the youth at camps throughout the United States to experience international understanding on a personal basis. A secondary purpose is to improve the foreign camp counselor's knowledge of American culture and language skills though active participation in every facet of camping life.

(1) *Selection.* The designated sponsoring organization must assume responsibility for the selection of international counselors to participate in these programs. As a general rule, individuals who have already served once as a Camp Counselor should not be selected again. The intent of this program is principally one of cultural exchange and is intended to give as many foreign camp counselors as possible an opportunity to visit the United States. Sponsoring organizations must have strong supporting documentation justifying the necessity for reselecting an individual who has already once served as counselor. Prospective participants should be individually interviewed by a

representative of the sponsoring organization. The interviewer's report should be provided for the camp director's review. Each participant should submit a confidential reference from a teacher or employer to the sponsoring organization, a copy of which should be made available to the Camp Director. All participants must be fluent in English and be at least 18 years of age upon departure from their home country. The sponsor is responsible for handling the arrival of the counselors, completing transportation arrangements and directing them to their assigned camp.

(2) *Orientation.* Orientation, both pre-departure and upon arrival in the United States, should be provided to all Counselors. The orientation should be designed to give the counselors a good basic knowledge of the United States, its people, and a description of the varieties of American camps. It should provide clear descriptions of the roles and responsibilities of camp counselors and camp specialists, as well as the contractual obligations between the sponsoring organization, camp, and counselor. Counselors should be fully informed of the nature of the programs in which they are participating. Each should be given a general orientation manual by the sponsor and descriptive information about their assigned camps. They should participate in a training session conducted by the sponsoring organization and a precamp training session sponsored by the cooperating camp. The camp or the sponsor must provide the counselors a detailed job description and a copy of these guidelines at the beginning of this pre-camp training session. Counselors should be provided with some type of identification card which includes the name and phone number of an official of the sponsoring organization as well as the name and number of the Exchange-Visitor Program in which they are participating. It should contain the counselor's name and home address as well as the cooperating camp's name, address, telephone number and name of the camp director.

(3) *Health and accident insurance.* It is the responsibility of the program sponsor to make certain that each participant is adequately covered with health and accident coverage. This may be done in any of the following ways: (i) by health and accident coverage arranged for by the counselors themselves, (ii) by health and accident insurance coverage arranged for by the sponsor or (iii) by the sponsor assuming all financial responsibilities for a counselor's illnesses and accidents from the time they leave their home country until they return to their home country.

(4) *Geographical distribution.* Sponsors should develop plans to ensure that groups of counselors, especially those of the same nationality, are not "clustered" in the same camps in certain areas. Every effort should be made to have the international counselors widely dispersed throughout the country. As a general rule, not more than 10 percent of the total number of counselors at a camp should be international counselors, nor should there be more than two international counselors of the same nationality at one camp. An exception to this requirement will be made by USICA for camps which have specific ethnic, language or nationality programming as a prime or principal programming concept.

(5) *Supervision.* The sponsor must assume the responsibility of resolving problems including, if necessary, finding a replacement camp position for counselors whose original assignment does not work out, and the early return home of the counselors because of personal or family difficulties. The sponsor must provide both the cooperating camp and the counselor with the names and telephone numbers of officials of the sponsoring organization who can be contacted at any time in case of an emergency or other problems. The sponsoring organization should have offices or personnel available both in the United States and abroad for this purpose. All counselors should have a prearranged camp assignment before their departure for the United States. Participants may be placed only in counseling positions. The intent of this program is principally one of cultural exchange and not one intended for staffing purposes or to provide an inexpensive labor pool. Therefore, participants may not be placed in office or kitchen or custodial jobs or other jobs which are basically menial labor. Sponsors must make every effort to assure that individual counselors are placed with the particular camp which seems to promise the greatest compatibility for the counselor and the camp. Such arrangements should be made well in advance so that the prospective counselors and camp directors will have ample time for correspondence before the counselors leave their home country. Sponsoring organizations should notify participants of their camp placement at least five weeks prior to their departure for the United States. Cooperating camps should be given the background data and arrival information of the participants at least five weeks prior to their arrival in the United States. The sponsoring organization should have a representative visit and inspect as many camps as possible where their exchange visitors are placed. It is important that the cooperating camps guarantee that when an international counselor drives a motor vehicle in connection with asigned duties that the state laws are being met and that there is sufficient insurance coverage. International counselors should be allowed at least 24 hours off each two weeks (with at least 12 hours continuous). International counselors must be able to leave camp on day(s) off and the camp should assist the counselors with accessible, affordable transportation to and from the nearest town.

(6) *Financial responsibility.* Sponsors must ensure that all participants will return home at no charge to the U.S. Government. Sponsors are required to have available for review by USICA an audited annual financial statement of its operations. The financial statement should include an itemized list of the salaries of the officers of the organization.

(7) *Evaluation reports.* Sponsors will furnish USICA an evaluation report of their programs at the end of each camping year (no later than November 1). Reports should include but not be limited to: (i) Number of participants and countries of origin; (ii) georgraphic distributioin of counselors within the United States, by State; (iii) noteworthy achievements or major problems or difficulties encountered; (iv) details regarding the extent to which the sponsor has evaluated the success of the program including specific examples of how counselors enhance the knowledge of Americans about other lands and other people and vice versa; and (v) names and addresses of persons and organizations in the United States and abroad assisting in the administration of the program. The annual evaluation report shold also include copies of the program materials (forms, instruction sheets, publications, information folders. etc.) and a copy of the health and accident insurance policy provided for the counselor. The copy of the health and accident insurance policy must be included every year. Other materials once provided need not be duplicated. Only new or updated materials need be included in the annual report in ensuing years.

(8) *Post camp cultural experience.* Every international counselor should be given an opportunity to participate in at least a two week cultural experience at the end of his or her camp assignment. This experience can be accomplished

either (i) by a group tour arranged by the sponsoring organization or (ii) by independent travel preferably with a small group of fellow international counselors or American friends. The international counselor who plans independent travel should send a proposed itinerary to the sponsoring organization so that the counselor can be contacted in case of an emergency.

(9) *Departure.* Program sponsors are required to take all necessary action to ensure the departure of the participants at the conclusion of their authorized stay. The Immigration and Naturalization Service must be notified of any Camp Counselor who fails to depart the United States on schedule.

(Sec. 4, 63 Stat. 111; secs. 102, 109 (a), (b), (d), 75 Stat. 527, 534, 535; secs. 101(a)(15)(J), 104(a), 212(e), 66 Stat. 166, 174, 182, 184; sec. 2, 84 Stat. 116, 117 (22 U.S.C. 2056, 2452; (8 U.S.C. 1101(a)(15)(J), 1104(a), 1182(e), 1258); Reorg. Plan No. 2 of 1977; E.O. 12040 of March 27, 1978).

E.O. 12291 Federal Regulation

USICA has determined that this is not a major rule for the purposes of E.O. 12291, Federal Regulation, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Dated: December 11, 1981.

BILLING CODE 8230-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-192-81]

Tax-Exempt Financing for Qualified Mass Commuting Vehicles

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the issuance of tax-exempt bonds for the acquisition of qualified mass commuting vehicles. Changes to the tax law were made by the Economic Recovery Tax Act of 1981. The regulations would provide guidance to issuers and holders of obligations used for the acquisition of such vehicles.

DATES: Written comments and requests for a public hearing must be delivered or mailed by March 1, 1982. The amendments are proposed to be effective with respect to obligations issued after August 13, 1981, and before January 1, 1985.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, 1111 Constitution Avenue NW., Attention: CC:LR:T, Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Susan K. Thompson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3294).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 103(b)(4)(I) and (9) of the Internal Revenue Code of 1954. These amendments are proposed to conform the regulations to section 811 of the Economic Recovery Tax Act of 1981 (95 Stat. 340) and are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Explanation of New Provisions

Under section 103, interest on State and local government obligations is generally exempt from Federal income tax. However, tax exemption is denied to State and local government issues of industrial development bonds with certain exceptions. Certain industrial development bonds qualify for the exemption where the proceeds of the bonds are used to provide exempt facilities. Included among these facilities are mass commuting facilities, but not, under prior law, the vehicles used for mass commuting purposes.

The Economic Recovery Tax Act of 1981 provides that interest on obligations or a State or local government are exempt from Federal income tax if substantially all of the proceeds of the obligations are used to provide qualified mass commuting vehicles. This term is defined to mean a bus, subway car, rail car, or similar equipment leased to a mass transit system that is wholly owned by one or more governmental units and that is used by the mass transit system in providing mass commuting services.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Regulatory Flexibility Act

Although this is a notice of proposed rulemaking which solicits public comment, the Internal Revenue Service has concluded that the regulations proposed are interpretative and that the notice and public procedure requirements of U.S.C. 553 do not apply. Accordingly, these proposed amendments do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of these proposed regulations is Susan K. Thompson of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Part 1 are as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Section 1.103-8 is amended by redesignating paragraph (i) as paragraph (k) and by adding new paragraphs (i) and (j) immediately following paragraph (h). These added paragraphs read as follows:

§ 1.103-8 Interest on bonds to finance certain exempt facilities.

* * * * *

(i) *Qualified hydroelectric generating facilities.* [Reserved]

(j) *Qualified mass commuting vehicles*—(1) *General rule.* Section 103(b)(4)(I) provides that section 103(b)(1) shall not apply to obligations

issued by a State or local governmental unit which are part of an issue substantially all the proceeds of which are to be used to provide qualified mass commuting vehicles. The term "qualified mass commuting vehicle" is defined in section 103(b)(9) and paragraph (j)(2) of this section. Section 103(b)(4)(I) and (9) and this paragraph (j) apply only to obligations issued after August 13, 1981, and before January 1, 1985.

(2) *Qualified mass commuting vehicle defined.* For purposes of section 103(b)(4)(I) and (9) and this paragraph, the term "qualified mass commuting vehicle" means any bus, subway car, rail car or similar equipment—

(i) That is leased to a mass transit system wholly owned by one or more governmental units, or agencies or instrumentalities or a governmental unit, and

(ii) That is used by the mass transit system in providing mass commuting services.

(3) *Similar equipment.* For purposes of paragraph (j)(2) of this section, the term "similar equipment" means a vehicle for the transportation of passengers. Thus, for example, the term "similar equipment" includes a streetcar, cable car, van, hydroplane, or ferry vessel. It also includes a vehicle used to power a vehicle that transports passengers, such as the engine car of a subway train. The term "similar equipment" does not include machinery, furniture, or other equipment or parts not attached to, located in, or otherwise made an integral part of a vehicle. Machinery, furniture, or other non-vehicular equipment not made a part of a vehicle as described in the preceding sentence may qualify as a part of, or as functionally related and subordinate to, a mass commuting facility under section 103(b)(4)(D) and § 1.103–8(a)(3). For other rules relating to mass commuting facilities, see § 1.103–8(e)(2)(iv).

(4) *Mass commuting services.* A transportation service is a mass commuting service within the meaning of section 103(b)(9) and this paragraph (j) if it is used predominantly by business commuters on a day-to-day basis. Thus, for example, a sightseeing service is not a mass commuting service because it is not used predominantly by business commuters. Likewise, the transportation of children to and from school is not a mass commuting service.

(5) *Public use requirement.* To qualify under section 103(b)(4) and paragraph (a)(2) of this section as a mass commuting vehicle, the vehicle must serve or be available on a regular basis for general public use. A vehicle will not qualify under this section if more than an insubstantial portion of its use is reserved for the exclusive benefit of particular individuals or private groups. For example, a van used by employees of a specific employer or employers will not qualify as a mass commuting vehicle.

(6) *Wholly owned by governmental unit.* Section 103(b)(9) and paragraph (j)(2) of this section require that a qualified mass commuting vehicle be leased to a mass transit system wholly owned by one or more governmental units (or agencies or instrumentalities of a governmental unit). In determining whether an entity qualifies as a governmental unit or agency or instrumentality of a governmental unit, the rules of section 103(a)(1) and § 1.103–1 apply.

* * * * *

Approved: December 24, 1981.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

John E. Chapoton,

Assistant Secretary of the Treasury.

[FR Doc. 81–37277 Filed 12–28–81; 5:03 pm]

BILLING CODE 4830–01–M

VETERANS ADMINISTRATION

38 CFR Part 17

Health Professional Scholarship Program

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The "Veterans Administration Health Care Amendments of 1980" established the Veterans Administration Health Professional Scholarship Program. The purpose of the Scholarship Program is to assist in providing an adequate supply of trained physicians and nurses for the Veterans Administration and for the Nation and, if needed by the Veterans Administration, certain other health-care professionals. Under this program, medical, osteopathic and nursing students could receive up to four years of financial assistance during their training. This assistance would include payment of tuition, other educational expenses and a monthly stipend, all of which would be exempt from taxation. In return for this financial assistance, a scholarship participant would be obligated to serve as a full-time employee in the VA's Department of Medicine and Surgery for a period of time equal to the period of support or two years, whichever is greater. Medical or osteopathic students may request a deferment of obligated service to complete a residency or other advanced clinical training. Such a deferment may, however, obligate the student to an additional period of service.

It is intended that the proposed regulations will set forth the requirements for the award of scholarships under the VA Professional Health Scholarship Program to students receiving academic training in medicine, osteopathy, nursing and, if needed by the Veterans Administration, certain other health-care professionals. However, for the 1982–83 school year, scholarships will be awarded only to students pursuing academic training leading to a degree in nursing.

DATES: Comments must be received on or before February 1, 1982. It is proposed to make these regulations effective the date of final approval.

ADDRESSES: Interested persons are invited to send written comments to: Administrator of Veterans Affairs (271A), 810 Vermont Avenue, NW, Washington, D.C. 20420. All written comments received will be available for public inspection in the Veterans Services Unit, room 132, at the address shown above only between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday (except holidays) until February 16, 1982. Records are available for inspection only at VA Central Office.

FOR FURTHER INFORMATION CONTACT: Ms. Dorothy E. Reese, Associate Director, Affiliated Education Programs Services, Office of Academic Affairs, Department of Medicine and Surgery, Veterans Administration, 810 Vermont Avenue, NW, Washington, D.C. 20420, Phone (202) 389–3829.

SUPPLEMENTARY INFORMATION: The proposed regulations for the Veterans Administration Health Professional Scholarship Program have been designated as non-major by the Administrator under Executive Order 12291. The regulations will apply to individuals seeking benefits of the program. The regulations will not result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment investment, productivity, innovation, or on the ability of United States-based enterprise to compete with foreign-based enterprises in domestic or export markets.

The Administrator hereby certifies that this proposed rule will not, if promulgated, have a significant economic impact on a substanital number of small entities as they are

defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), this proposed rule is therefore exempt from the initial and final regulatory flexibility analyses requirement of sections 603 and 604. The reason for this certification is that this rule will, almost exclusively, be directed to individuals who wish to apply for assistance from the VA Professional Nurse Scholarship Program. It will, therefore, have no significant direct impact on small entities (i.e., small business, small private and non-profit organizations, and small governmental jurisdictions.)

The Catalog of Federal Domestic Assistance number for this program is 84.023.

Approved: December 16, 1981.

Robert P. Nimmo,

Administrator.

PART 17—MEDICAL

It is proposed to amend 38 CFR Part 17 by adding §§ 17.600 through 17.612 to read as follows:

* * * * *

VA Health Professional Scholarship Program

Sec.

17.600 Purpose.
17.601 Definitions.
17.602 Eligibility.
17.603 Availability of scholarships.
17.604 Application for the scholarship program.
17.605 Selection of participants.
17.606 Award procedures.
17.607 Obligated service.
17.608 Deferment of obligated service.
17.609 Pay during period of obligated service.
17.610 Failure to comply with terms and conditions of participation.
17.611 Bankruptcy.
17.612 Cancellation, waiver or suspension of obligation.

Authority: 38 U.S.C. 4141–4146.

VA Health Professional Scholarship Program

§ 17.600 Purpose.

The purpose of §§ 17.600 through 612 is to set forth the requirements for the award of scholarships under the Veterans Administration Health Professional Scholarship Program (Pub. L. 96–330; 38 U.S.C. 4141–4146) to students receiving academic training in medicine, osteopathy or nursing to assure an adequate supply of such health professionals for the Veterans Administration and for the Nation.

§ 17.601 Definitions.

For the purpose of these regulations:

(a) "Acceptable level of academic standing" means the level at which a full-time student retains eligibility to continue in attendance in school under the school's standards and practices.

(b) "Act" means the Veterans Administration Health-Care Amendments of 1980, Pub. L. 96–330, (38 U.S.C. 4141–4146.)

(c) "Affiliation agreement" means a Memorandum of Affiliation between a Veterans Administration health care facility and a school of medicine or osteopathy.

(d) "Approved graduate training" means those programs of graduate training in medicine including osteopathy which (1) lead to eligibility for board certification or which provide other evidence of completion, and (2) have been approved by the appropriate body as determined by the Administrator.

(e) "Administrator" means the Administrator of Veterans Affairs.

(f) "Chief Medical Director" means the Chief Medical Director of the Department of Medicine and Surgery (DM&S), Veterans Administration.

(g) "Citizen of the United States" means any person born, or lawfully naturalized in the United States, subject to its jurisdiction and protection, and owing allegiance thereto.

(h) "Degree in nursing" means a course of study leading to a baccalaureate degree or a master's degree in a clinical specialty, excluding maternal-child health, pediatrics, midwifery and related fields for which the Veterans Administration has no employment needs.

(i) "Full-time student" means an individual pursuing a course of study leading to a degree in medicine, osteopathy or nursing who is enrolled for a sufficient number of credit hours in any academic term to complete the course of study within not more than the number of academic terms normally required by the school, college or university.

(j) "Required educational equipment" means educational equipment which must be rented or purchased by all students pursuing a similar curriculum in the school.

(k) "Required fees" means those fees which are charged by the school to all students pursuing a similar curriculum.

(l) "Scholarship Program" means the Veterans Administration Health Professional Scholarship Program authorized by Section 201 of the Act.

(m) "Participant" means an individual whose application to the Scholarship Program has been approved and whose contract has been accepted by the Administrator.

(n) "School" means a school of medicine, osteopathy or nursing which (1) provides training leading to a degree of doctor of medicine, doctor of osteopathy or degree in nursing and (2) which is accredited by a body or bodies recognized for accreditation by the Administrator.

(o) "School year" means all or part of the 12-month period from July 1 through June 30 during which an applicant is enrolled in the school as a full-time student.

(p) "State" means one of the several States, Territories and possessions of the United States, the District of Columbia and the Commonwealth of Puerto Rico.

§ 17.602 Eligibility.

(a) To be eligible for a scholarship under this program an applicant must—

(1) Be accepted for enrollment or be enrolled as a full-time student in an accredited school located in a State;

(2) Be pursuing a course of study or program offered by a school of nursing leading to a degree in medicine, osteopathy or a degree in nursing;

(3) Be a citizen of the United States; and

(4) Submit an application to participate in the Scholarship Program together with a signed contract. (38 U.S.C. 4142(a))

(b) Any applicant who, at the time of application, owes a service obligation to another Federal program to perform service after completion of the course of study is ineligible to receive a scholarship under the Veterans Administration Scholarship Program. (38 U.S.C. 4142(a)(4)).

§ 17.603 Availability of scholarships.

Scholarships will be awarded only when necessary to assist the Veterans Administration in alleviating shortages or anticipated shortages of personnel in particular health professions. The existence of a shortage of personnel will be determined in accordance with specific criteria for each health profession, promulgated by the Chief Medical Director. If it becomes necessary for the Veterans Administration to award scholarships in any health profession other than medicine, osteopathy or nursing, the Administrator may publish a list of those professions in the **Federal Register**. (38 U.S.C. 4142(c)(2))

§ 17.604 Application for the scholarship program.

Each individual desiring a scholarship under this program must submit an application in the form and at the time prescribed by the Administrator. Included with the application will be a

signed written contract to accept payment of a scholarship and to serve "a period of obligated service" (as defined in § 17.607) if the application is approved and if the contract is accepted by the Administrator. (38 U.S.C. 4142(e)(1)(B)(iv))

§ 17.605 Selection of participants.

(a) *General.* In deciding which Scholarship Program applications will be approved by the Administrator, priority will be given to applicants who previously received scholarship awards and who meet the conditions of paragraph (d) of this section. Except for continuation awards (see paragraph (d)), applicants will be evaluated under the criteria specified in paragraph (b) of this section. (38 U.S.C. 4142(c)(1))

(b) *Selection.* In evaluating and selecting participants, the Administrator will take into consideration those factors determined necessary to assure effective participation in the Scholarship Program. The factors may include, but not be limited to—

(1) Work experience, including prior medically related employment and Veterans Administration employment;

(2) Faculty and employer recommendations;

(3) Academic performance; and

(4) Related experience gained in college and community activities. (38 U.S.C. 4142(i))

(c) *Duration of scholarship award.* Subject to the availability of funds for the Scholarship Program, the Administrator will award a participant a scholarship under §§ 17.600–17.612 for a period of 1 school year. (38 U.S.C. 4142(e)(1)(A); 4146)

(d) *Continuation awards.* Subject to the availability of funds for the Scholarship Program and selection, the Administrator will award a continuation scholarship if—

(1) The participant request a continuation;

(2) The award will not extend the total period of Scholarship Program support beyond 4 years; and

(3) The participant remains eligible for continued participation in the Scholarship Program. (38 U.S.C. 4142(c)(1), (i))

§ 17.606 Award procedures.

(a) *Amount of scholarship.* (1) A scholarship award for each school year will consist of (i) tuition, (ii) reasonable educational expenses, including required fees, books, laboratory equipment, and (iii) a monthly stipend for the 12-month period beginning with the first month of each school year in which the participant is enrolled in the course of study. All such payments to scholarship participants are exempt from taxation. (38 U.S.C. 4145)

(2) The Administrator may make arrangements with the school in which the participant is enrolled for the direct payment of the amount of tuition and/or reasonable educational expenses on the participant's behalf. (38 U.S.C. 4142(f)(1) and (2); 4145)

(b) *Leave-of-absence, repeated course work.* The Administrator will suspend scholarship payments to or on behalf of a participant if the school (1) approves a leave-of-absence for the participant for health, personal, or other reasons, or (2) requires the participant to repeat course work for which the Administrator previously has made payments under the Scholarship Program. Only if the repeated course work does not delay the participant's graduation date, will scholarship payments continue; however, additional costs relating to the repeated course work will not be paid under this program. Any scholarship payments suspended under this section will be resumed by the Administrator upon notification by the school that the participant has returned from the leave-of-absence or has completed the repeated course work and is pursuing as a full-time student the course of study for which the scholarship was awarded. (38 U.S.C. 4142(i)).

§ 17.607 Obligated service.

(a) *General.* Except as provided in paragraph (d) of this section, each participant is obligated to provide service as a Veterans Administration employee in full-time clinical practice in his or her clinical specialty or discipline in an assignment or location determined by the Administrator. (38 U.S.C. 4143(a))

(b) *Beginning of service.* The period of obligated service will begin with the participant is appointed under title 38 as a full-time employee of the Department of Medicine and Surgery, Veterans Administration in the clinical field or discipline in which the individual was trained. Except for those participants who receive a deferral under § 17.608, the assignment will be made by the Administrator within 60 days of (1) the completion of the participant's course of study leading to a degree in medicine, osteopathy or nursing or (2) the date upon which the participant becomes licensed to practice medicine, osteopathy, or nursing. (38 U.S.C. 4143(b), (c))

(c) *Duration of service.* Except as provided in paragraph (d) of this section, the period for which the participant is obligated on a full-time basis in the clinical field or discipline in which the individual was trained to serve is equal to 1 year for each school year for which the participant receives a scholarship award under these regulations, or 2 years, whichever is greater. (38 U.S.C. 4142(e)(1)(B)(iv))

(d) *Service by detail.* The Administrator, in cooperation with and with the consent of the heads of other relevant Federal departments and agencies and with the consent of the participant involved, may permit—

(1) Any period of required obligated service to be performed in another Federal department or agency or in the Armed Forces; and

(2) Any period of obligated service required to be performed in another Federal department or agency or in the Armed Forces under another Federal health personnel scholarship program to be performed in the Department of Medicine and Surgery, Veterans Administration. (38 U.S.C. 4144(e))

(e) *Creditability of approved graduate medical training.* No period of approved graduate training will be credited toward satisfying the period of obligated service incurred under the Scholarship Program. (38 U.S.C. 4143(b)(3)(A)(ii))

§ 17.608 Deferment of obligated service.

(a) *Request for deferment.* A participant receiving a degree from a school of medicine or osteopathy may request deferment of obligated service to complete approved graduate medical training. The Administrator will generally defer the beginning date of the obligated service to allow the participant to complete the approved graduate training program. The period of this deferment will be the time designated for the specialty training in which the physician is enrolled as defined by the Accreditation Council for Graduate Medical Education or the American Osteopathic Association. (38 U.S.C. 4142(i); 4143(b)(3)(A)(i))

(b) *Deferment requirements.* Any participant whose period of obligated service is deferred shall be required to take all or part of the approved graduate medical training in an accredited program in an educational institution affiliated with a Veterans Administration health care facility. (38 U.S.C. 4143(b)(4)(A))

(c) *Additional service obligation.* A participant who has requested and received deferment of approved graduate medical training may, at the time of approval of such deferment and at the discretion of the administrator and upon the recommendation of the Chief Medical Director, incur an additional period of obligated service—

(1) At the rate of one-half of a calendar year for each year of approved graduate training (or a proportionate

ratio thereof) if the training is in a medical specialty determined to be necessary to meet health care requirements of the Department of Medicine and Surgery, Veterans Administration; or

(2) At the rate of three-quarters of a calendar year for each year of approved graduate training (or a proportionate ratio thereof) if the training is in a medical specialty determined not to be necessary to meet the health care requirements of the Department of Medicine and Surgery. Specialties necessary to meet the health care requirements of the Department of Medicine and Surgery will be prescribed periodically by the Administrator when, and if, this provision for an additional period of obligated service is to be used. (38 U.S.C. 4143(b)(4)(B))

(b) *Altering deferment.* Before altering the length or type of approved graduate medical training for which the period of obligated service has deferred under paragraphs (a) or (b) of this section, the participant must request and obtain the Administrator's written approval of the alteration. (38 U.S.C. 4142(i))

(e) *Additional terms of deferment.* The Administrator may prescribe additional terms and conditions for deferment under paragraphs (a), (b), (c) and (d) of this section as necessary to carry out the purposes of the Scholarship Program. (38 U.S.C. 4142(i))

(f) *Beginning of service after deferment.* Any participant whose period of obligated service has been deferred under paragraph (a) or (b) of this section must begin the obligated service effective on the date of appointment under title 38 in full-time clinical practice in an assignment or location in a Veterans Administration health care facility as determined by the Administrator. The assignment will be made by the Administrator within 120 days prior to or no later than 30 days following the completion of the requested graduate training for which the deferment was granted. Travel and relocation regulations will apply. (38 U.S.C. 4143(b)(2))

§ 17.609 Pay during period of obligated service.

The initial appointment of physicians for obligated service will be made in a grade commensurate with qualifications as determined in section 4107(b)(1) of title 38, United States Code. A physician serving a period of obligated service is not eligible for incentive special pay during the first three years of such obligated service. He or she may be paid primary special pay at the discretion of the Administrator upon the recommendation of the Chief Medical Director. (Pub. L. 96-330, Sec. 202; 38 U.S.C. 4118(h))

§ 17.610 Failure to comply with terms and conditions of participation.

(a) If a participant, other than one described in paragraph (b) of this section fails to accept payment or instructs the school not to accept payment of the scholarship provided by the Administrator, the participant must, in addition to any service or other obligation incurred under the contract, pay to the United States the amount of $1,500 liquidated damages. Payment of this amount must be made within 90 days of the date on which the participant fails to accept payment of the scholarship award or instructs the school not to accept payment. (38 U.S.C. 4144(a))

(b) When a participant fails to maintain an acceptable level of academic standing, is dismissed from the school for disciplinary reasons, voluntarily terminates the course of study or program for which the scholarship was awarded before completing the course of study or program, or fails to become licensed to practice medicine or osteopathy in a State or fails to become licensed as a graduate nurse in a State within 2 years from the date such person becomes eligible to appy for state licensure, the participant must, instead of performing any service obligation, pay to the United States an amount equal to all scholarship funds awarded under the written contract executed in accordance with § 17.602. Payment of this amount must be made within 3 years from the date academic training terminates. (38 U.S.C. 4144(b))

(c) Participants who breach their contracts by failing to begin or complete their service obligation (for any reason) are liable to repay the amount of all scholarship funds paid to them and to the school on their behalf, plus interest, as determined by the following formula:

$$A = 30\,\frac{(t-s)}{t}$$

in which:

'A' is the amount the United States is entitled to recover;

'0' is the sum of the amounts paid to or on behalf of the applicant and the interest on such amounts which would be payable if, at the time the amounts were paid, they were loans bearing interest at the maximum legal prevailing rate, as determined by the Treasurer of the United States;

't' is the total number of months in the applicant's period of obligated service; and

's' is the number of months of the period of obligated service served by the participant.

The amount which the United States is entitled to recover shall be paid within 1 year of the date on which the applicant failed to begin or complete the period of obligated service, as determined by the Administrator. (38 U.S.C. 4144(c))

§ 17.611 Bankruptcy.

Any payment obligation incurred may not be discharged in bankruptcy under title 11 of the United States Code until 5 years after the date on which the payment obligation is due. (38 U.S.C. 4144(d)(3))

§ 17.612 Cancellation, waiver, or suspension of obligation.

(a) Any obligation of a participant for service or payment will be canceled upon the death of the participant. (38 U.S.C. 4144(d)(1))

(b)(1) A participant may seek a waiver or suspension of the service or payment obligations incurred under this program by written request to the Administrator setting forth the basis, circumstances, and causes which support the requested action. The Administrator may approve an initial request for a suspension for a period of up to 1 year. A renewal of this suspension may also be granted.

(2) The Administrator may waive or suspend any service or payment obligation incurred by a participant whenever compliance by the participant (i) is impossible, due to circumstances beyond the control of the participant or (ii) whenever the Administrator concludes that a waiver or suspension of compliance would be in the best interest of the Veterans Administration. (38 U.S.C. 4144(d)(2))

(c) Compliance by a participant with a service or payment obligation will be considered impossible due to circumstances beyond the control of the participant if the Administrator determines, on the basis of information and documentation as may be required, that the participant suffers from a physical or mental disability resulting in permanent inability to perform the service or other activities which would be necessary to comply with the obligation. (38 U.S.C. 4144(d)(2))

(d) Waivers or suspensions of service or payment obligations, when not related to paragraph (c) of this section, and when considered in the best interest of the Veterans Administration, will be

determined by the Administrator on an individual basis. (38 U.S.C. 4144(d)(2))

BILLING CODE 8320-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

43 CFR Part 426

Acreage Limitation: Reclamation Rules and Regulations and Draft Environmental Impact Statement

AGENCY: Bureau of Reclamation, Interior.

ACTION: Extension of comment periods and scheduling of public hearings on proposed rules and draft environmental impact statement on acreage limitation.

SUMMARY: This notice extends the comment periods on the acreage limitation proposed rules (46 FR 37528, July 21, 1981) and draft environmental impact statement (46 FR 37529, July 21, 1981) from December 31, 1981, to March 5, 1982. The extension will allow the Bureau of Reclamation time to conduct 10 public hearings. The information gathered at these hearings will be considered before making any revisions to the published proposed rules and regulations (46 FR 3350–3358) for administering the acreage limitation provisions of Reclamation law and in writing the final environmental impact statement on those rules.

DATES: Comments are due on or before March 5, 1982. The hearings will be held on the dates shown below. All hearings will begin at 9:00 a.m. and will continue until all comments have been heard.

ADDRESSES: The hearings will be held at the locations shown below.

FOR FURTHER INFORMATION CONTACT: Vernon S. Cooper, (202) 343–2148.

SUPPLEMENTARY INFORMATION: The hearings will be held on the dates and at the locations shown below.

Feb. 16—Red Lion Inn, Pasco, Washington
Feb. 17—Federal Building, Room 3421, Salt Lake City, Utah
Feb. 18—Fresno Convention Center, Fresno, California
Feb. 19—Albuquerque Convention Center, Sandia-Santa Anna Room, Albuquerque, New Mexico
Feb. 23—Sacramento Convention Center, Sacramento, California
Feb. 24—Holiday Inn West, Billings, Montana
Feb. 25—Red Lion Downtowner, Boise, Idaho Phoenix Civic Plaza, Room S–10, Phoenix, Arizona
Feb. 26—Department of the Interior, Auditorium, Washington, DC

Oral statements will be limited to minutes. Speakers will not be permitted to trade their time to obtain a longer oral presentation; however, the hearings officer may allow any person additional time after all other comments have been heard. Speakers will be scheduled according to the time preference mentioned in their letter or telephone request, whenever possible. Any scheduled speaker not present when called will lose his or her privilege in the scheduled order, but will be recalled after all the scheduled speakers have been heard. Speaker requests will be scheduled up to two working days preceding the hearings and any subsequent request will be handled on a first-come-first-served basis following the scheduled presentations.

Individuals or organizations wishing to speak at the hearings or who desire additional information should contact the appropriate office listed below:

Hearing: Pasco, Washington and Boise, Idaho.

Contact: Regional Director, Pacific-Northwest Region, Bureau of Reclamation, 550, West Fort Street, P.O. Box 043, Boise, Idaho 83724, (208) 334–1900.

Hearing: Sacramento and Fresno, California.

Contact: Regional Director, Mid-Pacific Region, Bureau of Reclamation, Federal Office Building, 280 Cottage Way, Sacramento, California 95825, (916) 484–4680.

Hearing: Phoenix, Arizona.

Contact: Regional Director, Lower Colorado Region, Bureau of Reclamation, Nevada Highway and Park Street, P.O. Box 427, Boulder City, Nevada 89005, (702) 293–7652.

Hearing: Salt Lake City, Utah.

Contact: Regional Director, Upper Colorado Region, Bureau of Reclamamtion, 125 South State Street, P.O. Box 11568, Salt Lake City, Utah 84147, (801) 524–5457.

Hearing: Albuquerque, New Mexico.

Contact: Regional Director, Southwest Region, Bureau of Reclamation, 714 South Tyler, Amarillo, Texas 79101, (806) 378–5400.

Hearing: Billings, Montana.

Contact: Regional Director, Upper Missouri Region, Bureau of Reclamation, 316 North 26th Street, P.O. Box 2553, Billings, Montana 59103, (406) 657–6412.

Hearing: Denver, Colorado.

Contact: Regional Director, Lower Missouri Region, Bureau of Reclamation, Building 20, Denver, Federal Center, P.O. Box 25247, Denver, Colorado 80225 (303) 234–3327.

Hearing: Washington, DC.

Contact: Commissioner, Bureau of Reclamation, Attention: Code 410, 18th and C Streets NW., Washington, DC 20240, (202) 343–2148.

Those wishing to supplement their testimony with a written statement or those who would prefer to submit only a written statement for the public hearing testimony should address them to: Mr. Phillip T. Doe, Bureau of Reclamation, E&R Center, Code D–700, P.O. Box 25007, Denver, Colorado 80225.

Public hearing testimony will be summarized and responded to in the final environmental impact statement. Written statements will be processed in a like manner.

Dated: December 23, 1981.

R. N. Broadbent,

Commissioner, Bureau of Reclamation.

BILLING CODE 4310-09-M

Bureau of Land Management

43 CFR Part 3500

Federal Oil Shale Management Program

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to propose rules; prepare an Environmental Impact Statement and hold scoping meetings.

SUMMARY: This document serves as public notice of intent to publish proposed regulations for Federal oil shale management, prepare an Environmental Impact Statement (EIS) pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, hold scoping meetings on the EIS, and to hold a Regional Oil Shale Team (ROST) meeting.

DATES: The meetings will be held on February 1–5, 1982.

ADDRESSES: The meeting locations are listed in Supplementary Information below.

FOR FURTHER INFORMATION CONTACT: On the EIS: Jack D. Edwards, Environmental Statement Office, Bureau of Land Management, 555 Zang Street, Denver, Colorado 80025, Telephone: Commercial—303–234–6737, FTS—234–6737.

On the Rulemaking: Donald W. Brabson, Branch of Tar Sands and Oil Shale, Bureau of Land Management, Washington, D.C. 20240, Telephone: Commercial—202–343–4537, FTS—343–4537.

SUPPLEMENTARY INFORMATION: The regulations will cover such things as lands subject to leasing, acreage or lease size limitation, diligent

development requirements, and rentals and royalties. Additionally, the regulations may include requirements to guide tract selection, lease management procedures, and surface management and protection standards.

The EIS will consider alternative methods of leasing oil shale, alternative production levels, and alternative energy sources. Regional and cumulative impacts of oil shale development, particularly in Colorado, Utah, and Wyoming, will be assessed. The cumulative analysis will include other development in those areas (i.e., coal, oil and gas, power plants, recreation projects, other oil shale projects, etc.). The Department intends to publish proposed rules and the draft programmatic EIS in July 1982, the final EIS in December 1982, and the final rules in January 1983.

A series of scoping meetings for the programmatic EIS will be held during the first week of February 1982. These meetings are open to the public. Interested persons are invited to attend the meetings, and to submit oral and written comments on the scoping of the EIS and the program. In addition, oral and written comments may be submitted until February 19, 1982, to either of the parties listed under the section of this notice entitled, "For Further Information Contact."

Specifically, the meetings are scheduled for:

Monday, February 1, 1982—1 p.m., Room 269, Main Post Office Building Auditorium, 18th and Stout, Denver, Colorado

Tuesday, February 2, 1982—1 p.m., Room 128, Salt Palace, Salt Lake City, Utah

Wednesday, February 3, 1982—7 p.m., Golden Age Center, 155 South 100 West, Vernal, Utah

Wednesday, February 3, 1982—7 p.m., Signal Room, Holiday Inn, 16755 Sunset Drive, Rock Springs, Wyoming

Thursday, February 4, 1982—7 p.m., Fairfield Center, 200 Main Street, Meeker, Colorado

Friday, February 5, 1982—7 p.m., Grand Junction City Auditorium, Road Avenue between 5th and 6th Streets, Grand Junction, Colorado

The February 1, 1982, scoping meeting will be part of a Regional Oil Shale Team (ROST) meeting scheduled for the same day. The purpose of the ROST meeting is to announce and scope the proposed Federal Oil Shale Management Program and associated programmatic EIS.

The scoping process will involve contact with agencies and individuals, in addition to formal contact with other Federal, State, and local agencies and groups.

In accordance with the final regulations of the Council on Environmental Quality for Implementation of Procedural Provisions of the National Environmental Policy Act (40 CFR Part 1500) the scoping meetings will:

a. Inform affected Federal, State and local agencies, and other interested groups or individuals about the EIS and the regulations.

b. Define the scope and significant issues to be analyzed in the EIS. This includes identification of and elimination from detailed study those issues which are not significant.

c. Identify environmental reports which may be related to the proposal or may contain relevant data.

d. Identify related consultation and review requirements which will be addressed in the EIS, including identification of mandated documentation.

e. Identify subject areas which may be relevant to proposed regulations for leasing.

Dated: December 28, 1981.

James M. Parker,

Acting Director.

[FR Doc. 81-37347 Filed 12-30-81; 8:45 am]

BILLING CODE 4310-84-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6224]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below and proposed changes to base flood elevations for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, P.E., Federal Emergency Management Agency, National Flood Insurance Program, (202) 287-0230, Washington, D.C., 20472.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with Section 110 and Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4.

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

The proposed base (100-year) flood elevations for selected locations are:

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD). **Elevation in feet (MLLW)
Alabama	Unincorporated areas of Shelby County	Cahaba River	Approximately 1,000 feet upstream from Tuscaloosa Road Bridge.	*353
			Approximately 500 feet downstream from Southern Railway Bridge.	*369
			Approximately 1,200 feet upstream from County Road 52 bridge.	*403
			Approximately 800 feet downstream from confluence of Patton Creek.	*423
			Approximately 120 feet downstream from centerline of southbound lane of U.S. Highway 31.	*425
			Approximately 900 feet downstream from confluence of Acton Creek.	*426
			Approximately 1,000 feet downstream from County Road 29 (Caldwell Mild Road) bridge.	*435
		Buck Creek	Approximately 110 feet downstream from centerline of southbound lane of Interstate Highway 65.	*515
			Just upstream from U.S. Highway 31	*530
		Bishop Creek	Approximately 100 feet upstream from centerline of northbound lane of Interstate 65.	*462
			Approximately 200 feet downstream from Alabama Highway 119.	*493
			Just downstream from County Road 14	*516
		Yellowleaf Creek	Just downstream from Alabama Highway 25	*407
			Approximately 550 feet upstream from confluence of Muddy Prong.	*433
			Just upstream from County Road 51	*448
			Just downstream from County Road 55	*456
			Approximately 300 feet downstream from confluence of North Fork Yellowleaf Creek and South Fork Yellowleaf Creek.	*460
		Four Mile Creek	Approximately 100 feet downstream from County Road 81.	*423
			Just upstream from County Road 55	*459
			Just upstream from County Road 49	*476
		Muddy Prong	Just upstream from County Road 450	*446
			Just downstream from Seaboard Coast Line Railroad (upstream crossing).	*463
			Just downstream from new U.S. Highway 280	*462
			Approximately 650 feet downstream from County Road 55.	*473
		South Fork Yellowleaf Creek	Approximately 200 feet upstream from County Road 48.	*462
			Just downstream from County Road 47	*479
			Just downstream from County Road 69	*488
		Bolivar Creek	Just upstream from County Road 39	*510
		North Fork Yellowleaf Creek	Just downstream from County Road 432	*465
			Approximately 1,200 feet downstream from confluence of Spencer Creek.	*473
			Approximately 150 feet downstream from County Road 439.	*483
			Approximately 130 feet downstream from U.S. Highway 280.	*501
			Approximately 130 feet upstream from County Road 53.	*502
		Little Creek	Just upstream from Seaboard Coast Line Railroad	*478
			Just upstream from U.S. Highway 280	*484
			Just downstream from Alabama Highway 38	*493
		Hargis Retreat Creek	Approximately 150 feet upstream from U.S. Highway 280.	*501
			Approximately 200 feet upstream from Alabama Highway 38.	*507
		Spencer Creek	Just upstream from Breeched Dam	*474
			Just downstream from County Road 39	*517
			Just downstream from County Road 38	*549
		Yellow Creek	3,500 feet upstream from confluence with North Fork Yellowleaf Creek.	*526
		Waxahatchee-Big Creek	Approximately 300 feet downstream from County Road 42.	*434
			Approximately 300 feet upstream of Montevallo Road	*469
			Approximately 200 feet downstream from Tuscaloosa Road.	*479
			Approximately 250 feet downstream from confluence of Wolf Creek.	*483
		Camp Branch	Approximately 300 feet upstream from County Road 42.	*434
			Approximately 430 feet upstream from Alabama Highway 25.	*482
			Just upstream from Southern Railway	*484
			Approximately 200 feet upstream from County Road 42.	*501
			Just downstream from County Road 70	*537
		Wolf Creek	Approximately 750 feet upstream from County Road	*484
		Wildwood Creek	Just upstream from County Road 26	*521

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 67

[CC Docket No. 80-286; FCC 81-566]

Establishment of a Joint Board; Customer Premises Equipment (CPE); Recommended Decision and Order

AGENCY: Federal Communications Commission—Federal-State Joint Board.

ACTION: Recommended decision and order.

SUMMARY: The Federal-State Joint Board is recommending that the Commission phase customer premises equipment (CPE) out of the jurisdictional separations process over a five-year period beginning in 1983. The Joint Board concluded that this would allow a smooth and gradual transition to the deregulated environment for the provision of CPE mandated by the Commission in CC Docket No. 20828, the Second Computer Inquiry.

DATES: The Joint Board's recommendations do not become effective until they have been reviewed and acted on by the Commission.

ADDRESS: Federal Communications Commission, 1919 M St. NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: James McConnaughey, Policy and Program Planning Division, Common Carrier Bureau at (202) 632-6342.

In the matter of amendment of Part 67 of the Commission's rules, CC Docket No. 80-286.

Recommended Decision and Order

Adopted: November 18, 1981.
Released: December 14, 1981.

By the Federal-State Joint Board: Commissioner Fogarty dissenting and issuing a statement; State Commissioner Larkin dissenting.

I. Introduction

1. This Joint Board was established pursuant to Section 410(c) of the Communications Act, 47 U.S.C. 410(c) to develop, *inter alia*, modifications to the 1971 FCC–NARUC Separations Manual reflective of the Federal Communications Commission's policies regarding detariffing of customer premises equipment (CPE). Amendment of Part 67 of the Commission's Rules and Establishment of a Joint Board, CC Docket No. 80–286, 78 FCC 2d 837 (1980). In its recent Order Inviting Comments and Suggested Information Requests, FCC 81–264 (released June 12, 1980), the Joint Board sought recommendations on the specific modifications to be made and the procedural framework within which the Joint Board should adopt them. In that Order, the Joint Board

acknowledged the potential severity of the impact on intrastate revenue requirements, under either flash cut or bifurcated detariffing of CPE, that would occur if existing terminal equipment is removed from the separations process suddenly or in a disorderly and inconsistent manner. Further, the Joint board recognized the relative urgency of resolving CPE separations issues, because of the approximately 18 percent annual growth rate in assignment of non-traffic sensitive costs to interstate and the increasing interest among some independent companies and state regulatory agencies in detariffing terminal equipment on an accelerated schedule. To provide assistance in meeting these concerns, the Joint Board requested comments on the advisability of adopting a phased approach to this proceeding, and on a specific proposal prepared by the Joint Board Staff for the gradual elimination over a five-year period of the dollar amount of the investment and expenses subject to separations allocations.

2. Since the release of that Order, the Commission has issued a decision on further reconsideration of its detariffing plan in the Second Computer Inquiry, CC Docket No. 20828, FCC 81–481, (released October 30, 1981). In that Order, the Commission reaffirmed its bifurcation plan for detariffing CPE and established January 1, 1983, as the implementation date. All "new" CPE, defined as CPE acquired by a carrier or manufactured by an affiliated carrier after January 1, 1983, will be offered on a detariffed basis separate and apart from the carrier's utility service. All "embedded" CPE, including that equipment or inventory which is under state or federal tariff or otherwise subject to the jurisdictional separations process as of the bifurcation date, will remain in the rate base until issues related to asset valuation and the manner of timing of detariffing embedded CPE have been decided.

3. The choice between flash cut or bifurcated detariffing of CPE has been a major variable influencing our decision regarding the separations treatment of terminal equipment. The legal and economic considerations underlying the adoption of a particular separations plan for CPE vary greatly between the two detariffing approaches. Since a bifurcated plan will now be implemented, we believe we can appropriately move forward with recommended changes to the Separations Manual reflecting this plan without further delay. Our goal, which is consistent with that of the Commission, is to devise a plan that removes disincentives to detariffing and minimizes the inequities of uneven removal of CPE from various carriers' rate bases. We believe this goal can be accomplished by adopting a modified version of the Staff proposal which was set forth in Appendix B to our June 12, 1981 order. The modified plan is attached as Appendix A to this Decision.

II. Summary of the CPE Separations Plan

4. Under the original Staff proposal, no investment or expenses associated with CPE incurred after December 31, 1981 would be allocated to interstate operations. The net CPE plant balances in the relevant accounts on the books as of that date would constitute a "base amount" to which jurisdictional cost separations procedures would continue to be applied over a period of five years. The base amount would be reduced by one-sixtieth each month, eventually to be phased out entirely. A slightly altered version of this proposal constitutes the plan recommended herein.

5. The plan may be effected through slight additions and modifications to the current separations manual. The precise wording of these modifications is presented as Appendix A to this order. The portion of costs in various accounts subject to these changes is identified through the application of a definition of CPE that is to be added to the Glossary. This definition, which is intended to be consistent with the Commission's recent decision in the Second Computer Inquiry, FCC 81–481 (released October 30, 1981), excluded multiplexing equipment, coin operated or pay stations and related equipment, and equipment on telephone company premises used in the normal course of business. Therefore, for the present, these excluded types of equipment, and the expenses attributable to them will receive the same treatment under separations as they do now. In the future, the Joint Board may change separations procedures applicable to these items, but the modifications recommended in this Decision are intended to affect only embedded customer premises equipment as identified in the Second Computer Inquiry.

6. The plan requires addition of a few new paragraphs and augmentation of existing paragraphs in the Manual to exclude from interstate allocation all investments and associated reserves and expenses incurred in connection with customer premises equipment after the implementation date. This date has been revised from December 31, 1981 to December 31, 1982 to reflect the postponement adopted by the Commission on further reconsideration. The accounts affected, in addition to Accounts 231 (station apparatus) and 234 (large PBXs), are those associated with materials and supplies (Account 122), maintenance expense (Account 605), depreciation expense (Account 608), the wage portion of maintenance expense (Accounts 661, 662, 663, 664, 665, 668, 669, and 677), and the depreciation reserve (Account 171). The amounts in these accounts related to CPE will constitute the base amount to be phased out for separations purposes.[1]

7. The net CPE plant balances constituting the investment base amount are to be determined in accordance with Section 51.21 of the Manual. This section provides for the allocation of a portion of the aggregate depreciation reserve to Accounts 231 and 234 on the basis of the straight line reserves "theoretically applicable" to these accounts as of December 31, 1982. The base amount for net CPE plant balances so calculated will then be assigned to existing separations categories set forth in § 25.2 Under present procedures, CPE assigned to four of these categories, Teletypewriter Exchange Service, Private Line Services, Station Identification Equipment, and Wideband Message Service, would continue to be apportioned to interstate operations on bases other than the subscriber plant factor (SPF). CPE assigned to the fifth category, Other Station Equipment, would continue to be apportioned on the basis of SPF. The Joint Board has not yet determined the proper apportionment factors that eventually will be applied to these categories. This issue will be addressed in the next phase of this Joint Board proceeding. If the Joint Board recommends replacement of SPF with a new factor applicable to non-traffic sensitive plant, this new factor would be applied to the declining balance of the CPE base amount.

8. The apportionment to interstate of the expense base amount will follow established separations procedures which generally provide that apportionment of expenses follow the separation of related investment. The apportionment of other costs which may be based in part on the separation of station equipment, e.g., that of vehicles and other work equipment in Account 264, will be indirectly affected by the phase out of separations treatment of

[1] Under the original plan, both investment and expense base amounts would be determined as of a date certain. Under the revised plan adopted here, expense base amounts are to be calculated as the averge for the year prior to the implementation date.

CPE. However, no additional modifications to the wording of the Separations Manual are required at this time to institute these indirect effects.

III. Comments of the Parties and Discussion

A. Phased Approach to Separations Issues

9. In the June 12, 1981 Joint Board order, parties were asked to comment on the desirability of devising a plan for the removal of CPE from separations in advance of the resolution of the numerous other separations changes that may need to be considered. Virtually all of the parties recognize the importance of addressing CPE separations issues on a priority basis. However, there is disagreement as to whether CPE related changes should be initiated separately, or in coordination with other changes, or whether treatment of CPE issues should be delayed entirely until the Commission has made a final decision in ce-tain other related proceedings.

10. Several parties specify particular matters which they feel must be addressed, along with the removal of CPE from separations, in an initial phase of this proceeding. Many of the larger telephone companies focused on the need to reduce assignments to interstate operations. AT&T argues that the Joint Board should develop a multifaceted plan to deal with exchange access allocations which would incorporate, at a minimum, the removal of CPE, reduction of the allocation of remaining non-traffic sensitive plant through the gradual transition from the subscriber plant factor (SPF) to unweighted relative use (SLU), the replacement of five business days with seven calendar day usage studies, changes to accommodate the access charge plan proposed by the Commission in CC Docket No. 78–72, 77 FCC 2d 224 (1980), and the assignment of private line, FX and CCSA minutes of use to the interstate jurisdiction. Rochester Telephone adds to this minimum agenda the removal from separations of inside wire. United Telephone Systems shares the interest in combining removal of CPE with the "deloading" of toll through a transition from SPF to SLU, but also maintains that the Joint Board should coordinate detariffing of CPE with capital recovery for the equipment, Aeronautical Radio, Inc. (ARINC) generally supports the development of a single five year plan encompassing most of the needed revisions.

11. Many of the other telephone companies, while advocating the simultaneous resolution of several issues, have as their primary interest the mitigation of revenue requirement impacts that may accompany detariffing of CPE and its removal from separations. Most of them do not specifically argue against a phased approach to allow for an initial resolution of CPE issues. Rather, they stress that related separations changes should be coordinated so that upward rate pressure at the local level will be minimized. The United States Independent Telephone Association (USITA) approves of the Joint Board Staff proposal.[2] However, USITA recommends the synchronization of removal of CPE from separations with the capital recovery time frame and the inclusion of other separations issues such as changes in SPF and treatment of station connections within a "comprehensive package." The Rural Telephone Coalition, Central Telephone and Utilities Corporation (Centel), Anchorage Telephone Utility (ATU) and the Kansas Corporation Commission argue generally that all variables should be considered simultaneously so that broader public interest issues such as the impact on price and availability of telephone service may be addressed. They also desire that revenue offset effects be incorporated in the plan. The Rural Electrification Administration (REA) further proposes that the Joint Board develop a comprehensive agenda for coordinating a CPE separations plan with the related major Commission proceedings concerning detariffing of CPE, access charges, station connections, and the Uniform System of Accounts. The National Telecommunications and Information Administration would also have the Joint Board coordinate a CPE separations plan with changes in Commission depreciation policies. In a somewhat similar vein, the GTE Telephone Companies argue that no changes to the Separations Manual are necessary, and that all embedded CPE should be included in the separations process until it is fully depreciated. However, GTE believes that, if separations modifications are adopted, interrelated and revenue offsetting changes should be considered. Finally, Citizens Utilities Company urges the Joint Board to coordinate the removal of CPE from both the rate base and separations, and to assure the application of SPF to CPE investment during the entire phase-out period.

12. Other parties perceive advantages to the resolution of different separations issues in sequence. The Ad Hoc Telecommunications Users Committee believes that, in pactice, the time constraints imposed by the Commission's CPE detariffing schedule require that the resolution of CPE separations issues take precedence over the development of any theoretically more appealing "comprehensive" solution to all separations problems. They argue that it is proper for the Joint Board to address separations changes *seriatim* so that the final question of subsidies may be addressed after other adjustments are determined. The New York State Department of Public Service, the Pennsylvania Public Utilities Commission, the Colorado Public Utilities Commission and International Business Machines Corporation (IBM) concur in the view that the simultaneous treatment of all issues would be impractical. They believe that the removal of CPE from separations is a discrete problem, and may best be examined apart from the time delays and encumbering complexity associated with the resolution of remaining separations issues. MCI Telecommunications Corporation (MCI) and Southern Pacific Communications Company (SPCC) support the prioritization of separations issues. Satellite Business Systems (SBS) also favors the treatment of CPE matters in an initial phase, and regards certain separations issues, such as access charge related changes as not ripe for decision-making. However, SBS suggests that intrastate ratepayers may actually benefit from the elimination of interstate allocations of CPE if the equipment is not currently priced to cover full costs, and proposes that an investigation to determine the actual costs and revenues of CPE be conducted before any revenue requirement offset mechanisms are adopted.

13. We believe that it is both necessary and proper to adopt CPE separations revisions in a separate and initial phase of this proceeding. Many of the parties seem to have misconstrued the significance of this approach. The division of this proceeding into separate segments is a matter of decision-making and administrative efficiency for the Joint Board itself. It is not necessarily determinative of the time frame within which any of the other potential separations changes before the Joint Board ultimately will be implemented. It is essential to adopt a CPE separations plan now to remove obstacles that may prevent adherence to the Commission's detariffing schedule. Adoption of a CPE plan which is interim in nature and narrow in scope will neither delay nor prejudice the resolution of other

[2] This language reflects the position taken by USITA in its pleadings. After the end of the comment period, USITA and AT&T jointly filed a letter in which they proposed an alternative plan to apply SPF to a declining proportion of actual net book balances of CPE.

separations issues. Many of the parties that disapprove of a phased approach voice a fear of lack of coordination among the various separations issues and disregard for the revenue requirement impacts that major changes will impose. However, the mere fact that a plan for removal of CPE from separations procedures is subject to the Joint Board's decision-making process on a priority basis in no way precludes the coordinated implementation of that plan with other separations changes. We fully intend to address all necessary modifications to the Separations Manual as expeditiously as possible. The choice of a CPE separations plan provides a foundation upon which these other modifications can be built in a sequence that achieves the most equitable result for all parties concerned. The institutionalization of changes that have the effect of providing revenue requirements offsets, such as the proper jurisdictional treatment of FX and CCSA minutes of use, or that render separations results more compatible with interexchange competition, such as adopting an alternative to SPF, will not be postponed for the entire five years during which CPE is being removed from separations. Rather, it is expected that implementation time frames will be designed with significant overlaps. Thus, the coordination that is so necessary for the minimization of upward rate pressure as well as the implementation of all of the Commission's competitive policies will not be sacrificed.

14. The changes under review by the Joint Board are numerous and complex. Many of them, particularly those involving the proper allocation factor for non-traffic sensitive plant and the treatment of exchange access lines, will require diligent study so that reasoned and responsible choices may be made. In some cases, Commission policies have not yet been set. In others, voluminous amounts of data must be collected and analyzed so that controversies may be intelligently resolved. It is clearly premature at this stage to adopt a comprehensive plan that would lock the industry into separations procedures that may turn out to be ill-considered and unresponsive to the actual requirements of the marketplace.

15. It is just as clearly unnecessary for the Joint Board to avoid making decisions that can and must be made on an expeditious basis to facilitate the timely implementation of Commission policies that have been actually formulated. There is a great urgency to develop a separations plan for embedded CPE so that detariffing of terminal equipment will not be accompanied by unnecessary market dislocations and interferences. In addition, CPE separations issues are straightforward and lend themselves to relatively uncomplicated solutions. The only real issues are the amount of CPE to be removed and the period of time over which this should take place. Both of these issues can be adequately addressed on an expedited basis with modest alterations in the wording of the Separations Manual. We believe that CPE separations issues are now ripe for resolution, and that the adoption of a plan at this time will free the Joint Board for diligent analysis and proper coordination of the other more sensitive and complex issues.

B. Choice of a Plan

1. *AT&T Proposal*

16. On June 2, 1981, AT&T submitted a proposal to the Joint Board incorporating thirty-three changes to the Separations Manual that, among other things, would result in the initial removal of all CPE from the separations process and the transition from SPF to SLU over a five-year period. Under the plan, exchange access allocations for each company would be changed to reflect the uniform treatment of all access lines, measurement of FX/CCSA interstate minutes of use, a redefinition of exchange outside plant, seven calendar day traffic studies in place of the current five business day studies, identification of revenue accounting and business relations expenses associated with CCCs, and the specific treatment of host/remote complexes as local dial switching equipment—Category 6.[3] To compensate for the removal of CPE, and to provide a means for a gentle shift from the allocations presently calculated on the basis of SPF to the level that will result from the use of a revised SLU, AT&T proposes the use of an "interim additive factor." Thus, the multiplicative subscriber plant factor would be replaced by an additive amount calculated to provide, initially, the same allocations as achieved under SPF as of the implementation date. The additive factor would be reduced by one-sixtieth each month until entirely eliminated at the end of five years. At that time, allocations of all remaining non-traffic sensitive plant would be made on the basis of the revised SLU.

17. Although the Commission has now reaffirmed its decision to detariff CPE under a bifurcated plan, AT&T claim that its proposal is as equally adaptable to bifurcated detariffing as to flash-out detariffing. AT&T also defends the plan against criticisms from GTE that it would constitute an unacceptable allocation of surrogate costs to the interstate jurisdiction. AT&T maintains that the interim additive factor would be entirely proper since it would be applied to actual non-traiffic sensitive costs remaining after all CPE is removed from separations, and would represent a reasonable mechanism for avoiding severe dislocations in the transition to radically altered allocation procedures. In addition, AT&T responds to the objections of SBS, Alascom and SPCC that interexchange facilities allocations should not be addressed by the Joint Board at this time. AT&T agrees that the interchange modifications in its original proposal may be instituted in a second phase on this proceeding. AT&T asserts that one of the major benefits of its approach is that some of the modifications, such as the proper jurisdictional treatment of FX and CCSA minutes of use and the switch to seven day studies, will have offsetting effects and will ameliorate the disruptive impact of introducing several changes separately. Also, AT&T argues that its plan offers the best opportunity to coordinate all of the changes that should be addressed by the Joint Board as a first priority, particularly the long postponed reduction of SPF.

18. ARINC, Central and Rochester Telephone Company also favor a plan that would combine the removal of CPE with the reduction of SPF. United supports the concept of capping SPF but believes that the AT&T proposal would reduce allocations too far too fast. The Rural Telephone Coalition observed that the AT&T plan would have a greater impact than the Staff proposal due to the eventual elimination of SPF. Letters from thirty-one small telephone companies in several states indicate that the removal of CPE combined with the allocation of remaining non-traffic sensitive plant on current SLU would have a dramatic effect on local rates.[4]

[3] Other Manual changes that have been under consideration by the National Association of Regulatory Utility Commissioners (NARUC) for the past several years, including updating the .85 factor and the CSR ratios used in the Ozark (SPF) formula, are rendered moot under the AT&T proposal by the substitution of an interim additive factor for the SPF formula. Several other changes are also proposed, generally pertaining to interexchange network allocations.

[4] Letters were filed by the following parties: Arkansas—E. Ritter Telephone Company, Southwest Arkansas Telephone Cooperative, Inc.; Florida—Indiantown Telephone System Inc.; Georgia—Brantley Telephone Company, Inc., Coastal Utilities Inc., Citizens Telephone Company, Inc., Public Service Telephone Company; Kansas—Zenda Telephone Company, Inc., ; Michigan—Concord Telephone Company, Inc.; New

Continued

The studies reported in these letters, as is true of most of the impact studies filed by the parties, do not reflect projected growth in subscriber line usage over the five year transition period or the offsetting impact of other changes proposed by AT&T that will tend to increase allocations to interstate services.[5] However, the small companies that filed letters assert that these offsetting changes will probably not be sufficient to forestall drastic rate increases. Five small companies (Haviland Telephone Company et al.), argue that their subscribers would not be able to afford the AT&T plan, especially since outside experts would hve to be hired to perform the cost studies for the rate cases that will be necessary to obtain additional revenues. The Ad Hoc Telecommunications Users Committee argues that the AT&T proposal is attractive only as a "package deal," and that other changes in Commission policy, such as deregulation of inside wire, may not preserve the net effect of the plan and would lead to rate "churning."

19. The specialized carriers dislike the AT&T proposal for a variety of reasons. SBS, MCI, and SPCC argue that under AT&T's proposal, the effects of each aspect of the plan would be obscured through simultaneous implementation of several changes. They also contend that access charge issues are not yet ripe for decision making and should not be incorporated in a separations plan regarding treatment of CPE. MCI charges that, through its plan, AT&T is attempting to impose the cost consequences of various separations changes on its competitors, and that the Joint Board should focus on the identification of the particular cost elements of local plant associated with interexchange as opposed to exchange service. MCI believes that only exchange related costs should be shared by the SCCs. SPCC believes that the Joint Board should postpone any changes in separations until the completion of studies to identify the value of CPE to be transferred to AT&T's fully separated subsidiary, as mandated in the Second Computer Inquiry.

20. We do not think that implementation of either the Staff or AT&T. plan depends on valuation studies of embedded CPE. Any plan to remove CPE from the separations process would be properly designed if it were based on the same basic rules that presently guide the allocations of station equipment to interstate operations. Under current procedures, actual net account balances are not calculated. Rather, for separations purposes, net plant balances are determined through application of the theoretical depreciation reserve. Thus, the separations modifications needed to reflect detariffing policies do not require the same valuation studies as will be necessary to remove embedded CPE from the rate base. Therefore we do not agree with the specialized carriers that separation changes should not be adopted until valuation studies, to be performed in the context of the Commission's implementation proceeding, are completed.

21. However, we do agree that it would be inappropriate to adopt some of the elements of the AT&T. plan at this time. The Commission has not yet defined its policy with regard to access charges. In order to achieve consistency with the categories of services and the relative treatment of those categories that will be approved by the Commission, changes with respect to the separations treatment of exchange access lines await a final decision on access charges in Docket No. 78–72. In addition, although it is agreed by most parties that some reform must be instituted to curb the continuing increase of interstate allocations due to the SPF formula, it would be premature to approve a plan that is dependent on the eventual reduction to a version of SLU. First, the removal of CPE from separations does not depend on the elimination of SPF. We believe it is important for this Joint Board to address both matters as swiftly as responsible action will permit, but the resolution of one does not necessarily require simultaneous resolution of the other. In fact, removal of CPE from separations itself will somewhat ameliorate the problem now caused by SPF. Since CPE represents such a large portion of the non-traffic sensitive costs subject to SPF, the removal of customer premises equipment from the allocation process will greatly reduce the undesirable effect that SPF has on interstate allocations. Second, there are many alternatives to SPF and SLU that may be considered as appropriate measures of the proper interstate share of non-traffic sensitive costs. These alternatives have not yet been fully investigated. In the next phase of this proceeding, the Joint Board will analyze the issues raised and proposals made by the parties in response to questions asked in Appendix A of the June 12, 1981 Order. Among other things, these questions pertain to options for the treatment of remaining non-traffic sensitive costs and the propriety of including some provisions for non-cost factors in the allocation of exchange costs. Until these issues are diligently and thoroughly analyzed, it cannot be assumed that SLU is the most appropriate allocative factor. This is a major infirmity of the AT&T plan. Its adoption would require a premature decision regarding one of the most crucial aspects of the separations process.

22. In addition, the combination within a single five-year transition plan of all the changes proposed by AT&T may not best serve the public interest. As we have noted, implementation periods for many of these changes may in fact overlap. However, it is unclear at this stage, what the most equitable schedule would be. The revenue offsetting items incorporated in AT&T's plan may not provide sufficient relief for the drastic increases in intrastate revenue requirements that the plan would impose by the end of the five year transition period. Five years may be sufficient for the implementation of some changes, but insufficient for others, especially if all of them are instituted within the same time frame. The Joint Board must retain the flexibility to design separate implementation schedules for different changes in order to regulate the

[5] AT&T submitted impact studies showing the projected revenue requirement effects of both the Staff proposal and its own plan on Bell System Companies and Independents in each state. The AT&T studies incorporate the following assumptions: Historical growth in investment, 10% annual growth in ENFIA usage, projected revenue requirements based on a 12.75% rate of return, and for the Bell proposal, a 5 percent annual growth in FX and CCSA access lines, and estimated conversation minutes per month for FX (2433), CCSA (4258), and private line (3000). The estimates do not reflect effects of future rate changes, accererated capital recovery programs, or expensing of stations connections. The studies show that, under the Bell exchange access proposal, by 1986 the interstate revenue requirement will be reduced by approximately $10 billion for Bell Companies and $3.7 billion for Independents. Under the Staff Proposal, by 1986 interstate revenue requirements will be reduced by approximately $2.6 billion for Bell Companies and $1.1 billion for Independents.

magnitude of adverse impact that may be experienced at any one time. For all of the foregoing reasons, we find that the AT&T plan cannot be adopted at this time.

2. *Alternative Proposals*

23. Some parties disapprove of both the Staff and AT&T plans, and have made counter proposals. In general, these parties are concerned that the Joint Board make adequate provision for full capital recovery of embedded CPE. Haviland Telephone Company et al., the Rural Telephone Coalition, and Anchorage Telephone Utility argue that CPE balances in Accounts 231 and 234 should be capped as of the date of detariffing and that actual plant balances, maintenance and depreciation expenses should be included within the separations process while CPE is reduced through normal depreciation accruals. Haviland, the Rural Telephone Coalition, United Telephone Systems, and Citizens Telephone Utilities recommend the application of remaining life depreciation procedures to embedded CPE. GTE, in offering a similar counter proposal, suggests that the amortization period should not be extended beyond five to seven years. AT&T objects to these proposals, arguing that they merely constitute modified Staff plans and offer nothing in the way of attention to priority separations issues.

24. We also perceive several deficiencies in these proposals. We agree with the Ad Hoc Telecommunications Users Committee that it is not incumbent upon this Joint Board to devise capital recovery plans for embedded CPE or to ensure that CPE is appropriately priced. The Joint Board is charged only with considering changes to separations procedures. We have no authority under Section 410(c) of the Communications Act, 47 U.S.C. 410(c), to make determinations as to proper depreciation procedures, or to design mechanisms for full capital recovery as embedded CPE is removed from the rate base. The Separations Manual has never been a vehicle for capital recovery. The problems of capital recovery for CPE and its removal from separations procedures, though related, are separable. It is the province of the Commission, in the context of the implementation proceeding, to establish guidelines for the valuation of embedded CPE and, in coordination with the states, to develop the applicable depreciation rates and detariffing time tables. Therefore, the Joint Board cannot resolve these matters in the context of this proceeding. Moreover, the decision made by this Joint Board will not in any way impair the ability of local companies to achieve full cost recovery for CPE. The equipment will continue to be tariffed on a basis calculated to achieve cost recovery until such time as detariffing is implemented by each state regulatory agency. Detariffing may be effected through retirement, sale or transfer to a separated subsidiary. In any case, it will be the responsibility of the state commission to design detariffing mechanisms that allow each company to at least recoup its investment. Similarly, local companies will be fully compensated for actual maintenance and depreciation expense through cost recovery techniques established at the local level. These are entirely separate considerations from those facing the Joint Board.

25. The focus of the Joint Board's task is not the proper compensation that each company should receive through separations for the CPE investment it maintains. Rather, the focus is on an equitable reduction of the revenues that separations allocations of CPE contribute to other aspects of intrastate operations. There is a significant contribution phenomenon created by the combination of SPF allocations of CPE and full cost pricing of CPE at the local level.[6] Since CPE constitutes such a large portion of the non-traffic sensitive plant subject to SPF, its exclusion from separations will substantially erode the cost base from which the SPF contribution effect is presently derived. It is this result, if achieved too precipitously, that may require inordinate intrastate rate increases. The pricing of CPE itself should be unaffected.

26. Even as a means of providing a gradual reduction in SPF allocations, a depreciation based plan is unacceptable. In order to determine whether or not reliance on depreciation accruals for the removal of CPE from separations would even approach equitable results for most companies, the Joint Board would be forced to wait until the implementation proceeding was completed and each state had rendered a decision on its own detariffing plans. It would not be until after these mechanisms had been set in motion that the Joint Board could begin to determine the impact on each company. This arrangement would inhibit the effective and timely implementation of competitive policies. Further, absent assurance that separations contribution would diminish, albeit at a measured rate, state commissions which currently desire to promote the removal of CPE from the rate base would lack the incentive to do so. This would be especially true if the depreciation process were allowed to extend much beyond a five year transition period. This would interfere with competitive processes because used equipment might be held in the rate base and, therefore, kept out of the marketplace. In addition, depending on the depreciation plan ultimately adopted, different companies could experience the impact of detariffing at widely varying rates. This may create significantly inequitable results among carriers. It would certainly make it extremely difficult for the Joint Board to redress any inequities since the particular circumstances surrounding the economic impact on each individual company would have to be studied. Thus, because of the likely unevenness of the result, the tendency to create undesirable incentives, the difficulties in remedying inequities, and the delays in implementation due to the requirement for prior resolution of valuation and state detariffing issues, we find the proposals for a depreciation based plan to be unsatisfactory.

3. *Staff Proposal*

27. The Staff proposal is favored by many of the parties. For example, the Ad Hoc Telecommunications Users Committee, Rochester Telephone Utility, and the California and the Colorado Public Utilities Commissions perceive it as a straightforward, readily implementable plan to spread the rate impact of deregulation over a reasonable period. United, USITA, Continental, the Pennsylvania Public Utilities Commission, the New York State Department of Public Service and Centel also essentially agree with the approach embodied in the Staff plan.

28. However, other parties assert either that the Staff proposal is deficient, or that it would be acceptable only with various modifications. Centel believes that the staff plan is workable, but that valuation issues should be

[6] We reject the notion, proffered by SPCC, that the Joint Board's assumption that all terminal equipment rates are set at or near full costs is contradicted by the Commission's own findings. The studies cited by SPCC that were filed in the Commission's Customer Interconnection inquiry, Docket No. 20003, 61 FCC 2d 766 (1976), 75 FCC 2d 506 (1980) and that concluded that terminal equipment revenues did not cover costs, related only to the pricing of vertical services. These studies did not encompass the pricing of all customer premises equipment. Since the time that those studies were performed, most states have instituted unbundled rates for all CPE. Some states, particularly New York, have also increased the charges for vertical services. Where Western Electric transfer prices are used instead of net book costs as the basis for ratemaking, the unbundled rates, especially for residential CPE, may actually cover more than 100 percent of the cost.

resolved first, so that the net CPE plant balances subject to separations can be identified. SPCC advocates the determination of the actual cost of CPE to be removed from the rate base and transferred to the separate subsidiary to prevent cross subsidization between regulated and unregulated services. The staff plan does not depend upon valuation of CPE or upon the actual rate at which CPE will be removed from the rate base. The five year transition period of equally spaced reductions of a given level of CPE costs represents a reasonable approximation of the anticipated average rate of detariffing under desirable conditions. This is appropriate because, as previously stated, the purpose of the continued allocation of any CPE costs is not intended to contribute to capital recovery, but is intended to prevent abrupt increases in rates as result of the sudden evaporation of such a large portion of costs that provide the basis of support through the application of SPF. At any particular time during the transition period, some companies may have more CPE in the rate base than is reflected in the declining CPE base for separations allocations. Some companies may have less. The equal separations treatment of all companies, regardless of the actual rate of detariffing of embedded CPE, will not only create incentives for the realization of the Commission's Second Computer Inquiry objectives, but will provide equally fair treatment for all telephone companies while those objectives are being achieved. Thus, the actual CPE costs involved in a detariffing plan need not be accurately reflected in the separations process at any one time during the transition period. Additionally, SPCC's fears of inadequate protection against cross subsidies are not a proper subject for this proceeding. Those concerns should be addressed in the context of the Commission's implementation proceeding.

29. A.T. & T., GTE, Haviland et al., and Citizens Telephone Utilities are also concerned that, under the staff plan, local companies will not adequately be compensated for any increases in actual maintenance expenses associated with embedded CPE. We do not expect that maintenance of embedded CPE will become a burdensome expense. In any case, this issue is akin to the capital recovery issue, and it will remain the responsibility of each local jurisdiction to provide for adequate revenues to cover these expenses. However, the present form of the Staff proposal, once recommended by this Joint Board and adopted by the Federal Communications Commission, is not forever immutable. If it becomes necessary to accommodate unforeseen increases in costs, especially for more vulnerable small companies, adjustments can be made.

30. In a similar vein, several parties including GTE, Citizens, United, USITA, the Rural Telephone Coalition, and Haviland et al., believe that the termination date for the transition period should be coordinated with the target date for completed detariffing of all CPE. This would supposedly avoid a "mismatch" between the acutal depreciation reserve and the CPE separations base, and would assist in the achievement of capital recovery. A.T. & T. and the Ad Hoc Telecommunications Users Committee view this as unnecessary. Although legal considerations might require the continued allocation of some CPE costs as long as they remain in the rate base, we believe that precise matching of the dates of total removal of CPE from both separations and the rate base is not crucial. However, matched termination dates offer the advantage of consistency and simplicity. While it is the responsibility of the Commission rather than the Joint Board to determine the ultimate detariffing date, the choice of a schedule coordinated with the completion of the separations changes recommended here is an option that may be considered in the implementation proceeding.

31. Centel thinks the regulatory treatment of inside wire in Account 232 should be clarified before a plan is adopted. ARINC, SPCC and the New York State Department of Public Service want assurance that A.T. & T. will reflect reduced revenue requirements in lowered interstate rates. We agree with A.T. & T. and the Ad Hoc Telecommunications Users Committee that the resolution of other federal regulatory policies including treatment of inside wire, access charges, depreciation schedules, and interstate rates are outside the scope of this proceeding. Futhermore, it is not necessary to delay the choice of a CPE separations plan while these matters are being resolved. The operative effect of the staff proposal will be compatible with any other separations changes that may be necessary to accommodate additional developments in federal policies. This is due to the fact that the staff proposal requires only minimal changes in the Separations Manual and does not explicitly modify the allocative factor for nontraffic sensitive plant. As Commission policies become clarified, additional modifications can be made to the Manual, if necessary. In addition, the eventual resolution of the SPF issue may incorporate some means of softening the impact of any new policies that might place an added burden on exchange operations.

32. Haviland and the Rural Telephone Coalition desire assurance that SPF will be applicable to the embedded CPE balance until it is entirely removed from the rate base and title is deeded to customers. Citizens and United recommend that SPF be capped on the detariffing date and that the capped factor be applied to the decreasing CPE separations base. We decline to assure the application of SPF to remaining CPE throughout the entire transition period. As stated above, the issue of the appropriate allocation factor for non-traffic sensitive plant is not ripe for final determination at this time. SPF will be applicable to all non-traffic sensitive plant until the Joint Board has recommended that another allocative factor is more appropriate. We do not here prejudge that decision, and cannot foresee what that factor will be. At the time that a new factor, if any, is chosen, the total impact on each jurisdiction will be taken into consideration. The effect of applying a different allocative measure to remaining CPE will be included in the analysis. We believe the argument by Citizens, that the phase out of embedded investment must be conducted under current separations procedures in order to allow each telephone company to "recover its investment according to the rules under which that investment was made", is irrelevant. We have already explained that separations allocations of CPE are unrelated to recovery of the capital invested in the equipment. The application of a different, more lucrative allocation factor to CPE would distort incentives for removal of that equipment from the rate base, thereby thwarting the achievement of detariffing objectives. Such a result is clearly contrary to our goal.

33. AT&T, ARINC, SPCC, Centel and Rochester Telephone Company believe that the plan should at least incorporate a modification from SPF to SLU. MCI argues that existing jurisdictional allocations of CPE are unlawful because they are unrelated to "cost causative realities." However, it is well known that there are no objectively verifiable cost causative realities involved in the allocation of non-traffic sensitive joint and common costs. See American Telephone & Telegraph Co., 84 FCC 2d at 392 (1981). The Ozark Plan is now under review because changes in usage patterns and the cost characteristics of

new technologies may have rendered it less serviceable. Although the allocation of non-traffic sensitive plant on the basis of traffic patterns may not be perfect technique, it has provided some reasonable measure of the burden each jurisdiction must bear. It is the hazard of using such a mechanism, however, that it may need periodic alteration as cost and usage circumstances dictate. The continued value of the SPF formula is currently under consideration. However, until that evaluation is complete we can neither endorse a transition to SLU nor promise that SPF will always be applied to CPE. We leave these decisions to a separate phase of this proceeding.

34. We see several advantages to the Staff proposal. It is an easily administered plan for the orderly extraction of CPE from the separations process. It minimizes delay and creates incentives for detariffing CPE while avoiding severe economic dislocations for small carriers. Implementation of the Staff proposal does not depend on the extensive studies that would be required to determine the appropriate factor to be applied to remaining non-traffic sensitive plant under AT&T's plan to flash-cut CPE from separations. It also does not involve the interferences with market forces that would result from a plan to coordinate CPE removal with capital recovery through the depreciation process.

35. Some state commissions have already begun programs to encourage the sale of terminal equipment and are anxious to detariff CPE, but are waiting for separations issues to be resolved. Without some kind of certainty as to the nature of separations adjustments that eventually will be made and the changes in settlements these adjustments will cause, many states may be reluctant to order detariffing. The fear of potential adverse revenue requirement impacts is a substantial deterrent to detariffing. Thus, any continued delay in the formation of a specific plan is a formidable impediment to achievement of the Commission's Second Computer Inquiry goals. Under the Staff proposal, states will easily be able to calculate the precise reduction in toll settlements that will occur for each company over a given period of time.[7] Thus, apprehension over loss of settlements will not serve as a major disincentive to states desiring to move ahead with detariffing initiatives. Both carriers and the state regulators will be able to plan sufficiently in advance for any rate adjustments that may have to be instituted. In fact, the certainty of a particular schedule for reduced settlements for CPE will encourage states and carriers to accelerate movement toward detariffing and establish schemes for adequate capital recovery. The plan will not, of course, derogate in any way from carriers' rights to full recovery of invested capital. Therefore, because of its administrative covenience, minimized economic impact, and serviceability for the achievement of detariffing objectives, we find that adoption of the modified version of the staff plan to remove CPE from separations, set forth in Appendix A, would best serve the public interest.

[7] It is expected that if the SPF formula is replaced by another factor, ample lead time will be provided to allow the recalculation of settlements impacts.

IV. Modifications to the Original Staff Plan

36. Several of the parties have suggested minor changes to the Staff plan. The Rural Electrification Administration, the Rural Telephone Coalition, Continental, and the Pennsylvania Public Utilities Commission indicate that a five year transition schedule may not be long enough. However, these parties have provided no substantive evidence regarding the specific extent of harms that they believe could be prevented through an extension of the five year period. Separations modifications relating to the removal of CPE from the jurisdictional allocation process should be made effective as swiftly as most carriers can accommodate. Further, the detariffing of CPE should be reflected in separations as straightforwardly as possible, and should not be unnecessarily confused with the general issue of the potential need for special separations treatment for small rural carriers. Thus, the staff plan properly does not attempt to address the relationship between jurisdictional cost allocations and maintenance of affordable local rates beyond the fact that a reasonable phase-in of the removal of CPE from separations seems to be most equitable.

37. In choosing the length of the transition period, the Joint Board and the Commission must carefully weigh the inequity to most carriers of a transition that may be too sudden with the deterrence from detariffing that may occur from a transition that is too long. The balancing of these factors is a specific problem arising from the implementation of a particular regulatory policy. It may be related to, but should not necessarily encompass, the broader more difficult question of the proper role of jurisdictional cost separations in the promotion of universal service. The Joint Board and the Commission will address these latter issues and the special concerns of small carriers well before the five year transition period expires. From the responses of such parties as AT&T, ARINC, United, USITA, Rochester Telephone Co., and the Ad Hoc Telecommunications Users Committee, it appears that a five year time frame for the limited changes adoted here is generally acceptable, and we believe that it would be wise not to alter it.

38. Centel requests the Joint Board to specify the subaccounts necessary to identify the costs of company telephones, pay stations and multiplexing equipment contained in Accounts 231 and 234 that are not subject to detariffing under the Second Computer Inquiry. We do not believe this is necessary. The definition of customer premises equipment to be added to the Manual's Glossary will adequately serve to assist a telephone company in the calculation of the CPE base amount. This calculation need be made only once. The creation of subaccounts for the maintenance of ongoing records for equipment that will remain in the rate base is a subject for the Commission's implementation proceeding and is not required in order to make the Staff's separations plan operational. Similarily, Centel's request for direction as to the treatment of investment tax credits would be more appropriately referred to the Commission rather than to this Joint Board.

39. Many of the parties, including AT&T, Citizens, Centel, and Haviland et al., have mentioned that for the purposes of computing the separations base the expenses associated with repair and maintenance of embedded CPE, recorded in a particular month, may not be fairly representative of the level of expenses incurred over the course of a year. They propose that annual average expense figures be used instead. We find this argument to be persuasive and have modified the proposed new Section 42.552 of the Manual to specify that the maintenance expense portion of the separations base shall consist of the average monthly recorded maintenance expense in Account 605 associated with repairs and maintenance of customer premises equipment in Accounts 231 and 234 (excluding amounts for installation, moves and changes) for the twelve months preceding the cut-off date.

40. We have also reevaluated the advisability of requiring all carriers to reduce the CPE separations base by increments of one-sixtieth each month over the five year period. Some companies may not perform cost studies

on a monthly basis, and this requirement may impose an unnecessary burden on them. Therefore, we have revised the Staff's proposed new Section 25.32 of the Manual to permit companies that have a separation study period other than monthy to establish equal intervals consistent with such study periods for reducing the base amount over five years.

41. Finally, we have considered a change in the date of implementation of the Staff plan. Orginally, the effective date was to be January 1, 1982. This was premised on the perceived advantage of coordinating the implementation date with the beginning of a new calendar year, and the need to have a plan in place at least by March 1, 1982, the Commission's original cut off date for detariffing of new CPE. On further reconsideration of its final decision in the Second Computer Inquiry, the Commission postponed the detariffing date to January 1, 1983. Thus, the urgency with which separation changes should be effected has been somewhat eased. We find that January 1, 1983, is the most appropriate date for execution of the staff plan.

42. There is certainly no need to delay implementation beyond January 1, 1983. The Anchorage Telephone Utility requested two or three years of lead time in order to allow adjustment of inventory levels, purchasing decisions, budgets, and borrowing commitments. However, it seems that many of these concerns are related to detariffing implementation rather than separations, and that, in any case, a full year of preparation before the gradual settlements reduction process begins should be sufficient for planning purposes. In contrast, the Ad Hoc Telecommunications Users Committee asserts that the date for separations changes need not be matched with the detariffing date, and may be scheduled earlier. Some states that are anxious to implement detariffing plans, such as California, may prefer an effective date for the staff plan that precedes the Commission's implementation target by six months or so. However, the benefits of such an accelerated schedule are minimal, as are detriments of a slight additional postponement. Most of the parties that remarked on the issue, including GTE, USITA and Haviland et al., stated a preference for matched implementation dates. The January 1, 1983, date appears to be the most equitable for all parties. It preserves the advantages of beginning the plan with the calendar year, and offers the best opportunity for synchronizing the actual amounts of embedded CPE with the costs that will be phased out of separations.

43. Accordingly, it is ordered that the revisions to the 1971 FCC–NARUC Separations Manual set forth in Appendix A which are to be effective on January 1, 1983, are adopted, as a Recommended Decision and Order.

The Federal-State Joint Board.*

Mark S. Fowler,

Chairman.

Addendum to the Separations Manual

General

This addendum to the February, 1971 edition of the Separations Manual provides for the phase out and termination of the allocation to interstate of customer premises equipment in Accounts 231 and 234. No customer premises equipment investment which may be added to those accounts after December 31, 1982 shall be allocated to the interstate operation. The plant balances attributable to customer premises equipment on the books as of December 31, 1982 shall constitute a base amount for allocation between state and interstate operations during a phase out period of 60 months. Starting with January, 1983 the base amount shall be reduced by one sixtieth each month, and all customer premises equipment subject to allocation between state and interstate operations shall terminate after 60 months. A consistent treatment is afforded the expenses and reserves associated with customer premises equipment. The following revisions to the manual are made:

Section 1, Part 1

A new paragraph 11.25 shall be added as follows:

11.25 The procedures set forth herein provide for the exclusion from the interstate alloction of all investments and associated reserves and expenses incurred in connection with customer premises equipment after December 31, 1982. Investments in customer premises equipment on the books as of December 31, 1982 will be phased-out over a 60-month period for allocation to interstate operations. Consistent treatment is afforded the reserves and expenses associated with phase out of the investment in customer premises equipment.

Section 2, Part 5

A new section 25.131 shall be added as follows:

25.111 The investments in Accounts 231 and 234 shall be segregated between customer premises equipment and other station equipment. Customer premises equipment shall be apportioned among the operations as set forth in Sections 25.31 and 25.32. Other station equipment shall be apportioned as follows:

A new section 25.3 shall be added as follows:

25.3 Phase-out and Termination of Interstate Apportionment of Customer Premises Equipment in Accounts 231 and 234.

25.31 New customer Premises Equipment—No portion of any investment in customer premises equipment in Accounts 231 and 234 which may be entered on the books of the company after December 31, 1982 shall be apportioned to interstate operations.

25.32 Phase-Out of Customer Premises Equipment Recorded as of December 31, 1982—The recorded investments of customer premises equipment in Accounts 231 and 234 which are on the books as of Decembr 31, 1982 shall be assigned to the five categories set forth under Section 25.2. The amount of plant investment so determined, reduced by one-sixtieth, shall be apportioned between state and interstate operations in accord with the procedures prescribed for each category under Section 25.2 for the month of January, 1983. Each month thereafter, the base December 31, 1982 amount shall be reduced by one-sixtieth of the base amount in each category, and the apportionment between state and interstate operations shall be made in a similar manner. After sixty months the amounts in each category will be reduced to zero, and no apportionment of any customer premises equipment to interstate operations shall thereafter be made. Companies that have a separations study period different than monthly may establish equal periods for reducing the base amounts consistent with such study periods to write off the base amount in 5 years.

Section 2, Part 9

The following sentence shall be added to Paragraph 29.11:

Starting with January 1, 1983 any amounts included in Account 122 associated with customer premises equipment shall be excluded from the amounts which are allocated to the interstate operation.

Section 4, Part 2

A new Section 42.55 shall be added as follows:

42.55 Phase out and Termination Provision

42.551 No portion of any maintenance expense in Account 605 associated with repairs of customer premises equipment in Accounts 231 and 234 incurred after December 31, 1982 shall be apportioned to interstate operations.

42.552 The average monthly recorded maintenance expense in Accounts 605 associated with repairs and maintenance of customer premises equipment in Accounts 231 and 234 (excluding amounts for installation, moves and changes) for the 12 months preceding the cut-off date shall be used as a base in connection with the phase out of interstate allocation of customer

*See attached statement of Commissioner Joseph R. Fogarty.

premises equipment. For the month of January, 1983 such base amount shall be reduced by one-sixtieth and apportioned among the operations in accordance with the procedures set forth above in paragraphs 42.521 through 42.542, as applicable.

Each month thereafter, the base amount shall be reduced by one-sixtieth of the base original amount, and the apportionment of such reduced amount among the operations shall be made in a similar manner. After sixty months the base amount will be reduced to zero, and no apportionment of customer premises equipment maintenance expense to interstate operations shall thereafter be made.

Section 4, Part 3

A new Section 43.112 shall be added as follows:

43.112 Depreciation expense associated with customer premises equipment in Accounts 231 and 234 for the month of December, 1982 shall be expressed as a ratio to the plant in these accounts as recorded for December 31, 1982 and such ratio shall be applied to the phase-out of plant in these accounts as described in paragraph 25.32 in accord with the procedure in Paragraph 43.12.

Section 4, Part 7

The following sentence shall be added to Paragraph 47.211:

The wage portion of maintenance expense related to maintenance of customer premises equipment shall be determined in a manner consistent with the phase-out of maintenance expense provided in Section 42.55.

Section 5, Part 1

A new paragraph 51.22 shall be added as follows:

51.22 The depreciation reserve associated with customer premises equipment in Accounts 231 and 234 shall be determined as of December 31, 1982 as a base for the phase out of customer premises equipment in those accounts. Starting with January, 1983 such base amount shall be reduced by one-sixtieth each month.

Glossary

The following definition shall be added:

Customer Premises Equipment—Items of telecommunications terminal equipment in Accounts 231 and 234, such as telephone instruments, data sets, dialers and other supplemental equipment, and PBX's which are located on customer premises and inventory included in the accounts to be used for such purposes. Excluded from this classification are similar items of equipment located on telephone company premises and used by the company in the normal course of business as well as public telephones, channel multiplexing equipment and related equipment.

Dissenting Statement of Commissioner Joseph R. Fogarty

In Re: Amendment of Part 67 of the Commission's Rules, CC Docket 80-286

At its meeting on October 13, 1981, the Joint Board instructed the staff to prepare an order adopting a staff proposal—known as the "Popenoe or California Plan"—which would cap and then phase-out of the jurisdictional separations process the allocation to interstate of customer premises equipment (CPE) over a 60-month period. The phase-out procedure was to be implemented by use of "base amounts" derived from net CPE plant balances as of a date-certain (*i.e.*, December 31, 1982). I dissented to these instructions in part because I believed that the plan was deficient in that it did not tie the phase-out of CPE from the separations process to the recovery of capital and expenses for the equipment. Additionally, I was concerned that the staff plan would not curb the alarming growth of the Subscriber Plant Factor (SPF).[1]

Unfortunately, only part of my concerns have been met. In a companion order, the Joint Board is recommending to the Federal Communications Commission that the SPF factor be capped—an action which I proposed and support.[2] However, I must dissent to this *Recommended Decision and Order* because I continue to believe that the CPE reduction factor (1/60th reduction each month) should be linked to actual revenue requirements derived from actual book costs and expenses instead of the frozen net balance figure porposed in the staff plan.

The question of whether the phase-out of the interstate allocation of embedded CPE should be based on a frozen net balance figure or actual revenue requirements may seem arcane, but the consequences of such an action can be significant. It is because of these potential consequences that I believe that the Joint Board should have recommended a cost recovery-based phase-out scheme.[3] Common sense dictates that in order not to unduly burden local rates both during and after the transition period, the proposed phase-out formula should reflect actual retirement, depreciation and maintenance expenses. Unless the proposed reductions are based on actual costs, there is the risk that some depreciation and maintenance expenses which should be borne by the interstate jurisdiction will not because the expenses were not reflected in the frozen net plant balance that the staff proposes to use as a "base amount." These newly determined or "post-freeze" costs would be forced *in toto* on to the state jurisdictions even though some part of these costs is appropriately borne by the interstate jurisdiction. *See* Comments of Citizens Utilities Company at 4–7. Not only would such a consequence be unlawful,[4] it would result in an unnecessarily high increase in local rates. State commissions should beware of the recommended plan adopted by this Board.

Although the Order recognizes this possibility, it unfairly places the burden on the states to provide for adequate revenues to recover actual—as opposed to the plan's theoretical—maintenance and depreciation expenses. *See Recommended Decision* at paras. 24 and 29. I do not believe that the Joint Board can wash its hands of this problem in its recommendation to the FCC.

My disagreement with much of the analysis in the *Recommended Decision* is fundamental. In particular, I am troubled by the assertion in the decision that the problems of capital recovery for CPE and its removal from separations procedures, although concededly related, are separable. *Recommended Decision* at para. 24.[5] While this might be theoretically correct, in reality, separations and capital recovery for CPE are inseparable as we move toward a deregulated environment. To argue as is done in paragraph 28 that "the actual CPE costs involved in a detariffing plan need not be accurately reflected in the separations process" directly contradicts the Commission's policy that whenever possible costs should be placed on the causative customer. *See*, e.g., Further Notice of Inquiry, *Deregulated Customer Premises Inside Wiring*, ———FCC 2d———(1981). The justification of the proposal to base the

---

[1] *See* Statement of Commissioner Joseph R. Fogarty, Concurring in Part, and Dissenting in Part, Amendment of Part 67 of the Commission's rules, CC Docket No. 80-286 (released October 13, 1981).

[2] *See* Separate Statement of Commissioner Joseph R. Fogarty, Recommended Interim Order, Amendment of Part 67 of the Commission's rules, CC Docket No. 80-286 (Adopted November 18, 1981).

[3] I disagree with paragraph 24 of the *Recommended Decision* to the extent it can be read as indicating that this Joint Board cannot recommend to the Commission that the phase-out of the interstate allocation of CPE be linked to capital and expense recovery. To state that the Joint Board "cannot resolve these matters" is to state the obvious. The Joint Board can only recommend a decision to the Commission. The Commission, however, does have the authority to tie any phase-out of CPE to capital and expense recovery.

[4] *See Smith v. Illinois Bell*, 282 U.S. 148 (1930).

[5] I note that at para. 32 the *Recommended Decision* would go farther and indicate that separations allocations of CPE are completely unrelated to capital recovery. This is inconsistent.

phase-out formula on an equitable/reasonable averaging scheme is reminiscent of the "whole-life" depreciation theory which the Commission recently abandoned as inappropriate in a competitive environment. *See Property Depreciation,* 83 FCC 2d 289 (1980). The continued allocation of CPE costs is definitely intended to contribute to capital recovery. In the *Recommended Decision* the Joint Board neglects the fact that abrupt increases in local rates may come about not just as a result of a sudden evaporation of CPE costs, but also as a result of large depreciation and expense costs which are unfairly foisted on the state jurisdictions. *See Recommended Decision* at para. 28.

No undue delay would result if the phase-out of CPE allocations was based on actual revenue requirements. The Commission would not be forced to wait until the Computer II implementation proceeding was concluded. *See Recommended Decision* at paras. 26 and 34. The 60-month reduction could be based on actual book accounts until such time as the valuation proceeding was concluded. Any difference between the book and valuation amounts not only could be compensated for at that time, but would probably be less than the difference between the staff's theoretical figures and the valuation amount.

Similarly, the use of the actual book accounts would neither create signficiant inequitable results among carriers nor cause severe economic dislocations for small carriers. *See Recommended Decision* at paras. 26 and 34. Instead, it would ensure that every carrier properly recovers all depreciation and maintenance expenses. Without such recovery, dislocations will occur.

The only substantial justification put forward for the use of frozen base amounts is that use of these amounts would permit a state to detariff and require the sale of CPE while still continuing to receive contributions from separations. I find this concept repugnant to the Commission's basic procompetitive policies. To allow a state to continue to receive contributions from separations after all CPE has been detariffed and sold would permit it to receive a windfall it does not deserve. Moreover, ratepayers in those states which did not order the quick detariffing of CPE would subsidize the rates paid by ratepayers in those states which did. For years the Commission has attempted to stop cross-subsidization of this sort. To encourage it now in the guise of providing "incentives" is wrong.

The Joint Board unrealistically attempts to base the phase-out of the interstate allocation of embedded CPE investment on a frozen revenue requirement which is in turn based on a "snap-shot" of net plant balances as of December 31, 1982. Revenue requirements have always been and will continue to be dynamic in nature. Any proposed phase-out of CPE investment which does not recognize this fact is fundamentally unfair and runs counter to the public interest.

Therefore, I dissent.

47 CFR Part 67

[CC Docket No. 80-286; FCC 81-565]

Establishment of a Joint Board; Subscriber Plant Factor (SPF)

AGENCY: Federal Communications Commission—Federal-State Joint Board.

ACTION: Recommended interim order.

SUMMARY: The Federal-State Joint Board recommended that the Commission freeze the subscriber plant factor (SPF) on January 1, 1982 to preserve the *status quo* and limit growth of the interstate cost allocations pending adoption of final changes in the jurisdictional separations process.

DATES: The Joint Board's recommendations do not become effective until they have been reviewed and acted on the Commission.

ADDRESS: Federal Communications Commission, 1919 M St., N.W., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: James McConnaughey, Policy and Program Planning Division, Common Carrier Bureau at (202) 632-0342.

Recommended Interim Order

Adopted: November 18, 1981.

Released: December 14, 1981.

In the matter of amendment of Part 67 of the Commission's rules, CC Docket No. 80-286.

By the Federal-State Joint Board: Commissioner Fogarty issuing a separate statement; State Commissioners Burke and Hipp dissenting; State Commissioner Gravelle dissenting and issuing a statement.

1. In its *Notice of Proposed Rulemaking and Order Establishing a Joint Board,* 78 F.C.C. 2d 837 (1980), the Commission stated that:

> A primary purpose of this proceeding is to reexamine rules for the allocation of exchange plant investment between interstate and intrastate services in light of the comments filed in the MIS/WATS Market Structure proceeding * * *.[1]

The comments in that proceeding raised several issues relating to the allocation of non-traffic sensitive exchange costs to the interstate jurisdiction via the subscriber plant factor (SPF) as defined in Section 23.444 of the current Separations Manual. Thus, the examination of the continued appropriateness of SPF is a task of high priority for this Joint Board.

2. To date, we have taken several steps toward the completion of this task. On June 12, 1981, we released an Order Inviting Comments and Suggested Information Requests in which we solicited preliminary views on a list of questions concerning the proper separations treatment of non-traffic sensitive plant.[2] Many parties have submitted comments in response to the June 12, 1981 Order, and have raised numerous complex issues which must be thoroughly analyzed before a final decision may be reached. The Joint Board Staff has prepared summaries of all comments filed in response to the June 12, 1981 Order and has presented to us a report of the options for long-range changes to SPF that must be considered. The Staff has also been directed to develop plans for regional hearings to be held in the near future. The hearings will allow the broadest possible participation in the development of a record that will provide the basis for our ultimate decision on the allocation of non-traffic sensitive plant. Finally, prior to the Joint Board's next meeting in February, 1982, meetings with the industry will be held in order to best take advantage of their experties on matters of long term solutions and implementation.

3. While we recognize the need to achieve an expeditious resolution of the SPF issue, we are also sensitive to the importance that any change in the allocative factor for non-traffic sensitive plant would hold for both the individual parties and the public. For this reason, we will move toward a final decision to change SPF with due caution. Because of the complexity of the issue, the substantial diversity of interests and the economic significance of the outcome, we expect that a resolution of the SPF

---

[1] CC Docket No. 78-72, Notice of Inquiry and Proposed Rulemaking, 67 F.C.C. 2d 757 (1978), Supplemental Notice, 73 F.C.C. 2d 222 (1979), Second Supplemental Notice, 77 F.C.C. 2d 224 (1980).

[2] The questions were set forth as Appendix A to that Order.

issue will not be achieved for several months. Full implementation of a final plan may take a few years.

4. During that time, it is certain that continued application of SPF will cause allocations to the interstate jurisdiction to increase. The SPF formula is directly tied to usage. As interstate usage increases, as it has steadily over past years, allocations also increase. However, the SPF formula is structured so that relative use (subscriber line use or SLU) is multiplied by various factors and generally results in approximately a threefold increase in the usage measure.[3] Therefore, SPF has the effect of mangifying the allocative impact as usage increases.

CSR is the composite station rate, a ratio that combines measurements of average initial 3 minute station charges and average lengths of haul for interstate toll calls. CSR is determined for each telephone company "study area."

5. In the Commission's Order establishing this Joint Board, it was noted that the past dramatic increases in SLU were expected to continue.[4] Thus, it is highly probable that interstate allocations would grow significantly before any necessary changes to SPF are made fully effective.[5] This could result in severe adjustment problems for many carriers. If it is later determined that SPF should be capped at the present percentage or dollar amount, or that it should be reduced below current levels many local companies ultimately might have to make more substantial rate adjustments if SPF has continued to grow then such companies would make if it had been maintained at a constant level. Although we do not here prejudge the final decision, we are concerned that the continued growth of the subscriber plant factor may impose undue hardships on many local companies during the transition to any new allocative scheme. For this reason, we have decided that it is necessary, as an interim measure, to freeze SPF at 1981 levels, pending a complete examination of the allocation of non-traffic sensitive plant.[6]

	SLU (percent)	SPF (percent)	NTS costs allocated interstate (billions)	MTS/WATS interstate NTS costs [1]
1972	5.5	18	51.9	28
1978	6.9	23	8.1	34
1983 (est.)	8.3	27	11.2	41

[1] As percent of interstate MTS/WATS revenues.

6. At our meeting on October 13, 1981, we requested the Joint Staff to review the comments made by the parties and to recommend options for an interim freeze as well as the long-term resolution of the SPF issue. The Staff presented these options at the November 18, 1981 meeting. The Staff observed that inaction with respect to SPF would not preserve the *status quo* because it would result in the probable increase of interstate allocations each year. The Federal Staff developed a proposal for an interim percentage freeze of SPF to be imposed in order to approximate the *status quo* during further Joint Board proceedings to develop more permanent rules for the apportionment of exchange plant investment and related expenses.

7. This recommendation reflected, in large part, the concerns voiced by several parties regarding the need to prevent further growth in SPF while an ultimate solution is developed. For example, United Telephone System, Inc. (UTS) has suggested that SPF be frozen at current levels, as a ceiling, in order to provide all parties with the "breathing room" necessary to determine an acceptable alternative allocative measure. The United States Independnent Telephone Association (USITA) has proposed a temporary, transitional freeze of SPF followed by a reduction from SPF to SLU. Similarly, GTE Service Corporation (GTE) has advocated that SPF be capped and frozen for the first five years of a ten-year transition to SLU. Northeast Nebraska Telephone Company, while opposing an ultimate reduction to SLU, has specifically said that it would support the GTE and USITA proposals to cap SPF for five years. The Kansas Corporation Commission (KCC) also has viewed the capping of SPF as a practical interim approach to the SPF problem, and has recommended that SPF be capped for all companies whose allocations of costs related to non-traffic sensitive plant exceed 125% of the national average SPF factor (3.29), or 4.11. While we cannot, at this stage, adopt a particular transition plan or specifically endorse the GTE plan to reduce SPF to SLU within ten years, we believe that an immediate freeze of SPF is a necessary and warranted measure.

8. We believe that a freeze of actual 1981 SPF percentages is the most reasonable approach to an interim plan. An average percentage "cap," such as that proposed by KCC, would not necessarily create equitable results among carriers. In addition to being needlessly complex from a administrative standpoint, it would require that some telephone companies decrease their current allocations while other telephone companies could permit their interstate share to increase until it has reached the accepted level. Currently, the interstate percentage of non-traffic sensitive costs allocated to the interstate jurisdiction varies from state to state and carrier to carrier. Because a different SPF is calculated for each "study area," the imposition of a uniform percentage allocation would necessitate the redistribution of wealth among states or telephone companies. While it is conceivable that we may eventually determine that an avearage percentage is an equitable and efficient allocative technique, we are not yet prepared to make that determination. Thus, the frozen SPF amount must be based on actual percentages calculated for each study area for the most recent study period.

9. In addition, the freeze must be applied to a percentage rather than a dollar amount. A cap based on a dollar amount would not preserve the *status quo*. Rather, over time such a cap would actually result in reductions in the interstate share of costs. A percentage cap would permit each telephone company to allocate increased costs burdens resulting from such changes as inflation, new depreciation rates, and the expensing of station conections in the same proportion as the base year costs. This result would be more consistent with a desire to maintain the *status quo* during the course of further Joint Board deliberations.

10. The frozen SPF also would not reflect changes that might ultimately be made in the jurisdictional treatment of FX/CCSA services, private line or OCC access lines. The Joint Board has not completed its review of these issues and has not yet made any recommendations for amendments to the Separations Manual to reflect such changes. We cannot prejudge the outcome of those matters at this stage. We believe that the adoption of a frozen SPF, as a temporary interim measure, will not prejudice the positions of any of the parties and will serve to protect the best interests of all carriers until these matters can be resolved.

11. The modifications to the Separations Manual necessary to freeze

---

[3] SPF = .85 SLU + (2 SLU × CSR).

[4] In Comments filed in CC Docket No. 78–72, AT&T outlined this growth for its own operations as follows:

See *Notice of Proposed Rulemaking and Order Establishing a Joint Board*, 78 F.C.C. 2d 837 (1980), para. 16.

[5] In comments filed in this proceeding, GTE estimates that, as a result of continued growth of SPF, by 1992 GTE's interstate allocations will have increased by 559% while its intrastate allocations will have increased by only 186%.

SPF as of January 1, 1982 are presented in Appendix A to this Recommended Interim Order. We believe that, because of the urgency of this matter, the cap should be effective January 1, 1982. The single frozen annual 1981 avearge SPF should be employed by each carrier for each study regardless of whether costs studies are performed monthly, quarterly, annually or on some other basis, beginning with the first study period after the Commission's designated implementation date.

12. Accordingly, it is ordered, That the revisions to the 1971 FCC–NARUC Separations Manual set forth in Appendix A, to be effective on January 1, 1982, subject to approval by the Federal Communications Commission, are adopted as a Recommended Interim Order.

The Federal-State Joint Board.[7]

Mark S. Fowler,

Chairman.

Appendix A

Section 2, Part 3

Revised paragraph 23.444 to read as follows:

23.444 The cost of subscriber line outside plant in Category 1.3 assigned to message telephone services in the study area, as determined in paragraph 23.443, is apportioned between state and interstate operations by the application, to the cost of such plant, of a subscriber plant factor, which is the sum of the following:

(a) *Annual average* interstate subscriber line use (SLU), *for the calendar year 1981,*[8] representing the interstate use of subscriber plant as measured by the ratio of interstate holding time minutes of use to total holding time minutes of use applicable to traffic originating and terminating in the study area, multiplied by the nationwide ratio of (1) subscriber plant costs assignable to the exchange operation per minute of exchange use to (2) total subscriber plant cost per total minute of use of subscriber plant, plus

(b) Twice the *annual average* interstate subscriber line use ratio for the study area *for the calendar year 1981,*[8] multiplied by the ratio of (1) the nationwide, industry-wide average interstate initial 3-minute station charge at the study area average interstate length of haul to (2) the nationwide, industry-wide average total toll initial 3-minute station charge at the nationwide average length of haul for all toll traffic for the total telephone industry.

[8] The 1981 level is to be determined through the use of the average interstate SLU calculated for the calendar year 1981 or the average interstate SLU for the customarily used twelve month study period ending in 1981. For companies that perform their first cost study after 1981, the average interstate SLU for the initial twelve month study period will be used.

[7] See attached statement of Commissioner Joseph R. Fogarty

Separate Statement of Commissioner Joseph R. Fogarty

In Re: Recommended Interim Order, Amendment of Part 67 of the Commission's Rules, CC Docket No. 80–286

It is crucial that the growth of the Subscriber Plant Factor (SPF) be capped. The phase-out of the interstate allocation of embedded customer premises equipment, as recommended by the Joint Board in a companion order,[9] is at best an initial step. Many pressing issues still remain for the Joint Board to address. Of special concern is the alarming growth of the SPF factor with the resultant increase in interstate allocations of subscriber plant. While phase-out of the CPE allocation may slow down this frightening growth in interstate allocations of subscriber plant, it will not stop it. Only a comprehensive Joint Board plan will achieve this needed result, and I hope that the Joint Board can move expeditiously to this end.

Unfortunately, the development of such a plan will be time consuming. In the interim, the problem will continue to grow more severe. Due to the basis nature of the Ozark formula, the SPF factor will continue its exponential growth, causing greater dislocations, if no action is taken prior to the adoption of a comprehensive plan. For example, in 1971, the Ozark Plan's first year of operation, 17% of non-traffic sensitive costs were allocation to the interstate jurisdiction. Due to the dynamics of the Ozark Plan, that figure rise to 23% in 1978 and is expected to increase in 1983.[10]

An interim solution is necessary if the SPF growth problem is not to go completely out of control before the Joint Board can develop a comprehensive plan. A Commission-ordered cap of the SPF factor as of January 1, 1982 is the only possible interim solution.

A SPF cap offers many advantages. A cap would stop the growth of the SPF factor but the actual dollars derived from interstate allocations because of the continuing growth of SLU. As a consequence, smaller telephone companies would not be injured because the dollar amounts they receive should remain at approximately the same level. Further, it is fairly certain that the Joint Board will ultimately recommend adjustments in the separations process which will result in reducing SPF to SLU or an equivalent. A cap on SPF would minimize the ultimated size of that reduction by preventing the SPF factor from increasing while the Commission considers such issues as access charges and the Access Cost Factor proposed in the Wyoming Plan.[11] The cap would not disadvantage one company or state against another. It would be easy to administer. Moreover, no company or state would assign a lower amount of its costs to interstate than was assigned in a previous year.

The cap on SPF should continue until the Joint Board has recommended and the Commission adopted a comprehensive plan. At that point the cap may be lifted and any modification of SPF begun.

Such a modification of SPF, however, must be undertaken with great care. I believe that the Joint Board must take special precautions to insure that its future recommendations to the FCC regarding interstate allocations of SPF protect the vulnerable small rural telephone companies.

In conclusion, I urge that the Commission adopt this Joint Board recommendation to cap SPF.

Dissenting Statement of Richard D. Gravelle

I dissent. The action taken here to limit SPF is improper in at least four ways. It does not follow the procedures that the Joint Board, itself, adopted. No record has been developed to support the action. It does *not* maintain the *status quo.* No determination has been made as to the effect on rate payers.

This action does not follow the Joint Board's own procedures.

In our order adopted November 12, 1980, Released December 5, 1980, we stated that we would "in general attempt to follow the Commission's rules and regulations pertaining to Rule Making" set out in §§ 1.1 to 1.120 and 1.399 to 1.430 of the Commission's Rules since the purpose of this proceeding is to amend a rule, namely, Part 67 of the Commission's rules. Section 1.412(a) of the Rules provides, "Except as provided in paragraphs (b) and (c) of this section, prior notice of proposed rule making will be given". In my view there is nothing in paragraphs (b) and (c) of § 1.412 which would permit waiver of notice for a specific rule change as proposed here. Section 1.415 provides, inter alia, that a reasonable time will be afforded parties to file comments and reply comments. The order here adopted by the majority does neither. It proposes for the first

[9] *See* Recommended Decision and Order, Amendment of Part 67 of the Commission's Rules (Adopted November 18, 1981).

[10] Comments of AT&T, MTS-WATS Market Structure, Docket 78–72 at 97.

[11] *See* Proposal of Wyoming Telephone Comapny, Inc. et. al.

time a specific rule change and then makes it effective on January 1, 1982 without further debate. I submit this is a clear violation of the rules under which we operate and a clear violation of any sense of fairness.

No record has been developed to support this action.

It is true that there have been numerous filings, many of them not specifically called for, which have demanded, "freeze SPF". Mainly these filings contain allegations which are nothing more than self serving statements of the parties doing the filings. The claim is made that SPF is too high or that it is growing too fast. Why is it too high? Why is it growing too fast? What is the public detriment if SPF is too high or growing too fast? What are the effects to be expected if it continues to grow? What will be the effect on the ratepayer of freezing SPF?—of permitting it to grow? These are all questions which should be answered before we take such a drastic action as here proposed.

As far as I can see the principal argument advanced by the carriers is that the established carriers, being saddled with SPF, cannot compete with the new other common carriers (OCC's) which do not have SPF costs added into their intercity rates. Here again I think a record should be developed. The information I have is that the message toll business continues to grow at 10% a year and that the specialized carriers have less than 3% of the business. At what rate should message toll grow? How much business should the competition have? Is the competition's business merely a bite out of message toll or has competition generated new business? What will be the effect on competition if SPF is frozen, or reduced to SLU as some of my colleagues on the Joint Board appear to advocate? Can the OCC's even continue to exist if the established carriers operate with the same local cost burden as the OCC's? These are all questions which must be answered before we move precipitously ahead to eliminate SPF or even just freeze it.

As a further point I note that the majority has ignored our staff in making this recommendation. The Joint Staff considered this matter at its meeting on November 16, 1981. The Joint Staff at this time concluded that there was an inadequate record on the subject of freezing SPF. By a unanimous vote the Joint-Staff recommended that the question should be the subject of an order to be issued at the February, 1981 Joint Board meeting seeking comments on the question: Should SPF be frozen and, if so, how?

The majority's action does not maintain the status quo

The majority alleges that the result of their order "would be more consistent with a desire to maintain the *status quo*" than would placing a cap on the dollar amount of costs assigned interstate. If the majority has a desire to maintain the status quo, why do they not leave things as they are? The majority's action does not maintain the status quo. The status quo is a variable SPF factor that either increases or decreases with relative volumes of interstate and local traffic. The majority would have us believe that the only way SPF can move is up. That is false. Although SPF has generally increased in recognition of the recent phenomenal growth in toll, it can and has declined when toll business declines. For instance, see the 1981 Report of the NARUC Committee on Communications which includes an eight year tabulation of SPF by states on page 44 and 45. This shows that the Bell SPF for Michigan steadily declined from 14.70 to 13.44 between 1973 and 1976. Likewise the Bell SPF for North Carolina declined from 18.96 to 18.35 between 1974 and 1975.

The status quo is that state rates are based on costs which include a growth in SPF. Individual companies have counted on a growth in SPF to help meet the ever escalating cost of providing universal service in rural areas. What happens to the company that converts from rural eight- and ten-party service to individual line? What happens to a company that converts from average settlement to cost settlement? The majority on this Joint Board cannot tell me. In the rush to cap SPF the numerous questions associated with a cap of SPF have not been thought out or developed. At the very least this matter should have gone through the comment stage to seek answers to some of these questions.

The effect on rate payers has not been determined.

We have just finished taking an action to phase out customer premises equipment (CPE) which will cost the local rate payers an estimated $4.4 billion per year in five year's time even with a growing SPF. In view of deregulation of CPE such action was inevitable. Now, right on top of that, the majority on this board is asking the state rate payer to swallow another big chunk all to the end that interstate rates can be lowered to meet the competition. My staff assistant has calculated, that assuming a continuing 4% growth in SPF, the cost of capping SPF to the local rate payer will be an additional $5.1 billion in 1987 when CPE is finally phased out. In sum, the majority has just taken action to transfer $9.5 billion to the local rate payer which, of necessity, must be made up in local rates.

If I heard my colleagues correctly there are some that say that is just the first step; the objective is to go to SLU. That would be another $5 billion, or so. Should we not be attempting to find what these actions will do to exchange rates and to universal service? I am apprised of recent testimony in the Bell anti-trust case that a doubling of exchange rates would decrease the telephone penetration of households from 91.5% to 83.7% and that a tripling of rates would further reduce the penetration to 70%. Is this the way we are headed? Does the concept of "Universal Service" mean that we should reduce the number of households that can afford telephone service from 91.5% to 70%? This could certainly be the effect in many high-cost areas. Such a heavy impact on the residential users of this country deserves more consideration than has been given to this hasty proposed "Cap SPF" decision. I think we should find out what the effects are before we act on such far reaching changes as here adopted by the majority.

AGENCY: Federal Communications Commission.

ACTION: Further notice of proposed rulemaking.

SUMMARY: The Commission is requesting comments on the Joint Board's recommended decisions phasing customer premises equipment (CPE) out of the jurisdictional separations process and freezing the subscriber plant factor (SPF). The Commission decided to allow additional input by interested persons prior to reviewing the Joint Board's recommendations because of the importance of the issues involved.

DATES: Comments must be filed on or before January 18, 1982. Replies must be filed on or before February 2, 1982.

ADDRESS: Federal Communications Commission, 1919 M St., NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: James McConnaughey, Policy and Program Planning Division, Common Carrier Bureau at (202) 632-9342.

Adopted: December 17, 1981.

Released: December 21, 1981.

By the Commission: Commissioner Fogarty concurring in the result.

In the matter of amendment of Part 67 of the Commission's rules and Establishment of a Joint Board, CC Docket No. 80-286.

1. The Commission instituted this proceeding on June 11, 1980 to revise the Commission's rules concerning the allocation of local exchange investment and expenses between interstate and intrastate services.[1] Pursuant to Section 410(c) of the Communications Act, a Federal-State Joint Board was convened to develop recommended changes in the jurisdictional separations process 45 FR 41459, June 19, 1980. Amendment of Part 67 of the Commission's rules, 78 FCC 2d 837 (1980). On June 10, 1981, (46 FR 32281) the Joint Board adopted an Order requesting comments on a proposed plan for phasing customer premises equipment (CPE) out of the separations process as well as a lengthy list of issues including, among other things, questions concerning the use of the subscriber plant factor (SPF) in the allocation of local exchange plant. Over 90 comments and replies were filed in response to the Joint Board's Order.

2. After considering these comments, the Joint Board adopted a recommended decision at its November 18, 1981 meeting designed to phase CPE out of the separations process over a five-year period. Amendment of Part 67 of the Commission's rules, FCC 81-566, released December 14, 1981. At this meeting, the Joint Board also adopted a decision recommending that SPF be frozen on January 1, 1982 as an interim measure pending adoption of final rule changes. Amendment of Part 67 of the Commission's rules, FCC 81-565, released December 14, 1981. The Joint Board felt that freezing SPF as soon as possible was necessary to preserve the *status quo* and prevent increases in interstate cost allocations resulting from the growth of SPF pending final resolution of the issues in this proceeding.[2]

3. In light of the importance of these proposed changes in the jurisdictional separations process, we are requesting comments on both Joint Board recommendations. We agree with the Joint Board that interim action concerning SPF is an urgent matter. We also believe that the benefits to our decision-making process resulting from a further round of comment justify the brief additional period of time involved. Due to the previous opportunities for comment on these issues and the need for expeditious action on the SPF proposal, we are establishing an expedited pleading schedule with comments due January 18, 1982 and replies due February 2, 1982.

4. Section 410(c) of the Act provides that the State members of the Joint Board are to be afforded an opportunity to participate in the Commission's deliberations concerning Joint Board recommendations, although they are not entitled to vote. Since the Joint Board will be meeting on or about February 24, 1982 in Washington, D.C. in conjunction with the February NARUC executive committee meeting, we will schedule Commission consideration of the Joint Board's recommendations at a regular or special meeting at that time. Although this allows only a relatively brief period of time for the analysis of comments on the Joint Board's recommendations, we believe that expeditious action is necessary and we are directing the staff to devote sufficient resources to this proceeding to allow Commission action in February 1982.

5. Accordingly, it is ordered, that comments concerning the Joint Board's recommended decisions involving CPE and SPF are to be filed no later than January 18, 1982. Replies are to be filed no later than February 2, 1982.[3]

6. It is further ordered, that the Secretary shall cause this Further Notice of Proposed Rulemaking as well as the Joint Board's recommended decisions concerning CPE and SPF to be published in the **Federal Register.**

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 81-37355 Filed 12-30-81; 8:45 am]

BILLING CODE 6712-01-M

[1] Since local exchange plant is used in the origination and termination of interstate services, a certain proportion of local exchange costs are presently allocated to the interstate jurisdiction and recovered through the charges for the relevant interstate services.

[2] Non-traffic sensitive local exchange plant and expenses are presently allocated between the interstate and intrastate jurisdictions on the basis of SPF. When interstate relative use or subscriber line usage (SLU) increases, as it has in recent years, SPF and the resulting interstate cost allocation also increase. However, the use of various multiplicative factors in calculating SPF means that a 1.0 percent increase in relative use or SLU results in approximately a 3.3 percent increase in SPF.

[3] In light of the desirability of expeditious action discussed above, requests for extension of the time for filing comments and replies will be looked upon with disfavor and will be granted only upon the strongest showing of need.

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1001, 1007, 1008, and 1220

[Ex Parte No. 420 (Sub-No. 2A)]

Regulatory Flexibility Act; Periodic Review of Regulations

AGENCY: Interstate Commerce Commission.

ACTION: Notice of review of regulations.

SUMMARY: On November 3, 1981, the Commission published its 10-year plan for the review of its regulations which have or will have a significant impact on a substantial number of small entities [46 FR 54614]. Listed below are the rules which will be reviewed during calendar year 1982 in accordance with section 610 of the Regulatory Flexibility Act (5 U.S.C. 610). Following each rule identified is a brief description of the rule including its purpose and legal basis. Our general purpose is to ensure that each regulation which affects small entities achieves a valid purpose in the most efficient and economical manner possible.

DATE: Comments must be filed on or before March 1, 1982.

ADDRESSES: For each rule listed below, an address for the submission of comments is listed.

FOR FURTHER INFORMATION CONTACT: A contact person is identified for each of the rules listed below.

SUPPLEMENTARY INFORMATION: Four sets of rules will be reviewed during calendar year 1982. Although it did not appear in our original schedule, we have included the regulation at 49 CFR Part 1001 (Inspection of Records) for review during calendar year 1982. The regulation implements the Freedom of Information Act and is a companion regulation to the regulation at 49 CFR Part 1007, already scheduled for review. The complete list of regulations to be reviewed is as follows:

Subject	ICC rule: 49 CFR	Legal basis	Contact person	Address comments to
1. Inspection of Records	Part 1001	5 U.S.C. 552	S. Arnold Smith	S. Arnold Smith, FOIA and Privacy Officer, Room 3387, ICC, Washington, D.C. 20423.

Description and objective of the rule: These rules implement the Freedom of Information Act (5 U.S.C. 552). They provide that all information on file with an agency be disclosed to the public unless any of the 9 exemptions set forth in the statute and rules give the FOIA officer a discretionary legal basis on which to withhold its release. The rules mandate that information be released within 10 days from the receipt of a request and sets forth appellate procedures in the event a requester desires to appeal the withholding of a part or all of a particular document.

	Subject	ICC rule: 49 CFR	Legal basis	Contact person	Address comments to
2.	Records containing information about individuals.	Part 1007	5 U.S.C. 552a	S. Arnold Smith, 202-275-7076	Same as above.

Description and objective of the rule: These rules implement the Privacy Act of 1974 (5 U.S.C. 552a). They provide that systems of records containing information about individuals not be released to the public unless specifically exempted from nondisclosure. They also provide that individuals may see documents containing information about themselves and seek to have them amended or corrected. Additionally, the rules provide for appellate procedures should the Agency's Privacy Officer's determination in any of the areas be in conflict with individual interests.

Subject	ICC rule: 49 CFR	Legal basis	Contact person	Address comments to
3. Procedures governing, investigation, disposition of overcharges, duplicate payment or over collection claims.	Part 1008, Subchapter A	49 U.S.C. 10103, 10301-10306, 10308-10309, 10311, 10321-10325, 10328, 10701, 10702, 10721-10724, 10761, 10922, 10923, 11101, 11703, 11705, 11706, 11913.	R. G. Atherton, 202-275-7844.	R. G. Atherton, ICC, Room 7205, 12th and Constitution Ave., NW., Washington, D.C. 20423.

Description and objective of the rule.—These regulations provide uniform procedures for motor common carriers and freight forwarders in handling and disposing of overcharge, duplicate payment, or overcollection claims.

	Subject	ICC rule: 49 CFR	Legal basis	Contact person	Address comments to
4.	Preservation of records	Part 1220	49 U.S.C. 11144(d)	Wayne Howard, 202-275-7448.	Wayne Howard, Section of Accounting and Reporting, Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423.

Description and objective of the rule.—This part instructs carriers to maintain their corporate, treasury, property, personnel, insurance and claims, inventory, transportation, tariff, statistical, and miscellaneous records in certain forms (microfiche, hard paper copy, or machine readable) and for certain periods. The objectives of the rule are to assure that carriers' records are secure, readable, and accessible and to provide carriers with firm guidelines for keeping records available.

(5 U.S.C. 610)

Dated: December 23, 1981.

By the Commission, Chairman Taylor, Vice Chairman Clapp, Commissioners Gresham and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

North Pacific Fishery Management Council; Public Hearing

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings.

SUMMARY: The North Pacific Fishery Management Council (Council) will hold public hearings on proposed Amendment No. 11 to the Fishery Management Plan for the Gulf of Alaska Groundfish (FMP).

DATES: Written comments on the proposed amendment from members of the public are invited until February 8, 1982. The public hearing will be held as follows: January 8, 1982—Juneau, Alaska. The hearing will start at 9:00 a.m. and adjourn at 12:00 p.m.

ADDRESS: Send comments to: Chairman, North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510.

PUBLIC HEARING LOCATION: Federal Building, Room 117, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Jim Branson, Executive Director, North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510, (907) 274-4563.

SUPPLEMENTARY INFORMATION: The primary purpose of the hearing will be to consider amendments to the Gulf of Alaska groundfish FMP. Among the proposals being considered is one from the Plan Maintenance Team proposing a reduction in optimum yield for sablefish. The Alaska Longline Fishermen's Association has proposed (a) allowing

only hook and line gear for sablefish east of 140° W., and (b) a winter, gulfwide closure of the sablefish fishery from November 15 to March 15 each year. The North Pacific Longline-Gillnet Association has proposed opening the Davidson Bank area to foreign longlining. The Plan Maintenance Team also proposed two options to amend the reporting requirements for domestic fishing vessels that land their catches outside of Alaska. One requires domestic fishing vessels to report their catch and advise the management agencies of their departure by radio before leaving Alaskan waters. The other requires them to report their catch by making a port call before leaving Alaskan waters. A new method for specifing the annual level of expected harvest of groundfish by domestic fishermen and for establishing reserve amounts of groundfish is also included in the amendment package.

Dated: December 22, 1981.

E. Craig Felber,

Chief, Management Services Staff, National Marine Fisheries Service.

Federal Register
Vol. 46, No. 251
Thursday, December 31, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Public Review of Alternative Goals; 1985 Resources Planning Act (RPA) Program

The Department of Agriculture, Forest Service is inviting public comment to help prepare the 1985 Resources Planning Act (RPA) Program. This is the third long-range plan for the future management of the 190-million-acre National Forest System, as well as Forest Service research and cooperative assistance activities.

Comments are being solicited in regard to national goals to be addressed by the 1985 RPA Program through a publication entitled "Alternative Goals—1985 RPA Program". Copies of this publication can be obtained at all Forest Service offices. Federal, State and local agencies, and individuals and organizations who may be interested in or affected by long-range natural resource planning are invited to participate. Comments must be received by the Forest Service on or before March 15, 1982.

Comments should be mailed and inquiries addressed to: Thomas E. Hamilton, Director, Resources Planning and Assessment; Room 3243 South Building; USDA, Forest Service; Box 2417; Washington, D.C. 20013; (202) 447–5440.

Policy and Technical Advisory Committees on Science and Education Research Grants

Notice is hereby given that the Secretary of Agriculture intends to establish a Policy Advisory Committee and a Technical Advisory Committee on Science and Education Research Grants. The purpose of the Policy Advisory Committee is to advise the Secretary with respect to areas of agricultural research to be supported, priorities to be adopted, and procedures to be followed in implementing programs of research grants to be awarded competitively. The purpose of the Technical Advisory

Committee is to advise the Secretary of Agriculture on the relative technical and scientific research grant applications submitted to Science and Education of the U.S. Department of Agriculture. The activities of the Technical Advisory Committee may be accomplished primarily through subcommittees consisting of peer scientists in areas of research to be funded.

Both Advisory Committees will meet annually in Washington, D.C. The duties of these Committees are to evaluate research proposals for scientific merit and to provide recommendations to the Secretary on proposals that should be considered for funding as a part of the selection process for research grant awards.

It has been determined that the establishment of these Advisory Committees is in the public interest in connection with the work of the U.S. Department of Agriculture.

Interested parties are invited to submit written comments, views, or data concerning this proposal to Walter I. Thomas, Acting Administrator, Cooperative State Research Service, U.S. Department of Agriculture, Washington, D.C. 20250, by January 15, 1982.

Done at Washington, D.C. this 23rd day of December, 1981.

John Schrate,

Deputy Assistant Secretary.

BILLING CODE 3510–25–M

[Case No. 615]

Chicago International Trading Co., Respondent; Administrative Proceedings

Order

The Office of Export Administrtation, United States Department of Commerce (the "Department"), initiated administrative proceedings, pursuant to Section 11(c) of the Export Administration Act of 1979 (50 U.S.C. app. sec. 2401, *et seq.*) (Supp. III 1979) (the "Act") and Part 388 of the Export Administration Regulations (15 CFR Part 368, *et seq.* (1981)) (the "Regulations"), against Chicago International Trading Co. ("CIT") 4819 S. Ashland Avenue, Chicago, Illinois 60609, by issuing a charging letter (the "Charging Letter") alleging that CIT violated Sections 387.2 and 387.6 of the Regulations.

The Department and CIT have entered into a Consent Agreement whereby each party has agreed to settle this matter: (1) by a denial to CIT of all export privileges, subject to certain exceptions, for a period ending January 14, 1982; and (2) by payment of a civil penalty by CIT in the amount of $10,000.

The Hearing Commissioner approves the Consent Agreement.

It is therefore ordered.

First. For a period to and including January 14, 1982, CIT is denied all export privileges, except that, upon prior written notification of and prior written authorization by the Hearing Commissioner, CIT may, provided any such export complies with the Regulations, export to satisfy service and repair requirements (including spare and replacement parts) arising from prior legal exports.

Second. CIT is assessed a civil penalty, pursuant to Section 11(c)(1) of the Act, to be paid as follows.

A. Within 20 days of the date of this Order, CIT shall pay $3,000 in the manner specified in the attached instructions.

B. Payment of the remaining $7,000 by CIT shall be suspended for a period to and including October 14, 1982, with payment of this suspended penalty to be waived at the end of this period, provided CIT has committed no violation of the Act, the Regulations, or this Order.

Third. Within six months after the date of this Order, CIT shall submit a written report to the Director, Compliance Division, Office of Export Administration, setting forth in detail the steps CIT has implemented to ensure its future compliance with the Act and the Regulations. Because a copy of such report may be made available for public inspection, CIT may submit, for such public inspection, a duplicate of such report, marked "Public Inspection Copy", and may edit such copy to delete information that would be properly exempt from public disclosure under 5 U.S.C. section 552.

Fourth. The Charging Letter, the Consent Agreement, and this Order shall be made available to the Public, and this Order shall be published in the Federal Register.

This Order is effective immediately.

Dated: December 22, 1981.

Thomas W. Hoya,

Hearing Commissioner.

BILLING CODE 3510–25–M

Preliminary Affirmative Determination of Sales at Less Than Fair Value; High Power Microwave Amplifiers and Components Thereof From Japan

AGENCY: International Trade Administration, Commerce.

ACTION: Preliminary affirmative determination of sales at less than fair value.

SUMMARY: We have preliminarily determined that high power microwave amplifiers and components thereof from Japan are being sold in the United State at less than fair value. We have notified the U.S. International Trade Commission of our decision and are directing the U.S. Customs Service to "suspend liquidation" of all entries or warehouse withdrawals of this merchandise for consumption and to require a cash deposit, bond, or other security in an amount equal to the estimated dumping margin of 16.6 percent. Because we have also found that this case does not present critical circumstances, this suspension will not be retroactive.

Unless we extend the investigation, we will make our final determination within 75 days of this notice's signature. Interested parties may submit oral or written views concerning this decision.

EFFECTIVE DATE: December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Steven Morrison, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, Telephone: (202) 377–1279.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based on our investigation and in accordance with 19 CFR 353.39 (a)(2), we have preliminarily determined that there is reason to believe or suspect that high power microwave amplifiers and components thereof from Japan are being sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act). We have found that the U.S. prices of this merchandise are lower than their foreign market values. The estimated dumping range is 13.2 to 38.9 percent with the weighted-average margin being 16.6 percent.

Unless we extend this investigation, we will make our final determination within 75 days of this notice's signature.

Case History

On July 24, 1981, we received a petition in proper form from Aydin Corporation, Ft. Washington, Pennsylvania. The petition alleged that high power microwave amplifers from Japan were being sold in the United States at less than fair value, and that such sales were materially injuring a U.S. industry. The petitioner compared the purchase price of the goods in question with the constructed value. The petitioner also claimed that this case presented "critical circumstances" because massive amounts of this merchandise would be imported during a relatively short period.

After reviewing the petition, we decided it contained sufficient grounds to initiate an antidumping investigation. Therefore, we notified the U.S. International Trade Commission of our decision and on August 17, 1981, we announced the initiation (46 FR 41542). On September 16, 1981, the ITC preliminarily found that there is a reasonable indication that these imports are materially injuring or are threatening to materially injure a U.S. industry (46 FR 46021).

Scope of Investigation

For purposes of this investigation, high power microwave amplifiers are radio-frequency power amplifier assemblies and components thereof, specifically designed for uplink transmission in the C, X and Ku bands from fixed earth stations to communication satellites and having a power output of one kilowatt or more. They are currently classified under item 685.29 of the Tariff Schedules of the United States. The International Trade Commission limited its preliminary determination to this merchandise. We have redefined the scope of merchandise covered to conform with the ITC definition.

Since Nippon Electric Company, Ltd. manufactures all of the high power microwave amplifiers that Japan exports to the United States, we limited our investigation to that company. There were two types of high power amplifiers exported: Klystron amplifiers, which include a Klystron tube, and TWT amplifiers, which include a travelling wave tube.

This investigation covers the period March 1, 1981 through August 31, 1981.

Methodology for Fair Value Comparison

To determine the fair value of any product, we compare its U.S. price with its foreign market value.

U.S. Price

To determine the U.S. price of the high power amplifiers we used the purchase price, as defined in section 772(b) of the Act. We did so because the price of the high power amplifiers to the unrelated U.S. customer was agreed to before it was imported to the United States.

In accordance with section 772(d) of the Act, we calculated the purchase price by deducting the following expenses the exporter incurred in Japan: inland freight, airport usage, handling, airport storage, cartage and customs handling.

Foreign Market Value

To determine the foreign market value of high power amplifiers, we used their constructed value, as defined in section 773(e) of the Act. We used this method of calculation because there were no separate sales of high power amplifiers in the home market or to third countries. While there were high power amplifiers sold to third countries as part of larger sales of earth stations, they comprised a minor element in those contracts. In addition, we were not able to determine if the contract items indicated corresponded with the merchandise sold to the United States.

We constructed the foreign market value of high power amplifiers by adding the material and fabrication costs, the normal home market general expenses (which exceeded the statutory minimum), the estimated general expenses of the related U.S. subsidiary, the statutory profit (which was higher than the usual profit), and the cost of packing.

During the verification, we found that the costs of materials and parts were based on estimates. We requested actual cost data on materials and parts. NEC submitted the information for travelling wave-tube amplifiers but not for Klystron amplifiers. In absence of actual cost data information on the Klystron amplifiers, we based our calculation of materials costs, excluding the cost of the Klystron tube, on the best information available. This was determined to be information furnished by the petitioner. We used NEC's cost for the Klystron tube because that information was verified.

We used labor costs which included directly related overhead costs for fabrication costs. We plan to conduct an additional verification to determine whether the estimates in NEC's submission accurately reflect the actual costs incurred to date. At that time we will also determine whether the method of allocation has appropriately classified fabrication costs and general expenses.

We calculated the general expenses in two steps. First we calculated NEC's expenses incurred in Japan on the basis of their submission. Since NEC's calculation of general expenses was

based on cost of goods sold, which included these expenses, we made an adjustment to exclude them in the calculation of the percentage to be applied to material and fabrication costs. We plan to conduct an additional verification to determine if all appropriate general expenses have been included in our calculations. We will verify cost categories such as research and development and indirect selling expenses. Secondly, we estimated the general expenses incurred by Nippon Electric Company of America (NECAM) on the basis of the amount of commission paid to NECAM by NEC. Since this commission is included in the price, we determined that the selling expenses of the U.S. subsidiary are part of the corporate general expenses and, therefore, should be included in the determination of constructed value. We are developing data on these expenses from NECAM.

We determined that NEC did not maintain profit data on the basis of destination. We determined the usual profit on sales of long-range communications equipment by NEC. These sales were mostly to the home market or third countries. This profit was less than the 8 percent statutory minimum. Therefore, we calculated profit as 8 percent of the total of the cost of materials, fabrication and general expenses.

We calculated packing on the basis of actual costs.

Negative Determination of Critical Circumstances

The petition asserted that imports of high powered amplifiers from Japan present "critical circumstances." We announced in the Notice of Initiation that there was not a reasonable basis for concluding that critical circumstances exist. To rule that critical circumstances exist we must find that the case provides a reasonable basis for believing that (1) there is a history of dumping of high power amplifiers in the United States or elsewhere, or the importer knew or should have known that the exporter was selling high power amplifiers at less than fair value, and (2) there have been massive imports of high power amplifiers during a relatively short period.

The petitioner has not come forward with further evidence that there is a history of dumping or that the importer knew or should have known that the high power amplifiers were sold at less than fair value. We have not considered the question of massive imports since the first criterion has not been met.

Therefore, since the petitioner has not met the statutory requirements, we conclude that critical circumstances do not exist. Accordingly, we will not direct the U.S. Customs Service to suspend liquidations retroactively.

Verification

In accordance with section 776(a) of the Act, we verified the information submitted in the original response and relied upon in this determination. We used traditional verification procedures, including on-site inspection of the manufacturer's operations and examination of accounting records and randomly selected documents containing relevant information. We will verify any additional information relied upon before we make our final determination. This verification will include additional analysis of accounting records.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the U.S. Customs Service to suspend, upon this notice's publication, the liquidation of merchandise that is subject to this investigation and that is entered into the United States for consumption or withdrawn from warehouses for consumption. Customs will require that a cash deposit, bond, or other security be posted in the amount of 16.6 percent of the f.o.b. value of such merchandise. This suspension of liquidation will remain in effect until further notice.

ITC Notification

We are making available to the U.S. International Trade Commission all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.
